Comments regarding proposed changes to the regulations governing the trade of
Leveraged/Inverse Investments.

To whom it may concern,

I am a private citizen who trades stock on the public markets. I first began trading Leveraged/Inverse EFT's in 2010. These are important to me and provide trading opportunities that other stock and funds do not. I request that the SEC does not change the regulations that may restrict/regulate or otherwise alter my access to trade these funds.

I do agree that providing more information regarding these funds would be a benefit to traders in general.

I do not wish to have any government or private concern assessing my capability to trade these funds, especially if it impacts the timing of my trades. I have witnessed how these funds have performed over the last 9 years and am aware of their risks and benefits.

I would like to retain my freedom to trade in the public markets without government imposed limitations.

Please consider my opinion as stated above when reviewing the current proposition.

Sincerely,

Mr. R. C. Van den Berg.
