RULE 7-E EQUITIES TRADING

Section 1. General Provisions

*****

Rule 7.11-E. Limit Up-Limit Down Plan and Trading Pauses in Individual Securities Due to Extraordinary Market Volatility

(a) Limit Up-Limit Down Mechanism.

(1) Definitions

(A) "LULD Plan" or "Plan" means the Plan to Address Extraordinary Market Volatility Submitted to the Securities and Exchange Commission Pursuant to Rule 608 of Regulation NMS under the Securities Exchange Act of 1934, Exhibit A to Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012), as it may be amended from time to time.

*****

(b) Re-opening of Trading following a Trading Pause. No change.

(c) Overnight Protections pursuant to Section VIII of the LULD Plan.

(1) For the purposes of this Rule 7.11-E(c), the following definitions shall apply:

(A) "Closing Price" of an NMS Stock shall mean the Listing Market Official Closing Price of an NMS Stock, adjusted for relevant corporate actions.

(B) "Consolidated Price" shall mean the consolidated last round lot sale price of an NMS Stock as of 7:30 p.m. ET (or, in the case of an early scheduled close, 4:30 p.m. ET), adjusted for relevant corporate actions.

(C) "Overnight Percentage Parameter" shall mean 20% for both Tier 1 and Tier 2 NMS Stocks and non-leveraged ETPs; the Overnight Percentage Parameters for a leveraged ETP shall be 20%, multiplied by the leverage ratio of such product.

(D) "Overnight Price Bands" shall have the meaning provided in Section VIII(B)(1) of the LULD Plan.

(E) "Overnight Protected Hours" will begin at 9:00 p.m. ET on Sunday through Thursday and conclude at 4:00 a.m. ET on the next calendar day.

(F) "Overnight Reference Prices" shall mean the two reference prices used for calculating Overnight Price Bands: (i) the Closing Price; and (ii) the Consolidated Price.

Any term not defined in this Rule 7.11-E(c) shall have the meaning assigned to it in Section I of the LULD Plan.

(2) Overnight Price Bands.

(A) For each NMS Stock for which the Exchange is the Primary Listing Exchange, the Exchange shall calculate and disseminate to the Processors an Overnight Lower Price Band and an Overnight Upper Price Band, each as defined in this Rule 7.11-E(c), to be disseminated by the Processors and applied during Overnight Protected Hours for such NMS Stock.

(B) The Overnight Price Bands for an NMS Stock shall be calculated by applying the Overnight Percentage Parameter for such NMS Stock to the Overnight Reference Prices. The Overnight Lower Price Band shall be an Overnight Percentage Parameter below the lower of the two Overnight Reference Prices, and the Overnight Upper Price Band shall be an Overnight Percentage Parameter above the higher of the two Overnight Reference Prices.

(C) The minimum Overnight Upper Price Band and the minimum Overnight Lower Price Band for an NMS Stock with a Closing Price of less than $1.00 shall be $1.00 from the applicable Overnight Reference Price. The minimum Overnight Upper Price Band and the minimum Overnight Lower Price Band for an NMS Stock with a Closing Price of $1.00 or more shall each be $3.00 from the applicable Overnight Reference Price. The Minimum Price Band for a leveraged ETP shall be multiplied by the leverage ratio of such product.

(D) For each NMS Stock for which the Exchange is the Primary Listing Exchange, the Exchange shall determine the Overnight Reference Prices and calculate the Overnight Price Bands. The Exchange shall transmit the

calculated Overnight Price Bands to the Processors no later than 8:55 p.m. ET, except that if there is an issue or error with calculating or transmitting the Overnight Price Bands at that time, the Exchange may transmit corrected or replacement Overnight Price Bands to the Processor at any time during the Overnight Trading Session.

(E) The Exchange shall establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent trades at prices that are below the Overnight Lower Price Band or above the Overnight Upper Price Band for an NMS Stock during Overnight Protected Hours and, in general, to comply with Section VIII of the LULD Plan.

(3) Repricing, Rejection, and Cancellation of Orders.

(A) Exchange systems will reject incoming buy (sell) orders that are priced or could be traded above (below) the Upper (Lower) Overnight Price Band.

(B) The provisions in subparagraphs (i), (ii), and (iii) below apply only to orders resting on the book at a time when Overnight Price Bands are published or republished after the start of the Overnight Trading Session pursuant to Rule 7.11-E(c)(2)(D).

(i) Limit Orders. Unless the ETP Holder has entered an instruction to cancel any quantity of a Limit Order that cannot be traded or routed at prices at or within the Overnight Price Bands, such resting order will be assigned a working price, and if applicable, display price, at the Upper (Lower) Overnight Price Band, consistent with the terms of the order. If the Overnight Price Bands are republished again by the Processors and the limit price of a repriced order is at or within the Overnight Price Bands, such Limit Order will be adjusted to its limit price.

(ii) Sell Short Orders. If a resting Limit Order does not include a cancel instruction and is also a sell short order, during a Short Sale Price Test, as set forth in Rule 7.16-E(f), such short sale order priced below the Overnight Lower Price Band will be repriced to the higher of the Overnight Lower Price Band or the Permitted Price, as defined in Rule 7.16-E(f)(5)(A). Sell short orders that are not eligible to be repriced will be canceled.

(iii) If the Overnight Price Bands are published or republished by the Processors after the start of the Overnight Trading Session and the working price of a resting Q order or resting Day ISO (including any portion of a resting Day ISO designated as a Reserve Order) to buy (sell) is above (below) the updated Upper (Lower) Overnight Price Band, such order will be canceled.

(4) Regulatory Halt during Overnight Protected Hours. During Overnight Protected Hours, the Exchange may declare a Regulatory Halt in any NMS Stock for which it is the Primary Listing Market, in accordance with Exchange rules. If the Exchange declares a Regulatory Halt pursuant to this paragraph, the Exchange shall notify the Processor, which shall disseminate notice of the halt. After a Regulatory Halt is instituted pursuant to this paragraph, the security will not reopen during Overnight Protected Hours.

(5) Overnight Protections as described in this Rule 7.11-E(c) and Section VIII of the LULD Plan are expected to commence on December 6, 2026.
