OTP fees are charged based on the maximum number of OTPs held during the month, according to the table shown below. The “Bottom 45%” refers to the least actively traded issues on the Exchange, ranked by industry volume, as reported by the OCC for each issue during the calendar quarter. Each calendar quarter, with a one-month lag, the Exchange will publish on its website a list of the Bottom 45% of issues traded. Any newly listed issues will automatically become part of the Bottom 45% until the next evaluation period, at which time they may or may not remain part of the Bottom 45% list depending upon their trading volumes and resultant rank among all issues traded on the Exchange.
