this govt agency has been sitting with its hands folded doing nothing while our financial markets are exploding. this govt agency allowed that horror to take place. they all should be fired since they are doing nothing to help america. of course, skanky slimy washington dc where lobbyists are running wild will do nothing to help america and is sending it on the road to ruin. over 80% of the us public believes the bush cheney administration is the worst in the history of america, causing destruction in every single avenue. this industry is not self-regulatory at all and when greed enters the picture you cannot allow anyone to be self regulatory. this industry needs the tightest control of all because the vultures in the industry will beat up poor people every day of the tweek and twice on sunday. they are greed personified and walking around. they have not one shred of honesty in them. govt controls on this industry need to have huge fines, where their houses are seized, their wife's bank accounts are seized, and their children's bank accounts and properties are seized. these people in this industry are vultures, pure and simple. and meanwhile the poor people in this nation and elsewhere cant even get a meal to eat and are living in their cars because they have no homes. anybody who lets this industry get away with this is sick and perverted..
