Subject: SEC File No. 4-500 protect shareholders

I encourage you to support this to prevent fraud and manipulation.

Pink Sheets has petitioned the SEC to cause the amendment of NASD Rule 3360 and require NASD broker dealers to maintain a record of total "short" positions in all customer and proprietary firm accounts in all publicly traded equity securities as well as report this information to the NASD for public dissemination of the short positions by security. The SEC's action is urgently needed to prevent fraudulent acts, expose market manipulation, promote fair principles of trade and protect investors.
