Financial Crisis Inquiry Commission – Tips Submission

<http://www.fcic.gov/contact/>

Having just read a *New York Times* article about the misguided Senate Financial Regulatory Reform bill, I am contacting this Commission in hopes that you may have interest in learning about my theory regarding the root cause of the man caused disaster we refer to as the financial crisis of 2008.

I passed the Certified Public Accountant exam in 1992 and held an active Ohio CPA license until 2002. I have worked in accounting, finance, and treasury positions in the oil industry, technology industry, manufacturing industry, construction industry, and aerospace industry. I am also a Certified Treasury Professional. My degree is in Business Administration and Accounting from Washington and Lee University. I am also the product of a prestigious boarding school, Culver Military Academy. My diverse background and life experiences never prepared me for what transpired over the past five years. My life was dramatically disrupted and I have the need to share with you the crucial information that may help you and others get an understanding of the root cause of the financial crisis of 2008.

My theory involves some bizarre personal life experiences, but the sequence of events and timing of the financial crisis perfectly coincide. It involves my former employer, a global aerospace company, the Securities Exchange Commission, the Department of Justice's Federal Bureau of Investigation, the Department of Labor, a Sarbanes-Oxley complaint, Ohio Senator Voinovich, and my Congressman Michael Turner. It all started out as a seemingly harmless "community action alert" back in 2004. Most of the facts are public as my Freedom of Information Act request with the US Department of Labor was satisfied in the Fall of 2009. I had an extensive conversation with two SEC Enforcement staff shortly thereafter. The primary SEC Enforcement agent, Mr. William Scarborough, and I had established a relationship about my allegations beginning in 2007.

This Commission is in a far better position to review the facts and circumstances as they may relate to the man caused disaster we refer to as the financial crisis of 2008. The subject is a matter of intense controversy and has national security implications.

The discussion I wish to have with you is a personal confession of sorts. The "community action alert" was a manipulative scheme put into action by executives of the global aerospace company which at the time was my employer. I was a Risk and Control Specialist working to ensure compliance with Sarbanes-Oxley laws. The "community action alert" scheme spun out of control and many questions remain unasked. However, the underlying facts are truly compelling.

I would not go along with the scheme or play dumb as some had requested. I am ready to share, if you are willing to listen.

Please feel free to reply to this email or call me at the telephone number below.

Sincerely,

Joe Jefferis
