State:

This Notice shall be used to indicate reliance on the Uniform Limited Offering Exemption (ULOE) for sales of securities in those states that have adopted ULOE and that have adopted this form. Issuers relying on ULOE must file a separate notice with the Securities Administrator in each state where sales are to be, or have been made. If a state requires the payment of a fee as a precondition to the claim for the exemption, a fee in the proper amount shall accompany this form. This notice shall be filed in the appropriate states in accordance with state law. The Appendix to the notice constitutes a part of this notice and must be completed.

ATTENTION

Failure to file notice in the appropriate states will not result in a loss of the federal exemption. Conversely, failure to file the appropriate federal notice will not result in a loss of an available state exemption unless such exemption is predicated on the filing of a federal notice.

Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number.

Tachyon/MedRemit Testing Acceptance Criteria

Upon completion of Phase 2, the software will be transferred to AdminiSource to run in parallel with the production software in Little Rock. AdminiSource should exercise due diligence and run the transferred Contributed Software in parallel to Remettra's live production to make sure that the outcome at AdminiSource matched the outcome at Remettra. If the outcome at AdminiSource differs from the outcome at Remettra, Remettra will fix the defect that altered the outcome and the process will repeat to make sure that the outcome at AdminiSource matched the outcome at Remettra.

Tested Milestone	**Accepted?**
The Contributed Software should accept the incoming FTP file transfer for QCA, and start the QCA specific pre-processing to include unarchiving, copying, and loading the QCA datafiles (in the format as it exists on Oct 31, 2004) into the QCA specific data tables in SQL server.	
A standard 835 file should be generated for all documents of type 'provider payment' (where received data can be reformatted into the standard 835 format) and marked for import by the Contributed Software. If received data cannot be reformatted to standard, an "Abbreviated" ST record will be created delineating only the payment information.	
The standard 835 file should be loaded by the ~~C.S.~~ Contributed Software and should populate the remittance database, as well as create document records (payment table) for each provider payment. These document records should be matched back via database key to the original raw data records created in step 1.	
The CASS software should attempt to CASS encode the recipient (payee) address for each payment record (ST) in the remittance data.	
The Contributed Software should match provider payments to known providers and update the document records. Unmatched providers should be available for matching in the intranet portal.	
QCA should have a functional fund/pull/signoff interface on the extranet portal. Files that are not released should not go through the matching until they are released.	
The provider should have the ability to add bank account information to receive EFT.	
All extranet entities should have the ability to do self administration of user logins and role assignment.	
QCA's bank (Arvest) should be able to login and retrieve CCD+ ASCII-armored payment files from ftp. This ftp should maintain an archive of these payment files.	
The bank application should create a CCD+ file for transmission to the bank, and encrypt it. The app should then transmit the file (Copy to FTP for pickup, or initiate ftp push)	
The payer should be able to retrieve an APUpdate file with original check numbers, ACH trace numbers, amounts, dates, and original filename. This file should be used to reconcile EFT payments.	
A provider should be able to retrieve ERA on demand via the extranet web portal.	

Once each milestone above has been accepted with the AdminiSource and Remettra results having the same outcome(s) (allowing variances for database key values and date/time differentials), AdminiSource will accept the software. Once the transfer takes place and AdminiSource accepts the Contributed Software, the Contributed Software will be on an "AS IS" basis from that point forward and Remettra will have no additional responsibility or liability regarding its use unless there is a Service/Maintenance Agreement.
