

May 17, 2005

Dear Sir/Madam: I am writing to voice our concern over the ability of short sellers operating in the OTC & Pink Sheet markets. We are a development company, listed on the Pinks and have been subjected to short sellers. These markets are excellent vehicles to raise legitimate capital for legitimate plans in their embryonic stage, but due to the lack of transparency the shorters are able to get away with decimating these companies stocks, creating an inability to finance their plans, create wealth for shareholders and create more employment.

We are requesting the SEC to amend **NASD Rule 3360** and **require NASD broker dealers to maintain a record of total "short" positions in all customer and proprietary firm accounts in all publicly traded equity securities as well as report this information to the NASD for public dissemination of the short positions by security. The SEC's action is urgently needed to prevent fraudulent acts, expose market manipulation, promote fair principles of trade and protect investors.**

Regards

Romeo (Ray) Prescott
