Notes to Condensed Financial Statement
(Unaudited)

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited condensed financial statements have been prepared in accordance with generally accepted accounting principles in the United States (GAAP) and applicable rules and regulations of the Securities and Exchange Commission regarding interim financial reporting. Certain information and note disclosures normally included in the financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations.

This is the first condensed financial statements of the Corporation.

The Corporation started to operation its business since October 6, 2014, and the Corporation started to test trading foreign exchange since November 17, 2014.

The condensed financial statements include the accounts of Lemont Inc. All intercompany balances and transactions have been eliminated.

The accompanying condensed financial statements reflect all normal recurring adjustments necessary to present fairly the financial position, results of operations, and cash flows for the periods.

Use of Estimates

Conformity with GAAP requires the use of estimates and judgments that affect the reported amounts in the condensed financial statements and accompanying notes.

These estimates form the basis for judgments we make about the carrying values of our

assets and liabilities, which are not readily apparent from other sources.

We base our estimates and judgments on historical information and on various other assumptions that we believe are reasonable under the circumstances.

GAAP requires us to make estimates and judgments in several areas, including, but not limited to, those related to revenue recognition, collectability of accounts receivable, contingent liabilities, fair value of financial instruments, fair value of acquired intangible assets and goodwill, useful lives of intangible assets and property and equipment, and income taxes.

These estimates are based on management's knowledge about current events and expectations about actions we may undertake in the future. Actual results could differ materially from those estimates.

Note 2. Acquisitions

The Corporation didn't have any acquisitions.

Note 3. Earnings per Share

Basic EPS is computed by dividing net income attributable to common stockholders by the weighted-average number of shares of our Class A common stock outstanding, adjusted for outstanding shares that are subject to repurchase.

For the calculation of diluted EPS, net income attributable to common stockholders for basic EPS is adjusted by the effect of dilutive securities, including awards under our equity compensation plans.

Diluted EPS attributable to common stockholders is computed by dividing the resulting net income attributable to common stockholders by the weighted-average number of fully diluted common shares outstanding. Basic and dilutive securities in our basic and diluted EPS calculation for from the October 6, 2014 to December 31, 2014.

Basic and diluted EPS are the same for each class of common stock because they are entitled to the same liquidation and dividend rights.

Note 10. Income Taxes

Our tax provision for interim periods is determined using an estimate of our annual effective tax rate, adjusted for discrete items arising in that quarter. In each quarter we update our estimate of the annual effective tax rate, and if our estimated annual tax rate

changes, we make a cumulative adjustment in that quarter. Our quarterly tax provision, and our quarterly estimate of our annual effective tax rate, are subject to significant volatility due to several factors, including our ability to accurately predict our income (loss) before provision for income taxes in multiple jurisdictions, including the portions of our share-based compensation that will not generate tax benefits, and the effects of acquisitions and the integration of those acquisitions. In addition, our effective tax rate can be more or less volatile based on the amount of income before provision for income taxes.

We are subject to taxation in the United States and various other state jurisdictions. We are under examination by the Internal Revenue Service (IRS). We remain subject to possible examinations or are undergoing audits in various other jurisdictions that are not anticipated to be material to our financial statements.

Although the timing of the resolution, settlement, and closure of any audit is highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years remaining that are subject to examination, we are unable to estimate the full range of possible adjustments to the balance of gross unrecognized tax benefits.

Note 11. As of December 31, 2014, a stock subscription receivable from Lansdale Inc was \$16,165, and it must be paid within two years after the registering statement would be effective.
