#### **NOTE 1. PRESENTATION**

For purposes of this report, "Ford," the "Company," "we," "our," "us" or similar references mean Ford Motor Company, our consolidated subsidiaries, and our consolidated VIEs of which we are the primary beneficiary, unless the context requires otherwise.

Our financial statements are presented in accordance with U.S. generally accepted accounting principles ("GAAP") for interim financial information, instructions to Quarterly Report on Form 10-Q, and Rule 10-01 of Regulation S-X.

In the opinion of management, these unaudited financial statements reflect a fair statement of our results of operations and financial condition for the periods, and at the dates, presented. The results for interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year. Reference should be made to the financial statements contained in our Annual Report on Form 10-K for the year ended December 31, 2015 ("2015 Form 10-K Report").

Change in presentation. Our core Automotive business includes the designing, manufacturing, marketing, and servicing of a full line of Ford cars, trucks, SUVs, and electrified vehicles, as well as Lincoln luxury vehicles. We provide vehicle-related financing and leasing activities through Ford Motor Credit Company LLC ("Ford Credit"). At the same time, we are pursuing emerging opportunities in connectivity, mobility, autonomous vehicles, the customer experience, and data and analytics.

Prior to the second quarter of 2016, we presented our financial statements on both a consolidated basis and on a "sector" basis for our Automotive and Financial Services sectors. With our expansion into mobility services, including the formation in March 2016 of the Ford Smart Mobility LLC subsidiary, we reevaluated our disclosures and concluded we should eliminate our two-sector financial presentation and, reflecting the manner in which our Chief Operating Decision Maker manages our business, changed our segment presentation beginning with the second quarter of 2016 to be Automotive, Financial Services, and All Other. See Note 3 for a description of our segment presentation.

In addition, as a result of the elimination of our two-sector financial presentation, at June 30, 2016 we changed the presentation of our consolidated balance sheet and certain notes to the consolidated financial statements to classify our assets and liabilities as current or non-current. We reclassified certain prior year amounts in our consolidated financial statements to conform to the current year presentation.

#### NOTE 2. NEW ACCOUNTING STANDARDS

#### **Adoption of New Accounting Standards**

Accounting Standard Update ("ASU") 2015-17, Income Taxes - Balance Sheet Classification of Deferred Taxes. On April 1, 2016, we retrospectively adopted the new accounting standard which requires deferred tax assets and liabilities to be classified as non-current in the consolidated balance sheet. The impact of the change resulted in the classification of all deferred taxes as non-current.

We also adopted the following standards during 2016, none of which have a material impact to our financial statements or financial statement disclosures:

Standard		Effective Date
2015-16	Business Combinations - Simplifying the Accounting for Measurement-Period Adjustments	January 1, 2016
2015-09	Insurance - Disclosures about Short-Duration Contracts	January 1, 2016
2015-05	Internal-Use Software - Customer's Accounting for Fees Paid in a Cloud Computing Arrangement	January 1, 2016
2015-02	Consolidation - Amendments to the Consolidation Analysis	January 1, 2016
2015-01	Extraordinary and Unusual Items - Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items	January 1, 2016
2014-12	Stock Compensation - Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period	January 1, 2016

### NOTE 2. NEW ACCOUNTING STANDARDS (Continued)

#### **Accounting Standards Issued But Not Yet Adopted**

ASU 2016-13, Credit Losses - Measurement of Credit Losses on Financial Instruments. In June 2016, the Financial Accounting Standards Board ("FASB") issued a new accounting standard which replaces the current incurred loss impairment method with a method that reflects expected credit losses. The new standard is effective as of January 1, 2020, and early adoption is permitted as of January 1, 2019. We are assessing the potential impact to our financial statements and disclosures.

ASU 2016-09, Stock Compensation - Improvements to Employee Share-Based Payment Accounting. In March 2016, the FASB issued a new accounting standard which simplifies accounting for share-based payment transactions, including income tax consequences and the classification of the tax impact on the statement of cash flows. We will adopt the standard effective January 1, 2017 by recognizing a one-time adjustment to retained earnings and deferred tax assets related to cumulative excess tax benefits previously unrecognized. We will also change classification of tax-related items on the consolidated statement of cash flows.

ASU 2016-02, Leases. In February 2016, the FASB issued a new accounting standard which provides guidance on the recognition, measurement, presentation, and disclosure of leases. The new standard supersedes present U.S. GAAP guidance on leases and requires substantially all leases to be reported on the balance sheet as right-of-use assets and lease liabilities, as well as additional disclosures. The new standard is effective as of January 1, 2019, and early adoption is permitted. We are assessing the potential impact to our financial statements and disclosures.

ASU 2014-09, Revenue - Revenue from Contracts with Customers. In May 2014, the FASB issued a new accounting standard that requires recognition of revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which we expect to be entitled in exchange for those goods or services. The FASB has also issued several updates to ASU 2014-09. The new standard supersedes U.S. GAAP guidance on revenue recognition and requires the use of more estimates and judgments than the present standards. It also requires additional disclosures. We plan to adopt the new revenue guidance effective January 1, 2017 by recognizing the cumulative effect of initially applying the new standard as an adjustment to the opening balance of equity. We do not expect a material impact to our financial statements or disclosures.

#### **NOTE 3. SEGMENT INFORMATION**

In conjunction with our expanded business model to become an automotive, financial services, and mobility company, beginning with the second quarter of 2016, we changed our reportable segment disclosures. Reflecting the manner in which our Chief Operating Decision Maker manages our businesses, including resource allocation and performance assessment, we have four operating segments that represent the primary businesses reported in our consolidated financial statements. These operating segments are: Automotive, Financial Services, Ford Smart Mobility LLC, and Central Treasury Operations.

Automotive and Financial Services comprise separate reportable segments. Ford Smart Mobility LLC and Central Treasury Operations did not meet the quantitative thresholds in this reporting period to qualify as reportable segments; therefore, these operating segments are combined and disclosed below as All Other. Prior-period amounts were adjusted retrospectively to reflect the change to our reportable segments.

Below is a description of our reportable segments and the business activities included in All Other.

### **Automotive Segment**

Our Automotive segment primarily includes the sale of Ford and Lincoln brand vehicles, service parts, and accessories worldwide, together with the associated costs to develop, manufacture, distribute, and service the vehicles, parts, and accessories. The segment includes 5 regional business units: North America, South America, Europe, Middle East & Africa, and Asia Pacific.

### **Financial Services Segment**

The Financial Services segment primarily includes our vehicle-related financing and leasing activities at Ford Credit.

### **All Other**

All Other is a combination of operating segments that did not meet the quantitative thresholds in this reporting period to qualify as reportable segments. All Other consists of our Central Treasury Operations (formerly Other Automotive) and Ford Smart Mobility LLC. The Central Treasury Operations segment is primarily engaged in decision making for investments, risk management activities, and providing financing for the Automotive segment. Interest income (excluding interest earned on our extended service contract portfolio that is included in our Automotive segment), interest expense, gains and losses on cash equivalents and marketable securities, and foreign exchange derivatives associated with intercompany lending, are included in the results of Central Treasury Operations. The underlying assets and liabilities, primarily cash and cash equivalents, marketable securities, debt, and derivatives, remain with the Automotive segment.

Ford Smart Mobility LLC is a new subsidiary formed to design, build, grow, and invest in emerging mobility services. Designed to compete like a start-up company, Ford Smart Mobility LLC will design and build mobility services on its own, and collaborate with start-ups and tech companies.

### **Special Items**

In addition, our results include Special Items that consist of (i) pension and other postretirement employee benefits ("OPEB") remeasurement gains and losses, (ii) significant personnel and dealer-related costs stemming from our efforts to match production capacity and cost structure to market demand and changing model mix, and (iii) certain infrequent significant items that we generally do not consider to be indicative of our ongoing operating activities. Our management excludes these items from its review of the results of the operating segments for purposes of measuring segment profitability and allocating resources. Special items are presented as a separate reconciling item.

### **NOTE 3. SEGMENT INFORMATION (Continued)**

Operating cash flows		5,199		5,329		_		_		3,550	(b)	14,078	

<sup>(</sup>a) Includes eliminations of intersegment transactions occurring in the ordinary course of business and deferred tax netting.

<sup>(</sup>b) We measure and evaluate our Automotive segment operating cash flow on a different basis than Net cash provided by/(used in) operating activities in our consolidated statement of cash flows. Automotive segment operating cash flow includes additional elements management considers to be related to our Automotive operating activities, primarily capital spending and non-designated derivatives, and excludes outflows for funded pension contributions, separation payments, and other items that are considered operating cash flows under U.S. GAAP. The table below quantifies these reconciling adjustments to Net cash provided by/(used in) operating activities for the periods ended September 30 (in millions):

	Third C	uarte	er	First Nine Months			
	 2016		2015	2016		2015	
Automotive capital spending	\$ 1,696	\$	1,819	\$ 4,879	\$	5,324	
Net cash flows from non-designated derivatives	(246)		119	(322)		90	
Funded pension contributions	(246)		(89)	(835)		(942)	
Separation payments	(40)		(90)	(198)		(600)	
Other	(3)		(258)	(208)		(322)	
Total operating cash flow adjustments	\$ 1,161	\$	1,501	\$ 3,316	\$	3,550	

### NOTE 4. CASH, CASH EQUIVALENTS, AND MARKETABLE SECURITIES

The following tables categorize the fair values of cash, cash equivalents, and marketable securities measured at fair value on a recurring basis on our balance sheet (in millions):

September 30, 2016

					<del></del>				
	Fair Value Level	Au	tomotive		Financial Services		All Other	Co	onsolidated

Sales proceeds for investments classified as AFS and sold prior to maturity were \$69 million and \$0 for the nine months ended September 30, 2016 and 2015, respectively. Gross realized gains from the sale of AFS securities were \$1 million and \$0 for the nine months ended September 30, 2016 and 2015, respectively. There were no gross realized losses from the sale of AFS securities for the nine months ended September 30, 2016 and 2015.

We determine other-than-temporary impairments on cash equivalents and marketable securities using a specific identification method. During the nine months ended September 30, 2016 and 2015, we did not recognize any other-than-temporary impairment loss.

#### NOTE 5. FINANCIAL SERVICES FINANCE RECEIVABLES

Our Financial Services, primarily Ford Credit, manages finance receivables as "consumer" and "non-consumer" portfolios. The receivables are generally secured by the vehicles, inventory, or other property being financed.

Finance receivables, net were as follows (in millions):

	September 30, 2016		December 31, 2015	
Consumer				
Retail financing, gross	\$ 67,894	\$	62,068	
Unearned interest supplements	(2,785)		(2,119)	
Consumer finance receivables	65,109		59,949	
Non-Consumer				
Dealer financing	30,533		31,115	
Non-Consumer finance receivables	30,533		31,115	
Total recorded investment	\$ 95,642	\$	91,064	
Recorded investment in finance receivables	\$ 95,642	\$	91,064	
Allowance for credit losses	(478)		(373)	
Finance receivables, net	\$ 95,164	\$	90,691	
Current portion	\$ 45,550	\$	45,137	
Non-current portion	49,614		45,554	
Finance receivables, net	\$ 95,164	\$	90,691	
Net finance receivables subject to fair value (a)	\$ 93,033	\$	88,876	
Fair value	94,327		90,048	

<sup>(</sup>a) At September 30, 2016 and December 31, 2015, excludes \$2.1 billion and \$1.8 billion, respectively, of certain receivables (primarily direct financing leases) that are not subject to fair value disclosure requirements. The fair value of finance receivables is categorized within Level 3 of the fair value hierarchy.

Excluded from finance receivables at September 30, 2016 and December 31, 2015, was \$206 million and \$209 million, respectively, of accrued uncollected interest, which are reported as *Other assets* in the current assets section of our consolidated balance sheet.

Included in the recorded investment in finance receivables at September 30, 2016 and December 31, 2015 were consumer receivables of \$29.9 billion and \$27.6 billion, respectively, and non-consumer receivables of \$23.3 billion and \$26.1 billion, respectively, that have been sold for legal purposes in securitization transactions but continue to be reported in our consolidated financial statements. The receivables are available only for payment of the debt issued by, and other obligations of, the securitization entities that are parties to those securitization transactions; they are not available to pay the other obligations or the claims of Ford Credit's other creditors. Ford Credit holds the right to receive the excess cash flows not needed to pay the debt issued by, and other obligations of, the securitization entities that are parties to those securitization transactions.

### NOTE 5. FINANCIAL SERVICES FINANCE RECEIVABLES (Continued)

### **Aging**

For all finance receivables, we define "past due" as any payment, including principal and interest, that is at least 31 days past the contractual due date. The recorded investment of consumer receivables greater than 90 days past due and still accruing interest was \$24 million and \$16 million at September 30, 2016 and December 31, 2015, respectively. The recorded investment of non-consumer receivables greater than 90 days past due and still accruing interest was de minimis and \$1 million at September 30, 2016 and December 31, 2015, respectively.

The aging analysis of our finance receivables balances were as follows (in millions):

	September 2016	30,	mber 31, 2015
Consumer			
31-60 days past due	\$	652	\$ 708
61-90 days past due		112	108
91-120 days past due		36	27
Greater than 120 days past due		39	38
Total past due		839	881
Current	64,	270	59,068
Consumer finance receivables	65,	109	59,949
Non-Consumer			
Total past due		71	116
Current	30,	462	30,999
Non-Consumer finance receivables	30,	533	31,115
Total recorded investment	\$ 95,	642	\$ 91,064

### **Credit Quality**

Consumer Portfolio. Credit quality ratings for consumer receivables are based on aging. Refer to the aging table above.

Consumer receivables credit quality ratings are as follows:

- Pass current to 60 days past due
- Special Mention 61 to 120 days past due and in intensified collection status
- Substandard greater than 120 days past due and for which the uncollectible portion of the receivables has already been charged off, as measured using the fair value of collateral less costs to sell

Non-Consumer Portfolio. Dealers are assigned to one of four groups according to risk ratings as follows:

- Group I strong to superior financial metrics
- Group II fair to favorable financial metrics
- Group III marginal to weak financial metrics
- Group IV poor financial metrics, including dealers classified as uncollectible

### NOTE 5. FINANCIAL SERVICES FINANCE RECEIVABLES (Continued)

The credit quality analysis of our dealer financing receivables was as follows (in millions):

	ember 30, 2016		ember 31, 2015
Dealer Financing			
Group I	\$ 23,162	\$	22,146
Group II	5,847		7,175
Group III	1,399		1,683
Group IV	125		111
Total recorded investment	\$ \$ 30,533		31,115

#### Impaired Receivables

Impaired consumer receivables include accounts that have been rewritten or modified in reorganization proceedings pursuant to the U.S. Bankruptcy Code that are considered to be troubled debt restructurings ("TDRs"), as well as all accounts greater than 120 days past due. Impaired non-consumer receivables represent accounts with dealers that have weak or poor financial metrics or dealer financing that has been modified in TDRs. The recorded investment of consumer receivables that were impaired at September 30, 2016 and December 31, 2015 was \$366 million, or 0.6% of consumer receivables, and \$375 million, or 0.6% of consumer receivables, respectively. The recorded investment of non-consumer receivables that were impaired at September 30, 2016 and December 31, 2015 was \$140 million, or 0.5% of non-consumer receivables, and \$134 million, or 0.4% of non-consumer receivables, respectively. Impaired finance receivables are evaluated both collectively and specifically.

### NOTE 6. FINANCIAL SERVICES ALLOWANCE FOR CREDIT LOSSES

An analysis of the allowance for credit losses related to finance receivables for the periods ended September 30 was as follows (in millions):

		Т	hird	Quarter 2010	6		Firs	st N	line Months 20	)16	93 324 (1) 478

<sup>(</sup>a) Primarily represents amounts related to translation adjustments.

<sup>(</sup>b) Total allowance, including reserves for operating leases, was \$403 million.

#### **NOTE 7. INVENTORIES**

All inventories are stated at the lower of cost and net realizable value. Cost for a substantial portion of U.S. inventories is determined on a last-in, first-out ("LIFO") basis. LIFO was used for 32% and 27% of total inventories at September 30, 2016 and December 31, 2015, respectively. Cost of other inventories is determined by costing methods that approximate a first-in, first-out ("FIFO") basis.

Inventories were as follows (in millions):

	ember 30, 2016	ember 31, 2015		
Raw materials, work-in-process, and supplies	\$ 4,335	\$ 4,005		
Finished products	6,823	5,254		
Total inventories under FIFO	11,158	9,259		
LIFO adjustment	(939)	(940)		
Total inventories	\$ 10,219	\$ 8,319		

### NOTE 8. OTHER LIABILITIES AND DEFERRED REVENUE

Other liabilities and deferred revenue were as follows (in millions):

	September 30, 2016		ember 31, 2015
Current			
Dealer and dealers' customer allowances and claims	\$ 9,050	\$	8,122
Deferred revenue	4,715		4,675
Employee benefit plans	1,505		1,562
Accrued interest	761		840
OPEB	357		354
Pension (a)	268		249
Other	2,875		3,287
Total current other liabilities and deferred revenue	\$ 19,531	\$	19,089
Non-current			
Pension (a)	\$ 9,024	\$	9,543
OPEB	5,362		5,347
Dealer and dealers' customer allowances and claims	3,146		2,731
Deferred revenue	3,639		3,285
Employee benefit plans	1,112		1,041
Other	1,369		1,510
Total non-current other liabilities and deferred revenue	\$ 23,652	\$	23,457

<sup>(</sup>a) Balances at September 30, 2016 reflect pension liabilities at December 31, 2015, updated for service and interest cost, expected return on assets, separation expense, actual benefit payments, and cash contributions. The discount rate and rate of expected return assumptions are unchanged from year-end 2015. Included in *Other assets* are pension assets of \$2.3 billion and \$1.6 billion at September 30, 2016 and December 31, 2015, respectively.

#### **NOTE 9. RETIREMENT BENEFITS**

#### **Defined Benefit Plans - Expense**

The pre-tax expense for our defined benefit pension and OPEB plans for the periods ended September 30 was as follows (in millions):

						Third C	Quar	ter				
				Pension

Net periodic benefit cost/(income)	\$ (357)	\$	(271)	\$	54	\$	58	\$	76	\$	70

Beginning in 2016, we changed the method used to estimate the service and interest costs for pension and OPEB plans that utilize a yield curve approach. We now apply the specific spot rates along the yield curve to the relevant cash flows instead of using a single effective discount rate. Service and interest costs in the third quarter and first nine months were about \$145 million lower and about \$435 million lower, respectively, with the new method than they would have been under the prior method.

#### **Pension Plan Contributions**

During 2016, we expect to contribute about \$1.2 billion from cash and cash equivalents to our worldwide funded pension plans (including discretionary contributions of about \$100 million), down about \$300 million from our previous plan due to recalendarization of contributions into 2017, and to make about \$300 million of benefit payments to participants in unfunded plans, for a total of about \$1.5 billion. In the first nine months of 2016, we contributed about \$800 million to our worldwide funded pension plans and made about \$200 million of benefit payments to participants in unfunded plans.

### NOTE 10. DEBT

The carrying value of Automotive and Financial Services debt was as follows (in millions):

Automotive	Sept	tember 30, 2016	Dec	ember 31, 2015
Debt payable within one year	<b>o</b>	1 160	<b>c</b>	010
Short-term Long term psychlo within one year	\$	1,169	\$	818

Total Financial Services	\$	124,077	\$	120,015
Fair value of Financial Services debt (a)	\$	126,175	\$	121,170

<sup>(</sup>a) The fair value of debt includes \$941 million and \$560 million of Automotive short-term debt and \$12.5 billion and \$10.3 billion of Financial Services short-term debt at September 30, 2016 and December 31, 2015, respectively, carried at cost, which approximates fair value. All other debt is categorized within Level 2 of the fair value hierarchy.

<sup>(</sup>b) Adjustments related to designated fair value hedges of unsecured debt.

#### NOTE 11. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

In the normal course of business, our operations are exposed to global market risks, including the effect of changes in foreign currency exchange rates, certain commodity prices, and interest rates. To manage these risks, we enter into highly effective derivative contracts. We have elected to apply hedge accounting to certain derivatives. Derivatives that are designated in hedging relationships are evaluated for effectiveness using regression analysis at the time they are designated and throughout the hedge period. Some derivatives do not qualify for hedge accounting; for others, we elect not to apply hedge accounting.

#### **Income Effect of Derivative Financial Instruments**

The gains/(losses), by hedge designation, recorded in income for the periods ended September 30 were as follows (in millions):

	Third Quarter					First Nine Months			
		2016		2015		2016		2015	
Cash flow hedges (a)									
Reclassified from AOCI to net income	\$	202	\$	(60)	\$	335	\$	(196)	
Fair value hedges									
Interest rate contracts									
Net interest settlements and accruals excluded from the assessment of hedge effectiveness		95		94		292		271	
Ineffectiveness (b)		(1)		10		21		6	
Derivatives not designated as hedging instruments									
Foreign currency exchange contracts		29		65		61		210	
Cross-currency interest rate swap contracts		128		63		463		75	
Interest rate contracts		21		(22)		(70)		(83)	
Commodity contracts		3		(22)		7		(47)	
Total	\$	477	\$	128	\$	1,109	\$	236	

<sup>(</sup>a) For the third quarter and first nine months of 2016, a \$340 million gain and a \$887 million gain, respectively, were recorded in *Other comprehensive income*. For the third quarter and first nine months of 2015, a \$453 million gain and a \$86 million gain, respectively, were recorded in *Other comprehensive income*.

<sup>(</sup>b) For the third quarter and first nine months of 2016, hedge ineffectiveness reflects the net change in fair value on derivatives of \$228 million loss and \$655 million gain, respectively, and a change in value on hedged debt attributable to the change in benchmark interest rates of \$227 million gain and \$634 million loss, respectively. For the third quarter and first nine months of 2015, hedge ineffectiveness reflects the net change in fair value on derivatives of \$373 million gain and \$345 million gain, respectively, and a change in value on hedged debt attributable to the change in benchmark interest rates of \$363 million loss and \$339 million loss, respectively.

### NOTE 11. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES (Continued)

#### **Balance Sheet Effect of Derivative Financial Instruments**

Derivative assets and liabilities are recorded on the balance sheet at fair value and are presented on a gross basis. The notional amounts of the derivative instruments do not necessarily represent amounts exchanged by the parties and are not a direct measure of our financial exposure. We also enter into master agreements with counterparties that may allow for netting of exposures in the event of default or breach of the counterparty agreement.

The fair value of our derivative instruments and the associated notional amounts, presented gross, were as follows (in millions):

		S	epte	mber 30, 201	16		December 31, 2015					
		Notional		ir Value of Assets		air Value of Liabilities		Notional		r Value of Assets		r Value of abilities
Cash flow hedges												
Foreign currency exchange and commodity contracts	\$	16,775	\$	818	\$	136	\$	12,593	\$	522	\$	366
Fair value hedges												
Interest rate contracts		36,215		1,217		_		28,964		670		16

Foreign currency exchange contracts		17,267		352		129		21,108		426		242
Cross-currency interest rate swap contracts		3,765		383		_		3,137		73		111
Interest rate contracts		61,650		142		122		62,638		159		112
Commodity contracts		525		10		4		643		2		26
Total derivative financial instruments, gross (a) (b)	\$	136,197	\$	2,922	\$	391	\$	129,083	\$	1,852	\$	873
Current portion			\$	1,395	\$	297			\$	1,209	\$	692
Non-current portion				1,527		94				643		181
Total derivative financial instruments, gross			\$	2,922	\$	391			\$	1,852	\$	873

<sup>(</sup>a) At September 30, 2016 and December 31, 2015, the net obligation to return cash collateral was \$13 million and \$0, respectively.

<sup>(</sup>b) At September 30, 2016 and December 31, 2015, the fair value of assets and liabilities available for counterparty netting was \$347 million and \$733 million, respectively. All derivatives are categorized within Level 2 of the fair value hierarchy.

### NOTE 12. ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)

The changes in the balances for each component of accumulated other comprehensive income/(loss) attributable to Ford Motor Company for the periods ended September 30 were as follows (in millions):

	Third Quarter			er	First Nine Month			nths
		2016		2015		2016	_	2015

<sup>(</sup>a) Reclassified to Non-Financial Services interest income and other income/(loss), net.

<sup>(</sup>b) Reclassified to Cost of sales. During the next twelve months we expect to reclassify existing net gains on cash flow hedges of \$548 million. See Note 11 for additional information.

<sup>(</sup>c) Amortization and recognition of prior service costs/(credits) is included in the computation of net periodic pension cost. See Note 9 for additional information.

### NOTE 13. OTHER INCOME/(LOSS)

#### **Non-Financial Services**

The amounts included in *Non-Financial Services interest income and other income/(loss), net* for the periods ended September 30 were as follows (in millions):

		Third C	Quarter	First Nine Months				
	- :	2016	2015		2016		2015	
Investment-related interest income	\$	50	\$ 60	\$	163	\$	161	
Interest income/(expense) on income taxes		9	_		8		1	
Realized and unrealized gains/(losses) on cash equivalents and marketable securities		(13)	189		52		146	
Gains/(Losses) on changes in investments in affiliates		(1)	_		180		18	
Royalty income		174	149		494		448	
Other		109	48		224		134	
Total	\$	328	\$ 446	\$	1,121	\$	908	

#### **Financial Services**

The amounts included in *Financial Services other income/(loss)*, *net* for the periods ended September 30 were as follows (in millions):

	Third Quarter				First Nine	nths	
		2016		2015	2016		2015
Investment-related interest income	\$	18	\$	19	\$ 57	\$	58
Interest income/(expense) on income taxes		(2)		(3)	11		(9)
Insurance premiums earned		38		32	118		97
Other		78		49	119		95
Total	\$	132	\$	97	\$ 305	\$	241

### **NOTE 14. INCOME TAXES**

For interim tax reporting, we estimate one single effective tax rate for tax jurisdictions not subject to a valuation allowance, which is applied to the year-to-date ordinary income/(loss). Tax effects of significant unusual or infrequently occurring items are excluded from the estimated annual effective tax rate calculation and recognized in the interim period in which they occur.

### NOTE 15. CAPITAL STOCK AND EARNINGS PER SHARE

### Earnings Per Share Attributable to Ford Motor Company Common and Class B Stock

Basic and diluted income per share were calculated using the following (in millions):

	Third (	Qua	rter	First Nine	nths	
	2016		2015	2016		2015
Basic and Diluted Income Attributable to Ford Motor Company						
Basic income	\$ 957	\$	2,192	\$ 5,379	\$	5,505
Diluted income	957		2,192	5,379		5,505
Basic and Diluted Shares						
Basic shares (average shares outstanding)	3,974		3,969	3,972		3,968
Net dilutive options and unvested restricted stock units	26		30	25		34
Diluted shares	4,000		3,999	3,997		4,002

#### **NOTE 16. COMMITMENTS AND CONTINGENCIES**

Commitments and contingencies primarily consist of guarantees and indemnifications, litigation and claims, and warranty.

#### **Guarantees and Indemnifications**

Guarantees and indemnifications are recorded at fair value at their inception. We regularly review our performance risk under these arrangements, and in the event it becomes probable we will be required to perform under guarantee or indemnity, the amount of probable payment is recorded.

We guarantee debt and lease obligations of certain joint ventures, as well as certain financial obligations of outside third parties, including suppliers, to support our business and economic growth. Expiration dates vary through 2033, and guarantees will terminate on payment and/or cancellation of the underlying obligation. A payment by us would be triggered by failure of the joint venture or other third party to fulfill its obligation covered by the guarantee. In some circumstances, we are entitled to recover from a third party amounts paid by us under the guarantee. However, our ability to enforce these rights is sometimes stayed until the guaranteed party is paid in full, and may be limited in the event of insolvency of the third party or other circumstances.

In the ordinary course of business, we execute contracts involving indemnifications standard in the industry and indemnifications specific to a transaction, such as the sale of a business. These indemnifications might include and are not limited to claims relating to any of the following: environmental, tax, and shareholder matters; intellectual property rights; power generation contracts; governmental regulations and employment-related matters; dealer, supplier, and other commercial contractual relationships; and financial matters, such as securitizations. Performance under these indemnifications are limited in nature, many of them do not limit potential payment. Therefore, we are unable to estimate a maximum amount of future payments that could result from claims made under these unlimited indemnities.

The maximum potential payments and the carrying value of recorded liabilities related to guarantees and limited indemnities were as follows (in millions):

	nber 30, 016	nber 31, 015
Maximum potential payments	\$ 227	\$ 284
Carrying value of recorded liabilities related to guarantees and limited indemnities	23	23

### **Litigation and Claims**

Various legal actions, proceedings, and claims (generally, "matters") are pending or may be instituted or asserted against us. These include but are not limited to matters arising out of alleged defects in our products; product warranties; governmental regulations relating to safety, emissions, and fuel economy or other matters; government incentives; tax matters; alleged illegal acts resulting in fines or penalties; financial services; employment-related matters; dealer, supplier, and other contractual relationships; intellectual property rights; environmental matters; shareholder or investor matters; and financial reporting matters. Certain of the pending legal actions are, or purport to be, class actions. Some of the matters involve or may involve claims for compensatory, punitive, or antitrust or other treble damages in very large amounts, or demands for field service actions, environmental remediation programs, sanctions, loss of government incentives, assessments, or other relief, which, if granted, would require very large expenditures.

The extent of our financial exposure to these matters is difficult to estimate. Many matters do not specify a dollar amount for damages, and many others specify only a jurisdictional minimum. To the extent an amount is asserted, our historical experience suggests that in most instances the amount asserted is not a reliable indicator of the ultimate outcome.

We accrue for matters when losses are deemed probable and reasonably estimable. In evaluating matters for accrual and disclosure purposes, we take into consideration factors such as our historical experience with matters of a similar nature, the specific facts and circumstances asserted, the likelihood that we will prevail, and the severity of any potential loss. We reevaluate and update our accruals as matters progress over time.

### NOTE 16. COMMITMENTS AND CONTINGENCIES (Continued)

For the majority of matters, which generally arise out of alleged defects in our products, we establish an accrual based on our extensive historical experience with similar matters. We do not believe there is a reasonably possible outcome materially in excess of our accrual for these matters.

For the remaining matters, where our historical experience with similar matters is of more limited value (i.e., "non-pattern matters"), we evaluate the matters primarily based on the individual facts and circumstances. For non-pattern matters, we evaluate whether there is a reasonable possibility of a material loss in excess of any accrual that can be estimated. Our estimate of reasonably possible loss in excess of our accruals for all material matters currently reflects indirect tax and customs matters, for which we estimate the aggregate risk to be a range of up to about \$2.8 billion.

As noted, the litigation process is subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. Our assessments are based on our knowledge and experience, but the ultimate outcome of any matter could require payment substantially in excess of the amount that we have accrued and/or disclosed.

#### **Warranty and Field Service Actions**

We accrue obligations for warranty costs and field service actions (i.e., safety recalls, emission recalls, and other product campaigns) at the time of sale using a patterned estimation model that includes historical information regarding the nature, frequency, and average cost of claims for each vehicle line by model year. Warranty and field service action obligations are reported in *Other liabilities and deferred revenue*. We reevaluate the adequacy of our accruals on a regular basis.

We recognize the benefit from a recovery of the costs associated with our warranty and field service actions when specifics of the recovery have been agreed with our supplier and the amount of the recovery is virtually certain. Recoveries are reported in *Trade and other receivables* and *Other assets*.

The estimate of our future warranty and field service action costs, net of supplier recoveries, for the periods ended September 30 were as follows (in millions):

	First I	First Nine Months				
	2016		2015			
Beginning balance	\$ 4,5	58 \$	4,785			
Payments made during the period	(2,4)	64)	(2,036)			
Changes in accrual related to warranties issued during the period	1,70	)4	1,523			
Changes in accrual related to pre-existing warranties	1,08	38	495			
Foreign currency translation and other	•	12	(192)			
Ending balance	\$ 4,92	28 \$	4,575			

Revisions to our estimated costs are reported as *Changes in accrual related to pre-existing warranties* in the table above.

### Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Ford Motor Company:

We have reviewed the accompanying consolidated balance sheet of Ford Motor Company and its subsidiaries as of September 30, 2016, and the related consolidated statements of income and comprehensive income for the three-month and nine-month periods ended September 30, 2016 and 2015 and the condensed consolidated statement of cash flows and the consolidated statement of equity for the nine-month periods ended September 30, 2016 and 2015. These interim financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2015, and the related consolidated statements of income, comprehensive income, equity, and cash flows for the year then ended (not presented herein), and in our report dated February 11, 2016 (which included an explanatory paragraph with respect to the Company's change in the manner in which it accounts for defined benefit pension and other postretirement employee benefit plans), we expressed an unqualified opinion on those consolidated financial statements. As discussed in Note 1 to the accompanying consolidated interim financial statements, the Company changed its presentation of the consolidated balance sheet to classify assets and liabilities as current or non-current. The accompanying December 31, 2015 consolidated balance sheet reflects this change.

/s/ PricewaterhouseCoopers LLP

PricewaterhouseCoopers LLP Detroit, Michigan October 27, 2016

### ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

#### **OVERVIEW**

Our core business includes designing, manufacturing, marketing, and servicing a full line of Ford cars, trucks, and SUVs, as well as Lincoln luxury vehicles. To expand our business model, we are aggressively pursuing emerging opportunities with investments in electrification, autonomy, and mobility. We provide financial services through Ford Credit.

In conjunction with our expanded business model to become an automotive, financial services, and mobility company, beginning with the second quarter of 2016, we changed our reportable segments. Prior-period amounts have been adjusted retrospectively to reflect the reportable segment change. See Note 3 of the Notes to the Financial Statements for additional information.

### **Non-GAAP Financial Measures That Supplement GAAP Measures**

We use both generally accepted accounting principles ("GAAP") and non-GAAP financial measures for operational and financial decision making, and to assess Company and segment business performance. The non-GAAP measures listed below are intended to be considered by users as supplemental information to their equivalent GAAP measures, to aid investors in better understanding our financial results. We believe that these non-GAAP measures provide useful perspective on underlying business results and trends, and a means to assess our period-over-period results. These non-GAAP measures should not be considered as a substitute for, or superior to measures of financial performance prepared in accordance with GAAP. These non-GAAP measures may not be the same as similarly titled measures used by other companies due to possible differences in method and in items or events being adjusted.

- Total Company Adjusted Pre-tax Profit (Most Comparable GAAP Measure: Net Income Attributable to Ford) The
  non-GAAP measure is useful to management and investors because it allows users to evaluate our pre-tax results
  excluding pre-tax special items. Pre-tax special items consist of (i) pension and other postretirement employee
  benefits ("OPEB") remeasurement gains and losses that are not reflective of our underlying business results,
  (ii) significant restructuring actions related to our efforts to match production capacity and cost structure to market
  demand and changing model mix, and (iii) other items that we do not necessarily consider to be indicative of
  earnings from ongoing operating activities.
- Adjusted Earnings Per Share (Most Comparable GAAP Measure: Earnings Per Share) Measure of Company's
  diluted net earnings per share adjusted for impact of pre-tax special items (described above), and tax special
  items. The measure provides investors with useful information to evaluate performance of our business excluding
  items not indicative of the underlying run rate of our business.
- Adjusted Effective Tax Rate (Most Comparable GAAP Measure: Effective Tax Rate) Measure of Company's tax
  rate excluding pre-tax special items (described above) and tax special items. The measure provides an ongoing
  effective rate which investors find useful for historical comparisons and for forecasting.
- Ford Credit Managed Receivables (Most Comparable GAAP Measure: Net Finance Receivables plus Net Investment in Operating Leases) Measure of Ford Credit's total net receivables, excluding unearned interest supplements and residual support, allowance for credit losses, and other (primarily accumulated supplemental depreciation). The measure is useful to management and investors as it closely approximates the customer's outstanding balance on the receivables, which is the basis for earning revenue.
- Ford Credit Managed Leverage (Most Comparable GAAP Measure: Financial Statement Leverage) Ford Credit's debt-to-equity ratio adjusted (i) to exclude cash, cash equivalents, and marketable securities (other than amounts related to insurance activities), and (ii) for derivative accounting. The measure is useful to investors because it reflects the way Ford Credit manages its business. Cash, cash equivalents, and marketable securities are deducted because they generally correspond to excess debt beyond the amount required to support operations and on-balance sheet securitization transactions. Derivative accounting adjustments are made to asset, debt, and equity positions to reflect the impact of interest rate instruments used with Ford Credit's term-debt issuances and securitization transactions. Ford Credit generally repays its debt obligations as they mature, so the interim effects of changes in market interest rates are excluded in the calculation of managed leverage.

See "GAAP Reconciliations to Non-GAAP Financial Measures" section in this Item 2.

### **RESULTS OF OPERATIONS**

**TOTAL COMPANY** 

### **Total Company**

Net income attributable to Ford. The chart below shows our third guarter 2016 net income attributable to Ford.

	\$957		\$552				\$4
				\$(223)	\$(26)	\$(426)	
			Pre-Tax Res	sults			Less:
	Total Company Net Income	Automotive Segment	Financial Services Segment	All Other	Special Items	Taxes	Non-controlling interests
B / (W) 3Q 2015	\$(1,235)	\$(1,678)	\$26	\$(60)	\$(192)	\$673	\$4

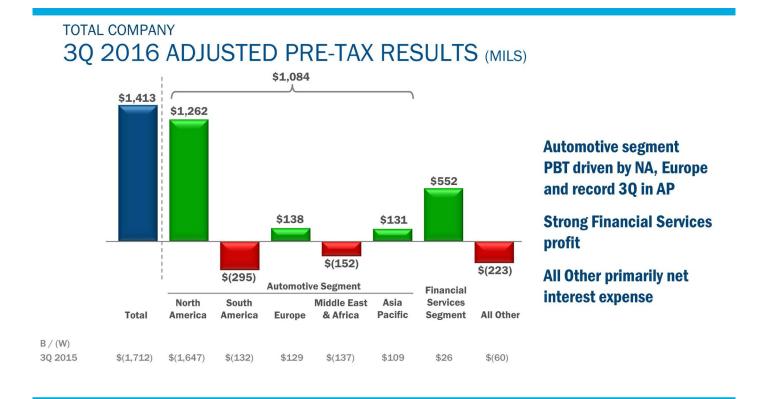

Net income attributable to Ford in the third quarter of 2016 was \$957 million or \$0.24 earnings per share of Common and Class B Stock, a decrease of \$1.2 billion or \$0.31 per share from the third quarter of 2015. Third quarter 2016 pre-tax results of our Automotive segment, Financial Services segment, All Other, Special Items, and Taxes are discussed in the following sections in "Results of Operations."

Revenue. Company revenue in the third quarter of 2016 was \$35.9 billion, \$2.2 billion lower than a year ago.

*Equity.* At September 30, 2016, total equity attributable to Ford was \$31.5 billion, an increase of \$2.9 billion compared with December 31, 2015. The detail for this change is shown below (in billions):

	<u> </u>	Higher/(Lower)
Net income	\$	5.4
Dividends		(2.8)
Other comprehensive income		0.2
Compensation-related equity issuances		0.2
Treasury stock share repurchases		(0.1)
Total	\$	2.9

The chart below shows our third quarter 2016 total Company adjusted pre-tax results and pre-tax results of our Automotive segment by regional business unit, our Financial Services segment, and All Other, which is mainly net interest expense.

Our total Company adjusted pre-tax profit was \$1.4 billion in the third quarter of 2016, higher than our guidance of about \$1 billion. This reflects favorable calendarization of marketing accruals in the United States and cost performance, all of which will be offset in the fourth quarter of 2016. Automotive results were driven by North America, Europe, and a record third quarter pre-tax profit in Asia Pacific.

Financial Services pre-tax profit of \$552 million included strong performance at Ford Credit, which earned a pre-tax profit of \$567 million.

As shown below the chart, our Automotive segment results were \$1.7 billion lower than a year ago while our Financial Services segment improved slightly compared to 2015.

#### **AUTOMOTIVE SEGMENT**

In general, we measure year-over-year change in Automotive segment pre-tax results using the causal factors listed below, with net pricing and cost variances calculated at present-year volume and mix and exchange:

- Market Factors:
  - Volume and Mix primarily measures profit variance from changes in wholesale volumes (at prior-year average contribution margin per unit) driven by changes in industry volume, market share, and dealer stocks, as well as the profit variance resulting from changes in product mix, including mix among vehicle lines and mix of trim levels and options within a vehicle line
  - Net Pricing primarily measures profit variance driven by changes in wholesale prices to dealers and marketing incentive programs such as rebate programs, low-rate financing offers, special lease offers, and stock adjustments on dealer inventory
- Contribution Costs primarily measures profit variance driven by per-unit changes in cost categories that typically
  vary with volume, such as material costs (including commodity and component costs), warranty expense, and
  freight and duty costs
- Structural Costs primarily measures profit variance driven by absolute change in cost categories that typically do
  not have a directly proportionate relationship to production volume. Structural costs include the following cost
  categories:
  - Manufacturing, Including Volume Related consists primarily of costs for hourly and salaried manufacturing personnel, plant overhead (such as utilities and taxes), and new product launch expense. These costs could be affected by volume for operating pattern actions such as overtime, line-speed, and shift schedules
  - Engineering consists primarily of costs for engineering personnel, prototype materials, testing, and outside engineering services
  - Spending-Related consists primarily of depreciation and amortization of our manufacturing and engineering assets, but also includes asset retirements and operating leases
  - Advertising and Sales Promotions includes costs for advertising, marketing programs, brand promotions, customer mailings and promotional events, and auto shows
  - Administrative and Selling includes primarily costs for salaried personnel and purchased services related to our staff activities and selling functions, as well as associated information technology costs
  - Pension and OPEB consists primarily of past service pension costs and other postretirement employee benefit costs
- Exchange primarily measures profit variance driven by one or more of the following: (i) transactions denominated in currencies other than the functional currencies of the relevant entities, (ii) effects of converting functional currency income to U.S. dollars, (iii) effects of remeasuring monetary assets and liabilities of the relevant entities in currencies other than their functional currency, or (iv) results of our foreign currency hedging
- Other includes a variety of items, such as parts and services profits, royalties, government incentives and compensation-related changes

In addition, definitions and calculations used in this report include:

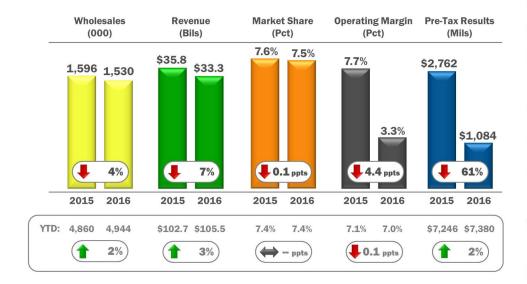

- Wholesales and Revenue wholesale unit volumes include all Ford and Lincoln badged units (whether produced by Ford or by an unconsolidated affiliate) that are sold to dealerships, units manufactured by Ford that are sold to other manufacturers, units distributed by Ford for other manufacturers, and local brand units produced by our China joint venture, Jiangling Motors Corporation, Ltd. ("JMC"), that are sold to dealerships. Vehicles sold to daily rental car companies that are subject to a guaranteed repurchase option (i.e., rental repurchase), as well as other sales of finished vehicles for which the recognition of revenue is deferred (e.g., consignments), also are included in wholesale unit volumes. Revenue from certain vehicles in wholesale unit volumes (specifically, Ford badged vehicles produced and distributed by our unconsolidated affiliates, as well as JMC brand vehicles) are not included in our revenue
- Automotive Segment Operating Margin defined as Automotive segment pre-tax profit divided by Automotive segment revenue
- Industry Volume and Market Share based, in part, on estimated vehicle registrations; includes medium and heavy duty trucks

- SAAR seasonally adjusted annual rate
- Automotive Cash includes cash, cash equivalents, and marketable securities

The charts on the following pages detail third quarter 2016 key metrics and the change in third quarter 2016 pretax results compared with the third quarter of 2015 by causal factor for our Automotive segment by business unit.

References to Automotive segment and business unit records are since at least 2000.

# AUTOMOTIVE SEGMENT 3Q 2016 KEY METRICS

All key metrics lower than a year ago driven by NA

Wholesales down 4%; revenue down 7%

Global market share lower due to NA, SA and MEA

**Global SAAR up 3%** 

Operating margin and Auto PBT down sharply

YTD metrics strong and about the same as last year

Shown above are the key market factors and financial metrics for our Automotive segment in the third quarter of 2016, which all declined from a year ago, consistent with expectations. The changes were driven by North America. Wholesale volumes were down 4%, more than explained by reductions in dealer stocks this year in North America and Europe versus increases a year ago. Automotive revenue was down 7% due to the lower volume.

Our global market share, at 7.5%, was down one-tenth of a percentage point compared to a year ago driven by lower market shares in North America, South America, and Middle East & Africa. Market share was flat in Europe and higher in Asia Pacific.

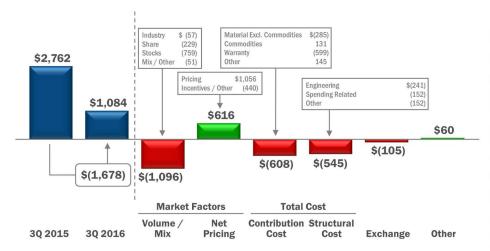

Global industry SAAR in the quarter was estimated to be 90.1 million units, an increase of 2.9 million units or 3% compared with a year ago; the increase was driven by Asia Pacific and Europe.

Automotive operating margin and pre-tax profit, at 3.3% and \$1.1 billion, respectively, were both significantly lower than a year ago.

As shown below the chart, the Automotive key metrics in the first nine months of 2016 were strong, about the same as last year.

### **AUTOMOTIVE SEGMENT**

### 3Q 2016 PRE-TAX RESULTS (MILS)

Lower PBT driven by lower volume and higher warranty cost related to recall

Unfavorable dealer stocks due to stock reductions this year versus increases last year in NA and Europe

Net pricing higher, mainly NA

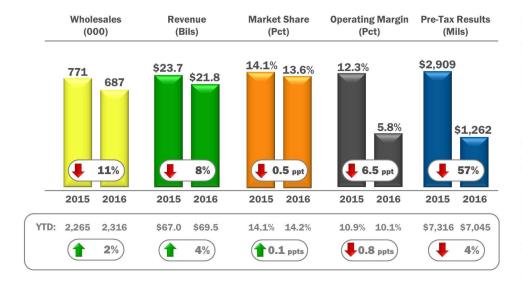

Shown above are the factors that contributed to the \$1.7 billion decline in third quarter Automotive segment pre-tax profit. The lower profit is explained by lower volume, mainly the unfavorable changes in dealer stocks in North America and Europe, as well as higher warranty costs related to a recall. Net pricing was favorable, mainly in North America.

Cost of sales and Selling, administrative, and other expenses for the third quarter of 2016 and 2015 was \$33 billion and \$33.6 billion, respectively, a decrease of \$600 million. Cost of sales and Selling, administrative, and other expenses for the first nine months of 2016 and 2015 was \$100.8 billion and \$97.4 billion, respectively, an increase of \$3.4 billion. The detail for the third quarter and first nine months of 2016 change is shown below (in billions):

	2016 Lowe	2016 Lower/(Higher) 2015	
	Third Quarter	First Nine Months	
Volume and mix, exchange, and other	\$ 1.	8 \$ (2.5)	
Contribution costs			
Material excluding commodities	(0.	3) 0.2	
Commodities	0.	1 1.0	
Warranty	(0.	6) (0.8)	
Other	0.	1 0.3	
Structural costs	(0.	5) (1.3)	
Special items		- (0.3)	
Total	\$ 0.	6 \$ (3.4)	

### AUTOMOTIVE SEGMENT – NORTH AMERICA

### 3Q 2016 KEY METRICS

# All key metrics lower than last year

Top line down due to lower volume – unfavorable stock changes and lower market share and industry

NA market share down due to U.S. retail (cars and SUVs) and fleet (rental)

NA SAAR lower – U.S. down 0.5M units

YTD metrics strong, though mixed

Shown above are the third quarter 2016 key metrics for the North America business unit, which were lower in the quarter compared to a year ago.

The top line declined with wholesale volume down 11% and revenue down 8% from a year ago. Lower wholesales were driven by dealer stock reductions this year compared to an increase last year for F-150 following the Kansas City Assembly Plant launch, the launch effect of the all-new Super Duty, and aligning car production with demand.

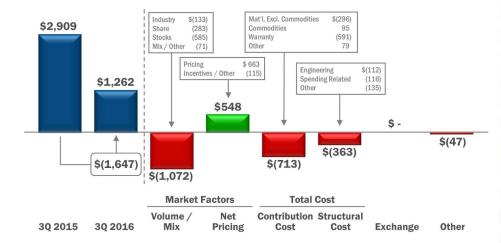

Our North America market share was down five-tenths of a percentage point, with our U.S. share down by seventenths of a percentage point to 14%. The decrease was driven by lower retail sales of cars and utilities, as well as lower fleet sales, mainly rental. F-Series retail share was flat from a year ago. North America SAAR, at 21.8 million units, was down 200,000 units; U.S. SAAR, at 17.8 million units, was down 500,000 units.

Operating margin was 5.8%, down sharply from last year, and pre-tax profit was \$1.3 billion, down \$1.6 billion.

As shown below the chart, North America's key metrics in the first nine months of 2016 were strong, though mixed from a year ago.

### AUTOMOTIVE SEGMENT - NORTH AMERICA

### 3Q 2016 PRE-TAX RESULTS (MILS)

Lower PBT driven by Super Duty launch, dealer stock reduction this year versus an increase last year for F-150, normalization of series mix on F-150 and previously announced door latch recall

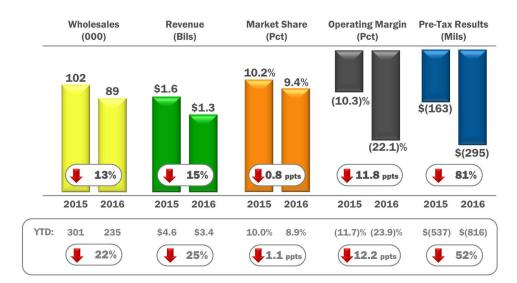

U.S. ATPs increased more than industry average, driven by higher net pricing

As shown above, our third quarter 2016 pre-tax profit was \$1.6 billion lower than a year ago, driven by the launch impact of our all-new Super Duty, the dealer stock reduction of F-150 versus the increase a year ago and normalization of series mix for F-150, and the previously announced door latch recall.

Net pricing was favorable for the first time in 2016. Average U.S. retail transaction prices were \$1,300 per vehicle higher compared to a year ago, almost double the industry average increase.

### AUTOMOTIVE SEGMENT - SOUTH AMERICA

### 3Q 2016 KEY METRICS

3Q and YTD metrics down from a year ago as economic conditions remained challenging

Top line lower due to lower volume and unfavorable exchange

Market share lower due to Fiesta in Brazil

SA and Brazil SAARs declined at lowest pace this year

In South America, our results were negatively impacted by the difficult external conditions, including high inflation and unfavorable exchange in Argentina, and lower industry volume in Brazil.

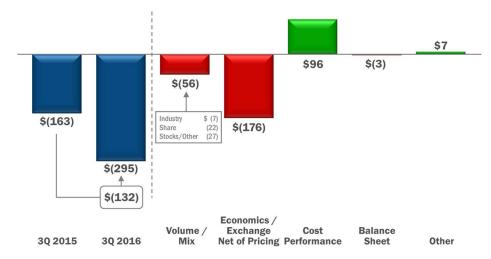

The top line was lower with wholesales down 13% and revenue down 15%, reflecting lower industry and market share, and weaker local currencies.

Our market share for the region, at 9.4%, was down eight-tenths of a percentage point due to Fiesta in Brazil. Industry SAAR for the region, at 3.6 million units, was 400,000 units lower than a year ago, due to Brazil.

Operating margin and pre-tax results for the region were both lower than a year ago.

As shown below the chart, each of South America's key metrics in the first nine months of 2016 was lower than a year ago.

## AUTOMOTIVE SEGMENT - SOUTH AMERICA 3Q 2016 PRE-TAX RESULTS (MILS)

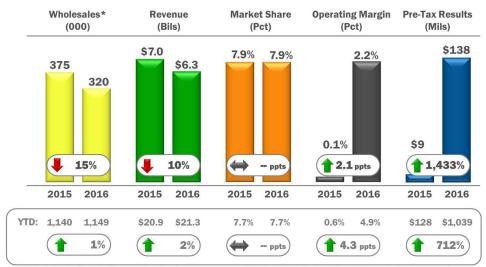

Higher loss driven by unfavorable effects of inflation and weaker local currencies exceeding higher net pricing

Cost performance continued to be favorable

As shown above, the higher loss in South America in the third quarter of 2016 was more than explained by the unfavorable effects of high local inflation and weaker local currencies exceeding higher net pricing. This was offset partially by continued progress in reducing costs, including further workforce reductions as we optimized our manufacturing plant operating patterns.

Our team is continuing its work to further improve the cost structure of the business and identify revenue opportunities. Importantly, we are now seeing some key economic indicators beginning to improve, although still in negative territory, suggesting we may have passed the trough of the current economic cycle.

## 3Q 2016 KEY METRICS

Includes Ford brand vehicles produced and sold by our unconsolidated affiliate in Turkey (about 19,000 units in 3Q 2015 and 15,000 units in 3Q 2016). 2015 YTD includes about 5,000 Ford brand vehicles produced and sold by our previously unconsolidated affiliate in Pulsaia. Beyonum does not include these sales.

Best 3Q PBT since 2007 with operating margin and PBT up sharply YOY

Top line decline due to volume

**Europe SAAR higher** 

Market share flat, but commercial vehicles up sharply

YTD PBT exceeds \$1 billion with operating margin of 4.9%

Shown above are the third quarter 2016 key metrics for Europe, where we delivered our best third quarter pre-tax profit since 2007, with pre-tax profit and operating margin up sharply from a year ago. The top-line declined from a year ago with wholesale volume down 15% and revenue down 10%, driven by lower volume.

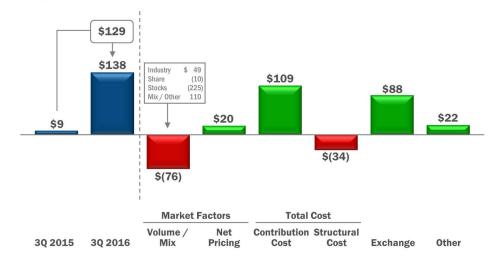

Our market share, at 7.9%, was flat from a year ago. Ford remained Europe's best selling commercial vehicle brand in the third quarter of 2016 with improved share from a year ago. Europe SAAR, at 20.1 million units, was 4% higher than in the third quarter of 2015.

Our operating margin, at 2.2%, was up 2.1 percentage points from a year ago, and pre-tax profit was \$138 million, up \$129 million.

As shown below the chart, each of Europe's key metrics in the first nine months of 2016 improved except market share which was flat, with pre-tax profit exceeding \$1 billion and operating margin at 4.9%.

#### AUTOMOTIVE SEGMENT - EUROPE

## 3Q 2016 PRE-TAX RESULTS (MILS)

6<sup>th</sup> consecutive profitable quarter and 4<sup>th</sup> with YoY cost improvement

Most factors drove higher PBT; volume lower due to dealer stock reduction this year versus an increase a year ago

Stock reduction reflects actions to align production to expected demand following Brexit

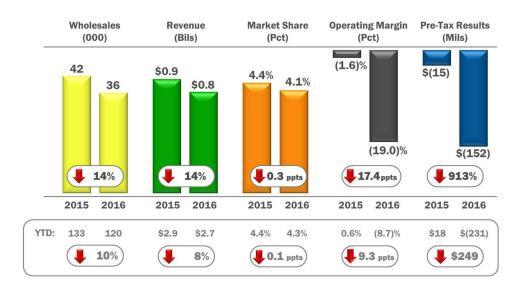

As shown above, we delivered our sixth consecutive profitable quarter, with pre-tax profit \$129 million higher in the third quarter of 2016 compared to a year ago, driven by improved cost performance, strong mix, and favorable balance sheet exchange.

We delivered our fourth consecutive quarter of year-over-year cost performance improvement, reflecting our continued focus on material cost reductions. Mix remains strong, driven by the strength of our products, including Ranger, Mustang, and Kuga, and increasing demand for our higher trim series across all major vehicle lines. Lower volume was a partial offset, reflecting a reduction in dealer stocks compared to an increase a year ago as we took actions to align production to expected demand following Brexit.

Although not shown above, our operations in Russia contributed meaningfully to Europe's improved results in the third quarter of 2016.

## AUTOMOTIVE SEGMENT - MIDDLE EAST & AFRICA

## 3Q 2016 KEY METRICS

Unfavorable YOY change in most key metrics driven by external factors and performance in the Middle East

Share decline due to unfavorable market mix

YTD metrics lower across the board -- adverse external conditions and 3Q performance in the Middle East

Shown above are key metrics for the Middle East & Africa region for the third quarter of 2016, where our key metrics were down compared to a year ago, reflecting lower industry and market performance in the Middle East.

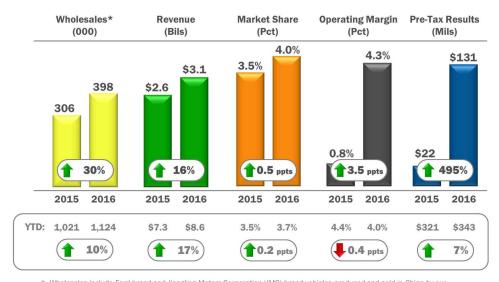

The top line in the third quarter of 2016 was down 14% from a year ago, driven primarily by lower wholesale volume. The decline in volume largely reflects stock adjustments in Saudi Arabia for lower industry and market performance. We are working with our distributor to improve our performance.

SAAR for the region, at 3.7 million units, was down 500,000 units from the third quarter of 2015. Within this, the markets where we participate declined 500,000 units. The markets where we do not participate, with Iran being the largest, were about the same as a year ago. Our market share for the region was 4.1%, down three-tenths of a percentage point due to unfavorable market mix. In markets where we participate, our market share was flat.

Middle East & Africa operating margin was negative 19%, down sharply from a year ago, reflecting lower volume and unfavorable exchange, primarily the South African rand.

As shown below the chart, each of the key metrics in the first nine months of 2016 was lower compared with a year ago, reflecting the impact of adverse external conditions.

# AUTOMOTIVE SEGMENT - ASIA PACIFIC 3Q 2016 KEY METRICS

<sup>\*</sup> Wholesales include Ford brand and Jiangling Motors Corporation (JMC) brand vehicles produced and sold in China by our unconsolidated affiliates (about 221,000 units in 3Q 2015 and 296,000 units in 3Q 2016); revenue does not include these sales

Record 3Q PBT with strong YoY performance across the board

Top line up sharply – China and rest of AP

Market share up, driven by China

AP and China SAARs up

China JVs at \$320M, up 26%; margin at 13.4%

YTD metrics improved except operating margin

In Asia Pacific, we delivered a record third quarter pre-tax profit with all key metrics improved compared to a year ago. Wholesale volume increased 30% and revenue from consolidated operations improved 16%, reflecting higher industry volume and strong performance from new products.

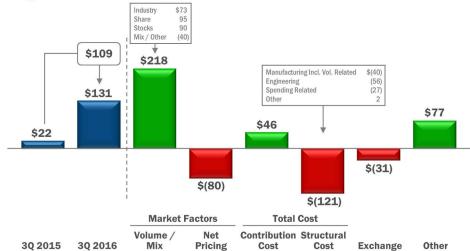

Asia Pacific SAAR was 40.9 million units, up 3.2 million units from the third quarter of 2015, mostly explained by a 2.8 million unit increase in China SAAR, estimated at 24.9 million units. This was driven by the government purchase tax incentive for vehicles with engine displacements of 1.6 liters or smaller. Asia Pacific market share was 4.0%, up five-tenths of a percentage point, with China share increasing five-tenths of a percentage point to 5.1%. The improvement in share was driven by strong C-car sales and new product introductions, including Taurus, the locally built Edge, Lincoln MKX, and Lincoln MKZ.

Asia Pacific operating margin was 4.3%, up 3.5 percentage points from a year ago, and pre-tax profit was \$131 million, up \$109 million. Our China joint ventures contributed \$320 million to pre-tax profit, reflecting our equity share of the joint ventures' after-tax earnings; this was \$67 million higher than a year ago. The joint ventures' net income margin was 13.4%, up seven-tenths of a percentage point.

As shown below the chart, all of our key metrics in the first nine months of 2016 improved compared with a year ago, except for operating margin.

## AUTOMOTIVE SEGMENT – ASIA PACIFIC

## 3Q 2016 PRE-TAX RESULTS (MILS)

Higher PBT driven by improvements outside China, as well as at China JVs

Higher volume the key factor driving profit improvement

As shown above, our third quarter record profit in Asia Pacific was up sharply compared with 2015. Volume and mix was up reflecting higher market share, favorable industry and the non-repeat of dealer stock reductions in China a year ago.

Lower net pricing compared to a year ago reflects continued negative pricing trends in China. In the quarter, the rate of negative pricing in China continued to slow since the fourth quarter of 2015. We continue to expect full year negative pricing for the industry.

Unfavorable cost performance was driven by cost increases to support higher volumes and continued investment for future product and regulatory actions; it includes the impact of plant launches during the second half of 2015. The investments in structural cost were offset partially by our continued focus on material cost efficiencies.

Unfavorable exchange reflects mainly the impact of the weaker Chinese yuan; the Company has a substantial net revenue exposure to this currency.

#### **FINANCIAL SERVICES SEGMENT**

In general, we measure year-over-year changes in Ford Credit's pre-tax results using the causal factors listed below:

#### Volume and Mix:

- Volume primarily measures changes in net financing margin driven by changes in average managed receivables at prior period financing margin yield (defined below in financing margin) at prior period exchange rates. Volume changes are primarily driven by the volume of new and used vehicle sales and leases, the extent to which Ford Credit purchases retail installment sale and lease contracts, the extent to which Ford Credit provides wholesale financing, the sales price of the vehicles financed, the level of dealer inventories, Ford-sponsored special financing programs available exclusively through Ford Credit, and the availability of cost-effective funding for the purchase of retail installment sale and lease contracts and to provide wholesale financing
- Mix primarily measures changes in net financing margin driven by period over period changes in the composition of Ford Credit's average managed receivables by product and by country or region

#### Financing Margin:

- Financing margin variance is the period-to-period change in financing margin yield multiplied by the present period average managed receivables at prior period exchange rates. This calculation is performed at the product and country level and then aggregated. Financing margin yield equals revenue, less interest expense and scheduled depreciation for the period, divided by average managed receivables for the same period
- Financing margin changes are driven by changes in revenue and interest expense. Changes in revenue are
  primarily driven by the level of market interest rates, cost assumptions in pricing, mix of business, and competitive
  environment. Changes in interest expense are primarily driven by the level of market interest rates, borrowing
  spreads, and asset-liability management

#### Credit Loss:

- Credit loss is the change in the provision for credit losses at prior period exchange rates. For analysis purposes, management splits the provision for credit losses into net charge-offs and the change in the allowance for credit losses
- Net charge-off changes are primarily driven by the number of repossessions, severity per repossession, and recoveries. Changes in the allowance for credit losses are primarily driven by changes in historical trends in credit losses and recoveries, changes in the composition and size of Ford Credit's present portfolio, changes in trends in historical used vehicle values, and changes in economic conditions. For additional information on the allowance for credit losses, refer to the "Critical Accounting Estimates Allowance for Credit Losses" section of Item 7 of Part II of our 2015 Form 10-K Report

#### Lease Residual:

- Lease residual measures changes to residual performance at prior period exchange rates. For analysis purposes, management splits residual performance primarily into residual gains and losses, and the change in accumulated supplemental depreciation
- Residual gain and loss changes are primarily driven by the number of vehicles returned to Ford Credit and sold, and the difference between the auction value and the depreciated value (which includes both base and accumulated supplemental depreciation) of the vehicles sold. Changes in accumulated supplemental depreciation are primarily driven by changes in Ford Credit's estimate of the expected auction value at the end of the lease term, and changes in the estimate of the number of vehicles that will be returned to it and sold. For additional information on accumulated supplemental depreciation, refer to the "Critical Accounting Estimates Accumulated Depreciation on Vehicles Subject to Operating Leases" section of Item 7 of Part II of our 2015 Form 10-K Report

#### Exchange:

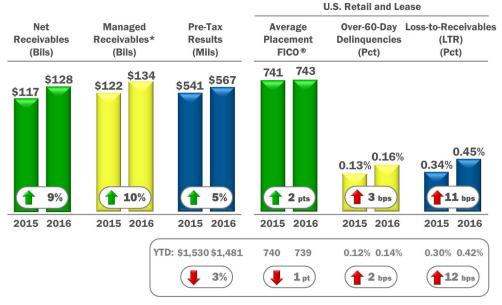

Reflects changes in pre-tax results driven by the effects of converting functional currency income to U.S. dollars

#### Other:

- Primarily includes operating expenses, other revenue, and insurance expenses at prior period exchange rates
- Changes in operating expenses are primarily driven by salaried personnel costs, facilities costs, and costs associated with the origination and servicing of customer contracts
- In general, other revenue changes are primarily driven by changes in earnings related to market valuation adjustments to derivatives (primarily related to movements in interest rates) and other miscellaneous items

Ford Credit. The chart below details the key metrics for Ford Credit for third guarter of 2016.

## FINANCIAL SERVICES SEGMENT - FORD CREDIT 3Q 2016 KEY METRICS

Best quarterly PBT since 2011 and up YOY; YTD profit of \$1.5 billion

Receivables up YOY, in line with expectations

Portfolio performance robust despite higher LTRs

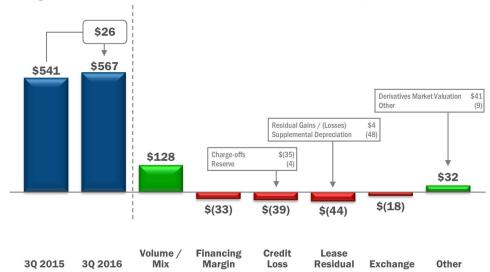

Disciplined and consistent originations, servicing and collections

In the third quarter of 2016, Ford Credit's pre-tax profit was strong – the best quarterly profit since 2011 – and receivables were higher than a year ago, in line with expectations. Portfolio performance remained robust. FICO scores remained consistent. The over-60-day delinquency ratio of 16 basis points in the third quarter of 2016 continued at the low end of Ford Credit's historical experience. The loss-to-receivables ratio of 45 basis points was up 11 basis points, also below, but approaching, Ford Credit's historical experience. Originations, servicing, and collections practices remained disciplined and consistent.

As shown below the chart, Ford Credit's year-to-date key metrics were unfavorable compared with a year ago.

<sup>\*</sup> See "GAAP Reconciliations to Non-GAAP Financial Measures" section for reconciliation to GAAP

# FINANCIAL SERVICES SEGMENT - FORD CREDIT 3Q 2016 PRE-TAX RESULTS (MILS)

Higher profit driven by receivables growth -- volume and mix

Credit losses normalizing with higher charge-offs

Outlook for lower auction values drove unfavorable lease residual performance

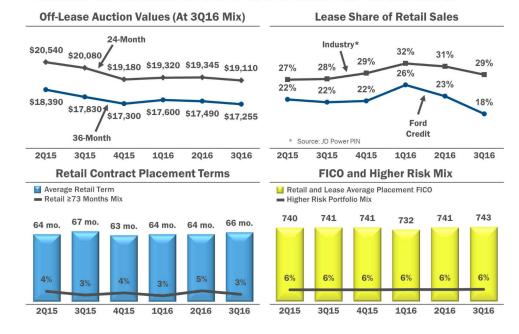

As shown above, Ford Credit's profit improvement of \$26 million in the third quarter of 2016 is explained primarily by favorable volume, mix, and market valuation adjustments to derivatives. Partial offsets include unfavorable lease residual performance and higher credit losses. The favorable volume and mix was driven by growth in all products globally.

Lease residual performance reflects higher depreciation in North America related to expected lower auction values in the lease portfolio.

Credit loss performance primarily reflects higher charge-offs as a result of higher defaults and severities in North America. Credit losses have been at historically low levels for quite some time, and we continued to see credit losses increase toward more normal levels.

#### FINANCIAL SERVICES SEGMENT - FORD CREDIT

## U.S. AUTOMOTIVE FINANCING TRENDS

Lower auction values reflect higher supply and higher new vehicle incentives

Reduced lease share reflects outlook on used vehicle values

Longer-term financing remained a small part of business

Leasing is a great trade cycle management product, but lease share must be managed carefully to protect residuals. Our leasing strategy considers many factors including share, term, model mix, and geography to optimize sales, share, profits, and residuals.

Over the last several years, we have seen industry lease share grow with rising industry volumes. As a result, the supply of off-lease vehicles is higher and will continue to grow for the next several years. The increased supply of used vehicles, along with higher new vehicle incentives, is resulting in lower auction values, particularly in smaller, more fuel efficient vehicles given low fuel prices. We expect this trend to continue, and we are planning for lower auction values going forward.

Given significant industry growth in leasing and higher new vehicle incentives, we lowered our projection on residual values which makes the relative cost of leasing higher. As a result, Ford Credit's lease share and lease placement volume in the third quarter of 2016 were lower compared to a year ago.

Ford Credit's off-lease vehicle auction values in the third quarter of 2016 were lower than a year ago and slightly lower than the prior quarter, with 36-month off-lease auction values about \$600 lower year-over-year. Ford Credit's auction performance has been consistent with the industry when comparing similar vehicle age and segment.

On longer-term financing, Ford Credit's average retail term remains largely unchanged from last year, and retail contracts of 73 months and longer continued to be a relatively small part of Ford Credit's business.

Finally, the average placement FICO score remained consistent with the second quarter and the same period last year, reflecting Ford Credit's consistent underwriting practices.

#### **ALL OTHER**

All Other is a combination of operating segments that did not meet the quantitative thresholds in this reporting period to qualify as reportable segments. All Other consists of our Central Treasury Operations (formerly Other Automotive) and Ford Smart Mobility LLC.

The Central Treasury Operations segment is primarily engaged in decision making for investments, risk management activities, and providing financing for the Automotive segment. Interest income (excluding interest earned on our extended service contract portfolio that is included in our Automotive segment), interest expense, gains and losses on cash equivalents and marketable securities, and foreign exchange derivatives associated with intercompany lending are included in the results of Central Treasury Operations. The underlying assets and liabilities, primarily cash and cash equivalents, marketable securities, debt, and derivatives, remain with the Automotive segment.

Ford Smart Mobility LLC is a new subsidiary formed to design, build, grow, and invest in emerging mobility services. Designed to compete like a start-up company, Ford Smart Mobility LLC will design and build mobility services on its own, and collaborate with start-ups and tech companies.

Our third quarter 2016 All Other pre-tax results were a loss of \$223 million, a \$60 million greater loss compared with a year ago. This increase is more than explained by higher net interest expense and net losses on cash equivalents and marketable securities.

#### **SPECIAL ITEMS**

As detailed in Note 3 of the Notes to the Financial Statements, special items are reflected as a separate reconciling item, as opposed to allocating them among the Automotive segment, Financial Services segment, and All Other. This reflects the fact that management excludes these items from its review of operating segment results for purposes of measuring segment profitability and allocating resources.

Our pre-tax and tax special items were as follows:

## TOTAL COMPANY SPECIAL ITEMS

(Mils, except amounts per share data)	3Q				YTD				/lemo:	
	2015		2016		2015		2016		F	Y 2015

#### **TAXES**

Our tax provision in the third quarter and first nine months of 2016 was \$426 million and \$2.5 billion, respectively, resulting in an effective tax rate of 30.7% and 31.9%, respectively.

Our third quarter and first nine months 2016 adjusted effective tax rate, which excludes special items, was 25.9% and 29.1%, respectively, 7.4 and 5 percentage points lower than a year ago. The lower adjusted effective tax rates through the first nine months of 2016 reflect tax benefits from legislation enacted December 18, 2015 making permanent the U.S. research and development tax credit.

#### LIQUIDITY AND CAPITAL RESOURCES

Auto cash and liquidity balances strong

Ford Credit well capitalized with strong liquidity; balance sheet self liquidating

Funded pensions largely funded

#### **Automotive Segment**

Liquidity. One of our key priorities is to finance our plan and maintain a strong balance sheet, while at the same time having resources available to grow our core business and invest in emerging opportunities. Based on our planning assumptions, we believe that we have sufficient liquidity and capital resources to continue to invest in new products and services that customers want and value, transform and grow our business, pay our debts and obligations as and when they come due, pay a sustainable dividend, and provide protection within an uncertain global economic environment.

Our key balance sheet metrics include cash, cash equivalents, and marketable securities (collectively, "Automotive cash"), Automotive liquidity, which includes Automotive cash and total available committed credit lines, and cash net of debt.

At September 30, 2016, we had \$24.3 billion of Automotive cash, of which 85% was held by consolidated entities domiciled in the United States. We target to have an average ongoing Automotive cash balance of about \$20 billion. We expect to have periods when we will be above or below this amount due to (i) future cash flow expectations, such as for pension contributions, debt maturities, capital investments, or restructuring requirements, (ii) short-term timing differences, and (iii) changes in the global economic environment.

Our Automotive cash investments primarily include U.S. Department of Treasury obligations, federal agency securities, bank time deposits with investment-grade institutions, corporate investment-grade securities, commercial paper rated A-1/P-1 or higher, and debt obligations of a select group of non-U.S. governments, non-U.S. governmental agencies, and supranational institutions. The average maturity of these investments ranges from about 90 days to up to about one year, and is adjusted based on market conditions and liquidity needs. We monitor our Automotive cash levels and average maturity on a daily basis.

Total available committed Automotive credit lines (including local lines available to foreign affiliates)

<sup>\*\*</sup> See "GAAP Reconciliations to Non-GAAP Financial Measures" section for Managed Receivables GAAP reconciliation and "Liquidity and Capital Resources" section for Managed Leverage GAAP reconciliation.

<sup>\*\*\*</sup> Balances at September 30, 2016 reflect net underfunded status at December 31, 2015, updated for service and interest cost, expected return on assets, separation expense, actual benefit payments, and cash contributions. The discount rate and rate of expected return assumptions are unchanged from year-end 2015

In addition to our target Automotive cash balance, we also target to maintain a corporate credit facility for our Automotive business of about \$10 billion to protect against exogenous shocks. Our corporate credit facility is discussed below. We assess the appropriate long-term target for total Automotive liquidity, comprised of Automotive cash and the corporate credit facility, to be about \$30 billion, which is an amount we believe is sufficient to support our business priorities and to protect our business. At September 30, 2016, we had \$35.2 billion of Automotive liquidity. Our Automotive cash and Automotive liquidity targets could be reduced over time based on improved operating performance and changes in our risk profile.

Changes in Automotive Cash. Changes in Automotive cash are summarized below (in billions):

## AUTOMOTIVE SEGMENT CASH FLOW

(Bils)	3Q 2016	YTD 2016
Cash at end of period	\$ 24.3	\$ 24.3
Cash at beginning of period	27.2	23.6
Change in Cash	\$ (2.9)	\$ 0.7
Automotive Segment pre-tax profits	\$ 1.1	\$ 7.4
Capital spending	(1.7)	(4.9)
Depreciation and tooling amortization	1.2	3.4
Changes in working capital	(1.2)	0.1
All Other and timing differences	(1.4)	(1.1)
Automotive operating cash flow	\$ (2.0)	\$ 4.9
Separation payments		(0.2)
Transactions with other segments	(0.1)	(0.1)
Other, including acquisitions and divestitures		
Cash flow before other actions	\$ (2.1)	\$ 4.6
Changes in debt		(0.2)
Funded pension contributions	(0.2)	(8.0)
Dividends / Other items	(0.6)	(2.9)
Change in Cash	\$ (2.9)	\$ 0.7

Negative 3Q operating cash flow due to unfavorable working capital and timing / other changes

Full year capital spending projected at about \$7B

Dividend payments of \$600M in the quarter

Now expect full year pension contributions of \$1.2 billion

In managing our Automotive business, we classify changes in Automotive cash into operating, and other items. Operating items include: Automotive segment pre-tax profits, capital spending, which we report as an operating cash flow as it is a key contributor to our Automotive segment financial results, depreciation and tooling amortization, changes in working capital, and All Other and timing differences. Other items include: separation payments, transactions with other segments, acquisitions and divestitures, changes in Automotive debt, contributions to funded pension plans, and dividends paid to shareholders.

Third quarter 2016 Automotive operating cash flow was \$2 billion negative, primarily reflecting the impact of lower production and dealer stocks on working capital and timing differences. First nine months 2016 Automotive operating cash flow was a strong \$4.9 billion positive, more than explained by Automotive segment pre-tax profit.

Third quarter 2016 capital spending was \$1.7 billion, and first nine months 2016 capital spending was \$4.9 billion. Full year 2016 capital spending is expected to be about \$7 billion. Based on expected cash flows and the identification of additional opportunities for profitable growth, the ongoing amount of capital spending to support product development, growth, restructuring, and infrastructure is expected to increase to about \$9 billion annually by 2020.

With respect to "Changes in working capital," in general we carry relatively low Automotive segment trade receivables compared with our trade payables because the majority of our Automotive wholesales are financed (primarily by Ford Credit) immediately upon sale of vehicles to dealers, which generally occurs at the time the vehicles are gate-released shortly after being produced. In addition, our inventories are lean because we build to order, not for inventory. In contrast, our Automotive trade payables are based primarily on industry-standard production supplier payment terms generally ranging between 30 days to 45 days. As a result, our cash flow tends to improve as wholesale volumes increase, but can deteriorate significantly when wholesale volumes drop sharply. These working capital balances generally are subject to seasonal changes that can impact cash flow. For example, we typically experience cash flow timing differences associated with inventories and payables due to our annual summer and December shutdown periods, when production, and therefore inventories and wholesale volumes, are usually at their lowest levels, while payables continue to come due and be paid. The net impact of this typically results in cash outflows from changes in our working capital balances during these shutdown periods.

Available Credit Lines. Total committed Automotive credit lines at September 30, 2016 were \$11.9 billion, consisting of \$10.4 billion of our corporate credit facility and \$1.5 billion of local credit facilities available to non-U.S. Automotive affiliates. At September 30, 2016, the utilized portion of the corporate credit facility was about \$40 million, representing amounts utilized for letters of credit. At September 30, 2016, the utilized portion of local credit facilities was about \$1 billion.

Lenders under our corporate credit facility have commitments to us totaling \$13.4 billion, with 75% of the commitments maturing on April 30, 2021 and 25% of the commitments maturing on April 30, 2019. We have allocated \$3 billion of commitments to Ford Credit on an irrevocable and exclusive basis to support its growth and liquidity. Any borrowings by Ford Credit under the corporate credit facility would be guaranteed by us.

The corporate credit facility is unsecured and free of material adverse change conditions to borrowing, restrictive financial covenants (for example, interest or fixed charge coverage ratio, debt-to-equity ratio, and minimum net worth requirements), and credit rating triggers that could limit our ability to obtain funding. The corporate credit facility contains a liquidity covenant that requires us to maintain a minimum of \$4 billion in aggregate of domestic cash, cash equivalents, and loaned and marketable securities and/or availability under the facility. If our senior, unsecured, long-term debt does not maintain at least two investment grade ratings from Fitch, Moody's, and S&P (each as defined under "Credit Ratings" below), the guarantees of certain subsidiaries will be required.

*Debt.* Total Automotive debt at September 30, 2016 was \$13.1 billion, which is about \$300 million higher than it was at December 31, 2015. The increase primarily reflects local funding in international markets and foreign currency exchange, offset partially by debt repayments.

Leverage. We manage Automotive debt levels with a leverage framework to maintain strong, investment grade credit ratings through a normal business cycle. The leverage framework includes a ratio of Automotive debt, underfunded pension liabilities, operating leases, and other adjustments, divided by Automotive income before income tax, adjusted for depreciation, amortization, interest expense on Automotive debt, and other adjustments. Ford Credit's leverage is calculated as a separate business as described in the Liquidity - Financial Services section of Item 2. Ford Credit is self-funding and its debt, which is used to fund its operations, is separate from our Automotive debt.

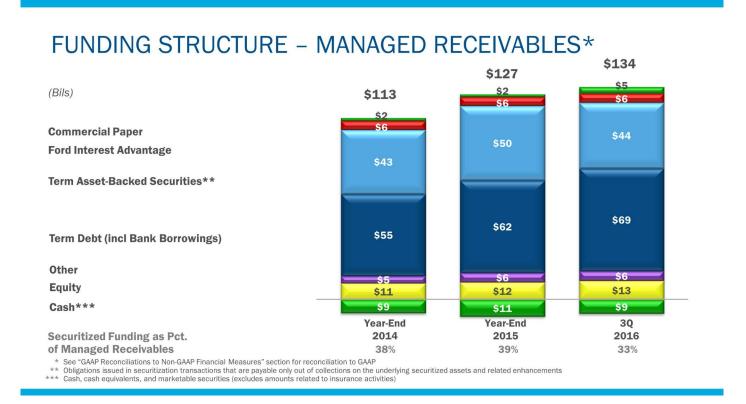

#### **Financial Services Segment**

#### Ford Credit

Funding Overview. Ford Credit's primary funding and liquidity objective is to maintain a strong investment grade balance sheet with ample liquidity to support its financing activities and growth under a variety of market conditions, including short-term and long-term market disruptions. Ford Credit's funding strategy remains focused on diversification, and it plans to continue accessing a variety of markets, channels, and investors.

Ford Credit's liquidity profile continues to be diverse, robust, and focused on maintaining liquidity levels that meet its business and funding requirements. Ford Credit regularly stress tests its balance sheet and liquidity to ensure that it continues to meet its financial obligations through economic cycles.

The following chart shows the trends in funding for Ford Credit's managed receivables:

Ford Credit's managed receivables of \$134 billion at the end of the third quarter of 2016 were funded primarily with term debt and term asset-backed securities. Securitized funding as a percent of managed receivables was 33%.

Ford Credit expects the mix of securitized funding to trend lower over time. The calendarization of the funding plan may result in quarterly fluctuations of the securitized funding percentage. Ford Credit expects this mix to be higher in the fourth quarter.

*Public Term Funding Plan.* The following chart shows Ford Credit's issuances for full-year 2014 and 2015, planned issuances for full-year 2016, and its global public term funding issuances through October 26, 2016, excluding short-term funding programs:

## PUBLIC TERM FUNDING PLAN

			20	16	
	2014	2015		Through	
(Bils)	Actual	Actual	Forecast	October 26	
					Public term issuance
Unsecured					nearly complete
- Ford Motor Credit	\$8	\$11	\$9 - 10	\$9	VTD issuance weighted
- Ford Credit Canada	2	1	1-2	1	YTD issuance weighted
- FCE Bank	3	4	3 - 4	3	toward unsecured
- Rest of World*	0	0	1	0	Remain diversified
Total Unsecured**	\$13	\$17	<b>\$14 - 16</b>	\$14	across platforms and

Total Public**	\$28	\$30	\$26 - 29	\$26	

<sup>\*</sup> Includes issuance from Ford Automotive Finance (China), Ford Credit Mexico, Banco Ford (Brazil) and Ford Credit India

For 2016, Ford Credit now projects full-year public term funding in the range of \$26 billion to \$29 billion. Through October 26, 2016, Ford Credit has completed \$26 billion of public term issuance.

<sup>\*\*</sup> Numbers may not sum due to rounding

<sup>\*\*\*</sup> Includes public securitization transactions and Rule 144A offerings sponsored by Ford Motor Credit, Ford Credit Canada, FCE Bank and Ford Automotive Finance (China)

Liquidity. The following chart shows Ford Credit's liquidity sources and utilization:

## LIQUIDITY SOURCES

	Dec. 31,	Jun. 30,	Sep. 30,	
(Bils)	2015	2016	2016	
Liquidity Sources				
Cash*	\$11.2	\$11.6	\$9.2	
Committed ABS facilities**	33.2	36.0	35.6	Committed
Other unsecured credit facilities	2.3	2.7	2.4	Capacity
Ford corporate credit facility allocation	3.0	3.0	3.0	\$41.0 billion
Total liquidity sources	\$49.7	\$53.3	\$50.2	
Utilization of Liquidity				
Securitization cash***	\$(4.3)	\$(2.7)	\$(2.6)	
Committed ABS facilities	(20.6)	(16.2)	(14.3)	
Other unsecured credit facilities	(0.8)	(0.7)	(0.1)	
Ford corporate credit facility allocation	-	-	_	
Total utilization of liquidity	\$(25.7)	\$(19.6)	\$(17.0)	
Gross liquidity	\$24.0	\$33.7	\$33.2	
Adjustments***	(0.5)	0.1	0.1	
Net liquidity available for use	\$23.5	\$33.8	\$33.3	

Cash, cash equivalents, and marketable securities (excludes amounts related to insurance activities)

Ford Credit's liquidity available for use will fluctuate quarterly based on factors including near-term debt maturities, receivable growth, and timing of funding transactions. Ford Credit has a target of at least \$25 billion. As of September 30, 2016, Ford Credit's liquidity available for use was up \$9.8 billion from year-end 2015 and down \$500 million from second quarter 2016.

As of September 30, 2016, Ford Credit's liquidity remained strong at \$33.3 billion. Its sources of liquidity include cash, committed asset-backed facilities, unsecured credit facilities, and the corporate credit facility allocation. As of September 30, 2016, Ford Credit's liquidity sources including cash totaled \$50.2 billion, up \$500 million from year-end.

<sup>\*\*</sup>Committed asset-backed security ("ABS") facilities are subject to availability of sufficient assets, ability to obtain derivatives to manage interest rate risk, and exclude FCE access to the Bank of England's Discount Window Facility

\*\*\* Used only to support on-balance sheet securitization transactions

\*\*\*\* Adjustments include other committed ABS facilities in excess of eligible receivables and certain cash within FordREV available through future sales of receivables

Leverage. Ford Credit uses leverage, or the debt-to-equity ratio, to make various business decisions, including evaluating and establishing pricing for finance receivable and operating lease financing, and assessing its capital structure.

The following chart shows the calculation of Ford Credit's financial statement leverage and managed leverage (in billions, except for ratios):

### **LEVERAGE**

(Bils)	Dec. 31,	Jun. 30,	Sep. 30,
	2015	2016	2016
Leverage Calculation  Total debt*  Adjustments for cash**	\$ 119.6	\$ 126.3	\$ 123.5
	(11.2)	(11.6)	(9.2)
Adjustments for derivative accounting***  Total adjusted debt	(0.5) \$ 107.9	(1.3) \$ 113.4	\$ 113.3
Equity****	\$ 11.7	\$ 12.4	\$ 12.7
Adjustments for derivative accounting***  Total adjusted equity	\$ 11.4	\$ 12.0	(0.3) \$ 12.4
Financial statement leverage (to 1) (GAAP)	10.2	10.2	9.7
Managed leverage (to 1) (Non-GAAP)	9.5	9.4	9.2

<sup>\*</sup> Includes debt issued in securitization transactions and payable only out of collections on the underlying securitized assets and related enhancements. Ford Credit holds the right to receive the excess cash flows not needed to pay the debt issued by, and other obligations of, the securitization entities that are parties to those securitization transactions

Ford Credit plans its managed leverage by considering prevailing market conditions and the risk characteristics of its business. At September 30, 2016, financial statement leverage was 9.7:1, and managed leverage was 9.2:1. Managed leverage is above the targeted range of 8:1 to 9:1, but continues to trend toward the target range.

#### **Total Company**

Pension Plans - Underfunded Balances. As of September 30, 2016, our total Company pension underfunded status reported on our balance sheet was \$7 billion and reflects the net underfunded status at December 31, 2015 updated for service and interest cost, expected return on assets, separation expense, actual benefit payments, and cash contributions. The discount rate and rate of expected return assumptions are unchanged from year-end 2015, and the reported number does not reflect the impact from the decline in interest rates throughout 2016.

As a result of our pension de-risking strategy, the sensitivity of our funded status to changes in interest rates has been significantly reduced, especially in the United States. In Europe, however, where our de-risking is less advanced, lower Eurozone and U.K. bond yields will negatively impact our funded status. Based on our planning assumptions for asset returns, discount rates, and contributions, we expect a modest deterioration in our funded status at year-end 2016 compared to year-end 2015.

Cash, cash equivalents, and marketable securities (excludes amounts related to insurance activities)

<sup>\*\*\*</sup> Primarily related to market valuation adjustments to derivatives due to movements in interest rates. Adjustments to debt are related to designated fair value hedges and adjustments to equity are related to retained earnings

<sup>\*\*\*\*</sup> Shareholder's interest reported on Ford Credit's balance sheet

#### **Supplemental Financial Information**

The tables below provide supplemental consolidating financial information. The data is presented by our reportable segments, Automotive and Financial Services. All Other and Adjustments include our operating segments that did not meet the quantitative threshold to qualify as a reportable segment, eliminations of intersegment transactions, deferred tax netting, and special items (if applicable). See Note 3 of the Notes to the Financial Statements for information regarding our segments.

Selected Balance Sheet Information. The following tables provide supplemental balance sheet information, by segment, at September 30, 2016 (in millions):

#### **CREDIT RATINGS**

Our short-term and long-term debt is rated by four credit rating agencies designated as nationally recognized statistical rating organizations ("NRSROs") by the U.S. Securities and Exchange Commission:

- DBRS Limited ("DBRS");
- Fitch, Inc. ("Fitch");
- Moody's Investors Service, Inc. ("Moody's"); and
- Standard & Poor's Ratings Services, a division of McGraw Hill Financial ("S&P").

In several markets, locally-recognized rating agencies also rate us. A credit rating reflects an assessment by the rating agency of the credit risk associated with a corporate entity or particular securities issued by that entity. Rating agencies' ratings of us are based on information provided by us and other sources. Credit ratings assigned to us from all of the NRSROs are closely associated with their opinions on Ford. Credit ratings are not recommendations to buy, sell, or hold securities, and are subject to revision or withdrawal at any time by the assigning rating agency. Each rating agency may have different criteria for evaluating company risk and, therefore, ratings should be evaluated independently for each rating agency.

There have been no rating actions taken by these NRSROs since the filing of our Quarterly Report on Form 10-Q for the quarter ended June 30, 2016.

The following chart summarizes certain of the credit ratings and outlook presently assigned by these four NRSROs:

	NRSRO RATINGS									
		Ford			Ford Credit					
	Issuer Default / Corporate / Issuer Rating	Long-Term Senior Unsecured	Outlook / Trend	Long-Term Senior Unsecured	Short-Term Unsecured	Outlook / Trend	Minimum Long-Term Investment Grade Rating			
DBRS	BBB	BBB	Stable	BBB	R-2M	Stable	BBB (low)			
Fitch	BBB	BBB	Stable	BBB	F2	Stable	BBB-			
Moody's	N/A	Baa2	Stable	Baa2	P-2	Stable	Baa3			
S&P	BBB	BBB	Stable	BBB	A-2	Stable	BBB-			

#### **PRODUCTION VOLUMES**

The third quarter 2016 actual and fourth quarter 2016 forecast production volumes for our Automotive business units are as follows:

#### **AUTOMOTIVE SEGMENT**

## PRODUCTION VOLUMES

	2016						
(000)	3Q A	3Q Actual		3Q Actual 40		Forecast	
	Units	0 / (U) 2015	Units	0 / (U) 2015			
North America	699	(93)	700	(100)			
South America	88	3	77	10			
Europe	289	(88)	350	(43)			
Middle East & Africa	25	3	23	6			
Asia Pacific	412	71	480	52			
Total	1,513	(104)	1,630	(75)			

Planned production consistent with guidance

**Key drivers of 4Q YoY:** 

NA lower – matching production to demand and non repeat of F-150 stock build

EU lower – matching production to demand and projected impact of Brexit on industry

AP higher – new products and higher industry

Production volumes above include Ford brand and JMC brand vehicles produced by our unconsolidated affiliates.

#### OUTLOOK

#### **Business Environment**

Our view of the global business environment is as follows:

- Global growth outlook for 2016 remains modest at just under 3%
- Full year GDP outlook reduced for United States on weak first half data; consumer spending remains solid with vehicle sales at high plateau
- Europe growth steady; U.K. data improving after initial Brexit shock but tone heading into formal exit negotiations is driving a weaker sterling
- China growth still supported by consumer and services sector strength, with vehicle purchase tax reduction in place through year end
- Russia and Brazil economies show signs of bottoming out

#### 2016 Planning Assumptions and Key Metrics

Based on the current economic environment, our industry and GDP planning assumptions for 2016 include the following:

### INDUSTRY AND GDP PLANNING ASSUMPTIONS

		GDP Growth (Pc	t)		Industry (Mils)		
	2015	2016 Out	look	2015	2016 Out	look	Global GDP updated to low
		Prior	Present		Prior	Present	end of prior range
Global	3.1%*	2.9 - 3.3%*	2.9%*	88.2	90.0 - 92.0	91.1	Global industry volume
U.S.	2.6%	1.6%	1.6	17.8	17.8	17.8	gains in 2016 driven by China and Europe
Brazil	(3.8)%	(3.5)%	(3.5)%	2.6	2.1	2.0	Outlook for industry volume raised for China
Europe	1.2%	1.5%	1.5%	19.2	19.9	20.0	and Europe and reduced for Brazil
China	6.9%	6.7%	6.7%	23.5	25.7	26.1	- IOI DIULII

<sup>\*</sup> Global GDP growth measured at purchasing power parity (PPP) rates using latest World Bank weighting

All in all, we see some risks to global GDP growth as policy uncertainty, including Brexit negotiations, adds to existing weakness in global trade flows and business investment spending. This is offset partially by a steady consumer sector in most major markets. We are updating our global GDP guidance to 2.9%, the low end of our prior range. For industry volumes, we are providing upward adjustments for China and Europe, with a small downward adjustment for Brazil.

#### 2016 Business Unit and Total Company Guidance

## 2016 BUSINESS UNIT GUIDANCE

	2015 FY	2016 FY		FY 2016 FY		Memo:
	Results	Plan	Plan Outlook			
Automotive						
North America	\$9,345M	≈ 2015	Lower	\$7,045M		
<b>Operating Margin</b>	10.2%	9.5% or Higher	Lower*	10.1%		
South America	\$(832)M	Loss > 2015	On Track	\$(816)M		
Europe	259M	> 2015	On Track	1,039M		
Middle East & Africa	31M	≥ 2015	Lower	(231)M		
Asia Pacific	765M	> 2015	Lower	343M		
Ford Credit	2,086M	≥ 2015	Lower	1,481M		
All Other	(796)M	≈ \$(800)M	On Track	(573)M		

<sup>\*</sup> Higher than 9.5% excluding door latch recall

We continue to expect healthy returns from North America in 2016, with an operating margin in the 9% to 9.5% range. Excluding the door latch recall, the margin would exceed 9.5%, consistent with our original guidance for 2016. We continue to expect South America's loss to be greater in 2016 than in 2015. In Europe, we continue to expect a significantly higher profit in 2016 compared to last year. In Middle East & Africa, we continue to expect a loss in 2016 compared to the small profit we earned last year. In Asia Pacific, we continue to expect a lower profit in 2016 than last year, driven by adverse China industry pricing and unfavorable exchange. For the full year, we continue to expect Ford Credit's pre-tax profit to be about \$1.8 billion.

### 2016 COMPANY GUIDANCE

	2015 FY	2015 FY 2016 FY		Memo:	
	Results	Plan	Outlook	2016 YTD Results	
Total Company Adjusted Pre-Tax Results*	\$10.8B	≥ 2015	≈ \$10.2B	\$8.2B	
Adjusted EPS*	\$1.93	≥ 2015	Lower	\$1.46	
Automotive Segment Revenue	\$140.6B	≥ 2015	On Track	\$105.5B	
Automotive Segment Operating Margin	6.8%	≥ 2015	Lower	7.0%	
Automotive Segment Operating Cash Flow	\$7.3B	Strong, but < 2015	On Track	\$4.9B	
Adjusted Effective Tax Rate* (Pct)	28.6%	Low 30s	On Track	29.1%	

<sup>\*</sup> Excluding special items; see "GAAP Reconciliations to Non-GAAP Financial Measures" section for reconciliation to GAAP

## We Continue To Expect 2016 Full Year Adjusted Pre-Tax Profit To Be About \$10.2 Billion

Shown above is our 2016 Company Guidance, including guidance for total Company adjusted pre-tax results, which is a non-GAAP financial measure. We do not provide guidance on our net income, the comparable GAAP financial measure. Full-year net income will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year end, specifically pension and OPEB remeasurement gains and losses.

We have had a strong first nine months of the year, and we continue to expect 2016 full year total Company adjusted pre-tax profit to be about \$10.2 billion – an outcome that would be our second best since 2000.

#### GAAP RECONCILIATIONS TO NON-GAAP FINANCIAL MEASURES

The following charts show GAAP reconciliations of our Non-GAAP financial measures for: Adjusted Pre-Tax Profit, Adjusted Earnings Per Share, Adjusted Effective Tax Rate, and Ford Credit Managed Receivables. The GAAP reconciliation for Ford Credit Managed Leverage can be found in the Financial Services Segment section of "Liquidity and Capital Resources."

Other, primarily accumulated supplemental depreciation	0.1	0.3	0.4	0.7
Total managed receivables (Non-GAAP)	\$ 112.8	\$ 122.4	\$ 127.2	\$ 134.4

<sup>\*</sup> Includes finance receivables (retail and wholesale) sold for legal purposes and net investment in operating leases included in securitization transactions that do not satisfy the requirements for accounting sale treatment. These receivables and operating leases are reported on Ford Credit's balance sheet and are available only for payment of the debt issued by, and other obligations of, the securitization entities that are parties to those securitization transactions; they are not available to pay the other obligations of Ford Credit or the claims of Ford Credit's other creditors

#### **Risk Factors**

Statements included or incorporated by reference herein may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on expectations, forecasts, and assumptions by our management and involve a number of risks, uncertainties, and other factors that could cause actual results to differ materially from those stated, including, without limitation:

- Decline in industry sales volume, particularly in the United States, Europe, or China, due to financial crisis, recession, geopolitical events, or other factors;
- · Decline in Ford's market share or failure to achieve growth;
- Lower-than-anticipated market acceptance of Ford's new or existing products or services;
- Market shift away from sales of larger, more profitable vehicles beyond Ford's current planning assumption, particularly in the United States:
- An increase in or continued volatility of fuel prices, or reduced availability of fuel;
- Continued or increased price competition resulting from industry excess capacity, currency fluctuations, or other factors;
- Fluctuations in foreign currency exchange rates, commodity prices, and interest rates;
- · Adverse effects resulting from economic, geopolitical, or other events;
- Economic distress of suppliers that may require Ford to provide substantial financial support or take other measures to
  ensure supplies of components or materials and could increase costs, affect liquidity, or cause production constraints or
  disruptions;
- Work stoppages at Ford or supplier facilities or other limitations on production (whether as a result of labor disputes, natural or man-made disasters, tight credit markets or other financial distress, production constraints or difficulties, or other factors);
- Single-source supply of components or materials;
- · Labor or other constraints on Ford's ability to maintain competitive cost structure;
- Substantial pension and postretirement health care and life insurance liabilities impairing liquidity or financial condition;
- Worse-than-assumed economic and demographic experience for postretirement benefit plans (e.g., discount rates or investment returns);
- · Restriction on use of tax attributes from tax law "ownership change;"
- The discovery of defects in vehicles resulting in delays in new model launches, recall campaigns, or increased warranty costs:
- Increased safety, emissions, fuel economy, or other regulations resulting in higher costs, cash expenditures, and/or sales restrictions;
- Unusual or significant litigation, governmental investigations, or adverse publicity arising out of alleged defects in products, perceived environmental impacts, or otherwise;
- A change in requirements under long-term supply arrangements committing Ford to purchase minimum or fixed quantities of certain parts, or to pay a minimum amount to the seller ("take-or-pay" contracts);
- Adverse effects on results from a decrease in or cessation or clawback of government incentives related to investments;
- Inherent limitations of internal controls impacting financial statements and safeguarding of assets;
- Cybersecurity risks to operational systems, security systems, or infrastructure owned by Ford, Ford Credit, or a third-party vendor or supplier;
- Failure of financial institutions to fulfill commitments under committed credit and liquidity facilities;
- Inability of Ford Credit to access debt, securitization, or derivative markets around the world at competitive rates or in sufficient amounts, due to credit rating downgrades, market volatility, market disruption, regulatory requirements, or other factors:
- Higher-than-expected credit losses, lower-than-anticipated residual values, or higher-than-expected return volumes for leased vehicles;
- Increased competition from banks, financial institutions, or other third parties seeking to increase their share of financing Ford vehicles; and
- New or increased credit regulations, consumer or data protection regulations, or other regulations resulting in higher costs and/or additional financing restrictions.

We cannot be certain that any expectation, forecast, or assumption made in preparing forward-looking statements will prove accurate, or that any projection will be realized. It is to be expected that there may be differences between projected and actual results. Our forward-looking statements speak only as of the date of their initial issuance, and we do not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events, or otherwise. For additional discussion, see "Item 1A. Risk Factors" in our 2015 Form 10-K Report, as updated by our subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

#### **ACCOUNTING STANDARDS ISSUED BUT NOT YET ADOPTED**

The Financial Accounting Standards Board ("FASB") has issued the following standards, which are not expected to have a material impact (with the exception of standards 2016-02, 2016-09, and 2016-13) to our financial statements or financial statement disclosures:

Standard		Effective Date (a)
2014-15	Going Concern - Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern	December 31, 2016
2016-09	Stock Compensation - Improvements to Employee Share-Based Payment Accounting	January 1, 2017 (b)
2016-07	Equity Method and Joint Ventures - Simplifying the Transition to the Equity Method of Accounting	January 1, 2017
2016-06	Derivatives and Hedging - Contingent Put and Call Options in Debt Instruments	January 1, 2017
2016-05	Derivatives and Hedging - Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships	January 1, 2017
2016-16	Income Taxes - Intra-Entity Transfers of Assets Other Than Inventory	January 1, 2018
2016-15	Statement of Cash Flows - Classification of Certain Cash Receipts and Cash Payments	January 1, 2018
2016-04	Extinguishments of Liabilities - Recognition of Breakage for Certain Prepaid Stored-Value Products	January 1, 2018
2016-01	Financial Instruments - Recognition and Measurement of Financial Assets and Financial Liabilities	January 1, 2018
2014-09	Revenue - Revenue from Contracts with Customers	January 1, 2018 (b) (c)
2016-02	Leases	January 1, 2019 (b)
2016-13	Credit Losses - Measurement of Credit Losses on Financial Instruments	January 1, 2020 (b)

<sup>(</sup>a) Early adoption for each of the standards, except standard 2016-01, is permitted.

#### OTHER FINANCIAL INFORMATION

The interim financial information included in this Quarterly Report on Form 10-Q for the periods ended September 30, 2016 and 2015 has not been audited by PricewaterhouseCoopers LLP ("PwC"). In reviewing such information, PwC has applied limited procedures in accordance with professional standards for reviews of interim financial information. Readers should restrict reliance on PwC's reports on such information accordingly. PwC is not subject to the liability provisions of Section 11 of the Securities Act of 1933 for its reports on interim financial information, because such reports do not constitute "reports" or "parts" of registration statements prepared or certified by PwC within the meaning of Sections 7 and 11 of the Securities Act of 1933.

#### ITEM 3. Quantitative and Qualitative Disclosures About Market Risk.

#### Automotive

Foreign Currency Risk. The net fair value of foreign exchange forward contracts (including adjustments for credit risk), as of September 30, 2016, was an asset of \$791 million compared with an asset of \$322 million as of December 31, 2015. The potential decrease in fair value from a 10% adverse change in the underlying exchange rates, in U.S. dollar terms, would be \$2.7 billion at September 30, 2016, compared with \$2.2 billion at December 31, 2015.

Commodity Price Risk. The net fair value of commodity forward contracts (including adjustments for credit risk) as of September 30, 2016 was an asset of \$6 million, compared with a liability of \$24 million as of December 31, 2015. The potential decrease in fair value from a 10% adverse change in the underlying commodity prices, in U.S. dollar terms, would be \$53 million at September 30, 2016, compared with \$62 million at December 31, 2015.

<sup>(</sup>b) For additional information, see Note 2 of the Notes to the Financial Statements.

<sup>(</sup>c) The FASB has issued the following updates to the Revenue from Contracts with Customers standard: Accounting Standard Update ("ASU") 2015-14 (Deferral of the Effective Date), ASU 2016-08 (Principal versus Agent Considerations (Reporting Revenue Gross versus Net)), ASU 2016-10 (Identifying Performance Obligations and Licensing), and ASU 2016-12 (Narrow-Scope Improvements and Practical Expedients). We plan to adopt the new revenue guidance effective January 1, 2017.

#### **Financial Services**

Interest Rate Risk. To provide a quantitative measure of the sensitivity of its pre-tax cash flow to changes in interest rates, Ford Credit uses interest rate scenarios that assume a hypothetical, instantaneous increase or decrease of one percentage point in all interest rates across all maturities (a "parallel shiff"), as well as a base case that assumes that all interest rates remain constant at existing levels. The differences in pre-tax cash flow between these scenarios and the base case over a 12-month period represent an estimate of the sensitivity of Ford Credit's pre-tax cash flow. Under this model, Ford Credit estimates that at September 30, 2016, all else constant, such an increase in interest rates would increase its pre-tax cash flow by \$5 million over the next 12 months, compared with an increase of \$7 million at December 31, 2015. In reality, interest rate changes are rarely instantaneous or parallel and rates could move more or less than the one percentage point assumed in Ford Credit's analysis. As a result, the actual impact to pre-tax cash flow could be higher or lower than the results detailed above.

#### ITEM 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures. Mark Fields, our Chief Executive Officer ("CEO"), and Bob Shanks, our Chief Financial Officer ("CFO"), have performed an evaluation of the Company's disclosure controls and procedures, as that term is defined in Rule 13a-15(e) of the Securities Exchange Act of 1934, as amended ("Exchange Act"), as of September 30, 2016, and each has concluded that such disclosure controls and procedures are effective to ensure that information required to be disclosed in our periodic reports filed under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by SEC rules and forms, and that such information is accumulated and communicated to the CEO and CFO to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting. There were no changes in internal control over financial reporting during the quarter ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### Commissioners:

We are aware that our report dated October 27, 2016 on our review of interim financial information of Ford Motor Company (the "Company") for the three and nine month periods ended September 30, 2016 and September 30, 2015 and included in the Company's quarterly report on Form 10-Q for the quarter ended September 30, 2016 is incorporated by reference in the aforementioned Registration Statements.

Very truly yours,

/s/ PricewaterhouseCoopers LLP

PricewaterhouseCoopers LLP Detroit, Michigan

#### **CERTIFICATION**

- I, Mark Fields, certify that:
- 1. I have reviewed this Quarterly Report on Form 10-Q for the period ended September 30, 2016 of Ford Motor Company;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared:
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Dated: October 27, 2016 /s/ Mark Fields

Mark Fields

President and Chief Executive Officer

#### **CERTIFICATION**

#### I, Bob Shanks, certify that:

- 1. I have reviewed this Quarterly Report on Form 10-Q for the period ended September 30, 2016 of Ford Motor Company;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
