Breaking News: Northwater Resources, Inc. Announces Assay Results

VANCOUVER, British Columbia--(BUSINESS WIRE)--Aug. 7, 2006--Northwater Resources, Inc. is pleased to announce that further Geological work in its highly mineralized collapsed caldera (volcano) in Mexico has defined a highly mineralized structure with a strike length of 4 km with cross faulting extending a minimum of 1.5 km each side of the main mineralized zone. Every sample has contained both gold and silver values from everywhere on the property which is about 10,000 hectares.

About NWRS.PK

About Northwater is a mineral exploration and development company focused on advancing the Rio Mayo gold-silver-copper project in southern Sonora State, Mexico.
