Carbon capture platform mainfuse that captures greenhouse gases to stop climate change

Energy Climate Technology Hardware Carbon Capture

**Why are they raising?**

- We've developed the core tech and have proven our first pilot
- We can scale with batch bioplastic or Carbon Mineral, depend customer demand
- Our Carbon Mineral product is a drop in replacement for Portland Cement, which is responsible for 8% of global CO2 emissions
- We are a capital light model, we don't own the plant. Our tech is plug and play, we license our tech to plant owners, we make money on the Carbon Credits, Energy Credits, Carbon Mineral and Bioplastic sales and carbon offsets for the Fortune 500
- We are raising $1.5M to build our first commercial plant in Ontario, Canada

**Why is Carbon Capture Important?**

- Climate change is the most consequential challenge facing humanity and it is getting worse
- Carbon Capture is a critical component of the solution
- Carbon Capture is the only way to remove CO2 from the atmosphere
- Carbon Capture is the only way to reduce emissions from Cement, Steel, Aluminum, Chemicals, Pulp & Paper, Food & Beverage, Oil & Gas, Power Generation, Cement, Waste Management, Data Centers, Cannabis, Greenhouses, Agriculture, Direct Air Capture, Ocean Capture, Carbon Mineral, Carbon Credits, Energy Credits, Carbon Offsets, Carbon Capture Equipment, Carbon Capture Software
