POLICY SUMMARY

This summary highlights the features and benefits of the policy, the risks that you should consider before purchasing a policy and the fees and charges associated with the policy and its benefits. More detailed information is included in the other sections of this prospectus which should be read carefully before you purchase the policy.

The Policy's Features and Benefits

Premium Payments

See Premium Payments, page 20.

- You choose when to pay and how much to pay.
 - You will need to pay sufficient premiums to keep the policy in force. Failure to pay sufficient premiums may cause your policy to lapse.
 - You cannot pay additional premiums after age 100 of the younger insured person.
 - We may refuse any premium that would disqualify your policy as life insurance under Section 7702 of the Internal Revenue Code.
 - We deduct tax charges and a sales charge from each premium payment and credit the remaining premium (the "net premium") to the variable account or the fixed account according to your instructions.
-

Free Look Period

See Free Look Period, page 22.

- During the free look period, you have the right to examine your policy and return it for a refund if you are not satisfied for any reason.
 - The free look period is generally ten days from your receipt of the policy, although certain states may allow more than ten days.
 - Generally, there are two types of free look refunds:
 - ▷ Some states require a return of all premium we have received; and
 - ▷ Other states require that we return your policy value plus a refund of all fees and charges deducted.
 - The length of the free look period and the free look refund that applies in your state will be stated in your policy.
 - During the free look period, your net premium will be allocated among the investment options you have selected unless your state requires a return of premium as the free look refund. In these states your net premium directed to the sub-accounts will be allocated to ING Liquid Asset Portfolio sub-account until after the free look period ends.
-

Death Benefits

See Death Benefits, page 29.

- Death benefits are paid if your policy is in force when the second of the insured people dies.
 - Until age 100 of the younger insured person, the amount of the death benefit will depend on which death benefit option is in effect when the second of the insured people dies.
 - There are two death benefit options available under your policy:
 - ▷ Option 1 - the base death benefit is the greater of the amount of basic insurance coverage you have selected or your policy value multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A; or
 - ▷ Option 2 - the base death benefit is the greater of the amount of basic insurance coverage you have selected plus your policy value or your policy value multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A.
 - After age 100 of the younger insured person, death benefit Option 1 will apply to all policies and the amount of basic insurance coverage selected will equal the amount of basic insurance coverage in effect on the policy anniversary nearest the younger insured person's 100th birthday plus the amount of coverage, if any, under the adjustable term insurance rider on that date.
 - We will reduce the death benefit proceeds payable under any death benefit option by any outstanding loans, accrued loan interest and unpaid fees and charges.
 - The death benefit is generally not subject to federal income tax if your policy continues to meet the federal income tax definition of life insurance.
-

No-Lapse and Death Benefit Guarantees	<ul style="list-style-type: none"> • Generally, your policy will not lapse as long as your policy value minus any surrender charge and any outstanding loan amount and accrued loan interest (the "surrender value") is enough to pay the periodic fees and charges when due. • However, during the first five policy years we guarantee that your policy will not lapse, regardless of its surrender value, provided you have paid the minimum annual premium during each of your first five policy years. • Additionally, a death benefit guarantee is available which provides that the basic insurance coverage under the policy will not lapse even if the surrender value is not enough to pay the periodic fees and charges when due. The death benefit guarantee is an optional benefit and may be selected only when you apply for the policy. • If you meet all the requirements, the death benefit guarantee lasts until the younger insured person reaches age 100. • To keep the death benefit guarantee in force, on any monthly processing date: <ul style="list-style-type: none"> ▷ Your cumulative premium payments minus any partial withdrawals, loans and accrued loan interest, must equal or exceed the sum of guarantee period monthly premium payments to the current monthly processing date; and ▷ Your policy value minus any outstanding loan amount and accrued loan interest (the "net policy value") must be allocated to at least five investment options and no more than 35% of your net policy value may be allocated to any one investment option. • During the death benefit guarantee period there is an additional monthly charge for the death benefit guarantee. • The death benefit guarantee may not be available in some states.
Temporary Insurance <i>See Temporary Insurance, page 22.</i>	<ul style="list-style-type: none"> • If you apply and qualify, we may issue temporary insurance equal to the total amount of insurance coverage for which you applied. • The maximum amount of temporary insurance is \$4.5 million, which includes other in-force coverage each insured person has with us. • Temporary insurance may not be available in all states.
Rider Benefits <i>See Additional Insurance Benefits, page 35.</i>	<ul style="list-style-type: none"> • Your policy may include additional insurance benefits, attached by rider. There are two types of rider benefits: <ul style="list-style-type: none"> ▷ Optional rider benefits that you must select before they are effective; and ▷ Rider benefits that automatically come with your policy. • In many cases, we deduct an additional monthly charge for these benefits. • Not all riders may be available under your policy or in your state.
Investment Options <i>See The Investment Options, page 16.</i>	<ul style="list-style-type: none"> • You may allocate your net premiums to the Security Life Separate Account S-L1 (the "variable account") and to our fixed account. • The variable account is one of our separate accounts and consists of sub-accounts which invest in corresponding funds. When you allocate premiums to a sub-account, we invest any net premiums in shares of the corresponding fund. • Your variable account value will vary with the investment performance of the funds and the charges we deduct from your variable account value. • The fixed account is part of our general account and consists of all of our assets other than those in our separate accounts (including the variable account) and loan account. • We credit interest of at least 3.00% per year on amounts allocated to the fixed account, and we may, in our sole discretion, credit interest in excess of this amount.
Transfers <i>See Transfers, page 42.</i>	<ul style="list-style-type: none"> • You currently may make an unlimited number of transfers between the sub-accounts and to the fixed account each policy year. Transfers are, however, subject to any limits, conditions and restrictions that we or the funds whose shares are involved may impose. • There are certain restrictions on transfers from the fixed account. • We do not charge for transfers.

Dollar Cost Averaging	<ul style="list-style-type: none"> • Dollar cost averaging is a systematic program of transferring policy values to selected sub-accounts of the variable account. It is intended to help reduce the risk of investing too much when the price of a fund's shares is high. It also helps to reduce the risk of investing too little when the price of a fund's shares is low. • Dollar cost averaging does not assure a profit nor does it protect you against a loss in a declining market. • There are certain conditions on participation in the dollar cost averaging program, but there is no charge to participate in the dollar cost averaging program.
<i>See Dollar Cost Averaging, page 42.</i>	
Automatic Rebalancing	<ul style="list-style-type: none"> • Automatic rebalancing is a systematic program through which your variable and fixed account values are periodically reallocated among your selected investment options to maintain the allocation percentages you have chosen. • Automatic rebalancing does not assure a profit nor does it protect you against a loss in a declining market. • There are certain conditions on participation in the automatic rebalancing program, but there is no charge to participate in the automatic rebalancing program.
<i>See Automatic Rebalancing, page 43.</i>	
Loans	<ul style="list-style-type: none"> • After the first policy month, you may take loans against your policy's surrender value. • A loan must be at least \$100 and is generally limited to your surrender value less the periodic fees and charges to your next policy anniversary. • When you take a loan from your policy we transfer an amount equal to your loan to the loan account as collateral for your loan. The loan account is part of our general account. • We credit amounts held in the loan account with interest at an annual rate no less than 4.00%. • We also charge interest on loans. Interest is due in arrears on each policy anniversary and accrues daily at a current annual rate of 4.00% for preferred loans and 6.00% for non-preferred loans. • After the eleventh policy year, the first loan each year up to 10% of the net policy value is a preferred loan. Beginning in the twenty-first policy year, all loans and outstanding loan balances are preferred loans. • Loans reduce your policy's death benefit and may cause your policy to lapse. • Loans may have tax consequences, and you should consult with a tax adviser before taking a loan from your policy.
<i>See Loans, page 41.</i>	
Partial Withdrawals	<ul style="list-style-type: none"> • After the first policy year, you may take up to 12 partial withdrawals each policy year. In certain circumstances you may take partial withdrawals during the first policy year. • A partial withdrawal must be at least \$100 and may not exceed the amount which leaves your surrender value less than \$500. • We currently charge a fee of 2.00% of the amount withdrawn, up to \$25 for each partial withdrawal. • Partial withdrawals may reduce the amount of basic and total insurance coverage under your policy and will reduce your policy value. • Partial withdrawals may also have tax consequences, and you should consult with a tax adviser before taking a partial withdrawal from your policy.
<i>See Partial Withdrawals, page 45.</i>	
Surrenders	<ul style="list-style-type: none"> • You may surrender your policy for its surrender value at any time before the death of the second of the insured people. • Your surrender value is your policy value minus any surrender charge and your outstanding loan amount and accrued loan interest. • Surrender charges apply for the first fourteen years of each segment of basic insurance coverage. For most ages surrender charges are level for the first five years then decrease each year to zero at the beginning of the fifteenth year. The surrender charge is made up of two parts: an administrative surrender charge and a sales surrender charge. • The administrative surrender charge is a dollar amount for each \$1,000 of basic insurance coverage selected based on the joint equivalent age of the insured people and the policy or segment year. • The sales surrender charge is a percentage of surrender target premium based on the joint equivalent age and gender of the insured people.
<i>See Surrender, page 48.</i>	

Surrenders (Continued)	<ul style="list-style-type: none"> • If you decrease your basic insurance coverage, surrender charges are assessed against the policy value. If there are multiple coverage segments, the decrease and surrender charges will be processed on a pro rata basis. • If the surrender charge exceeds your net policy value, there will be no proceeds paid to you upon surrender. • All insurance coverage ends on the date we receive your surrender request. • If you surrender your policy it cannot be reinstated. • Surrendering the policy may have tax consequences, and you should consult with a tax adviser before surrendering your policy.
Reinstatement See <i>Reinstatement</i> , page 49.	<ul style="list-style-type: none"> • You may reinstate your policy (other than the death benefit guarantee) and riders within five years of lapse if you still own the policy and did not surrender it and the insured people are still insurable. • You will need to pay the required reinstatement premium. • If you had an outstanding loan when coverage lapsed, we will reinstate it with accrued loan interest to the date of the lapse. • When we reinstate your policy, we reinstate the surrender charges for the amount and time remaining when your policy lapsed. • A policy that is reinstated more than 90 days after lapsing may be considered a modified endowment contract for tax purposes. • Reinstating your policy may have tax consequences, and you should consult with a tax adviser before reinstating your policy.

Factors You Should Consider Before Purchasing a Policy

The decision to purchase a policy should be discussed with your agent/registered representative. Make sure you understand the policy's investment options, its other features and benefits, its risks and the fees and charges you will incur. Consider, among others, the following matters.

Life Insurance Coverage	<ul style="list-style-type: none"> • The policy is not a short-term savings vehicle and should be purchased only if you need life insurance coverage. Evaluate your need for life insurance coverage before purchasing a policy. • You should purchase a policy only if you intend and have the financial capability to keep the policy in force for a substantial period of time.
Fees and Charges See <i>Fees and Charges</i> , page 23.	<ul style="list-style-type: none"> • In the early policy years the surrender charge may exceed the policy value because the surrender charge may be more than the cumulative premiums minus policy fees and charges. Therefore, you should purchase a policy only if you intend and have the financial capability to keep the policy in force for a substantial period of time. • The policy's fees and charges reflect the costs associated with its features and benefits, the services we render, the expenses we expect to incur and the risks we assume under the policy. • We believe that the policy's fees and charges, in the aggregate, are reasonable, but before purchasing a policy you should compare the value that these various features, benefits and services have to you, given your particular circumstances, with the fees and charges associated with those features, benefits and services.
Lapse See <i>Lapse</i> , page 48.	<ul style="list-style-type: none"> • Your policy may lapse and your insurance coverage under the policy may terminate if on any monthly processing date: <ul style="list-style-type: none"> ▷ The no-lapse guarantee or the death benefit guarantee is not in effect; and ▷ Your surrender value is not enough to pay the periodic fees and charges when due. • If you meet these conditions, we will send you notice and give you a 61 day grace period to make a sufficient premium payment. • If you do not make a sufficient premium payment by the end of the 61 day grace period, your life insurance coverage will terminate and your policy will lapse without value. • Partial withdrawals and loans have an adverse impact on your surrender value. Before taking a partial withdrawal or loan consider its affect on your ability to keep your policy from lapsing.

Investment Risk	<ul style="list-style-type: none"> • You should evaluate the policy's long-term investment potential and risks before purchasing a policy. • For amounts you allocate to the sub-accounts of the variable account: <ul style="list-style-type: none"> ▷ Your values will fluctuate with the markets, interest rates and the performance of the underlying funds; ▷ You assume the risk that your values may decline or may not perform to your expectations; ▷ Your policy could lapse without value or you may be required to pay additional premium because of poor fund performance; ▷ Each fund has various investment risks, and some funds are riskier than others; ▷ You should read each fund's prospectus and understand the risks associated with the fund before allocating your premiums to its corresponding sub-account; and ▷ There is no assurance that any fund will achieve its stated investment objective. • For amounts you allocate to the fixed account: <ul style="list-style-type: none"> ▷ Interest rates we declare will change over time; and ▷ You assume the risk that interest rates may decline, although never below the guaranteed minimum annual rate of 3.00%.
Exchanges See <i>Purchasing a Policy</i> , page 19.	<ul style="list-style-type: none"> • Replacing your existing life insurance policy(ies) with the policy described in this prospectus may not be beneficial to you. • Before purchasing a policy, determine whether your existing policy(ies) will be subject to fees or penalties upon surrender or cancellation. • Also compare the fees, charges, coverage provisions and limitations, if any, of your existing policy(ies) with those of the policy described in this prospectus.
Taxation See TAX CONSIDERATIONS, page 50.	<ul style="list-style-type: none"> • Under current federal income tax law, death benefits of life insurance policies generally are not subject to income tax. In order for this treatment to apply, the policy must qualify as a life insurance contract. We believe it is reasonable to conclude that the policy will qualify as a life insurance contract. • Assuming the policy qualifies as a life insurance contract under current federal income tax law, your policy earnings are generally not subject to income tax as long as they remain within your policy. Depending on your circumstances, however, the following events may have tax consequences for you: <ul style="list-style-type: none"> ▷ Reduction in the amount of your insurance coverage; ▷ Partial withdrawals; ▷ Loans; ▷ Surrender; ▷ Lapse; and ▷ Reinstatement. • In addition, if your policy is a modified endowment contract, a partial withdrawal, surrender or a loan against or secured by the policy will may cause income taxation to the extent of any gain in the policy. A penalty tax may be imposed on a distribution from a modified endowment contract as well. • There is always the possibility that the tax treatment of the policy could be changed by legislation or otherwise. You should consult a tax adviser with respect to legislative developments and their effect on the policy. • Consult with a qualified legal or tax adviser before you purchase a policy.
Sales Compensation	<ul style="list-style-type: none"> • We pay compensation to broker/dealers who sell the policy. • Broker/dealers may be able to choose to receive their compensation under various payment options, but their choice will not affect the fees and charges you will pay for the policy.
Other Products	<ul style="list-style-type: none"> • We and our affiliates offer other insurance products which may have different features, benefits, fees and charges. These other products may better match your needs. • Contact your agent/registered representative if you would like information about these other products.

Fees and Charges

The following tables describe the fees and charges you will pay when buying, owning and surrendering the policy.

Transaction Fees and Charges The following table describes the fees and charges deducted at the time you buy the policy, make a partial withdrawal, surrender your policy, or request an excess illustration. **See *Fees and Charges - Transaction Fees and Charges*, page 23.**

Charge	When Deducted	Amount Deducted
Tax Charges	<ul style="list-style-type: none"> Deducted when you make a premium payment. 	<ul style="list-style-type: none"> 2.50% of each premium payment for state and local taxes. 1.50% of each premium payment for estimated federal income tax treatment of deferred acquisition costs.
Sales Charge	<ul style="list-style-type: none"> Deducted when you make a premium payment. 	<ul style="list-style-type: none"> 4.00% of premium up to target premium in segment years 1-10, and lower thereafter; plus. 2.00% of premium above target premium.
Partial Withdrawal Fee	<ul style="list-style-type: none"> Deducted when you take a partial withdrawal. 	<ul style="list-style-type: none"> 2.00% of the amount withdrawn, up to \$25.
Surrender Charge ¹	<ul style="list-style-type: none"> Deducted during the first fourteen segment years when you surrender your policy, decrease your basic insurance coverage, take a partial withdrawal which decreases your basic insurance coverage or allow your policy to lapse. 	<p>Administrative Surrender Charge -</p> <ul style="list-style-type: none"> \$2 per \$1,000 of basic insurance coverage. <p>Sales Surrender Charge -</p> <ul style="list-style-type: none"> Minimum rates - \$1.39 per \$1,000 of basic insurance coverage. Maximum rates - \$56.39 per \$1,000 of basic insurance coverage. Rates for representative insured people - \$8.89 per \$1,000 of basic insurance coverage. The representative insured people are a male and female, age 50 in the preferred no tobacco risk class.
Excess Illustration Fee	<ul style="list-style-type: none"> Deducted each time you request an illustration after the first each policy year. 	<ul style="list-style-type: none"> \$25 - maximum. \$0 - current.

¹ The surrender charge rates shown are for the first policy year. The sales surrender charge rates are based on the age and genders of the insured people. The rates for the representative insured people listed above may be more or less than you will pay, and you should contact your agent/registered representative for information about the rates that apply to you. Surrender Charge rates remain level for the first five years then decrease at the beginning of each year to zero at the beginning of the fifteenth year.

Periodic Fees and Charges The following table describes the fees and charges deducted each day or each month on the monthly processing date, not including fund fees and expenses. See *Fees and Charges - Periodic Fees and Charges*, page 26.

Charge	When Deducted	Amount Deducted
Cost of Insurance Charge ²	<ul style="list-style-type: none"> On the monthly processing date. 	<ul style="list-style-type: none"> Minimum Rates per \$1,000 of basic insurance coverage - <ul style="list-style-type: none"> \$0.01 - current and guaranteed. Maximum Rates per \$1,000 of basic insurance coverage - <ul style="list-style-type: none"> \$2.71 - current. \$15.58 - guaranteed. Rates for representative insured people per \$1,000 of basic insurance coverage - <ul style="list-style-type: none"> \$0.01 - current and guaranteed. The representative insured people are a male and female, age 50 in the preferred no tobacco risk class.
Mortality & Expense Risk Charge ³	<ul style="list-style-type: none"> Daily and included in the daily unit value calculation. 	<ul style="list-style-type: none"> 0.002% daily (0.90% annually) of policy value invested in the variable account.
Policy Charge	<ul style="list-style-type: none"> On the monthly processing date. 	<ul style="list-style-type: none"> \$15 per month in policy years 1-10, and lower thereafter.
Administrative Charge	<ul style="list-style-type: none"> On the monthly processing date. 	<ul style="list-style-type: none"> \$0.09 per \$1,000 of basic insurance coverage (or total insurance coverage, if greater) up to \$212.50 in policy years 1-10, and lower thereafter.
Death Benefit Guarantee Charge (if selected)	<ul style="list-style-type: none"> On the monthly processing date. 	<ul style="list-style-type: none"> \$0.005 per \$1,000 of basic insurance coverage during the guarantee period.
Loan Interest Charge	<ul style="list-style-type: none"> Accrues daily but is due in arrears on each policy anniversary. 	<ul style="list-style-type: none"> 6.00% per annum of the loan amount for non-preferred loans. 4.00% per annum of the loan amount for preferred loans.

² The cost of insurance rates shown are for the first policy year. The rates have been rounded to the nearest penny. Consequently, the actual rates are either more or less than these rounded rates. The rates that apply to you depend on the amount of your basic insurance coverage and the insured people's ages, genders, policy duration and risk classes and generally increase each year after the first segment year. Different cost of insurance rates will apply to each segment of basic insurance coverage. The rates for the representative insured people listed above may be more or less than you will pay, and you should contact your agent/registered representative for information about the rates that apply to you.

³ The daily mortality and expense risk charge rate has been rounded to the nearest one thousandth of one percent. See *Periodic Fees and Charges - Mortality and Expense Risk Charge*, page 26 for the daily rate without rounding.

Optional Rider Fees and Charges The following table describes the charges deducted if you elect any of the optional rider benefits. See *Fees and Charges - Optional Rider Fees and Charges*, page 28.

Rider	When Deducted	Amount Deducted
Adjustable Term Insurance Rider ⁴	<ul style="list-style-type: none"> On the monthly processing date. 	<ul style="list-style-type: none"> Minimum Rates per \$1,000 of rider benefit - <ul style="list-style-type: none"> \$0.01 - current and guaranteed. Maximum Rates per \$1,000 of rider benefit - <ul style="list-style-type: none"> \$1.36 - current. \$19.47 - guaranteed. Rates for representative insured people per \$1,000 of rider benefit - <ul style="list-style-type: none"> \$0.01 - current and guaranteed. The representative insured people are a male and female age 50 in the preferred no tobacco risk class.
Single Life Term Insurance Rider ⁵	<ul style="list-style-type: none"> On the monthly processing date. 	<ul style="list-style-type: none"> Minimum Rates per \$1,000 of rider benefit - <ul style="list-style-type: none"> \$0.02 - current \$0.11 - guaranteed. Maximum Rates per \$1,000 of rider benefit - <ul style="list-style-type: none"> \$8.29 - current. \$12.75 - guaranteed. Rates for representative insured person per \$1,000 of rider benefit - <ul style="list-style-type: none"> \$0.10 - current. \$0.38 - guaranteed. The representative insured person is a male, age 45 in the preferred no tobacco risk class.

⁴ The rates shown are for the first policy year and have been rounded to the nearest penny. Consequently, the actual rates are either more or less than these rounded rates. The rates for this rider depend on the insured people's ages, genders, risk classes and policy duration and generally increase each year after the first policy year. The rates for the representative insured people listed above may be more or less than you will pay, and you should contact your agent/registered representative for information about the rates that apply to you.

⁵ The rates shown are for the first policy year and have been rounded to the nearest penny. Consequently, the actual rates are either more or less than these rounded rates. The rates for this rider depend on the insured person's age, gender, risk class and policy duration and generally increase each year after the first policy year. The rates for the representative insured person listed above may be more or less than you will pay, and you should contact your agent/registered representative for information about the rates that apply to you.

Fund Fees and Expenses. The following table shows the minimum and maximum fund fees and expenses that you may pay during the time you own the policy. These may change from year to year. You should review the fund prospectuses for details about the fees and charges specific to a particular fund.

Annual Total Fund Expenses (expenses deducted from fund assets)

	<u>Minimum</u>	<u>Maximum</u>
Total Gross Annual Fund Expenses ⁶	0.28%	2.40%
Total Net Annual Fund Expenses ^{6, 7}	0.28%	2.40%

⁶ Total Annual Fund Expenses include management fees, distribution (12b-1) fees and other expenses.

⁷ The Total Net Annual Fund Expense figures take into account contractual arrangements that require reimbursement or waiver of certain fund fees and expenses at least through October 1, 2005. Out of all funds available through the policy, one has a contractual arrangement to reimburse or waive certain fees and expenses through this period. Generally, these arrangements provide that fees and expenses will be reimbursed or waived above a certain levels for a specific period of time. See the Fund Expense Table below for more detailed information about these contractual arrangements. The minimum and maximum Total Net Annual Fund Expenses shown take into account all of the available funds, not just those with contractual arrangements.

Fund Expense Table.¹ The following table shows the investment advisory fees and other expenses charged annually by each fund. Fund fees are one of the factors that impact the value of a fund share. To learn about additional factors, please see the fund prospectuses. **See also *Fees and Charges - Fund Fees and Expenses*, page 28.** The following figures are a percentage of the average net assets of each fund as of December 31, 2003.

Fund Name	Management Fees	Distribution (12b-1) Fees	Other Expenses	Total Gross Annual Fund Expenses	Fees and Expenses Waived or Reimbursed	Total Net Annual Fund Expenses
Alger American Growth Portfolio - Class O Shares	0.75%	--	0.10%	0.85%	--	0.85%
Alger American Leveraged AllCap Portfolio - Class O Shares	0.85%	--	0.12%	0.97%	--	0.97%
Alger American MidCap Growth Portfolio - Class O Shares	0.80%	--	0.13%	0.93%	--	0.93%
American Funds Insurance Series - Growth Fund - Class 2	0.37%	0.25%	0.02%	0.64%	N/A	0.64%
American Funds Insurance Series - Growth - Income Fund - Class 2	0.33%	0.25%	0.01%	0.59%	N/A	0.59%

¹ We may receive compensation from each of the funds or their affiliates based on an annual percentage of the average net assets held in that fund by the company. The percentage paid may vary from one fund to another. For certain funds, some of this compensation may be paid out of 12b-1 fees or service fees that are deducted from fund assets. Any such fees deducted from fund assets are disclosed in this Fund Expense Table and the fund prospectuses. We may also receive additional payments for administrative, recordkeeping or other services which we provide to the funds or their affiliates or as an incentive for us to make the funds available through the policy. These additional payments are not disclosed in this Fund Expense Table and do not increase, directly or indirectly, the fees and expenses shown below. **See Fees and Charges - Fund Fees and Expenses on page 28 for additional information.**

² The table above shows the estimated operating expenses for Class I Shares of each Portfolio as a ratio of expenses to average daily net assets. These estimates, unless otherwise noted, are based on each Portfolio's actual operating expenses for its most recently completed fiscal year, as adjusted for contractual changes, if any.

- ³ Through a "bundled fee" arrangement, Directed Services, Inc. (DSI), the Trust's manager, is paid a single fee for advisory, administrative, custodial, transfer agency, auditing and legal services necessary for the ordinary operation of the Portfolio. The Portfolios would bear any extraordinary expenses.
- ⁴ Because the Class I Shares of these Portfolios had not had a full year's performance during the fiscal year ended December 31, 2003, expenses are estimated based on the expenses of the Portfolio's Class S Shares for the most recently completed fiscal year.
- ⁵ Because the Class I Shares of these Portfolios had not commenced operations prior to December 31, 2003, the Portfolios' fiscal year end, expenses are estimated based on the expenses of the Portfolio's Class S Shares for the most recently completed fiscal year.
- ⁶ A portion of the brokerage commissions that the Portfolios pay is used to reduce each Portfolio's expenses. Including these reductions and the MFS voluntary management fee waiver the "Total Net Annual Fund Expenses" for the year ended December 31, 2003 would have been 0.89% for ING JPMorgan Small Cap Equity, 0.80% for ING Legg Mason Value, 0.77% for ING Marsico Growth, 0.61% for ING MFS Mid Cap Growth, 0.59% for ING MFS Research, 0.64% for ING MFS Total Return, and 0.68% for ING T. Rowe Price Capital Appreciation and ING T. Rowe Price Equity Income Portfolios. This arrangement may be discontinued at any time.
- ⁷ The table above shows the estimated operating expenses for Class S Shares of each Portfolio as a ratio of expenses to average daily net assets. These estimates, unless otherwise noted, are based on each Portfolio's actual operating expenses for its most recently completed fiscal year, as adjusted for contractual changes, if any. "Other Expenses" shown in the table above includes a Shareholder Service Fee of 0.25%.
- ⁸ DSI has voluntarily agreed to waive a portion of its management fee for certain Portfolios. Including these waivers, the "Total Net Annual Fund Expenses" for the year ended December 31, 2003, would have been 0.64% for ING MFS Mid Cap Growth and ING MFS Research Portfolios and 0.65% for ING MFS Total Return Portfolio. This arrangement may be discontinued by DSI at any time.
- ⁹ Because the Portfolio is new, expenses, shown above, are estimated.
- ¹⁰ "Management Fees" have been restated to reflect a decrease from 0.90% to 0.85% effective May 1, 2004. Effective November 8, 2004, this Portfolio will be renamed ING Van Kampen Equity and Income Portfolio, and effective December 1, 2004, the "Management Fees" and "Other Expenses" will be reduced to 0.55% and 0.02%, respectively.
- ¹¹ The Administrator of the Fund has contractually agreed to waive all or a portion of its administrative services fees and/or reimburse administrative expenses through April 30, 2005. Including these waivers and/or reimbursements, the "Total Net Annual Fund Expenses" would have been 0.88%. For further information regarding the fee waivers and/or reimbursements, see the Portfolio's prospectus.
- ¹² The table above shows the estimated operating expenses for Class I shares of each Portfolio as a ratio of expenses to average daily net assets. These estimates are based on each Portfolio's actual operating expenses for its most recently completed fiscal year and fee waivers to which the Portfolio's investment adviser has agreed for each Portfolio.
- ¹³ ING Investments, LLC, the investment adviser to each Portfolio, entered into written expense limitation agreements with each Portfolio under which it will limit expenses of the Portfolios, excluding interest, brokerage and extraordinary expenses, subject to possible recoupment by the adviser within three years. The amount of each Portfolio's expenses waived, reimbursed or recouped during the last fiscal year by the adviser is shown under "Fees and Expenses Waived or Reimbursed" in the table above. The expense limit for each Portfolio is shown as "Total Net Annual Fund Expenses" in the table above. For each Portfolio, the expense limits will continue through at least December 31, 2004. For further information regarding the expense limitation agreements, see the Fund's prospectus.
- ¹⁴ The above table shows the estimated operating expenses for Class I shares of each Portfolio as a ratio of expenses to average daily net assets. These estimates are based on each Portfolio's actual operating expenses for its most recently completed fiscal year, as adjusted for contractual changes, if any, and fee waivers to which the Portfolio's investment adviser has agreed for each Portfolio.

- ¹⁵ ING Funds Services, LLC receives an annual administration fee equal to 0.10% of average daily net assets which is included in Other Expenses in the above table. Estimated Other Expenses are based on each Portfolio's actual Other Expenses for its most recently completed fiscal year.
- ¹⁶ ING Investments, LLC, the investment adviser to each Portfolio, has entered into a written expense limitation agreement with each Portfolio under which it will limit expenses of the Portfolio, excluding interest, taxes, brokerage and extraordinary expenses, subject to possible recoupment by the adviser within three years. The amount of each Portfolio's expenses waived, reimbursed or recouped during the last fiscal year by the adviser was 0.24% for the ING VP MagnaCap Portfolio, and 0.17% for the ING VP SmallCap Opportunities Portfolio". Including these waivers and/or reimbursements, the "Total Net Annual Fund Expenses" would have been 0.90% for the ING VP MagnaCap Portfolio, and 0.90% for the ING VP SmallCap Opportunities Portfolio. For each Portfolio except ING VP MidCap Opportunities Portfolio, the expense limits will continue through at least December 31, 2004. For ING VP MidCap Opportunities Portfolio, the expense limits will continue through at least December 31, 2005. For further information regarding the expense limitation agreements, see the Fund's prospectus.
- ¹⁷ "Other Expenses," "Total Gross Annual Fund Expenses" and "Total Net Annual Fund Expenses" in the above table exclude a one-time merger fee of 0.05% incurred in connection with the merger of another investment company into ING VP MagnaCap Portfolio.
- ¹⁸ The table above shows the estimated operating expenses for Class I shares of each Portfolio as a ratio of expenses to average daily net assets. These estimates are based on each Portfolio's actual operating expenses for its most recently completed fiscal year and fee waivers to which the Portfolio's investment adviser has agreed for each Portfolio.
- ¹⁹ ING Investments, LLC, the investment adviser to each Portfolio, entered into written expense limitation agreements with each Portfolio under which it will limit expenses of the Portfolios, excluding interest, brokerage and extraordinary expenses, subject to possible recoupment by the adviser within three years. The amount of each Portfolio's expenses waived, reimbursed or recouped during the last fiscal year by the adviser was 0.04% for the ING Strategic Allocation Balanced Portfolio and 0.09% for the ING Strategic Allocation Income Portfolio. Including these waivers and/or reimbursements, the "Total Net Annual Fund Expenses" would have been 0.70% for the ING Strategic Allocation Balanced Portfolio and 0.65% for the ING Strategic Allocation Income Portfolio. For each Portfolio, the expense limits will continue through at least December 31, 2004. For further information regarding the expense limitation agreements, see the Portfolio's prospectus.
- ²⁰ The Fund has adopted new forms of administrative services and transfer agency agreements which were effective May 1, 2004. As a result, "Other Expenses" have been restated to reflect the changes in fees under the new agreements.
- ²¹ The Fund's advisor is entitled to receive reimbursement from the Fund for fees and expenses paid for by the Fund's advisor pursuant to expense limitation commitments between the Fund's advisor and the Fund if such reimbursement does not cause the Fund to exceed its then-current expense limitations and the reimbursement is made within three years after the Fund's advisor incurred the expense.
- ²² As a result of a reorganization of another fund into the Fund, which occurred on April 30, 2004, the Fund's "Total Gross Annual Expenses" have been restated to reflect current expenses.
- ²³ The expenses in the table above do not reflect the contractual expense limitation in effect through May 1, 2005 under which Pioneer has agreed not to impose all or a portion of its management fee and, if necessary, to limit other ordinary operating expenses to the extent required to reduce Class I expenses to 1.25% (Pioneer Small Cap Value VCT Portfolio) of the average daily net assets attributable to Class I shares. If the expense limitation was reflected in the above table, the "Fees and Expenses Waived or Reimbursed" would have been 1.15% and the "Total Net Annual Fund Expenses" would have been 1.25%.

How the Policy Works

THE COMPANY, THE FIXED ACCOUNT AND THE VARIABLE ACCOUNT

Security Life of Denver Insurance Company

Prior to October 1, 2004, the policies were issued by Southland Life Insurance Company ("Southland Life"), an affiliate of Security Life and a wholly-owned indirect subsidiary of ING Groep N.V. ("ING"). Southland Life was a stock life insurance company organized in 1908 and incorporated under the laws of the State of Texas. On October 1, 2004, Southland Life merged with and into Security Life and Security Life assumed responsibility for Southland Life's obligations under the policies.

Security Life is a stock life insurance company organized in 1929 and incorporated under the laws of the State of Colorado. Security Life is admitted to do business in the District of Columbia and all states except New York. Our headquarters is at 1290 Broadway, Denver, Colorado 80203-5699. Security Life's consolidated financial statements appear in the Statement of Additional Information.

Security Life is a wholly-owned indirect subsidiary of ING. ING is a global financial institution active in the fields of insurance, banking and asset management. ING is headquartered in Amsterdam, The Netherlands.

The Investment Options

You may allocate your premium payments to any of the available investment options. These options include the fixed account and sub-accounts of the variable account. The investment performance of a policy depends on the performance of the investment options you choose.

The Fixed Account

In the policy the "fixed account" is referred to as the "Guaranteed Interest Division."

You may allocate all or a part of your net premium and transfer your net policy value into the fixed account. We declare the interest rate that applies to all amounts in the fixed account. This interest rate is never less than 3.00%. The credited interest rate will be in effect for an initial twelve-month period. Thereafter, the credited interest rate will be guaranteed for successive twelve-month periods at an interest rate current at that time. Interest compounds daily at an effective annual rate that equals the declared rate. We credit interest to the fixed account on a daily basis. We pay interest regardless of the actual investment performance of our general account. We bear all of the investment risk for the fixed account.

Your fixed account value equals the net premium you allocate to the fixed account, plus interest earned, minus amounts you transfer out or withdraw. It may be reduced by fees and charges assessed against your policy value.

The fixed account guarantees principal and is part of our general account. The general account supports our non-variable insurance and annuity obligations. We have not registered interests in the fixed account under the Securities Act of 1933, as amended ("1933 Act"). Also, we have not registered the fixed account or the general account as an investment company under the Investment Company Act of 1940, as amended ("1940 Act") (because of exemptive and exclusionary provisions). This means that the general account, the fixed account and interests in it are generally not subject to regulation under these Acts.

The SEC staff has not reviewed the disclosures in this prospectus relating to the general account and the fixed account. These disclosures, however, may be subject to certain requirements of the federal securities law regarding accuracy and completeness of statements made.

The Variable Account

Security Life Separate Account S-L1 (the "variable account") was originally established on February 25, 1994, under the laws of the State of Texas to hold the assets that underlie the policy. Prior to October 1, 2004, the variable account was known as Southland Separate Account L1. On October 1, 2004, Southland Separate Account L1 was transferred to Security Life in conjunction with the merger of Southland Life with and into Security Life and was renamed Security Life Separate Account S-L1. Security Life Separate Account S-L1 operates pursuant to the laws of the State of Colorado and is a unit investment trust, registered with the SEC under the 1940 Act.

In the policy the "variable account" is referred to as the "Separate Account."

We own all of the assets of the variable account and are obligated to pay all amounts due under a policy according to the terms of the policy. Income, gains and losses credited to, or charged against, the variable account reflect the investment experience of the variable account and not the investment experience of our other assets. Additionally, Colorado law provides that we cannot charge the variable account with liabilities arising out of any other business we may conduct. This means that if we ever became insolvent, the variable account assets will be used first to pay variable account policy claims. Only if variable account assets remain after these claims have been satisfied can these assets be used to pay owners of other policies and creditors.

The variable account is divided into sub-accounts. Each sub-account invests in a corresponding fund. When you allocate premium payments to a sub-account, you acquire accumulation units of that sub-account. You do not invest directly in or hold shares of the funds when you allocate premium payments to the sub-accounts of the variable account. **See Appendix B for a list of the funds available through the variable account along with information about each fund's investment adviser/subadviser, and investment objective. See the Fund Expense Table on page 11 for fund expense information.**

More detailed information about a fund, including information about the risks associated with investing in the fund, is located in the fund's prospectus. Read the fund prospectuses in conjunction with this prospectus, and retain the prospectuses for future reference.

A fund available through the variable account is not the same as a retail mutual fund with the same or similar name. Accordingly, the management, expenses and performance of a fund available through the variable account is likely to differ from a similarly named retail mutual fund.

Voting Privileges. We invest each sub-account's assets in shares of a corresponding fund. We are the legal owner of the fund shares held in the variable account, and we have the right to vote on certain issues. Among other things, we may vote on issues described in the fund's current prospectus or issues requiring a vote by shareholders under the 1940 Act.

Even though we own the shares, we give you the opportunity to tell us how to vote the number of shares attributable to your policy. We count fractional shares. If you have a voting interest, we send you proxy material and a form on which to give us your voting instructions.

Each fund share has the right to one vote. The votes of all fund shares are cast together on a collective basis, except on issues for which the interests of the funds differ. In these cases, voting is on a fund-by-fund basis.

Examples of issues that require a fund-by-fund vote are changes in the fundamental investment policy of a particular fund or approval of an investment advisory agreement.

We vote the shares in accordance with your instructions at meetings of the fund's shareholders. We vote any fund shares that are not attributable to policies and any fund shares for which the owner does not give us instructions in the same proportion as we vote the shares for which we did receive voting instructions.

We reserve the right to vote fund shares without getting instructions from policy owners if the federal securities laws, regulations or their interpretations change to allow this.

You may instruct us only on matters relating to the funds corresponding to the sub-accounts in which you have invested assets as of the record date set by the fund's Board for the shareholders meeting. We determine the number of fund shares in each sub-account of your policy by dividing your variable account value in that sub-account by the net asset value of one share of the matching fund.

Right to Change the Variable Account. Subject to state and federal law and the rules and regulations thereunder, we may, from time to time, make any of the following changes to our variable account with respect to some or all classes of policies:

- Change the investment objective;
- Offer additional sub-accounts which will invest in funds we find appropriate for policies we issue;
- Eliminate sub-accounts;
- Combine two or more sub-accounts;
- Substitute a new fund for a fund in which a sub-account currently invests. A substitution may become necessary if, in our judgment:
 - ▷ A fund no longer suits the purposes of your policy;
 - ▷ There is a change in laws or regulations;
 - ▷ There is a change in the fund's investment objectives or restrictions;
 - ▷ The fund is no longer available for investment; or
 - ▷ Another reason we deem a substitution is appropriate.
- In the case of a substitution, the new fund may have different fees and charges than the fund it replaced;
- Transfer assets related to your policy class to another separate account;
- Withdraw the variable account from registration under the 1940 Act;
- Operate the variable account as a management investment company under the 1940 Act;
- Cause one or more sub-accounts to invest in a fund other than, or in addition to, the funds currently available;
- Stop selling the policy;

- End any employer or plan trustee agreement with us under the agreement's terms;
- Limit or eliminate any voting rights for the variable account;
- Make any changes required by the 1940 Act or its rules or regulations; or
- Close a sub-account to new investments.

We will not make a change until it is effective with the SEC and approved by the appropriate state insurance departments, if necessary. We will notify you of changes. If you wish to transfer the amount you have in the affected sub-account to another sub-account or to the fixed account, you may do so free of charge. Just notify us at our customer service center.

DETAILED INFORMATION ABOUT THE POLICY

This prospectus describes our standard Survivor Dimensions variable universal life insurance policy. The policy provides death benefits, policy values and other features of traditional life insurance contracts. There may be variations in policy features, benefits and charges because of requirements of the state where we issue your policy. We describe all such differences in your policy.

If you would like to know about state variations, please ask your agent/registered representative. We can provide him/her with the list of variations that will apply to your policy.

Purchasing a Policy

The policy is no longer offered for sale to new purchasers.

To purchase a policy you must submit an application to us. On that application you will, among other things, select:

- The amount of your insurance coverage (your coverage generally must be at least \$250,000);
- Your initial death benefit option; and
- Any riders or optional benefits.

Additionally, on the application you will provide us with certain health and other necessary information.

On the date coverage under the policy begins (the "policy date"), the age of the two insured people on whose lives we issue the policy (the "insured people", each an "insured person") generally can be no more than age 85. "Age" or "joint equivalent age" under a policy means the sum of both insured people's ages adjusted for the differences in age and gender, divided by two and rounded down. An individual insured person's age is measured on their birthday nearest the policy date. The individual age of each insured person generally must be no more than 90 on the policy date. There is no maximum age difference between the two insured people.

The insured people must share some relationship and commonly include husband and wife; business partners; parent and child; grandparent and grandchild; and siblings. Upon the death of the second of the insured people we pay the death benefit.

From time to time, we may accept an insured person who exceeds our normal maximum age limit. We will not unfairly discriminate in determining the maximum age at issue. All exceptions to our normal limits are dependent upon our ability to obtain acceptable reinsurance coverage for our risk with an older insured. We may also set a minimum age to issue a policy.

You may request that we back-date the policy up to six months to allow the insured people to give proof of a younger age for the purposes of your policy.

Premium Payments

Premium payments are flexible and you may choose the amount and frequency of premium payments, within limits, including:

- We may refuse to accept any premium less than \$25;
- You cannot pay additional premiums after age 100 of the younger insured person;
- We may refuse any premium that would disqualify your policy as life insurance under Section 7702 of the Internal Revenue Code;
- We may refuse any premium that would cause your policy to become a modified endowment contract under Section 7702A of the Internal Revenue Code without your prior written acknowledgement accepting your policy as a modified endowment contract; and
- We may refuse to accept any premium that does not comply with our anti-money laundering program. **See *General Policy Provisions - Anti-Money Laundering*, page 58.**

After we deduct the tax charges and the sales charge from your premium payments, we apply the remaining premium (the "net premium") to your policy as described below.

A premium payment is received by us when it is received at our offices. After you have paid your initial premium, we suggest you send payments directly to us, rather than through your agent/registered representative, to assure the earliest crediting date.

Your initial premium must be at least equal to the sum of the scheduled premium from the policy date through the investment date. The investment date is the date we apply the net premium to your policy.

Scheduled Premium. You may select your scheduled (planned) premium (within our limits) when you apply for your policy. The scheduled premium, shown in your policy and schedule, is the amount you choose to pay over a stated time period. This amount may or may not be enough to keep your policy in force. You may receive premium reminder notices for the scheduled premium on a quarterly, semi-annual or annual basis. You are not required to pay the scheduled premium.

You can change the amount of your scheduled premium within our minimum and maximum limits at any time. If you fail to pay your scheduled premium or if you change the amount of your scheduled premium, your policy performance will be affected.

If you have the death benefit guarantee feature, your scheduled premium should not be less than the guarantee period annual premium shown in your policy. **See *Death Benefits - No-Lapse and Death Benefit Guarantees*, page 33.**

Unscheduled Premium Payments. Generally speaking, you may make unscheduled premium payments at any time, however:

- We may limit the amount of an unscheduled premium payment if it would result in an increase in the amount of the base death benefit required by the federal income tax law definition of life insurance. We may require satisfactory evidence that the insured people are insurable at the time that you make the unscheduled premium payment if the base death benefit is increased due to an unscheduled premium payment;
- We may require proof that at least one insured person is insurable if an unscheduled premium payment will cause the net amount at risk to increase; and
- We will return premium payments which would cause your policy to become a modified endowment contract, unless you have acknowledged in writing the new modified endowment contract status for your policy.

Target Premium. Target premium is not based on your scheduled premium. Target premium is actuarially determined based on the ages and genders of the insured people. The target premium is used to determine your sales charge and the sales compensation we pay. It may or may not be enough to keep your policy in force. You are not required to pay the target premium and there is no penalty for paying more or less. The target premium for your policy and additional segments is listed in your policy schedule pages.

Minimum Annual Premium. To qualify for the no-lapse guarantee, during each of your first five policy years you must pay at least the minimum annual premium shown in your policy.

See *Death Benefits - No-Lapse and Death Benefit Guarantees*, page 33.

We may reduce the minimum annual premium for group or sponsored arrangements, or for corporate purchasers.

Premium Payments Affect Your Coverage. Unless your policy is in the no-lapse guarantee period or you have the death benefit guarantee feature, your coverage lasts only as long as you have a positive surrender value which is enough to pay the fees and charges due each month. If you do not meet this requirement, your policy will enter a 61-day grace period and you must make a sufficient premium payment to keep your policy from lapsing. **See *Termination of Coverage - Lapse*, page 48.**

In the policy, the "no-lapse guarantee period" is referred to as the "Special Continuation Period."

During the no-lapse guarantee period, we guarantee that your policy and riders will not lapse regardless of your surrender value provided your cumulative premium payments, minus any partial withdrawals and any outstanding loan amount and accrued loan interest are at least equal to your minimum annual premium. **See *Death Benefits - No-Lapse and Death Benefit Guarantees*, page 33.**

If you have the death benefit guarantee, we guarantee that your policy will not lapse during the guarantee period provided your cumulative premium payments minus any partial withdrawals and any outstanding loan amount and accrued loan interest are at least equal to the guarantee period annual premium and your net policy value meets certain diversification requirements. **See *Death Benefits - No-Lapse and Death Benefit Guarantees*, page 33.**

Allocation of Net Premium. We apply the initial net premium to your policy after all of the following conditions have been met:

- We receive the required initial premium;
- All issue requirements have been received by our customer service center; and
- We approve your policy for issue.

Amounts you designate for the fixed account will be allocated to that account on the investment date. If your state requires return of your premium during the free look period, we initially invest amounts you have designated for the sub-accounts of the variable account in the sub-account which invests in the ING Liquid Asset Portfolio. We later transfer these amounts from this sub-account to your selected sub-accounts, based on your most recent premium allocation instructions, at the earlier of the following dates:

- Five days after the date we mailed your policy to you plus the length of your state free look period; or
- The date we receive your delivery receipt plus the length of your state free look period.

If your state provides for return of your policy value during the free look period (or provides no free look period), we allocate amounts you designated for the sub-accounts of the variable account directly into those sub-accounts.

All net premium we receive after the applicable period are allocated to your policy on the valuation date of receipt. We will use your most recent premium allocation instructions specified in percentages stated to the nearest tenth and totaling 100%.

Free Look Period

You have the right to examine your policy and return it to us (for any reason) within the period shown in the policy. The period during which you have this right is called the free look period and starts on the date you receive your policy. If you return your policy to us within the free look period, we cancel it as of your policy date.

If you cancel your policy during the free look period, you will receive a refund as determined by state law. Generally, there are two types of free look refunds:

- Refund of all premium we have received from you; or
- Refund of your policy value plus a refund of all charges deducted.

The type of refund that applies in your state will be specified in your policy. The type of free look refund will affect when premium received before the end of the free look period is allocated to the sub-accounts. **See Premium Payments - Allocation of Net Premium, page 21.**

Temporary Insurance

If you apply and qualify, we may issue temporary insurance in an amount equal to the amount of insurance coverage for which you applied, up to \$4.5 million, which includes other in-force coverage each insured person has with us.

Temporary insurance coverage begins when all of the following events have occurred:

- You have completed and signed our temporary insurance coverage form;
- We have received and accepted a premium payment of at least your scheduled premium (selected on your application); and
- The necessary parts of the application are complete.

Unless otherwise provided by state law, temporary insurance coverage ends on the earliest of:

- Five days after we mail the premium refund to the address on your application;
- Five days after we mail notice of termination to the address on your application;
- Your policy date;
- The date we refuse to issue a policy based on your application; or
- 90 days after you sign our temporary life insurance coverage form.

There is no death benefit under the temporary insurance coverage if any of the following events occur:

- There is a material misrepresentation in your answers on the temporary insurance coverage form;
- There is a material misrepresentation in statements on your application;
- The persons intended to be insured die by suicide or self-inflicted injury; or
- The bank does not honor your premium check or authorized withdrawal.

During the period of temporary insurance coverage your premium payments are held by us in a general suspense account until underwriting is completed and the policy is issued or the temporary insurance coverage otherwise ends. Premiums held in this suspense account do not earn interest and they are not allocated to the investment options available under the policy until a policy is issued. **See Premium Payments - Allocation of Net Premium, page 21.**

Fees and Charges

We deduct fees and charges under the policy to compensate us for:

- Providing the insurance benefits of the policy (including any rider benefits);
- Administering the policy;
- Assuming certain risks in connection with the policy; and
- Incurring expenses in distributing the policy.

The amount of a fee or charge may be more or less than the cost associated with the service or benefit. Accordingly, excess proceeds from one fee or charge may be used to make up a shortfall on another fee or charge, and we may earn a profit on one or more of these fees and charges. We may use any such profits for any proper corporate purpose, including, among other things, payment of sales expenses.

Transaction Fees and Charges

We deduct the following transaction fees and charges from your policy value each time you make certain transactions.

Tax Charges. We deduct 2.5% from each premium payment to cover the total average state and local taxes we expect to pay. We pay state and local taxes in most states. These taxes vary from state to state and from jurisdiction to jurisdiction.

We deduct 1.5% from each premium payment to cover our estimated costs for the federal income tax treatment of deferred acquisition costs. This cost is determined solely by the amount of life insurance premium we receive.

We may increase or decrease the charges for taxes, within limits, if there are changes in the tax rates or tax laws.

Sales Charge. We deduct a sales charge from each premium payment.

<u>Segment Year</u>	<u>Sales Charge Percentage</u>	
	<u>Up to Segment Target Premium</u>	<u>Above Segment Target Premium</u>
1-10	4.0%	2.0%
11+	2.0%	2.0%

When calculating your applicable sales charge, we allocate premium payments we receive after an increase in the amount of basic insurance coverage to your coverage segments in the same proportion as the target premium for each segment bears to the sum of the target premium for all segments.

This charge helps compensate us for the costs associated with selling the policies, including promotional, advertising and distribution expenses.

Partial Withdrawal Fee. We deduct a partial withdrawal fee each time you take a partial withdrawal from your policy. The amount of this fee is 2.00% of the amount withdrawn up to \$25. We deduct the partial withdrawal fee proportionately from your remaining fixed and variable account values.

This fee helps offset the expenses we incur when processing a partial withdrawal.

Surrender Charge. We deduct a surrender charge during the first fourteen segment years when you:

- Surrender your policy;
- Allow your policy to lapse;
- Decrease your basic insurance coverage; or
- Take a partial withdrawal which decreases the amount of your basic insurance coverage.

The amount of the surrender charge depends on the amount of basic insurance coverage surrendered or decreased and the surrender charge rates.

When you purchase a policy or increase your basic insurance coverage, we set surrender charge rates based on the genders and ages of the insured people. These surrender charge rates decline to zero in the fifteenth segment year. Each coverage segment will have its own set of surrender charge rates which will apply only to that segment. **See *Death Benefits - Changes in the Amount of Your Insurance Coverage*, page 29.** Surrender charge rates will not exceed \$58.39 per \$1,000 of basic insurance coverage and the rates that apply to you will be set forth in your policy. **See the *Fees and Charges - Transaction Fees and Charges* table on page 8 for the minimum and maximum surrender charge rates and the rates for representative insured people.**

The surrender charge is made up of two parts:

- An administrative surrender charge; and
- A sales surrender charge.

Administrative Surrender Charge

The administrative surrender charge varies by joint equivalent age at policy issue or when you add a new basic coverage segment:

<u>Administrative Surrender Charge per \$1,000 of Basic Insurance Coverage</u>		
<u>Year</u>	<u>Joint Equivalent Age</u>	
	<u>15 - 84</u>	<u>85</u>
1	\$2.00	\$2.00
2	\$2.00	\$2.00
3	\$2.00	\$2.00
4	\$2.00	\$2.00
5	\$2.00	\$2.00
6	\$1.90	\$1.90
7	\$1.80	\$1.80
8	\$1.70	\$1.70
9	\$1.60	\$1.60
10	\$1.50	\$1.50
11	\$1.40	\$1.40
12	\$1.30	\$1.30
13	\$1.20	\$1.20
14	\$1.00	\$0.00
15	\$0.00	\$0.00

If during the first 14 segment years you decrease your basic insurance coverage or take a partial withdrawal which causes your basic insurance coverage to decrease, we will assess an administrative surrender charge in the same proportion as the decrease in your basic insurance coverage.

We designed the administrative surrender charge to cover part of our administrative expenses, such as the expenses associated with:

- Processing applications;
- Establishing policy records;
- Underwriting; and
- Developing and operating our administrative systems.

Sales Surrender Charge

The sales surrender charge is a percentage of the standard target premium, that is the target premium for each coverage segment without substandard ratings. The percentage is based on the joint equivalent age of the insured people.

The maximum sales surrender charge is 100% of the standard target premium. For ages 15-77 the maximum charge applies for the first five segment years and then decreases by 10% each segment year thereafter reaching zero by segment year fifteen. For ages 78-85, the maximum sales surrender charge also decreases in percentage increments starting no later than segment year five and reaching zero by segment year fifteen. There is no sales surrender charge by segment year fifteen. **See the *Fees and Charges - Periodic Fees and Charges* table on page 9 for the minimum and maximum sales surrender charge rates and the rates for representative insured people.**

We do not determine standard target premium based on your scheduled premium. We determine standard target premium actuarially, based on the age and genders of the insured people. Your policy schedule shows the maximum sales surrender charge for your basic insurance coverage.

If your basic insurance coverage decreases, we reduce your target premium for each segment in the same proportion that we reduce your basic insurance coverage. We do not do this if the reduction is a result of a death benefit option change. In that case, we will provide you a new schedule page.

For full surrenders, you will receive the surrender value of your policy. For decreases in the amount of basic insurance coverage, the surrender charge will reduce your policy value. If there are multiple segments of basic insurance coverage, the coverage decreases and surrender charges assessed will be processed on a pro rata basis.

In the early policy years the surrender charge may exceed the policy value because the surrender charge may be more than the cumulative premiums minus policy fees and charges. Therefore, you should purchase a policy only if you intend and have the financial capability to keep the policy in force for a substantial period of time.

The surrender charge helps offset the expenses we incur in issuing and distributing the policy.

Excess Illustration Fee. We currently do not assess this fee, but we reserve the right to assess a fee of up to \$25 for each illustration of your policy values you request after the first each policy year.

This fee helps offset the costs we incur when processing requests for excess illustrations.

Periodic Fees and Charges

We deduct the following periodic fees and charges from your policy value each day or on the monthly processing date. The monthly processing date is the same date each month as your policy date. If that date is not a valuation date, then the monthly processing date is the next valuation date.

At any time you may choose one investment option from which we will deduct your periodic fees and charges. If you do not choose the investment option or the amount in your chosen investment option is not enough to cover the periodic fees and charges, then your periodic fees and charges are taken from the sub-accounts and fixed account in the same proportion that your value in each has to your net policy value.

Mortality and Expense Risk Charge. We deduct from your policy value a mortality and expense risk charge of 0.002466% (0.90% on an annual basis) of the amount you have invested in the sub-accounts. This charge is deducted each day as part of the calculation of the daily unit values for the sub-accounts and does not appear as a separate charge on your statement or confirmation.

This charge helps compensate us for the mortality and expense risks we assume when we issue a policy. The mortality risk is the risk that insured people, as a group, may live less time than we estimated. The expense risk is the risk that the costs of issuing and administering the policies and operating the sub-accounts of the variable account are greater than we estimated.

Policy Charge. Each month we deduct a policy charge of \$15 during the first ten policy years and \$9 each month thereafter.

This charge helps compensate us for the costs associated with:

- Processing applications;
- Conducting medical examinations;
- Establishing policy records; and
- Underwriting.

Administrative Charge. Each month we deduct an administrative charge equal to our current monthly administrative charge rates multiplied by the amount of your basic insurance coverage (or total insurance coverage, if greater) divided by 1,000. The rates apply to the first \$2.5 million of coverage. The rates decrease after the tenth policy year. The rates that apply to you will be set forth in your policy. **See the *Fees and Charges - Periodic Fees and Charges* table on page 9 for the minimum and maximum administrative charge rates and the rates for representative insured people.**

This charge helps offset the costs we incur in administering the policy, including costs associated with:

- Billing and collecting premiums;
- Processing claims and policy transactions;
- Keeping records;
- Reporting and communicating with policy owners; and
- Our overhead and other expenses.

Cost of Insurance. Each month we deduct a cost of insurance charge equal to our current monthly cost of insurance rates multiplied by the net amount at risk for each segment of your basic insurance coverage. The net amount at risk as calculated on each monthly processing date equals the difference between:

- Your current base death benefit, discounted to take into account one month's interest earnings at an assumed 3.00% annual interest rate; and
- Your policy value minus the periodic fees and charges due on that date, other than cost of insurance charges.
- Monthly cost of insurance rates are based on the insured people's ages, genders, risk classes and amount of insurance coverage on the policy date and each date you increase your insurance coverage (a "segment date") and the segment year. They will not, however, be greater than the guaranteed cost of insurance rates shown in the policy, which are based on the 1980 Commissioner's Standard Ordinary Sex Distinct Mortality Tables. The rates that apply to you will be set forth in your policy. **See the *Fees and Charges - Periodic Fees and Charges* table on page 9 for the minimum and maximum cost of insurance rates and the rates for the representative insured people.**

Separate cost of insurance rates apply to each segment of your insurance coverage and your riders. The maximum rates for the initial segment and each new segment of your insurance coverage will be printed in your policy schedule pages.

The cost of insurance charge varies from month to month because of changes in your net amount at risk, changes in your death benefit and the increasing age of the insured people. The net amount at risk is affected by the same factors that affect your policy value, namely:

- The net premium applied to your policy;
- The fees and charges we deduct;
- Any partial withdrawals you take;
- Interest earnings on the amounts allocated to the fixed account;
- Interest earned on amounts held in the loan account; and
- The investment performance of the funds underlying the sub-accounts of the variable account.

We calculate the net amount at risk separately for each segment of your insurance coverage. We allocate the net amount at risk to segments of the base death benefit in the same proportion that each segment has to the total base death benefit for all insurance coverage as of the monthly processing date.

There are no cost of insurance charges during the continuation of coverage period.

The cost of insurance charge compensates us for the ongoing costs of providing insurance coverage, including the expected cost of paying death benefit proceeds that may be more than your policy value.

Death Benefit Guarantee Charge. If you have the death benefit guarantee feature, each month during the guarantee period we deduct a death benefit guarantee charge of \$.005 per \$1,000 of basic insurance coverage. We guarantee that this charge will not exceed this rate.

This charge helps compensate us for the costs associated with providing the death benefit guarantee.

Optional Rider Fees and Charges

There may be separate fees and charges for optional rider benefits. **See the *Fees and Charges - Optional Rider Fees and Charges* table on page 10 and the *Additional Insurance Benefits - Optional Rider Benefits* section on page 28 for more information about the optional rider benefits and the applicable fees and charges.**

Waiver and Reduction of Fees and Charges

We may waive or reduce any of the fees and charges under the policy, as well as the minimum amount of insurance coverage set forth in this prospectus. Any waiver or reduction will be based on expected economies that result in lower sales, administrative or mortality expenses. For example, we may expect lower expenses in connection with sales to:

- Certain groups or sponsored arrangements (including our employees, employees of our affiliates, our appointed sales agents and certain family members of each of these groups of individuals);
- Corporate purchasers;
- Our policyholders or the policyholders of our affiliated companies, or
- Certain groups or individuals who purchase the policy through investment professionals who charge a fee for their services.

Any variation in fees and charges will be based on differences in costs or services and our rules in effect at the time. We may change our rules from time to time, but we will not unfairly discriminate in any waiver or reduction.

Fund Fees and Expenses

Each fund deducts management fees from the amounts invested in the fund. In addition, certain funds deduct a distribution or 12b-1 fee which is used to finance any activity that is primarily intended to result in the sale of fund shares, and certain funds deduct a service fee which is used to compensate service providers for administrative and policy owner services provided on behalf of the funds. A fund's management fees, distribution (12b-1) fees, as applicable and other expenses are set by the fund and may change from year to year. They are deducted from the fund's assets and are not direct charges against a sub-account's assets or policy values. Rather, they are included when each underlying fund computes its net asset value, which is the share price used to calculate the unit values of the sub-accounts. **See the Fund Expense Table on page 11 for details about each fund's management fees, distribution (12b-1) fees, other expenses and total annual fund expenses.**

In addition to the fees and charges shown in the Fund Expense Table, we may, from time to time, receive other compensation from the funds or their affiliates. For example, the funds or their affiliates may make cash payments or provide expense reimbursements to us as an incentive for us to include the funds among the investment options available under the policy and to provide certain services to policy owners that relate to the investment options. More specifically, we may receive compensation from the investment advisers, administrators or distributors of the funds in connection with administrative, distribution, or other services and cost savings experienced by the investment advisers, administrators or distributors of the funds. It is anticipated that such compensation will be based on assets of the particular funds attributable to the policy. Some funds or their affiliates pay us more than others and some of the amounts we receive may be significant. The payments and expense reimbursements made to us by the funds do not increase, directly or indirectly, the expenses shown in the Fund Expense Table.

For a more complete description of the funds' fees and expenses, review each fund's prospectus.

Each of the funds or their affiliates pays us compensation for recordkeeping, administration or other services. The amount of compensation is usually based on the aggregate assets of the fund from policies that we issue or administer. Some funds or their affiliates pay us more than others and some of the amounts we receive may be significant.

Death Benefits

As a joint and survivor universal life insurance policy, your policy has a joint nature to the death benefit. We do not pay death benefit proceeds until the death of the second of the insured people. The death benefit is calculated as of the date of death of the second of the insured people.

You decide the amount of life insurance protection you need, now and in the future. Generally, we require a minimum of \$250,000 in insurance coverage to issue your policy. If you have coverage under the adjustable term insurance rider, the minimum basic coverage amount is \$100,000 as long as the total coverage is at least \$250,000. We may lower this minimum for certain group, sponsored or corporate purchasers. The amount of insurance coverage in effect on your policy date is your initial coverage segment.

In the policy the amount of insurance coverage you select is referred to as the "Face Amount."

You can combine the long-term advantages of permanent life insurance with the flexibility and short-term advantages of term life insurance through the policy. The base policy provides the permanent element of your coverage. The adjustable term insurance rider provides the term insurance element of your coverage.

It may be to your economic advantage to include part of your insurance coverage under the adjustable term insurance rider. The adjustable term insurance rider has no cash value, however, and provides no growth potential. Both the cost of insurance under the term insurance rider and the cost of insurance under the base policy are deducted monthly from your policy value and generally increase with the ages of the insured people.

Changes in the Amount of Your Insurance Coverage

Subject to certain limitations, you may change the amount of your insurance coverage after the first policy year (first monthly processing date for an increase). The change will be effective on the next monthly processing date after we receive your written request.

Changes in the amount of your insurance coverage must be for at least \$1,000.

A coverage segment or segment is a block of insurance coverage. A requested increase in basic insurance coverage will cause a new coverage segment to be created. Once we create a new segment, it is permanent unless law requires differently.

Each new segment will have:

- A new sales charge;
- New cost of insurance charges, guaranteed and current;
- A new incontestability period;
- A new suicide exclusion period;
- A new target premium;
- A new minimum annual premium during the no-lapse guarantee period; and
- A new surrender charge.

If a death benefit option change causes the amount of basic insurance coverage to increase, no new segment is created. Instead, the size of each existing segment(s) is (are) changed. If it causes the amount of basic insurance coverage to decrease, each segment is decreased.

In determining the net amount at risk for each coverage segment we allocate the net amount at risk among the basic coverage segments in the same proportion that each segment bears to the total amount of basic insurance coverage.

You may not decrease the amount of your insurance coverage below the minimum we require to issue you a policy. Decreases in insurance coverage may result in:

- Surrender charges on the amount of the decrease;
- Reduced target premium amounts; and
- Reduced cost of insurance charges.

Requested reductions in the amount of insurance coverage will first decrease your total insurance coverage amount. We decrease your basic insurance coverage amount only after your adjustable term insurance rider coverage is reduced to zero. If you have more than one segment, we divide decreases in basic coverage among your coverage segments pro rata unless law requires differently.

We reserve the right to not approve a requested change in your insurance coverage that would disqualify your policy as life insurance under Section 7702 of the Internal Revenue Code. In addition, we may refuse to approve a requested change in your insurance coverage that would cause your policy to become a modified endowment contract under Section 7702A of the Internal Revenue Code without your prior written acknowledgment accepting your policy as a modified endowment contract. Decreasing the amount of insurance coverage under your policy could cause your policy to be considered a modified endowment contract. If this happens, prior and subsequent distributions from the policy (including loans) may be subject to adverse tax treatment. You should consult a tax adviser before changing your amount of insurance coverage. **See *Distributions Other than Death Benefits - Modified Endowment Contracts*, page 52.**

Continuation of Coverage

The continuation of coverage feature automatically continues your insurance coverage in force for the period beyond the policy anniversary nearest the younger insured person's 100th birthday (the "continuation of coverage period"), unless prohibited by state law. If you do not surrender your policy before this date, on this date:

- The amount of your total insurance coverage becomes your basic insurance coverage amount;
- Death benefit Option 2 is converted to death benefit Option 1, if applicable;
- All riders are terminated;
- Your net policy value is transferred into the fixed account and subsequent transfers into the sub-accounts are not allowed; and
- Dollar cost averaging and automatic rebalancing programs are terminated.

Your insurance coverage continues in force until the death of the second of the insured people, unless the policy lapses or is surrendered. However:

- We accept no further premium payments; and
- We deduct no further fees and charges except transaction fees and charges, if applicable.

Partial withdrawals and loans are allowed during the continuation of coverage period. If we pay a persistency refund on the fixed account, it will be credited to your policy. If you have an outstanding loan, interest continues to accrue. If you fail to make sufficient loan or loan interest payments, it is possible that the outstanding loan amount plus accrued loan interest may become greater than your policy value and cause your policy to lapse. To avoid lapse, you may repay the loan and loan interest during the continuation of coverage period.

If you wish to stop coverage during the continuation of coverage period, you may surrender your policy and receive the net policy value. There is no surrender charge during this period. All other normal consequences of surrender apply. **See *Termination of Coverage - Surrender*, page 48.**

The continuation of coverage feature is not available in all states. If a state has approved this feature, it is automatic under your policy. In certain states the death benefit during the continuation of coverage period is the net policy value. Contact your agent/registered representative or our customer service center to find out if this feature is available in your state and which type of death benefit applies in your state.

The tax consequences of coverage continuing beyond the younger insured person's 100th birthday are uncertain. You should consult a tax adviser as to those consequences. See *Other Tax Matters - Continuation of a Policy*, page 54.

Death Benefit Qualification Test

The death benefit proceeds are generally not subject to federal income tax if your policy continues to meet the federal income tax definition of life insurance. Your policy will meet this definition of life insurance provided that it meets the requirements of the guideline premium test.

In the policy the "guideline premium test" is referred to as the "Guideline Premium/Cash Value Corridor Test."

Death Benefit Options

There are two death benefit options available under the policy. You choose the option you want when you apply for the policy. You may change that choice after your first monthly processing date and before age 100 of the younger insured person.

Option 1. Under death benefit Option 1, the base death benefit is the greater of:

- The amount of basic insurance coverage in effect on the date of the second death of the insured people; or
- Your policy value on the date of the second death of the insured people multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A.

In the policy death benefit Option 1 is referred to as "Option A" and death benefit Option 2 is referred to as "Option B."

Under this option your base death benefit will remain level unless your policy value multiplied by the appropriate factor described in Appendix A exceeds the amount of basic insurance coverage. In this case, your death benefit will vary as the policy value varies.

With Option 1, positive investment performance generally reduces your net amount at risk, which lowers your policy's cost of insurance charge. Option 1 also offers insurance coverage at a set amount with potentially lower cost of insurance charges over time.

Option 2. Under death benefit Option 2, the base death benefit is the greater of:

- The amount of basic insurance coverage in effect on the date of the second death of the insured people plus your policy value; or
- Your policy value on the date of the second death of the insured people multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A.

Under this option your base death benefit will vary as the policy value varies and investment performance is reflected in your insurance coverage.

Option 2 is not available after age 100 of the younger insured person. If Option 2 is in effect at age 100 of the younger insured person, it automatically converts to death benefit Option 1. **See *Death Benefits - Continuation of Coverage*, page 30.**

Which Death Benefit Option to Choose. If you are satisfied with the amount of your basic insurance coverage and prefer to have premium payments and favorable investment performance reflected to the maximum extent in the policy value and lower cost of insurance charges, you should choose death benefit Option 1. If you prefer to have premium payments and favorable investment performance reflected partly in the form of an increasing death benefit, you should choose death benefit Option 2.

Changing Death Benefit Options. On or after the first monthly processing date and before age 100 of the younger insured person you may change death benefit options as described below. We may require evidence of insurability under our normal rules of underwriting for some death benefit option changes.

Changing your death benefit option may reduce or increase your basic and total insurance coverage amounts but it will not change the amount of your base and total death benefits. We may not approve a death benefit option change if it reduces the amount of insurance coverage below the minimum we require to issue your policy. The following death benefit option changes are allowed, and on the effective date of the change the amount of your basic insurance coverage will change as follows:

Change From:	Change To:	Basic Insurance Coverage Following the Change:
Option 1	Option 2	<ul style="list-style-type: none">• Your basic insurance coverage before the change minus your policy value as of the effective date of the change.
Option 2	Option 1	<ul style="list-style-type: none">• Your basic insurance coverage before the change plus your policy value as of the effective date of the change.

Your death benefit option change is effective on your next monthly processing date after we approve it.

After we approve your request, we send a new policy schedule page to you. You should attach it to your policy. We may ask you to return your policy to our customer service center so that we can make this change for you.

If a death benefit option change causes the amount of insurance coverage to change, no new coverage segment(s) is (are) created. Instead, the size of each existing segment(s) is (are) changed. If you change death benefit options, there is no change to the amount of term insurance if you have the adjustable term insurance rider. **See Optional Rider Benefits - Adjustable Term Insurance Rider, page 35.**

We do not impose a surrender charge if a death benefit option change results in a decrease in the amount of your basic insurance coverage. Additionally, we do not adjust the target premium when you change your death benefit option. **See Transaction Fees and Charges - Surrender Charge, page 24.**

Changing your death benefit option may have tax consequences. You should consult a tax adviser before making changes.

Death Benefit Proceeds

After the death of the second of the insured people, if your policy is in force we pay the death benefit proceeds to the beneficiaries. The beneficiaries are the people you name to receive the death benefit proceeds from your policy. The death benefit proceeds are equal to:

- Your base death benefit; plus
- The amount of any rider benefits; minus
- Any outstanding loan amount plus accrued loan interest; minus
- Any outstanding fees and charges incurred before the death of the second of the insured people.

The death benefit is calculated as of the date of death of the second of the insured people and will vary depending on the death benefit option you have chosen.

No-Lapse and Death Benefit Guarantees

No-lapse Guarantee. The policy has a no-lapse guarantee which provides that the policy will not lapse during the first five policy years (the no-lapse guarantee period) regardless of its surrender value, if on a monthly processing date:

- Premiums you have paid, minus partial withdrawals that you have taken, minus outstanding loans, including accrued loan interest, is greater than or equal to;
- The cumulative minimum monthly premiums for each policy month from the first month of your policy through the current monthly processing date.

The minimum monthly premium is one-twelfth of the minimum annual premium. Your minimum annual premium is based on:

- The amount of your basic insurance coverage;
- The insured people's ages, genders and risk classes; and
- Additional rider coverage on your policy.

Your minimum annual premium is shown in the schedule pages of your policy. We may reduce the minimum annual premium for group or sponsored arrangements, or for corporate purchasers.

In the policy the no-lapse guarantee period is referred to as the "Special Continuation Period."

During the no-lapse guarantee period, if there is not enough surrender value to pay the periodic fees and charges due each month and you have satisfied these requirements, we do not allow your policy to lapse. We do not permanently waive these charges. Instead, we continue to deduct these charges which may result in a negative surrender value, unless you pay enough premium to prevent this. The negative balance is your unpaid monthly periodic fees and charges owing. At the end of the no-lapse guarantee period, to avoid lapse of your policy you must pay enough premium to bring the surrender value to zero plus the amount that covers your estimated monthly periodic fees and charges for the following two months. **See *Termination of Coverage - Lapse*, page 48.**

There is no charge for this guarantee.

In the policy, the death benefit guarantee feature is referred to as the "Guaranteed Minimum Death Benefit."

Death Benefit Guarantee. The policy has a death benefit guarantee which provides that the policy will not lapse even if the surrender value is not enough to pay the periodic fees and charges each month.

This is an optional benefit that may be selected only when you apply for the policy. The death benefit guarantee extends the period that your policy's basic insurance coverage remains in force even if the surrender value declines due to poor investment performance of the funds. Provided you keep the death benefit guarantee in force, this guarantee lasts until the continuation of coverage period begins, so long as you meet all requirements.

To keep the death benefit guarantee in force:

- You must pay premium at least equal to the guarantee period annual premium; and
- Your net policy value must meet certain diversification requirements.

The guarantee period annual premium for the death benefit guarantee is based on a percentage of the guideline level premium calculated under the federal tax laws.

Your guideline level annual premium depends on:

- The amount of your basic insurance coverage;
- The insured people's ages, genders, risk classes and underwriting characteristics;
- The death benefit option you choose;
- Additional rider coverage on your policy; and
- Other additional benefits on your policy.

On each monthly processing date we test to see if you have paid enough premium to keep your guarantee in place. We take the actual premiums we have received and subtract the partial withdrawals and loans (including accrued interest) you have taken. The result must equal or exceed the sum of the guarantee period monthly premium payments for each policy month starting with your first policy month through the end of the policy month that begins on the current monthly processing date. A guarantee period monthly premium is equal to one-twelfth of the guarantee period annual premium.

You must continually meet the premium requirements for this feature to remain in effect. If your policy benefits increase, the guarantee period annual premium increases.

In addition, to keep the death benefit guarantee in force your net policy value on any monthly processing date must be diversified as follows:

- Your net policy value is invested in at least five investment options; and
- No more than 35% of your net policy value is in any one investment option.

Your policy will continue to meet the diversification requirements if you have dollar cost averaging which results in transfers into at least four sub-accounts with no more than 35% of any transfer directed to any one or you have automatic rebalancing and meet the two diversification tests listed above. **See Transfers - Dollar Cost Averaging, page 42 and Transfers - Automatic Rebalancing, page 43.**

You should consider the following factors in relation to the death benefit guarantee:

- If you have the death benefit guarantee, the guarantee period annual premium will be shown on your policy schedule page (**see *Purchasing a Policy - Premium Payments*, page 20**;
- There is a monthly charge for this guarantee (**see *Periodic Fees and Charges - Death Benefit Guarantee Charge*, page 27**);
- If your policy fails to satisfy either the annual premium or diversification test we will send you a notice and give you a thirty day opportunity to correct the condition. If you do not correct it, the death benefit guarantee terminates;
- Once it terminates, you cannot reinstate the death benefit guarantee and the guarantee period annual premium no longer applies to your policy;
- You may terminate this guarantee at any time during the guarantee period upon written notice to us;
- A loan may cause the termination of this guarantee because we deduct your loan amount plus accrued loan interest from cumulative premiums paid when calculating whether you have paid sufficient premiums to keep the guarantee in effect; and
- Even if the death benefit guarantee terminates, your policy will not necessarily lapse (**see *Termination of Coverage - Lapse*, page 48**).

Additional Insurance Benefits

Your policy may include additional insurance benefits, attached by rider. There are two types of riders:

- Those that provide optional benefits that you must select before they are effective; and
- Those that automatically come with the policy.

The following information does not include all of the terms and conditions of each rider, and you should refer to the rider to fully understand its benefits and limitations. We may offer riders not listed here. Not all riders may be available under your policy. Contact your agent/registered representative for a list of riders and their availability.

Optional Rider Benefits

The following riders may have an additional cost, but you may cancel optional riders at any time. ***Adding or canceling riders may have tax consequences. See *Distributions Other than Death Benefits - Modified Endowment Contracts*, page 52.***

Adjustable Term Insurance Rider. You may increase the amount of your total insurance coverage under the policy by adding coverage under the adjustable term insurance rider before the insured people's joint equivalent age of 85, assuming both insured people are alive and insurable. This rider allows you to schedule the pattern of insurance coverage appropriate for your anticipated needs. As the name suggests, the adjustable term insurance rider adjusts over time to maintain your desired level of total coverage.

In the policy "basic" insurance coverage" or "basic coverage" is referred to as the "Stated Death Benefit"; the "total insurance coverage" or "total coverage" is referred to as the "Target Death Benefit."

You specify your amount of total insurance coverage when you apply for this rider. The amount of total insurance coverage can be level for the life of your policy or can be scheduled to change at the beginning of a selected policy year(s). See ***Death Benefits - Changes in the Amount of Your Insurance Coverage, page 29.***

Generally, the minimum amount of insurance coverage under a policy is \$250,000. If you have an adjustable term insurance rider, the minimum amount of basic insurance coverage to issue a policy is \$100,000, as long as your total insurance coverage is at least \$250,000.

We generally restrict your coverage under this rider to an amount not more than nine times your basic insurance coverage at issue. Under certain circumstances, we will be willing to allow you to specify a total insurance coverage of up to twenty-one times your basic insurance coverage during the first four policy years. After this four-year period, the normal total insurance coverage maximum applies.

The adjustable term insurance rider benefit is the difference between the amount of your total death benefit and your base death benefit, but not less than zero. The rider's benefit automatically adjusts daily as the amount of your base death benefit changes. Your death benefit proceeds depend on which death benefit option is in effect.

Under death benefit Option 1, the total death benefit is the greater of:

- The amount of total insurance coverage you have selected; or
- Your policy value multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A.

Under death benefit Option 2, the total death benefit is the greater of:

- The amount of total insurance coverage you have selected plus your policy value; or
- Your policy value multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A.

For example, under death benefit Option 1, assume your base death benefit changes as a result of a change in your policy value. The adjustable term insurance rider adjusts to provide death benefit proceeds equal to your total insurance coverage in each year:

<u>Base Death Benefit</u>	<u>Amount of Total Insurance Coverage</u>	<u>Adjustable Term Insurance Benefit</u>
\$201,500	\$250,000	\$48,500
\$202,500	\$250,000	\$47,500
\$202,250	\$250,000	\$47,750

It is possible that the amount of your adjustable term insurance may be zero if your base death benefit increases enough. Using the same example, if the base death benefit under your policy grew to \$250,000 or more, the adjustable term insurance benefit would be zero.

Even when the adjustable term insurance benefit is reduced to zero, your rider remains in effect until you remove it from your policy. Therefore, if later the base death benefit drops below the amount of your total insurance coverage, the adjustable term insurance rider coverage reappears to maintain the amount of your total insurance coverage.

You may change the amount of your total insurance coverage, according to our rules. See ***Death Benefits - Changes in the Amount of Your Insurance Coverage, page 29.***

We may deny future, scheduled increases to the amount of your total insurance coverage if you cancel a scheduled change or if you ask for an unscheduled decrease in your total insurance coverage.

Partial withdrawals, changes from death benefit Option 1 to Option 2, and decreases in the amount of your basic insurance coverage may reduce the amount of your total insurance coverage. **See *Special Features and Benefits - Partial Withdrawals*, page 45, and *Death Benefits - Changes in the Amount of Your Insurance Coverage*, page 29.**

There is no defined premium for a given amount of adjustable term insurance benefit. Instead, we deduct a separate monthly cost of insurance charge from your policy value. The cost of insurance for this rider is calculated as the monthly cost of insurance rate for the rider benefit multiplied by the amount of adjustable term insurance benefit in effect at the monthly processing date. The cost of insurance rates are determined by us from time to time. They are based on the issue ages, genders and risk classes of the insured people, as well as the length of time since your policy date. **See the *Fees and Charges - Optional Rider Fees and Charges* table on page 10 for the minimum rates, maximum rates and the rates for the representative insured people.**

The only charge for this rider is the cost of insurance charge. The total charges that you pay may be more or less if you have some coverage under an adjustable term insurance rider rather than just basic insurance coverage. There are no sales charges or surrender charges for this coverage.

If the total insurance coverage is increased by you after the adjustable term insurance rider is issued, we use the same cost of insurance rate schedule for the entire coverage for this rider. These rates are based on the original risk classes even though satisfactory new evidence of insurability is required for the increased schedule. Although the maximum cost of insurance rates for this rider are greater than the maximum cost of insurance rates for the basic insurance coverage, the current rates for this rider may be lower than current cost of insurance rates for the basic insurance coverage. **See *Periodic Fees and Charges - Cost of Insurance*, page 27.**

Not all policy features apply to the adjustable term insurance rider. The rider does not contribute to the policy value nor to the surrender value. It does not affect investment performance and cannot be used for a loan. The adjustable term insurance rider provides benefits only at the death of the second of the insured people.

Single Life Term Insurance Rider. This rider provides a benefit upon the death of one of the insured people under your policy. You may choose to add a single life term insurance rider for one insured person. Or, you may add two riders, one for each insured person. You may add this rider to your policy at any time if both insured people are alive and insurable according to our rules.

We will issue the single life term insurance rider on an insured person who is between the ages of 15 and 85. Coverage under this rider will continue until:

- The insured person covered by this rider reaches age 100;
- The continuation of coverage provision becomes effective;
- The death benefit guarantee is used to keep the policy in force;
- The insured person covered by this rider dies;
- The grace period expires and the policy lapses; or
- The policy is surrendered.

The minimum amount of coverage for a single life term insurance rider is \$1,000. The maximum coverage under this rider is subject to our underwriting determinations. At issue, you may schedule the rider's benefit to increase or decrease.

Your request for an increase or decrease in rider coverage is effective on the next monthly processing date after we approve your request. There may be underwriting or other requirements which must be met before we approve your request. A requested change in your coverage must be for at least \$1,000. If you schedule or request an increase after issue, the insured person will be subject to our underwriting requirements.

The charge for this rider is based on the age, gender and risk class of the insured person. The charge for this rider is deducted on each monthly processing date as a cost per each \$1,000 of the net amount at risk under the rider. See the policy schedule pages for information on your actual cost. There are no surrender charges for decreases in the amount of coverage under the single life term rider. **See the *Fees and Charges - Optional Rider Fees and Charges* table on page 10 for the minimum rates, maximum rates and the rates for a representative insured person.**

Automatic Rider Benefit

The following rider benefit may come with your policy automatically. Exercising this benefit may have tax consequences. **See *Other Tax Matters - Accelerated Death Benefit Rider*, page 53.**

Accelerated Death Benefit Rider. Under certain circumstances, the accelerated death benefit rider allows you to accelerate payment of the death benefit that we otherwise would pay upon the second death of the insured people. Generally, we will provide an accelerated benefit under this rider if the sole surviving insured person has a terminal illness that will result in his or her death within 12 months, as certified by a physician. The accelerated benefit may not be more than 50% of the amount that would be payable at the second death of the insured people. The accelerated benefit will first be used to pay off any outstanding loans and interest due. The remainder of the accelerated benefit will be paid to you in a lump sum. There is no charge for this rider.

Consider the following factors when deciding whether to accelerate the death benefit under this rider:

- Receipt of an accelerated payment under this rider reduces the policy's death benefit, surrender value and rider benefits by the percentage of eligible coverage that is accelerated. For example, if the accelerated payment is 25% of the eligible coverage, the new death benefit will be 75% of the death benefit proceeds just prior to acceleration;
- Accelerating the death benefit will not affect the amount of premium payable on the policy;
- No loans are permitted after this rider is exercised; and
- There may be tax consequences to requesting payment under this rider, and you should consult with a qualified tax adviser for further information.

Certain limitations and restrictions are described in the rider. Additionally, the benefit may vary by state. You should consult your agent/registered representative as to whether and to what extent the rider is available in your particular state and on any particular policy.

Policy Value

Your policy value equals the sum of your fixed account, variable account and loan account values. Your policy value reflects:

- The net premium applied to your policy;
- The fees and charges that we deduct;
- Any partial withdrawals you take;
- Interest earned on amounts allocated to the fixed account;
- The investment performance of the funds underlying the sub-accounts of the variable account; and
- Interest earned on amounts held in the loan account.

Fixed Account Value

Your fixed account value equals the net premium you allocate to the fixed account, plus interest earned, minus amounts you transfer out or withdraw. It may be reduced by fees and charges assessed against your policy value. **See *The Investment Options - The Fixed Account*, page 16.**

Variable Account Value

Your variable account value equals your policy value attributable to amounts invested in the sub-accounts of the variable account.

Determining Values in the Sub-Accounts. The value of the amounts invested in the sub-accounts are measured by accumulation units and accumulation unit values. The value of each sub-account is the accumulation unit value for that sub-account multiplied by the number of accumulation units you own in that sub-account. Each sub-account has a different accumulation unit value.

The accumulation unit value is the value determined on each valuation date. The accumulation unit value of each sub-account varies with the investment performance of its underlying fund. It reflects:

- Investment income;
- Realized and unrealized gains and losses;
- Fund expenses;
- Daily mortality and expense risk charges; and
- Taxes, if any.

A valuation date is a date on which a fund values its shares and the New York Stock Exchange is open for business, except for days on which valuations are suspended by the SEC. Each valuation date ends at 4:00 p.m. Eastern time.

You purchase accumulation units when you allocate premium or make transfers to a sub-account, including transfers from the loan account.

We redeem accumulation units:

- When amounts are transferred from a sub-account (including transfers to the loan account);
- For the monthly deduction of the periodic fees and charges from your policy value;
- For policy transaction fees;
- When you take a partial withdrawal;
- If you surrender your policy; and
- To pay the death benefit proceeds.

In the policy the "policy value" is referred to as the "Account Value"; the "fixed account value" is referred to as the "Account Value of the Guaranteed Interest Division"; the "variable account value" is referred to as the "Account Value of the Investment Options of the Separate Account"; and the "loan account value" is referred to as the "Account Value of the Loan Division."

To calculate the number of accumulation units purchased or sold we divide the dollar amount of your transaction by the accumulation unit value for the sub-account calculated at the close of business on the valuation date of the transaction.

The date of a transaction is the date we receive your premium or transaction request at our customer service center, so long as the date of receipt is a valuation date. We use the accumulation unit value which is next calculated after we receive your premium or transaction request and we use the number of accumulation units attributable to your policy on the date of receipt.

We deduct the periodic fees and charges each month from your policy value on the monthly processing date. If your monthly processing date is not a valuation date, the monthly deduction is processed on the next valuation date.

The value of amounts allocated to the sub-accounts goes up or down depending on investment performance of the corresponding funds. **There is no guaranteed minimum value of amounts invested in the sub-accounts of the variable account.**

How We Calculate Accumulation Unit Values. We determine the accumulation unit value for each sub-account on each valuation date.

We generally set the accumulation unit value for a sub-account at \$10 when the sub-account is first opened. After that, the accumulation unit value on any valuation date is:

- The accumulation unit value for the preceding valuation date, multiplied by
- The sub-account's accumulation experience factor for the valuation period.

Every valuation period begins at 4:00 p.m. Eastern time on a valuation date and ends at 4:00 p.m. Eastern time on the next valuation date.

We calculate an accumulation experience factor for each sub-account every valuation date as follows:

- We take the net asset value of the underlying fund shares as reported to us by the fund managers as of the close of business on that valuation date;
- We add dividends or capital gain distributions declared and reinvested by the fund during the current valuation period;
- We subtract a charge for taxes, if applicable;
- We divide the resulting amount by the net asset value of the shares of the underlying fund at the close of business on the previous valuation date; and
- We then subtract the mortality and expense risk charge. The daily charge is 0.002466% (.90% annually) of the accumulation unit value. If the previous day was not a valuation date, this charge is multiplied by the number of days since the last valuation date.

Loan Account Value

In the policy the "loan account" is referred to as the "Loan Division."

When you take a loan from your policy we transfer an amount equal to your loan to the loan account as collateral for your loan. The loan account is part of our general account and we credit interest to the amount held in the loan account. Your loan account value is equal to your outstanding loan amount plus interest in the loan account. **See *Special Features and Benefits - Loans*, page 41.**

Special Features and Benefits

Loans

You may borrow money from us at any time after the first policy month, by using your policy as collateral for the loan. Unless state law requires otherwise, a new loan amount must be at least \$100 and the amount you may borrow is limited to the surrender value of your policy minus the monthly periodic fees and charges to your next policy anniversary or the monthly periodic fees and charges for the next thirteen months if you take a loan within thirty days before your next policy anniversary.

Your loan request must be directed to our customer service center. When you request a loan you may specify the investment options from which the collateral for the loan will be taken. If you do not specify the investment options, the collateral for the loan will be taken proportionately from each active investment option you have, including the fixed account.

If you request an additional loan, we add the new loan amount to your existing loan. This way, there is only one loan outstanding on your policy at any time.

Loan Interest. We credit amounts held in the loan account with interest at an annual rate of 4.00%. Interest which we credit to the loan account becomes part of your loan account value until the next policy anniversary when it is transferred to the investment options according to your most recent allocation instructions.

We also charge interest on loans you take. The annual interest rate charged is 4.00% for preferred loans and 6.00% for non-preferred loans. Interest accrues daily but is due in arrears on each policy anniversary. If you do not pay the interest when it is due, we add it to your loan amount.

Beginning with the 10th policy year, the first loan each policy year up to 10% of the net policy value is a preferred loan. Beginning with the 21st policy year, all loans and outstanding loan balances will be considered preferred loans.

Loan Repayment. You may repay your loan at any time. We assume that payments you make, other than scheduled premium payments, are loan repayments. You must tell us if you want unscheduled payments to be premium payments.

When you make a loan repayment, we transfer an amount equal to your payment from the loan account to the sub-accounts and fixed account in the same proportion as your current premium allocation, unless you tell us otherwise.

Effects of a Loan. Using your policy as collateral for a loan will effect your policy in various ways. You should carefully consider the following before taking a loan:

- If you do not make loan repayments your policy could lapse if your loan amount plus accrued interest is greater than your policy value less any surrender charges;
- A loan may cause the termination of the death benefit guarantee because we deduct your loan amount plus accrued loan interest from cumulative premiums paid when calculating whether you have paid sufficient premiums to keep the death benefit guarantee in effect;
- Taking a loan reduces your opportunity to participate in the investment performance of the sub-accounts and the interest guarantees of the fixed account;
- Accruing loan interest will change your policy value as compared to what it would have been if you did not take a loan;
- Even if you repay your loan, it will have a permanent effect on your policy value;

- If you use the continuation of coverage feature and you have a loan, loan interest continues to accrue and could cause your policy to lapse;
- If you do not repay your loan we will deduct any outstanding loan amount plus accrued loan interest from amounts payable under the policy; and

Loans may have tax consequences and if your policy lapses with a loan outstanding, you may have further tax consequences. See **TAX CONSIDERATIONS - Distributions Other than Death Benefits**, page 51.

Transfers

You currently may make an unlimited number of transfers of your variable account value between the sub-accounts and to the fixed account. Transfers are subject to any conditions that we or the funds whose shares are involved may impose, including:

- If your state requires a refund of premium during the free look period, you may not make transfers until after your free look period ends;
- The minimum amount you may transfer is \$100;
- If the amount remaining in the investment option after a transfer will be less than \$100, we will transfer the entire amount; and
- We may limit the number of transfers or restrict or refuse transfers because of excessive trading, as described below.

Any conditions or limits we impose on transfers between the sub-accounts or to the fixed account will generally apply equally to all policy owners. However, we may impose different conditions or limits on third parties acting on behalf of policy owners, such as market timing services.

Transfers from the fixed account to the sub-accounts of the variable account may be made only during the first 30 days of each policy year and are limited to the greater of:

- 25% of your fixed account value at the time of the first such transfer in a policy year;
- The sum of the amounts transferred and withdrawn from the fixed account during the prior policy year; or
- \$100.

We reserve the right to liberalize these restrictions on transfers from the fixed account, depending on market conditions. Any such liberalization will generally apply equally to all policy owners. However, we may impose different restrictions on third parties acting on behalf of policy owners, such as market timing services.

We process all transfers and determine all values in connection with transfers on the valuation date we receive your request, except as described below for the dollar cost averaging or automatic rebalancing programs.

Dollar Cost Averaging. Anytime you have at least \$10,000 invested in the sub-account which invests in the ING Liquid Asset Portfolio or the ING Limited Maturity Bond Portfolio (the "source sub-account"), you may elect dollar cost averaging. There is no charge for this feature.

Dollar cost averaging is a long-term investment program through which you direct us to automatically transfer at regular intervals a specific dollar amount or percentage of sub-account value from the source sub-account to one or more of the other sub-accounts. We do not permit transfers to the fixed account or the loan account under this program. You may request that the dollar cost averaging transfers occur on a monthly, quarterly, semi-annual or annual basis.

This systematic plan of transferring policy values is intended to help reduce the risk of investing too much when the price of a fund's shares is high. It also helps reduce the risk of investing too little when the price of a fund's shares is low. Because you transfer the same dollar amount to the sub-accounts each period, you purchase more units when the unit value is low and you purchase fewer units when the unit value is high.

You may add dollar cost averaging to your policy at any time. The first dollar cost averaging date must be at least one day after we receive your dollar cost averaging request. If your state requires a refund of all premium received during the free look period, dollar cost averaging begins after the end of your free look period.

You may have both dollar cost averaging and automatic rebalancing at the same time. However, your dollar cost averaging source sub-account cannot be included in your automatic rebalancing program.

Dollar cost averaging does not assure a profit nor does it protect you against a loss in a declining market.

You may discontinue your dollar cost averaging program at any time. We reserve the right to discontinue, modify or suspend this program, and dollar cost averaging will automatically terminate on the date:

- You specify;
- Your balance in the source sub-account reaches a dollar amount you set; or
- Your balance in the source sub-account is equal to or less than the amount to be transferred. In this situation we will transfer the entire balance of the source sub-account to the other sub-accounts you have selected.

Automatic Rebalancing. Automatic rebalancing is a program for simplifying the process of asset allocation and maintaining a consistent allocation of your variable and fixed account values among your chosen investment options. There is no charge for this feature.

If you elect automatic rebalancing, we periodically transfer amounts among the investment options to match the asset allocation percentages you have chosen. This action rebalances the amounts in the investment options that do not match your set allocation percentages. This mismatch can happen if an investment option outperforms another investment option over the time period between automatic rebalancing transfers.

Automatic rebalancing may occur on the same day of the month on a monthly, quarterly, semi-annual or annual basis. If you do not specify a frequency, automatic rebalancing will occur quarterly.

The first transfer occurs on the date you select (after your free look period if your state requires return of premium during the free look period). If you do not request a date, processing is on the last valuation date of the calendar quarter in which we receive your request.

You may have both automatic rebalancing and dollar cost averaging at the same time. However, the source sub-account for your dollar cost averaging program cannot be included in your automatic rebalancing program. You may not include the loan account.

Automatic rebalancing does not assure a profit nor does it protect you against a loss in a declining market.

You may change your allocation percentages for automatic rebalancing at any time. Your allocation change is effective on the valuation date that we receive it at our customer service center. If you reduce the amount allocated to the fixed account, it is considered a transfer from that account. You must meet the requirements for the maximum transfer amount and time limitations on transfers from the fixed account.

If you have the death benefit guarantee and you ask for an automatic rebalancing allocation which does not meet the death benefit guarantee diversification requirements, we will notify you and ask you for revised instructions. If you have the death benefit guarantee and you terminate automatic rebalancing, you still must meet the diversification requirements for the guarantee period to continue. **See *Death Benefits - No-Lapse and Death Benefit Guarantees*, page 33.**

You may discontinue your automatic rebalancing program at any time. We reserve the right to discontinue, modify or suspend this program.

Limits on Frequent or Disruptive Transfers. The policy is not designed to serve as a vehicle for frequent transfers. Frequent transfer activity can adversely affect fund performance, disrupt fund management strategies and increase fund expenses through:

- Increased trading and transaction costs;
- Forced and unplanned portfolio turnover;
- Lost opportunity costs; and
- Large asset swings that decrease the fund's ability to provide maximum investment return to all policy owners.

Accordingly, individuals or organizations that use market-timing investment strategies or make frequent transfers should not purchase the policy.

We monitor transfer activity and reserve the right to take any necessary action if an individual's or organization's transfer activity:

- Exceeds our then-current monitoring standard for excessive trading;
- Is identified as problematic by an underlying fund;
- Is determined, in our sole discretion, to be not in the best interests of other policy owners; or
- Is determined, in our sole discretion, to be disruptive due to the excessive dollar amounts involved.

Such actions may include, but are not limited to, the suspension of transfer privileges via facsimile, telephone, email and internet, and the limiting of transfer privileges to submission by mail. We will notify you in writing if we take any of these actions.

Our current definition of excessive trading is more than one purchase and sale of the same underlying fund within a 30-day period. We do not count transfers associated with scheduled dollar cost averaging or automatic rebalancing programs and transfers involving certain de minimis amounts when determining whether transfer activity is excessive. We reserve the right to modify our excessive trading policy at any time, without prior notice and in our sole discretion, based on, among other factors, the best interests of policy owners, fund investors, fund management considerations and state or federal regulatory developments.

We also reserve the right to restrict, in our sole discretion and without prior notice, transfers initiated by a market-timing organization or individual or other party authorized to give transfer instructions on behalf of multiple policy owners. Such restrictions may include:

- Not accepting transfer instructions from an agent acting on behalf of more than one policy owner; and
- Not accepting preauthorized transfer forms from market timers or other entities acting on behalf of more than one policy owner at a time.

The Company does not allow exceptions to our excessive trading policy. Our excessive trading policy may not be completely successful in preventing market timing or excessive trading activity.

Limits Imposed by the Funds. Orders for the purchase of fund shares may be subject to acceptance or rejection by the underlying fund. We reserve the right to reject, without prior notice, any allocation of a premium payment to a sub-account if the sub-account's investment in its corresponding fund is not accepted by the fund for any reason.

Conversion to a Guaranteed Policy. During the first two policy years you may permanently convert your policy to a guaranteed policy, unless state law requires differently. If you elect to make this change, unless state law requires that we issue to you a new guaranteed policy, we will permanently transfer the amounts you have invested in the sub-accounts of the variable account to the fixed account and allocate all future net premium to the fixed account. After you exercise this right you may not allocate future premium payments or make transfers to the sub-accounts of the variable account. We do not charge for this change. Contact our customer service center or your agent/registered representative for information about the conversion rights available in your state.

Partial Withdrawals

Beginning in the second policy year (or the first policy year for "in corridor" policies) you may withdraw part of your policy's surrender value. Twelve partial withdrawals are currently allowed each policy year, and a partial withdrawal must be at least \$100. The maximum partial withdrawal you may take is the amount which leaves \$500 as your surrender value (or for in corridor policies during the first policy year, the amount that would cause your policy to no longer qualify as "in corridor"). If your withdrawal request is for more than the maximum, we will require you to surrender your policy or reduce the amount of the withdrawal.

A policy is "in corridor" if:

- Under death benefit Option 1, your policy value multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A is greater than the amount of your basic insurance coverage; or
- Under death benefit Option 2, your policy value multiplied by the appropriate factor from the definition of life insurance factors described in Appendix A is greater than your basic insurance coverage plus your policy value.

We charge a partial withdrawal fee of 2.00% of the amount withdrawn, up to \$25 for each partial withdrawal. **See Transaction Fees and Charges - Partial Withdrawal Fee, page 23.**

Unless you specify a different allocation, we will take partial withdrawals from the fixed account and the sub-accounts of the variable account in the same proportion that your value in each has to your net policy value immediately before the withdrawal. We will determine these proportions at the end of the valuation period during which we receive your partial withdrawal request. However, amounts withdrawn from the fixed account may not exceed the amount of the total withdrawal multiplied by the ratio of your policy value in the fixed account to your net policy value immediately before the partial withdrawal.

Effects of a Partial Withdrawal. We will reduce your policy value by the amount of the partial withdrawal plus the partial withdrawal fee. Your policy value may also be reduced by the amount of a surrender charge if you take a partial withdrawal which decreases your basic insurance coverage.

A partial withdrawal may also cause the termination of the death benefit guarantee because we deduct the amount of the partial withdrawal from the total premiums paid when calculating whether you have paid sufficient premiums in order to maintain the death benefit guarantee.

Under death benefit Option 1, a partial withdrawal will reduce the amount of your basic insurance coverage by the amount of a partial withdrawal unless:

- No more than fifteen years have passed since your policy date;
- The joint equivalent age of the insured people is less than age 81; and
- The amount of the partial withdrawal is less than the greater of 10% of your policy value or 5% of the amount of your basic insurance coverage.

Any amount withdrawn in excess of the greater of 10% of your policy value or 5% of the amount of your basic insurance coverage will reduce the amount of your basic insurance coverage by that excess amount.

Under death benefit Option 2, a partial withdrawal will not reduce the amount of your basic insurance coverage.

If a partial withdrawal reduces the amount of basic insurance coverage, the total amount of insurance coverage will also be reduced for the current year and all future years by an equal amount. Therefore, a partial withdrawal can affect the amount of pure insurance protection under the policy.

We will not allow a partial withdrawal if the amount of insurance coverage after the withdrawal would be less than \$250,000.

A reduction in the amount of basic insurance coverage as a result of a partial withdrawal will be pro-rated among the existing coverage segments, unless state law requires otherwise.

A partial withdrawal may have adverse tax consequences depending on the circumstances. See **TAX CONSIDERATIONS - *Tax Status of the Policy*, page 50.**

Policy Split Option

Under certain circumstances, you may exchange your policy for two single life insurance policies: one on each of the two insured people. The policy split option has insurability requirements which must be met at or before your policy is split. Evidence of insurability is required for a new single life policy where coverage is greater than 50% of your original amount of basic insurance coverage or for an insured person who is subject to certain underwriting ratings.

On the effective date of the policy split, the available death benefit under your policy will be divided between the two new single life insurance policies. You may take less than the maximum death benefit amount available. If the total death benefit for the two new single life insurance policies is less than the total death benefit under the one policy before the split, there may be a surrender charge.

Unless law requires otherwise, you may use the policy split option upon the occurrence of any of the following events:

- There is a dissolution of business conducted or owned by the two insured people;
- Three months following the effective date of a final divorce decree regarding the marriage of the two insured people; or
- There is a change to the federal estate tax law which results in either:
 - ▷ Removal of the unlimited marital deduction provision; or
 - ▷ A reduction in the current maximum federal estate tax of at least 50% after your policy date.

You must send us written notice of your election to use the policy split option within 180 days of the eligible event. You must provide satisfactory evidence that the event has occurred.

The effective date of the policy split is the first monthly processing date after we approve it. The insurance coverage under the two individual life insurance policies will start on the effective date of the policy split only if both insured people are alive on that date. If either insured person is not alive on that date, your exchange is void.

All terms and conditions of the new policies apply once your policy is split and they may differ from those of this policy. Consult your new single life insurance policies.

The premium for each new policy will be based on each insured person's age, gender and risk class at the time of the split of your policy. Premium will be due for each new policy under the terms of the new policy. The policy value less any surrender charge due of the old policy will be allocated to the new policies on the effective date in the same proportion that the basic insurance coverage was divided between the two single life insurance policies, unless we agree to a different allocation. If this allocation causes an increase in the basic insurance coverage of either of the new single life policies, we may limit the policy value less any surrender charge due you may apply to each new policy. Remaining surrender value will be paid to you and may be taxable.

If you have an outstanding policy loan it will be divided and transferred to each new single life insurance policy in the same proportion as your policy value less any surrender charge due is allocated. A remaining loan balance must be paid before the effective date of the policy split. Any person or entity to which you have assigned your policy must agree to the policy split. An assignment of your policy generally will apply to each new single life insurance policy.

If you have a single life term insurance rider on your policy at the date of the policy split, you may have a term insurance rider insuring the same person on the new policy, if that rider is available. Other riders may or may not be available on the new policies and may be subject to proof of insurability.

Exercising the policy split option may be treated as a taxable transaction. Moreover, the two single life insurance policies could be treated as modified endowment contracts.

You may not split your policy into two single life insurance policies if:

- The continuation of coverage period has begun;
- One of the insured people has died;
- Your grace period has ended and the policy has lapsed; or
- Your policy has been terminated or surrendered.

You should consult a tax adviser before exercising the policy split option.

Persistency Refund

Where state law permits, we pay long-term policy owners a persistency refund. Each month your policy remains in force after your tenth policy anniversary, we credit your policy value with a refund of 0.0625% of your net policy value. This refund is 0.75% of your net policy value on an annual basis.

We do not guarantee that we will pay a persistency refund on the fixed account. If we do, however, we will pay it even if your policy is in the continuation of coverage period.

We add the persistency refund to the sub-accounts and fixed account, but not the loan account, in the same proportion that your policy value in each investment option has to your net policy value as of the monthly processing date.

Termination of Coverage

Your insurance coverage will continue under the policy until you surrender your policy or it lapses.

Surrender

In the policy the "surrender value" is referred to as the "Net Cash Surrender Value."

You may surrender your policy for its surrender value at any time after the free look period before the second death of the insured people. Your surrender value is your policy value minus any surrender charge and your outstanding loan amount and accrued loan interest.

You may take your surrender value in other than one payment.

We compute your surrender value as of the valuation date we receive your written surrender request and policy (or lost policy form) at our customer service center. All insurance coverage ends on the date we receive your surrender request and policy.

If you surrender your policy we may deduct a surrender charge. **See Transaction Fees and Charges - Surrender Charge, page 24.** Surrender of your policy may have adverse tax consequences. **See TAX CONSIDERATIONS - Distributions Other than Death Benefits, page 51.**

Lapse

Your policy will not lapse and your insurance coverage under the policy will continue if on any monthly processing date:

- The no-lapse guarantee is in effect;
- The death benefit guarantee is in effect;
- Your surrender value is enough to pay the periodic fees and charges when due; or
- During the continuation of coverage period, your policy value exceeds your outstanding loan amount plus accrued loan interest.

Grace Period. If on a monthly processing date you do not meet these conditions, your policy will enter the 61-day grace period during which you must make a sufficient premium payment to avoid having your policy lapse and insurance coverage terminate.

We will notify you that your policy is in a grace period at least 30 days before it ends. We will send this notice to you (or a person to whom you have assigned your policy) at your last known address in our records. We will notify you of the premium payment necessary to prevent your policy from lapsing. This amount generally equals the past due charges, plus the estimated periodic fees and charges and charges of any optional rider benefits for the next two months. If we receive payment of the required amount before the end of the grace period, we apply it to your policy in the same manner as your other premium payments, then we deduct the overdue amounts from your policy value.

If you do not pay the full amount within the 61-day grace period, your policy and its riders lapse without value. We withdraw your remaining variable and fixed account values, deduct amounts you owe us and inform you that your coverage has ended.

If the second of the insured people dies during the grace period we pay death benefit proceeds to your beneficiaries with reductions for your outstanding loan amount, accrued loan interest and periodic fees and charges owed.

During the early policy years your surrender value may not be enough to cover the periodic fees and charges due each month, and you may need to pay sufficient premium to keep the no-lapse guarantee or the death benefit guarantee in force. **See *Purchasing a Policy - Premium Payments*, page 20.**

If your policy lapses, any distribution of policy value may be subject to current taxation. **See *TAX CONSIDERATIONS - Distributions Other than Death Benefits*, page 51.**

Reinstatement

Reinstatement means putting a lapsed policy back in force. You may reinstate a lapsed policy (other than the death benefit guarantee) and its riders by written request any time within five years after it has lapsed. A policy that was surrendered may not be reinstated.

To reinstate the policy and any riders, you must submit evidence of insurability satisfactory to us and pay a premium large enough to keep the policy and any rider benefits in force during the grace period and for at least two months after reinstatement. We will not reinstate your policy if one insured person has died or becomes uninsurable since your policy date. If one insured person was uninsurable at the issue date of your policy and remains uninsurable, we will review the underwriting requirements applicable to each insured person at the time you request reinstatement to determine whether or not your policy may be reinstated. When we reinstate your policy, we reinstate the surrender charges for the amount and time remaining when your coverage lapsed. If you had a loan existing when coverage lapsed, we will reinstate it with accrued loan interest to the date of the lapse.

A policy that lapses during a seven pay testing period and is reinstated more than 90 days after lapsing will be classified as a modified endowment contract for tax purposes. In general, a seven pay testing period is the first seven policy years and the first seven years after certain changes to your policy. You should consult with a qualified adviser to determine whether reinstating a lapsed policy will cause it to be classified as a modified endowment contract. **See *Distributions Other Than Death Benefits - Modified Endowment Contracts*, page 52.**

TAX CONSIDERATIONS

The following summary provides a general description of the federal income tax considerations associated with the policy and does not purport to be complete or to cover federal estate, gift and generation-skipping tax implications, state and local taxes or other tax situations. This discussion is not intended as tax advice. Counsel or other qualified tax advisers should be consulted for more complete information. This discussion is based upon our understanding of the present federal income tax laws. No representation is made as to the likelihood of continuation of the present federal income tax laws or as to how they may be interpreted by the Internal Revenue Service ("IRS").

The following discussion generally assumes that the policy will qualify as a life insurance contract for federal tax purposes.

Tax Status of the Company

We are taxed as a life insurance company under the Internal Revenue Code. The variable account is not a separate entity from us. Therefore, it is not taxed separately as a "regulated investment company," but is taxed as part of the company. We automatically apply investment income and capital gains attributable to the separate account to increase reserves under the policy. Because of this, under existing federal tax law we believe that any such income and gains will not be taxed to us. In addition, any foreign tax credits attributable to the separate account will first be used to reduce any income taxes imposed on the variable account before being used by the company.

In summary, we do not expect that we will incur any federal income tax liability attributable to the variable account and we do not intend to make provisions for any such taxes. However, if changes in the federal tax laws or their interpretation result in our being taxed on income or gains attributable to the variable account, then we may impose a charge against the variable account (with respect to some or all of the policies) to set aside provisions to pay such taxes.

Tax Status of the Policy

This policy is designed to qualify as a life insurance contract under the Internal Revenue Code. All terms and provisions of the policy shall be construed in a manner which is consistent with that design. In order to qualify as a life insurance contract for federal income tax purposes and to receive the tax treatment normally accorded life insurance contracts under federal tax law, a policy must satisfy certain requirements which are set forth in Section 7702 of the Internal Revenue Code. Specifically, the policy must meet the requirements of the guideline premium test. While there is very little guidance as to how these requirements are applied, we believe it is reasonable to conclude that our policies satisfy the applicable requirements. If it is subsequently determined that a policy does not satisfy the applicable requirements, we will take appropriate and reasonable steps to bring the policy into compliance with such requirements and we reserve the right to restrict policy transactions or modify your policy in order to do so.

We will at all times strive to assure that the policy meets the statutory definition which qualifies the policy as life insurance for federal income tax purposes. See **TAX CONSIDERATIONS - Tax Treatment of Policy Death Benefits, page 51.**

Diversification and Investor Control Requirements

In addition to meeting the Internal Revenue Code Section 7702 guideline premium test, Internal Revenue Code Section 817(h) requires separate account investments, such as our variable account, to be adequately diversified. The Treasury has issued regulations which set the standards for measuring the adequacy of any diversification. To be adequately diversified, each variable investment option must meet certain tests. If your variable life policy is not adequately diversified under these regulations, it is not treated as life insurance under Internal Revenue Code Section 7702. You would then be subject to federal income tax on your policy income as you earn it. Each sub-account's corresponding fund has represented that it will meet the diversification standards that apply to your policy. If it is determined that your variable life policy does not satisfy the applicable diversification regulations, we will take appropriate and reasonable steps to bring your policy into compliance with such regulations and we reserve the right to modify your policy as necessary in order to do so.

In certain circumstances, owners of a variable life insurance policy have been considered, for federal income tax purposes, to be the owners of the assets of the separate account supporting their policies, due to their ability to exercise investment control over such assets. When this is the case, the policy owners have been currently taxed on income and gains attributable to the separate account assets.

Your ownership rights under your policy are similar to, but different in some ways from those described by the IRS in rulings in which it determined that policy owners are not owners of separate account assets. For example, you have additional flexibility in allocating your premium payments and in your policy values. These differences could result in the IRS treating you as the owner of a pro rata share of the variable account assets. We do not know what standards will be set forth in the future, if any, in Treasury regulations or rulings. We reserve the right to modify your policy, as necessary, to try to prevent you from being considered the owner of a pro rata share of the variable account assets, or to otherwise qualify your policy for favorable tax treatment.

Tax Treatment of Policy Death Benefits

The death benefit under a policy is generally excludable from the gross income of the beneficiary(ies) under Section 101(a)(1) of the Internal Revenue Code. However, there are exceptions to this general rule. Additionally, federal and local transfer, estate, inheritance and other tax consequences of ownership or receipt of policy proceeds depend on the circumstances of each policy owner or beneficiary(ies). A tax adviser should be consulted about these consequences.

Distributions Other than Death Benefits

Generally, the policy owner will not be taxed on any of the policy value until there is a distribution. When distributions from a policy occur, or when loan amounts are taken from or secured by a policy, the tax consequences depend on whether or not the policy is a "modified endowment contract."

Modified Endowment Contracts

Under the Internal Revenue Code, certain life insurance contracts are classified as "modified endowment contracts" and are given less favorable tax treatment than other life insurance contracts. Due to the flexibility of the policies as to premiums and benefits, the individual circumstances of each policy will determine whether or not it is classified as a modified endowment contract. The rules are too complex to be summarized here, but generally depend on the amount of premiums we receive during the first seven policy years. Certain changes in a policy after it is issued, such as reduction in benefits, could also cause it to be classified as a modified endowment contract. A current or prospective policy owner should consult with a qualified adviser to determine whether or not a policy transaction will cause the policy to be classified as a modified endowment contract.

If a policy becomes a modified endowment contract, distributions that occur during the policy year will be taxed as distributions from a modified endowment contract. In addition, distributions from a policy within two years before it becomes a modified endowment contract will be taxed in this manner. This means that a distribution made from a policy that is not a modified endowment contract could later become taxable as a distribution from a modified endowment contract.

Additionally, all modified endowment contracts that are issued by us (or our affiliates) to the same policy owner during any calendar year are treated as one modified endowment contract for purposes of determining the amount includible in the policy owner's income when a taxable distribution occurs.

Once a policy is classified as a modified endowment contract, the following tax rules apply both prospectively and to any distributions made in the prior two years:

- All distributions other than death benefits, including distributions upon surrender and withdrawals, from a modified endowment contract will be treated first as distributions of gain taxable as ordinary income. Amounts will be treated as tax-free recovery of the policy owner's investment in the policy only after all gain has been distributed. The amount of gain in the policy will be equal to the difference between the policy's value and the investment in the policy;
- Loan amounts taken from or secured by a policy classified as a modified endowment contract, and also assignments or pledges of such a policy (or agreements to assign or pledge such a policy), are treated as distributions and taxed first as distributions of gain taxable as ordinary income and as tax-free recovery of the policy owner's investment in the policy only after all gain has been distributed; and
- A 10% additional income tax penalty may be imposed on the distribution amount subject to income tax. This tax penalty generally does not apply to distributions (1) made on or after the date on which the taxpayer attains age 59½; (b) which are attributable to the taxpayer becoming disabled (as defined in the Internal Revenue Code); or (c) which are part of a series of substantially equal periodic payments (not less frequently than annually) made for the life (or life expectancy) of the taxpayer or the joint lives (or joint life expectancies) of the taxpayer and his or her beneficiary. Consult a tax adviser to determine whether or not you may be subject to this penalty tax.

Policies That Are Not Modified Endowment Contracts

Distributions other than death benefits from a policy that is not classified as a modified endowment contract are generally treated first as a recovery of the policy owner's investment in the policy. Only after the recovery of all investment in the policy is there taxable income. However, certain distributions made in connection with policy benefit reductions during the first 15 policy years may be treated in whole or in part as ordinary income subject to tax. Consult a tax adviser to determine whether or not any distributions made in connection with a reduction in policy benefits will be subject to tax.

Loan amounts from or secured by a policy that is not a modified endowment contract are generally not taxed as distributions. However, the tax consequences of such a loan that is outstanding after policy year ten are uncertain and a tax adviser should be consulted about such loans. Finally, neither distributions from, nor loan amounts from or secured by, a policy that is not a modified endowment contract are subject to the 10% additional income tax.

Investment in the Policy

Your investment in the policy is generally the total of your aggregate premiums. When a distribution is taken from the policy, your investment in the policy is reduced by the amount of the distribution that is tax free.

Other Tax Matters

Policy Loans

In general, interest on a policy loan will not be deductible. A limited exception to this rule exists for certain interest paid in connection with certain "key person" insurance. You should consult a tax adviser to determine whether you qualify under this exception.

Moreover, the tax consequences associated with a preferred loan available in the policy are uncertain. Before taking out a policy loan, you should consult a tax adviser as to the tax consequences.

If a loan from a policy is outstanding when the policy is surrendered or lapses, then the amount of the outstanding indebtedness will be added to the amount treated as a distribution from the policy and will be taxed accordingly.

Accelerated Death Benefit Rider

We believe that payments under the accelerated death benefit rider should be fully excludable from the gross income of the beneficiary if the beneficiary is one of the insured persons under the policy, or is an individual who has no business or financial connection with the insured persons. **(See Automatic Rider Benefits - Accelerated Death Benefit Rider on page 38 for more information about this rider.)** However, you should consult a qualified tax adviser about the consequences of adding this rider to a policy or requesting payment under this rider.

Continuation of a Policy

The tax consequences of continuing the policy after younger joint insured person reaches age 95 are unclear. For example, in certain situations it is possible that after the younger joint insured person reaches age 95, the IRS could treat you as being in constructive receipt of the policy value if the policy value becomes equal to the death benefit. If this happens, an amount equal to the excess of the policy value over the investment in the policy would be includible in your income at that time. Because we believe the policy will continue to constitute life insurance at that time and the IRS has not issued any guidance on this issue, we do not intend to tax report any earnings due to the possibility of constructive receipt in this circumstance. You should consult a tax adviser if you intend to keep the policy in force after the younger joint insured person reaches age 95.

Section 1035 Exchanges

Internal Revenue Code Section 1035 provides, in certain circumstances, that no gain or loss will be recognized on the exchange of one life insurance policy for another life insurance policy, an endowment or annuity contract. Special rules and procedures apply to 1035 exchanges. These rules can be complex, and if you wish to take advantage of Section 1035, you should consult your tax adviser.

Taxation of Policy Splits

The policy split option rider permits a policy to be split into two single life policies upon the occurrence of:

- A divorce of the joint insured persons;
- Certain changes in federal estate tax law; or
- Dissolution of business conducted or owned by the joint insured persons.

Using the policy split option rider could have adverse tax consequences. Before you exercise the policy split option, it is important that you consult with a tax advisor regarding the possible tax consequences.

Tax-exempt Policy Owners

Special rules may apply to a policy that is owned by a tax-exempt entity. Tax-exempt entities should consult their tax adviser regarding the consequences of purchasing and owning a policy. These consequences could include an effect on the tax-exempt status of the entity and the possibility of the unrelated business income tax.

Tax Law Changes

Although the likelihood of legislative action is uncertain, there is always the possibility that the tax treatment of the policy could be changed by legislation or otherwise. You should consult a tax adviser with respect to legislative developments and their effect on the policy.

Policy Changes to Comply with the Law

So that your policy continues to qualify as life insurance under the Internal Revenue Code, we reserve the right to refuse to accept all or part of your premium payments or to change your death benefit. We may refuse to allow you to make partial withdrawals that would cause your policy to fail to qualify as life insurance. We also may make changes to your policy or its riders or make distributions from your policy to the degree that we deem necessary to qualify your policy as life insurance for tax purposes.

If we make any change of this type, it applies the same way to all affected policies.

Any increase in your death benefit will cause an increase in your cost of insurance charges.

Policy Availability and Qualified Plans

The policy is not available for sale to and cannot be acquired with funds that are assets of (i) an employee benefit plan as defined in Section 3(3) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and that is subject to Title I of ERISA; (ii) a plan described in Section 4975(e)(1) of the Internal Revenue Code; or (iii) an entity whose underlying assets include plan assets by reason of the investment by an employee benefit plan or other plan in such entity within the meaning of 29 C.F.R. Section 2510.3-101 or otherwise.

Policy owners may use the policy in various other arrangements, including:

- Non-qualified deferred compensation or salary continuance plans;
- Split dollar insurance plans;
- Executive bonus plans;
- Retiree medical benefit plans; and
- Other plans.

The tax consequences of these plans may vary depending on the particular facts and circumstances of each arrangement. If you want to use your policy with any of these various arrangements, you should consult a qualified tax adviser regarding the tax issues of your particular arrangement.

Life Insurance Owned by Businesses

In recent years, Congress has adopted new rules relating to life insurance owned by businesses. For example, in the case of a policy issued to a nonnatural taxpayer, or held for the benefit of such an entity, a portion of the taxpayer's otherwise deductible interest expenses may not be deductible as a result of ownership of a policy even if no loans are taken under the policy. (An exception to this rule is provided for certain life insurance contracts which cover the life of an individual who is a 20% owner, or an officer, director, or employee of a trade or business.) As another example, special rules apply if you are subject to the alternative minimum tax. Any business contemplating the purchase of a new policy or a change in an existing policy should consult a tax adviser.

Income Tax Withholding

The IRS requires us to withhold income taxes from any portion of the amounts individuals receive in a taxable transaction. We do not withhold income taxes if you elect in writing not to have withholding apply. If the amount withheld for you is insufficient to cover income taxes, you may have to pay income taxes and possibly penalties later.

Policy Transfers

The transfer of the policy or designation of a beneficiary may have federal, state and/or local transfer and inheritance tax consequences, including the imposition of gift, estate and generation-skipping transfer taxes. The individual situation of each policy owner or beneficiary will determine the extent, if any, to which federal, state and local transfer and inheritance taxes may be imposed and how ownership or receipt of policy proceeds will be treated for purposes of federal, state and local estate, inheritance, generation skipping and other taxes.

You should consult qualified legal or tax advisers for complete information on federal, state, local and other tax considerations.

ADDITIONAL INFORMATION

General Policy Provisions

Your Policy

The policy is a contract between you and us and is the combination of:

- Your policy;
- A copy of your original application and applications for benefit increases or decreases;
- Your riders;
- Your endorsements;
- Your policy schedule pages; and
- Your reinstatement applications.

If you make a change to your coverage, we give you a copy of your changed application and new policy schedules. If you send your policy to us, we attach these items to your policy and return it to you. Otherwise, you need to attach them to your policy.

Unless there is fraud, we consider all statements made in an application to be representations and not guarantees. We use no statement to deny a claim, unless it is in an application.

A president or other officer of our company and our secretary or assistant secretary must sign all changes or amendments to your policy. No other person may change its terms or conditions.

Age

The age stated in your policy schedule is the joint equivalent age of the insured people we use to issue your policy. The joint equivalent age is the sum of both insured people's ages adjusted for the differences in ages and genders, divided by two and rounded down.

The insured people must each be no more than age 90 at policy issue. The minimum joint equivalent age must be at least 15. The maximum joint equivalent age must be no more than 85. There is no limit on the difference in the insured people's ages. Age is measured as the age of the insured person on the birthday nearest the policy anniversary.

The policy anniversary nearest to the younger insured person's 100th birthday, whether or not he/she has survived, is the date used for continuation of coverage purposes.

We often use age to calculate rates, charges and values. We determine an insured person's age at a given time by adding the number of completed policy years to the age calculated at issue and shown in the policy schedule.

Ownership

The original owner is the person named as the owner in the policy application. The owner can exercise all rights and receive benefits until the death of the second of the insured people. These rights include the right to change the owner, beneficiaries or the method designated to pay death benefit proceeds.

As a matter of law, all rights of ownership are limited by the rights of any person who has been assigned rights under the policy and any irrevocable beneficiaries.

You may name a new owner by giving us written notice. The effective date of the change to the new owner is the date the prior owner signs the notice. However, we will not be liable for any action we take before a change is recorded at our customer service center. A change in ownership may cause the prior owner to recognize taxable income on gain under the policy.

Beneficiaries

You, as owner, name the beneficiaries when you apply for your policy. The primary beneficiaries who survive both of the insured people receive the death benefit proceeds. Other surviving beneficiaries receive death benefit proceeds only if there are no surviving primary beneficiaries. If more than one beneficiary survives both insured people, they share the death benefit proceeds equally, unless you specify otherwise. If none of your policy beneficiaries has survived both insured people, we pay the death benefit proceeds to you or to your estate, as owner.

You may name new beneficiaries any time before the death of the second of the insured people. We pay death benefit proceeds to the beneficiaries whom you have most recently named according to our records. We do not make payments to multiple sets of beneficiaries. **The designation of certain beneficiaries may have tax consequences. See TAX CONSIDERATIONS - *Other Tax Matters*, page 53.**

Collateral Assignment

You may assign your policy by sending written notice to us. After we record the assignment, your rights as owner and the beneficiaries' rights (unless the beneficiaries were made irrevocable beneficiaries under an earlier assignment) are subject to the assignment. It is your responsibility to make sure the assignment is valid. **The transfer or assignment of a policy may have tax consequences. See TAX CONSIDERATIONS - *Other Tax Matters*, page 53.**

Incontestability

After your policy has been in force and both insured people are alive for two years from the policy date and from the effective date of any new coverage segment, an increase in any other benefit or reinstatement, we will not question the validity of statements in your applicable application.

Misstatements of Age or Gender

Notwithstanding the Incontestability provision above, if an insured person's age or gender has been misstated, we adjust the death benefit to the amount which would have been purchased for each insured person's correct age and gender. We base the adjusted death benefit on the cost of insurance charges deducted from your policy value on the last monthly processing date before the death of the second of the insured people, or as otherwise required by law.

Suicide

If either insured person commits suicide (while sane or insane), within two years of your policy date, unless otherwise required by law, we limit death benefit proceeds to:

- The total premium we receive to the time of death; minus
- Outstanding loan account value plus accrued loan interest; minus
- Partial withdrawals taken.

We make a limited payment to the beneficiaries for a new coverage segment or other increase if the second of the insured people commits suicide (while sane or insane), within two years of the effective date of a new coverage segment or within two years of an increase in any other benefit, unless otherwise required by law. The limited payment is equal to the cost of insurance and periodic fees and charges which were deducted for the increase.

Anti-Money Laundering

In order to protect against the possible misuse of our products in money laundering or terrorist financing, we have adopted an anti-money laundering program satisfying the requirements of the USA PATRIOT Act. Among other things, this program requires us, our agents and customers to comply with certain procedures and standards that serve to assure that our customers' identities are properly verified and that premiums are not derived from improper sources.

Under our anti-money laundering program, we may require policy owners, insured persons and/or beneficiaries to provide sufficient evidence of identification, and we reserve the right to verify any information provided to us by accessing information databases maintained internally or by outside firms.

We may also refuse to accept certain forms of premium payments or loan repayments (travelers cheques, for example) or restrict the amount of certain forms of premium payments or loan repayments (money orders totaling more than \$5,000, for example). In addition, we may require information as to why a particular form of payment was used (third party checks, for example) and the source of the funds of such payment in order to determine whether or not we will accept it. Use of an unacceptable form of payment may result in your policy entering a 61-day grace period during which you must make a sufficient payment, in an acceptable form, to keep your policy from lapsing. **See Premium Payments - Premium Payments Affect Your Coverage, page 21.**

Our anti-money laundering program is subject to change without notice to take account of changes applicable in laws or regulations and our ongoing assessment of our exposure to illegal activity.

Transaction Processing

Generally, within seven days of when we receive all information required to process a payment, we pay:

- Death benefit proceeds;
- Surrender value;
- Partial withdrawals; and
- Loan proceeds.

We may delay processing these transactions if:

- The New York Stock Exchange is closed for trading;
- Trading on the New York Stock Exchange is restricted by the SEC;
- There is an emergency so that it is not reasonably possible to sell securities in the sub-accounts or to determine the value of a sub-account's assets; and
- A governmental body with jurisdiction over the variable account allows suspension by its order.

SEC rules and regulations generally determine whether or not these conditions exist.

We execute transfers among the sub-accounts as of the valuation date of our receipt of your request at our customer service center.

We determine the death benefit as of the date of death of the second of the insured people. The death benefit proceeds are not affected by subsequent changes in the value of the sub-accounts.

We may delay payment from our fixed account for up to six months, unless law requires otherwise, of surrender proceeds, withdrawal amounts or loan amounts. If we delay payment more than 30 days, we pay interest at our declared rate (or at a higher rate if required by law) from the date we receive your complete request.

Notification and Claims Procedures

Except for certain authorized telephone requests, we must receive in writing any election, designation, change, assignment or request made by the owner.

You must use a form acceptable to us. We are not liable for actions taken before we receive and record the written notice. We may require you to return your policy for changes to your policy or if you surrender it.

If an insured person dies while your policy is in force, please let us know as soon as possible. If it is the second death of the insured people, we will send you instructions on how to make a claim. As proof of an insured person's death, we may require proof of the deceased insured person's age and a certified copy of the death certificate.

The beneficiaries and the deceased insured person's next of kin may need to sign authorization forms. These forms allow us to get information such as medical records of doctors and hospitals used by the deceased insured person.

Telephone Privileges

Telephone privileges are automatically provided to you and your agent/registered representative, unless you decline it on the application or contact our customer service center. Telephone privileges allow you or your agent/registered representative to call our customer service center to:

- Make transfers;
- Change premium allocations;
- Change your dollar cost averaging and automatic rebalancing programs;
- Request partial withdrawals; and
- Request a loan.

Our customer service center uses reasonable procedures to make sure that instructions received by telephone are genuine. These procedures may include:

- Requiring some form of personal identification;
- Providing written confirmation of any transactions; and
- Tape recording telephone calls.

By accepting telephone privileges, you authorize us to record your telephone calls with us. If we use reasonable procedures to confirm instructions, we are not liable for losses from unauthorized or fraudulent instructions. We may discontinue this privilege at any time. **See Transfers - Limits on Frequent or Disruptive Transfers, page 44.**

Telephone and facsimile privileges may not always be available. Telephone or fax systems, whether yours, your service provider's or your agent's, can experience outages or slowdowns for a variety of reasons. These outages or slowdowns may prevent or delay our receipt of your request. Although we have taken precautions to help our systems handle heavy use, we cannot promise complete reliability under all circumstances. If you are experiencing problems, you should make your transfer request by written request.

Non-participation

Your policy does not participate in the surplus earnings of Security Life Insurance Company.

Advertising Practices and Sales Literature

We may use advertisements and sales literature to promote this product, including:

- Articles on variable life insurance and other information published in business or financial publications;
- Indices or rankings of investment securities; and
- Comparisons with other investment vehicles, including tax considerations.

We may use information regarding the past performance of the sub-accounts and funds. Past performance is not indicative of future performance of the sub-accounts or funds and is not reflective of the actual investment experience of policy owners.

We may feature certain sub-accounts, the underlying funds and their managers, as well as describe asset levels and sales volumes. We may refer to past, current, or prospective economic trends, and, investment performance or other information we believe may be of interest to our customers.

Settlement Options

You may elect to take the surrender value in other than one lump-sum payment. Likewise, you may elect to have the beneficiaries receive the death benefit proceeds other than in one lump-sum payment, if you make this election before the death of the second of the insured people. If you have not made this election, the beneficiaries may do so within 60 days after we receive proof of death of the second of the insured people.

The investment performance of the sub-accounts does not affect payments under these settlement options. Instead, interest accrues at a fixed rate based on the option you choose. Payment options are subject to our rules at the time you make your selection. Currently, a periodic payment must be at least \$20 and the total proceeds must be at least \$2,000.

The following settlement options are available:

- **Option 1** - The proceeds and interest are paid in equal installments for a specified period until the proceeds and interest are all paid;
- **Option 2** - The proceeds provide an annuity payment with a specified number of months. The payments are continued for the life of the primary payee. If the primary payee dies before the certain period is over, the remaining payments are paid to a contingent payee;
- **Option 3** - The proceeds are left with us to earn interest. Withdrawals and any changes are subject to our approval;
- **Option 4** - The proceeds and interest are paid in equal installments of a specified amount until the proceeds and interest are all paid; and
- **Option 5** - Other options we offer at the time we pay the benefit.

If none of these settlement options have been elected, your surrender value or the death benefit proceeds will be paid in one lump-sum payment.

Unless you request otherwise, death benefit proceeds generally will be paid into an interest bearing account which is backed by our general account and can be accessed by the beneficiary through a checkbook feature. The beneficiary may access the death benefit proceeds at any time without penalty. Interest earned on this account may be less than interest paid on other settlement options.

Reports

Annual Statement. We will send you an annual statement once each policy year showing the amount of insurance coverage under your policy as well as your policy's death benefit, policy and surrender values, the amount of premiums you have paid, the amounts you have withdrawn, borrowed or transferred and the fees and charges we have imposed since the last statement.

We send semi-annual reports with financial information on the funds, including a list of investment holdings of each fund.

We send confirmation notices to you throughout the year for certain policy transactions such as transfers between investment options, partial withdrawals and loans. You are responsible for reviewing the confirmation notices to verify that the transactions are being made as requested.

Illustrations. To help you better understand how your policy values will vary over time under different sets of assumptions, we will provide you with a personalized illustration projecting future results based on the ages and risk classifications of the insured people and other factors such as the amount of insurance coverage, death benefit option, planned premiums and rates of return (within limits) you specify. We may assess a charge not to exceed \$25 for each illustration you request after the first in a policy year. **See Transaction Fees and Charges - Excess Illustration Fee, page 25.**

Other Reports. We will mail to you at your last known address of record at least annually a report containing such information as may be required by any applicable law. To reduce expenses, only one copy of most financial reports and prospectuses, including reports and prospectuses for the funds, will be mailed to your household, even if you or other persons in your household have more than one policy issued by us or an affiliate. Call our customer service center toll-free at 1-877-253-5050 if you need additional copies of financial reports, prospectuses, historical account information or annual or semi-annual reports or if you would like to receive one copy for each policy in all future mailings.

Trading - Industry Developments

As with many financial services companies, the company and affiliates of the company have received requests for information from various governmental and self-regulatory agencies in connection with investigations related to trading in investment company shares. In each case, full cooperation and responses are being provided. The company is also reviewing its policies and procedures in this area.

Legal Proceedings

We are not aware of any pending legal proceedings which involve the variable account as a party.

We are, or may be in the future, a defendant in various legal proceedings in connection with the normal conduct of our insurance operations. Some of these cases may seek class action status and may include a demand for punitive damages as well as for compensatory damages. In the opinion of management, the ultimate resolution of any existing legal proceeding is not likely to have a material adverse effect on our ability to meet our obligations under the policy.

ING America Equities, Inc., the principal underwriter and distributor of the policy, is not involved in any legal proceeding which, in the opinion of management, is likely to have a material adverse effect on its ability to distribute the policy.

Financial Statements

Financial statements of the variable account and the company are contained in the Statement of Additional Information. To request a free Statement of Additional Information, please contact our Customer Service Center at the address or telephone number on the back of this prospectus.

We are required to include several additional financial statements in the Statement of Additional Information because of the October 1, 2004, merger of Southland Life with and into Security Life. These additional financial statements of Southland Life and pro forma financial statements of Security Life reflect the effect of the merger. None of these financial statements will appear in future versions of the Statement of Additional Information.

APPENDIX B

The following chart lists the funds, the investment advisers and subadvisers to the funds and summary information regarding the investment objective of each fund. For information about each fund's expenses, see the Fund Expense Table on page 11 of this prospectus. More detailed information about the funds can be found in the current prospectus and Statement of Additional Information for each fund.

There is no assurance that the stated objectives and policies of any of the funds will be achieved. Shares of the funds will rise and fall in value and you could lose money by investing in the funds. Shares of the funds are not bank deposits and are not guaranteed, endorsed or insured by any financial institution, the Federal Deposit Insurance Corporation or any other government agency. Except as noted, all funds are diversified, as defined under the 1940 Act.

Additional information about us, the variable account or the policy (including the SAI) can be reviewed and copied from the SEC's Internet website (www.sec.gov) or at the SEC's Public Reference Room in Washington, DC. Copies of this additional information may also be obtained, upon payment of a duplicating fee, by writing the SEC's Public Reference Room at 450 Fifth Street, NW, Washington, DC 20549-0102. More information about operation of the SEC's Public Reference Room can be obtained by calling 202-942-8090.

Prospectus Supplement

Survivor Dimensions Variable Universal Life

Security Life of Denver Insurance Company
and its
Security Life Separate Account S-L1

Supplement dated October 1, 2004, to the October 1, 2004, prospectus

This supplement updates certain information contained in your current variable life insurance product prospectus. Please read it carefully and keep it with your product prospectus for future reference.

NOTICE OF FUND SUBSTITUTIONS

Security Life of Denver Insurance Company (the "Company") and Security Life Separate Account S-L1 (the "Variable Account") have filed an application with the Securities and Exchange Commission to permit certain funds in which the sub-accounts of the Variable Account invests (the "Replaced Funds") to be replaced with certain other funds (the "Substitute Funds").

Reasons for the Substitution. The principal purposes of the substitutions are as follows:

- **Implement Business Plan.** The substitutions are part of an overall business plan to provide a more streamlined, standardized, simplified and consolidated current array of funds available through the Company's products.
- **Reduced Costs and Greater Influence.** Including too many different funds with different investment advisers within the Company's products makes those products more costly to administer. The Company believes that making available affiliated funds managed by expert third party asset managers will lead to increased efficiencies, greater influence over the administrative aspects of the funds and reduced costs.
- **Due Diligence.** The substitutions will allow the Company to respond to concerns that it has identified in their due diligence review of the funds available through the products, including concerns related to changes in fund managers, performance and well-publicized investigations, claims and regulatory actions and the corresponding negative publicity.

The Substitute Funds.

Each of the Substitute funds is a series of ING Partners, Inc. On August 13, 2004, the Board of Directors of ING Partners approved changing each Substitute Fund's sub-adviser, name and investment policies and reducing each Substitute Fund's fees and expenses. These actions are necessary to meet the conditions of the substitutions and shall be effective prior to the effective date of the substitutions. The information about the Substitute Funds in this supplement reflects the actions as approved by the ING Partners Board of Directors.

The following funds are involved in the substitutions:

Replaced Funds	Substitute Funds
Janus Aspen Balanced Portfolio - Service Shares	ING UBS U.S. Allocation Portfolio - Initial Class (to be renamed the ING Van Kampen Equity and Income Portfolio - Initial Class)
Janus Aspen Mid Cap Growth Portfolio - Service Shares	ING Alger Aggressive Growth Portfolio - Service Class (to be renamed the ING T. Rowe Price Diversified Mid-Cap Portfolio- Service Class)
Janus Aspen Worldwide Growth Portfolio - Service Shares	ING MFS Global Growth Portfolio - Service Class (to be renamed the ING Oppenheimer Global Portfolio - Service Class)

Important Information about the Proposed Substitutions.
<ul style="list-style-type: none"> • Prior to the effective date of the substitutions you will receive another prospectus supplement which will indicate the effective date of the substitutions and reiterate your rights related to the substitutions. You will also receive a prospectus for each of the Substitute Funds.
<ul style="list-style-type: none"> • Prior to the effective date of the substitutions and for thirty days thereafter you may transfer amounts allocated to a sub-account which invests in a Replaced Fund to any other sub-account or the fixed account free of charge and any such transfer will not count as a transfer when imposing any applicable restriction or limit on transfers.
<ul style="list-style-type: none"> • On the effective date of the substitutions all amounts you have allocated to a sub-account which invests in a Replaced Fund will automatically be reallocated to the corresponding Substitute Fund. Thereafter, all future allocations directed to a sub-account which invested in a Replaced Fund will be automatically allocated to the corresponding Substitute Fund.
<ul style="list-style-type: none"> • You will not incur any fees or charges or any tax liability because of the substitutions, and your policy value immediately before the substitutions will equal your policy value immediately after the substitutions;
<ul style="list-style-type: none"> • The total expenses of each Substitute Fund are less than or equal to the total expenses of the corresponding Replaced Fund. The fees and expenses of each Substitute Fund are more fully described below.
<ul style="list-style-type: none"> • The investment objective and policies of each Substitute Fund are substantially the same as the investment objective and policies of the corresponding Replaced Fund. The investment objective of each Substitute Fund is more fully described below.

Substitute Fund Fees and Expenses. The following table shows the investment advisory fees and other expenses charged annually by each of the Substitute Funds. The figures are a percentage of the average net assets of each fund as of the effective date of the substitutions as approved by the ING Partners Board of Directors. See the prospectuses for the Substitute Funds for more information concerning these fees and expenses.

Fund Name	Management Fees	Distribution (12b-1) Fees	Other Expenses	Total Gross Annual Fund Expenses	Fees and Expenses Waived or Reimbursed	Total Net Annual Fund Expenses
ING Van Kampen Equity and Income Portfolio - Initial Class	0.55%	--	0.02%	0.57%	--	0.57%
ING T. Rowe Price Diversified MidCap Growth Portfolio - Service Class	0.64%	--	0.27% ¹	0.91%	--	0.91%
ING Oppenheimer Global Portfolio - Service Class	0.60%	--	0.31% ¹	0.91%	--	0.91%

¹ Included in Other Expenses is a shareholder services fee of 0.25% of the average daily net assets of Service Class Shares to compensate insurance companies, broker dealers or other financial intermediaries that provide administrative services relating to the Service Class Shares and their shareholders.

Certain of the sub-advisers for the Substitute Funds have voluntarily agreed to pay for or reimburse the Companies or their affiliates for certain printing, mailing, transaction and/or transition costs associated with the substitutions. These payments are not disclosed in the Fund Fees and Expenses Table above, and they do not increase directly or indirectly the fees and expenses you will pay as a consequence of the substitutions.

Substitute Fund Investment Advisers/Sub-advisers and Investment Objectives. The following table lists the investment advisers and subadvisers and information regarding the investment objectives of the Substitute Funds. More detailed information about these funds can be found in the current prospectus and Statement of Additional Information for each fund.

Fund Name	Investment Adviser/ Subadviser	Investment Objective
ING Van Kampen Equity and Income Portfolio	<u>Investment Adviser:</u> ING Life Insurance and Annuity Company <u>Sub-adviser:</u> Morgan Stanley Investment Management Inc. (doing business as Van Kampen)	Seeks total return, consisting of long-term capital appreciation and current income.
ING T. Rowe Price Diversified Mid-Cap Portfolio	<u>Investment Adviser:</u> ING Life Insurance and Annuity Company <u>Subadviser:</u> T. Rowe Price Associates, Inc.	Seeks long-term capital appreciation.
ING Oppenheimer Global Portfolio	Investment Adviser: ING Life Insurance and Annuity Company Subadviser: OppenheimerFunds, Inc.	Seeks capital appreciation.

<p style="text-align: center;">SECURITY LIFE SEPARATE ACCOUNT S-L1 (formerly known as Southland Separate Account L1) OF SECURITY LIFE OF DENVER INSURANCE COMPANY</p>
--

Statement of Additional Information dated October 1, 2004

**SURVIVOR DIMENSIONS
Variable Universal Life Insurance Policy**

This Statement of Additional Information is not a prospectus and should be read in conjunction with the current Survivor Dimensions prospectus dated October 1, 2004. The policy offered in connection with the prospectus is a flexible premium variable universal life insurance policy funded through the Security Life Separate Account S-L1.

A free prospectus is available upon request by contacting the Security Life of Denver Insurance Company's Customer Service Center at P.O. Box 5065, Minot, ND 58702-5065, by calling 1-877-253-5050 or by accessing the SEC's web site at www.sec.gov.

Read the prospectus before you invest. Unless otherwise indicated, terms used in this Statement of Additional Information shall have the same meaning as in the prospectus.

Pro-Forma Unaudited Financial Statements of Security Life of Denver Insurance Company (see page PF - 1 for the periods presented)	PF - 1

GENERAL INFORMATION AND HISTORY

Prior to October 1, 2004, Southland Life Insurance Company ("Southland Life") issued the policy described in the prospectus and was responsible for providing each policy's insurance benefits. On October 1, 2004, Southland Life merged with and into the Security Life of Denver Insurance Company ("Security Life," "we," "us," "our" and the "company") and Security Life assumed responsibility for Southland Life's obligations under the policies. Security Life is a stock life insurance company organized in 1929 and incorporated under the laws of the State of Colorado and an indirect wholly-owned subsidiary of ING Groep N.V. ("ING"), a global financial institution active in the fields of insurance, banking and asset management. ING is headquartered in Amsterdam, The Netherlands. We are engaged in the business of issuing insurance policies. Our headquarters is at 1290 Broadway, Denver, CO 80203.

Southland Life established Southland Separate Account L1 (the "variable account") on February 25, 1994, under the laws of the State of Texas for the purpose of funding variable life insurance policies. On October 1, 2004, the variable account was transferred to Security Life in conjunction with the merger of Southland Life with and into Security Life and its name was changed to Security Life Separate Account S-L1. The variable account operates pursuant to the laws of the State of Colorado and is registered with the Securities and Exchange Commission ("SEC") as a unit investment trust under the Investment Company Act of 1940, as amended. Premium payments may be allocated to one or more of the available sub-accounts of the variable account. Each sub-account invests in shares of a corresponding fund at net asset value. We may make additions to, deletions from or substitutions of available funds as permitted by law and subject to the conditions of the policy.

Other than the policy owner fees and charges described in the prospectus, all expenses incurred in the operations of the variable account are borne by the company. We do, however, receive compensation for certain recordkeeping, administration or other services from the funds or affiliates of the funds available through the policies. See "Fees and Charges" in the prospectus.

The company maintains custody of the assets of the variable account. As custodian, the company holds cash balances for the variable account pending investment in the funds or distribution. The funds in whose shares the assets of the sub-accounts of the variable account are invested each have custodians, as discussed in the respective fund prospectuses.

DISTRIBUTION OF THE POLICIES

The policies are no longer offered for sale to new purchasers.

The company's affiliate, ING America Equities, Inc., serves as the principal underwriter (distributor) for the policies. ING America Equities, Inc. was organized under the laws of the State of Colorado on September 27, 1993 and is registered as a broker/dealer with the SEC and the National Association of Securities Dealers, Inc. We pay ING America Equities, Inc. under a distribution agreement dated May 1, 2002. ING America Equities, Inc.'s principal office is located at 1290 Broadway, Denver, Colorado 80203-5699.

ING America Equities, Inc. offers the securities under the policies on a continuous basis. For the years ended December 31, 2003, 2002 and 2001, the aggregate amount paid to ING America Equities, Inc. under our distribution agreement was \$31,870, \$102,239 and \$205,242, respectively.

We sell our policies through licensed insurance agents who are registered representatives of affiliated and unaffiliated broker/dealers. A description of the manner in which the policies are purchased may be found in the prospectus under the section entitled "Purchasing a Policy."

All broker/dealers who sell this policy have entered into selling agreements with us. Under these selling agreements, we pay a distribution allowance to broker/dealers, who in turn pay commissions to their agents/registered representatives who sell this policy.

The policy has two structures for the distribution allowance, but the structure does not affect fees or charges on your policy.

Under the first structure, the distribution allowance is up to 90% of the first target premium we receive in the first two policy years.

Under the second structure, the distribution allowance is up to 85% of the first target premium we receive in the first policy year. For premium over target we pay less. A bonus may be paid on aggregate sales.

Broker/dealers receive renewal commissions (trails) of up to 0.15% of the average net policy value beginning in policy year six.

In addition to these distribution allowances/commissions, we may also pay other amounts to broker/dealers and/or their agents/registered representatives. These amounts may include:

- Loans or advances of commissions in anticipation of future receipt of premiums (a form of lending to agents/registered representatives). These loans may have advantageous terms, such as reduction or elimination or the interest charged on the loan and/or forgiveness of the principal amount of the loan, which may be conditioned on insurance sales;
- Wholesaler fees and marketing allowances based on aggregate commissions paid during the year;
- Education and training allowances to facilitate our attendance at certain educational and training meetings to provide information and training about our products. We also hold training programs from time to time at our own expense;
- Sponsor payments or reimbursements for broker/dealers to use in sales contests for their agents/registered representatives. We do not hold contests directly based on sales of this product; and
- Certain overrides and other benefits, which may include cash compensation, based on the amount of earned commissions, agent/representative recruiting, and other activities that promote the sale of policies.

We pay dealer concessions, wholesaling fees, overrides, other allowances and benefits and the costs of all other incentives or training programs from our resources which include sales charges.

PERFORMANCE REPORTING AND ADVERTISING

Information regarding the past, or historical, performance of the sub-accounts of the variable account and the funds available for investment through the sub-accounts of the variable account may appear in advertisements, sales literature or reports to policy owners or prospective purchasers. SUCH PERFORMANCE INFORMATION FOR THE SUB-ACCOUNTS WILL REFLECT THE DEDUCTION OF ALL FUND FEES AND CHARGES, INCLUDING INVESTMENT MANAGEMENT FEES, DISTRIBUTION (12B-1) FEES AND OTHER EXPENSES BUT WILL NOT REFLECT DEDUCTIONS FOR ANY POLICY FEES AND CHARGES. IF THE POLICY'S PREMIUM EXPENSE, COST OF INSURANCE, ADMINISTRATIVE AND MORTALITY AND EXPENSE RISK CHARGES AND THE OTHER TRANSACTION, PERIODIC OR OPTIONAL BENEFITS FEES AND CHARGES WERE DEDUCTED, THE PERFORMANCE SHOWN WOULD BE SIGNIFICANTLY LOWER.

With respect to performance reporting it is important to remember that past performance does not guarantee future results. Current performance may be higher or lower than the performance shown and actual investment returns and principal values will fluctuate so that shares and/or units, at redemption, may be worth more or less than their original cost.

Performance history of the sub-accounts of the variable account and the corresponding funds is measured by comparing the value at the beginning of the period to the value at the end of the period. Performance is usually calculated for periods of one month, three months, year-to-date, one year, three years, five years, ten years (if the fund has been in existence for these periods) and since the inception date of the fund (if the fund has been in existence for less than ten years). We may provide performance information showing average annual total returns for periods prior to the date a sub-account commenced operation. We will calculate such performance information based on the assumption that the sub-accounts were in existence for the same periods as those indicated for the funds, with the level of charges at the variable account level that were in effect at the inception of the sub-accounts. Performance information will be specific to the class of fund shares offered through the policy, however, for periods prior to the date a class of fund shares commenced operations, performance information may be based on a different class of shares of the same fund. In this case, performance for the periods prior to the date a class of fund shares commenced operations will be adjusted by the fund fees and expenses associated with the class of fund shares offered through the policy.

We may compare performance of the sub-accounts and/or the funds as reported from time to time in advertisements and sales literature to other variable life insurance issuers in general; to the performance of particular types of variable life insurance policies investing in mutual funds; or to investment series of mutual funds with investment objectives similar to each of the sub-accounts, whose performance is reported by Lipper Analytical Services, Inc. ("Lipper") and Morningstar, Inc. ("Morningstar") or reported by other series, companies, individuals or other industry or financial publications of general interest, such as *Forbes*, *Money*, *The Wall Street Journal*, *Business Week*, *Barron's*, *Kiplinger's* and *Fortune*. Lipper and Morningstar are independent services which monitor and rank the performances of variable life insurance issuers in each of the major categories of investment objectives on an industry-wide basis.

Lipper's and Morningstar's rankings include variable annuity issuers as well as variable life insurance issuers. The performance analysis prepared by Lipper and Morningstar ranks such issuers on the basis of total return, assuming reinvestment of distributions, but does not take sales charges, redemption fees or certain expense deductions at the separate account level into consideration. We may also compare the performance of each sub-account in advertising and sales literature to the Standard & Poor's Index of 500 common stocks and the Dow Jones Industrials, which are widely used measures of stock market performance. We may also compare the performance of each sub-account to other widely recognized indices. Unmanaged indices may assume the reinvestment of dividends, but typically do not reflect any "deduction" for the expense of operating or managing an investment portfolio.

To help you better understand how your policy's death benefits, policy value and surrender value will vary over time under different sets of assumptions, we encourage you to obtain a personalized illustration. Personalized illustrations will assume deductions for fund expenses and policy and variable account charges. We will base these illustrations on the age and risk classification of the insured person and other factors such as the amount of insurance coverage, death benefit option, premiums and rates of return (within limits) you specify. These personalized illustrations will be based on either a hypothetical investment return of the funds of 0% and other percentages not to exceed 12% or on the actual historical experience of the funds as if the sub-accounts had been in existence and a policy issued for the same periods as those indicated for the funds. Subject to regulatory approval, personalized illustrations may be based upon a weighted average of fund expenses rather than an arithmetic average. A personalized illustration is available upon request by contacting our Customer Service Center at P.O. Box 5065, Minot, ND 58702-5065 or by calling 1-877-253-5050.

EXPERTS

Certain financial statements included in this Statement of Additional Information, which is part of the registration statement, have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in their reports thereon appearing elsewhere herein, and are included in reliance upon such reports given on the authority of such firm as experts in accounting and auditing. Their principal business address is Suite 2800, 600 Peachtree Street, Atlanta, GA 30308-2215.

FINANCIAL STATEMENTS

The statement of assets and liabilities of Southland Separate Account L1 (to become Security Life of Denver Separate Account S-L1 as of October 1, 2004) as of December 31, 2003, and the related statement of operations for the year then ended and statements of changes in net assets for each of the two years in the period then ended, appearing herein, have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in their report appearing herein.

The pro forma financial statements of Security Life, reflecting the merger of Southland Life into Security Life, appearing herein, are unaudited.

The statutory-basis financial statements of Security Life (into which Southland Life will merge, effective October 1, 2004) as of December 31, 2003, 2002 and 2001, and for each of the years then ended, appearing herein, have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in their report appearing herein. Financial statements of Security Life should be considered only as bearing on Security Life's ability to meet our obligations under the policy. They should not be considered as bearing on the investment performance of the assets held in the Separate Account.

We also are required to include several additional financial statements in this Statement of Additional Information because of the October 1, 2004, merger of Southland Life into Security Life. The statutory-basis financial statements as of December 31, 2003, 2002 and 2001, and for each of the years then ended of Southland Life, appearing herein, have been audited by Ernst & Young LLP, independent registered public accounting firm, as set forth in their reports appearing herein.

Putnam VT New Opportunities Fund - Class IB
Putnam VT Small Cap Value Fund - Class IB
Putnam VT Voyager Fund - Class IB

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2003, by correspondence with the transfer agents. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of each of the Divisions comprising Southland Separate Account L1 at December 31, 2003, and the results of their operations and changes in their net assets for the periods disclosed in the financial statements, in conformity with accounting principles generally accepted in the United States.

SOUTHLAND LIFE INSURANCE COMPANY
SOUTHLAND SEPARATE ACCOUNT L1
Notes to Financial Statements

1. Organization

The Southland Separate Account L1 (the "Account") was established by resolution of the Board of directors of Southland Life Insurance Company ("Southland Life" or "the Company") on February 25, 1994. The Account supports the operations of the Future Dimensions Variable Universal Life, Survivor Dimensions Variable Universal Life and Market Dimensions Variable Universal Life policies ("Variable Universal Life Policies" or collectively, "Policies") offered by the Company. The Company is a wholly owned subsidiary of ING America Insurance Holdings, Inc. ("ING AIH"), an insurance holding company domiciled in the State of Delaware. ING AIH is a wholly owned subsidiary of ING Groep, N.V., a global financial services holding company based in The Netherlands.

The Account is organized as a unit investment trust registered with the Securities and Exchange Commission under the Investment Company Act of 1940, as amended. Market Dimensions Variable Universal Life Policies became effective in 2001 and are defined as Class B Policies due to their mortality and expense charge structure. Future Dimensions Variable Universal Life and Survivor Dimensions Variable Universal Life Policies are defined as Class A Policies. The Variable Universal Life Policies allow the Policyholders to specify the allocation of their net premiums to the various funds. They can also transfer their account values among the funds. The Variable Universal Life Policies also provide the Policyholders the option to allocate their net premiums, or to transfer their account values, to a Guaranteed Interest Account ("GIA") in the Company's general account. The GIA guarantees a rate of interest to the Policyholder, and it is not variable in nature. Therefore, it is not included in the Account financial statements. The Account may be used to support other variable life policies as they are offered by the Company. The assets of the Account are the property of the Company. However, the portion of the Account's assets attributable to the Policies will not be used to satisfy liabilities arising out of any other operations of the Company.

As of December 31, 2003, the Account consisted of 64 investment divisions (the "Divisions") available to the Policyholders, 40 of which invest in independently managed mutual funds and 24 of which invest in mutual funds advised by an affiliate, either Directed Services, Inc., ING Investments, LLC, or ING Life Insurance and Annuity Company. The assets in each Division are invested in shares of a designated fund ("Fund") of various investment trusts (collectively, the "Trusts"). Investment Divisions at December 31, 2003 and related Trusts are as follows:

Notes to Financial Statements

2. Significant Accounting Policies

The following is a summary of the significant accounting policies of the Account:

Use of Estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

Investments

Investments are made in shares of a Fund and are recorded at fair value, determined by the net asset value per share of the respective Fund. The investments in shares of the Funds are accounted for on the date the order to buy or sell is confirmed. Dividend income and distributions of capital gains are recorded on the ex-dividend date. Realized gains and losses from investment transactions are reported using the first-in, first-out method of accounting for cost. The difference between cost and current fair value of investments owned on the day of measurement is recorded as unrealized appreciation or depreciation of investments.

Federal Income Taxes

Operations of the Account form a part of, and are taxed with, the total operations of Southland Life, which is taxed as a life insurance company under the Internal Revenue Code. Earnings and realized capital gains of the Account attributable to the Policyholders are excluded in the determination of the federal income tax liability of Southland Life.

Policyholder Reserves

Policyholder reserves are presented as net assets on the Statement of Assets and Liabilities and are equal to the aggregate account values of the Policyholders invested in the Account Divisions. To the extent that benefits to be paid to the Policyholders exceed their account values, Southland Life will contribute additional funds to the benefit proceeds. Conversely, if amounts allocated exceed amounts required, transfers may be made to Southland Life.

SOUTHLAND LIFE INSURANCE COMPANY
SOUTHLAND SEPARATE ACCOUNT L1
Notes to Financial Statements

Policy Loans

The Variable Universal Life Policies allow the Policyholders to borrow against their Policies by using them as collateral for a loan. At the time of borrowing against the Policies, an amount equal to the loan amount is transferred from the Account to a loan GIA in the Company's general account to secure the loan. As payments are made on the Policy loan, amounts are transferred back from the loan GIA to the Account Divisions. Interest is credited to the balance in the loan GIA at a fixed rate. The loan GIA is not variable in nature and is not included in these Account statements.

3. Charges and Fees

Under the terms of the Policies, certain charges are allocated to the Policies to cover Southland Life's expenses in connection with the issuance and administration of the Policies. Following is a summary of these charges:

Mortality and Expense Risk Charges

For Future Dimensions and Survivor Dimensions Policies (Class A Policies), charges are made directly against the assets of the Divisions, and are reflected daily in the computation of the unit values of the Divisions. A daily deduction, at an annual rate of 0.90% of the daily asset value of the Account Divisions, is charged to the Account for mortality and expense risks assumed by the Company.

For Market Dimensions Policies (Class B Policies), mortality and expense risk charges result in the redemption of units rather than in a deduction in the daily computation of unit values. A monthly deduction, at an annual rate of 0.90%, .60% and .15% of the Account value is charged during policy years 1 through 5, 6 through 10, and 11 and later, respectively.

Other Policy Deductions

The Variable Universal Life Policies provide for certain deductions for sales and tax loads from premium payments received from the Policyholders and for surrender charges and taxes from amounts paid to Policyholders. Such deductions are taken after the redemption of units in the Account and are not included in the Account financial statements.

Premium Taxes

Premiums are subject to a charge for premium and other state and local taxes. The amount and timing of the payment by Southland Life depends on the state of residence and currently ranges up to 4.0% of premiums.

SOUTHLAND LIFE INSURANCE COMPANY
SOUTHLAND SEPARATE ACCOUNT L1
Notes to Financial Statements

4. Related Party Transactions

During the year ended December 31, 2003, management and service fees were paid indirectly to Directed Services, Inc., an affiliate of the Company, in its capacity as investment manager to ING Investors Trust. The Fund's advisory agreement provided for a fee at annual rates ranging from 0.53% to 1.85% of the average net assets of each respective Division. Management fees were paid to ING Investments, LLC, an affiliate of the Company, in its capacity as investment advisor to ING Variable Products Trust, ING Income Shares, and ING Variable Portfolios, Inc. The Funds' advisory agreement provides for fees at annual rates ranging from 0.35% to 1.00% of the average net assets of each respective Division. Additionally, management fees were paid to ING Life Insurance and Annuity Company in its capacity as investment advisor to ING Partners, Inc. The Fund's advisory agreement provides for fees at annual rates of 0.90% of the average net assets of the ING UBS Tactical Asset Allocation Portfolio and 0.60% of the average net assets of the ING Van Kampen Comstock Portfolio.

* Not provided for 2000.

** As investment Division was not available until 2001, this data is not meaningful and is therefore not presented.

*** As investment Division was not available until 2002, this data is not meaningful and is therefore not presented.

**** As investment Division was not available until 2003, this data is not meaningful and is therefore not presented.

A The Investment Income Ratio represents dividends received by the Division, excluding capital gains distributions, divided by the average net assets. The recognition of investment income is determined by the timing of the declaration of dividends by the underlying fund in which the Division invests.

B The Expense Ratio considers only the expenses borne directly by the Account and is equal to the mortality and expense charge, as defined in Note 3. Certain items in this table are presented as a range of minimum and maximum values; however, such information is calculated independently for each column in the table.

C Total Return is calculated as the change in unit value for each Contract presented in the Statements of Assets and Liabilities. Certain items in this table are presented as a range of minimum and maximum values; however, such information is calculated independently for each column in the table.

Report of Independent Auditors

Board of Directors and Stockholder
Southland Life Insurance Company

We have audited the accompanying statutory basis balance sheets of Southland Life Insurance Company ("the Company" and a wholly owned subsidiary of ING America Insurance Holdings, Inc.) as of December 31, 2002 and 2001, and the related statutory basis statements of operations, changes in capital and surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1 to the financial statements, the Company presents its financial statements in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Texas (Texas Department of Insurance), which practices differ from accounting principles generally accepted in the United States. The variances between such practices and accounting principles generally accepted in the United States are described in Note 1. The effects on the financial statements of these variances are not reasonably determinable but are presumed to be material.

In our opinion, because of the effects of the matter described in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States, the financial position of Southland Life Insurance Company at December 31, 2002 and 2001 or the results of its operations or its cash flows for the years then ended.

However, in our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Southland Life Insurance Company at December 31, 2002 and 2001, and the results of its operations and its cash flows for the years then ended, in conformity with accounting practices prescribed or permitted by the Texas Department of Insurance.

As discussed in Note 3 to the financial statements, in 2001 the Company changed various accounting policies to be in accordance with the revised NAIC Accounting Practices and Procedures Manual, as adopted by the Texas Department of Insurance.

/s/ Ernst & Young LLP

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies

Southland Life Insurance Company (the "Company") is a wholly owned, Texas domiciled subsidiary of ING America Life Corporation (the "Parent"), a wholly owned subsidiary of ING America Insurance Holdings, Inc. ("ING AIH"). The Parent has another insurance subsidiary, Life Insurance Company of Georgia ("LOG"), in addition to a minor non-insurance subsidiary.

The Company's market focus is on the middle-income consumer. The life insurance products offered address retirement accumulation, wealth transfer and estate planning, and death protection needs. Products include universal life, survivorship and traditional life insurance and products with low expense loads to institutional and individual customers. Operations are conducted through independent producers. An increasing portion of the Company's business is no-load products sold to individuals, by fee-based financial planners, businesses and institutions. The Company is presently licensed in forty-nine states (all states except New York), the District of Columbia, and Puerto Rico.

The preparation of financial statements of insurance companies requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Basis of Presentation

The accompanying financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Texas Department of Insurance, which practices differ from accounting principles generally accepted in the United States ("GAAP"). The most significant variances from GAAP are as follows:

Investments: Investments in bonds and mandatorily redeemable preferred stocks are reported at amortized cost or market value based on the National Association of Insurance Commissioners ("NAIC") rating; for GAAP, such fixed maturity investments are designated at purchase as held-to-maturity, trading or available-for-sale. Held-to-maturity investments are reported at amortized cost, and the remaining fixed maturity investments are reported at fair value with unrealized capital gains and losses reported in

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

operations for those designated as trading and as a separate component of other comprehensive income in stockholder's equity for those designated as available-for-sale.

For structured securities, when a negative yield results from a revaluation based on new prepayment assumptions (i.e., undiscounted cash flows are less than current book value), an other than temporary impairment is considered to have occurred and the asset is written down to the value of the undiscounted cash flows. For GAAP, assets are re-evaluated based on the discounted cash flows using a current market rate. Impairments are recognized when there has been an adverse change in cash flows and the fair value is less than book. The asset is then written down to fair value.

Derivative instruments that meet the criteria of an effective hedge are valued and reported in a manner that is consistent with the hedged asset or liability. Embedded derivatives are not accounted for separately from the host contract. Under GAAP, the effective and ineffective portions of a single hedge are accounted for separately, an embedded derivative within a contract that is not clearly and closely related to the economic characteristics and risk of the host contract is accounted for separately from the host contract and valued and reported at fair value, and the change in fair value for cash flow hedges is credited or charged directly to a separate component of shareholders' equity rather than to income as required for fair value hedges.

Valuation Reserves: The asset valuation reserve ("AVR") is determined by a NAIC-prescribed formula and is reported as a liability rather than as a valuation allowance or an appropriation of surplus. The change in AVR is reported directly to unassigned surplus. Under a formula prescribed by the NAIC, the Company defers the portion of realized gains and losses on sales of fixed-income investments, principally bonds and mortgage loans, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity based on groupings of individual securities sold in five-year bands. The net deferral is reported as the interest maintenance reserve ("IMR") in the accompanying balance sheets.

Realized gains and losses on investments are reported in operations net of federal income tax and transfers to the IMR. Under GAAP, realized capital gains and losses are reported in the statements of operations on a pretax basis in the period that the asset giving rise to the gain or loss is sold and credit impairments are charged to income when there has been a decline in value deemed other than temporary.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

Valuation allowances, if necessary, are established for mortgage loans based on the difference between the net value of the collateral, determined as the fair value of the collateral less estimated costs to obtain and sell, and the recorded investment in the mortgage loan. Under GAAP, such allowances are based on the present value of expected future cash flows discounted at the loan's effective interest rate or, if foreclosure is probable, on the estimated fair value of the collateral.

The initial valuation allowance and subsequent changes in the allowance for mortgage loans as a result of a temporary impairment are charged or credited directly to unassigned surplus, rather than being included as a component of earnings as would be required under GAAP.

Policy Acquisition Costs: The costs of acquiring and renewing business are expensed when incurred. Under GAAP, acquisition costs related to traditional life insurance, to the extent recoverable from future policy revenues, are deferred and amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policy benefit reserves. For universal life insurance and investment products, to the extent recoverable from future gross profits, acquisition costs are amortized generally in proportion to the present value of expected gross margins from surrender charges and investment, mortality, and expense margins.

Premiums: Life premiums are recognized as revenue when due. Premiums for annuity policies with mortality and morbidity risk, except for guaranteed interest and group annuity contracts, are also recognized as revenue when due. Premiums received for annuity policies without mortality or morbidity risk and for guaranteed interest and group annuity contracts are recorded using deposit accounting. In deposit accounting premiums are credited to an appropriate policy reserve account, without recognizing premium income.

Under GAAP, premiums for traditional life insurance products, which include those products with fixed and guaranteed premiums and benefits and consist primarily of whole life insurance policies, are recognized as revenue when due. Group insurance premiums are recognized as premium revenue over the time period to which the premiums relate. Revenues for universal life, annuities and guaranteed interest contracts consist of policy charges for the cost of insurance, policy administration charges, amortization of policy initiation fees and surrender charges assessed during the period.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

Benefit and Contract Reserves: Life policy and contract reserves under statutory accounting practices are calculated based upon both the net level premium and Commissioners' Reserve Valuation methods using statutory rates for mortality and interest. GAAP requires that policy reserves for traditional products be based upon the net level premium method utilizing reasonably conservative estimates of mortality, interest, and withdrawals prevailing when the policies were sold. For interest-sensitive products, the GAAP policy reserve is equal to the policy fund balance plus an unearned revenue reserve which reflects the unamortized balance of early year policy loads over renewal year policy loads.

Reinsurance: For business ceded to unauthorized reinsurers, statutory accounting practices require that reinsurance credits permitted by the treaty be recorded as an offsetting liability and charged against unassigned surplus. Under GAAP, an allowance for amounts deemed uncollectible would be established through a charge to earnings. Statutory income recognized on certain reinsurance treaties representing financing arrangements is not recognized on a GAAP basis.

Policy and contract liabilities ceded to reinsurers have been reported as reductions of the related reserves rather than as assets as required under GAAP.

Commissions allowed by reinsurers on business ceded are reported as income when received rather than being deferred and amortized with deferred policy acquisition costs as required under GAAP.

Nonadmitted Assets: Certain assets designated as "nonadmitted," principally deferred federal income tax assets, disallowed interest maintenance reserves, non-operating software, past-due agents' balances, furniture and equipment, intangible assets, and other assets not specifically identified as an admitted asset within the NAIC *Accounting Practices and Procedures Manual* are excluded from the accompanying balance sheets and are charged directly to unassigned surplus.

Universal Life and Annuity Policies: Revenues for universal life and annuity policies consist of the entire premium received and benefits incurred represent the total of death benefits paid and the change in policy reserves. Under GAAP, premiums received in excess of policy charges would not be recognized as premium revenue and benefits would represent the excess of benefits paid over the policy account value and interest credited to the account values.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

Policyholder Dividends: Policyholder dividends are recognized when declared rather than over the term of the related policies.

Deferred Income Taxes: Deferred tax assets are provided for and admitted to an amount determined under a standard formula. This formula considers the amount of differences that will reverse in the subsequent year, taxes paid in prior years that could be recovered through carrybacks, surplus limits and the amount of deferred tax liabilities available for offset. Any deferred tax assets not covered under the formula are non-admitted. Deferred taxes do not include any amounts for state taxes. Under GAAP, a deferred tax asset is recorded for the amount of gross deferred tax assets that are expected to be realized in future years and a valuation allowance is established for the portion that is not realizable.

Statements of Cash Flows: Cash and short-term investments in the statements of cash flows represent cash balances and investments with initial maturities of one year or less. Under GAAP, the corresponding caption of cash and cash equivalents include cash balances and investments with initial maturities of three months or less.

Reconciliation to GAAP

The effects of the preceding variances from GAAP on the accompanying statutory basis financial statements have not been determined, but are presumed to be material.

Other significant accounting practices are as follows:

Investments

Bonds, preferred stocks, common stocks, short-term investments and derivative instruments are stated at values prescribed by the NAIC, as follows:

Bonds not backed by other loans are principally stated at amortized cost using the interest method.

Single class and multi-class mortgage-backed/asset-backed securities are valued at amortized cost using the interest method including anticipated prepayments. Prepayment assumptions are obtained from dealer surveys or internal estimates and are based on the current interest rate and economic environment. The retrospective adjustment method is used to value all such securities except for higher-risk asset backed securities, which are valued using the prospective method.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Investments (continued)

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/(losses) are reported in unassigned surplus along with adjustment for federal income taxes.

The Company analyzes the general account investments to determine whether there has been an other than temporary decline in fair value below the amortized cost basis. Management considers the length of the time and the extent to which the market value has been less than cost; the financial condition and near-term prospects of the issuer; future economic conditions and market forecasts; and the Company's intent and ability to retain the investment in the issuer for a period of time sufficient to allow for recovery in market value. If it is probable that all amounts due according to the contractual terms of a debt security will not be collected, an other than temporary impairment is considered to have occurred.

The Company uses interest rate swaps, caps and floors, options and certain other derivatives as part of its overall interest rate risk management strategy for certain life insurance and annuity products. As the Company only uses derivatives for hedging purposes, the Company values all derivative instruments on a consistent basis with the hedged item. Upon termination, gains and losses on those instruments are included in the carrying values of the underlying hedged items and are amortized over the remaining lives of the hedged items as adjustments to investment income or benefits from the hedged items. Any unamortized gains or losses are recognized when the underlying hedged items are sold.

Interest rate swap contracts are used to convert the interest rate characteristics (fixed or variable) of certain investments to match those of the related insurance liabilities that the investments are supporting. The net interest effect of such swap transactions is reported as an adjustment of interest income from the hedged items as incurred.

Interest rate caps and floors are used to limit the effects of changing interest rates on yields of variable rate or short-term assets or liabilities. The initial cost of any such agreement is amortized to net investment income over the life of the agreement. Periodic payments that are receivable as a result of the agreements are accrued as an adjustment of interest income or benefits from the hedged items.

Mortgage loans are reported at amortized cost, less allowance for impairments.

Policy loans are reported at unpaid principal balances.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Investments (continued)

For reverse dollar repurchase agreements, Company policies require a minimum of 95% of the fair value of securities posted as collateral under reverse agreements to be maintained. Cash received is invested in short-term investments and the offsetting liability is included in miscellaneous liabilities.

Reverse dollar repurchase agreements are accounted for as collateral borrowings, where the amount borrowed is equal to the sales price of the underlying securities.

Short-term investments are reported at amortized cost. Short-term investments include investments with maturities of less than one year at the date of acquisition.

Other invested assets are reported at amortized cost using the effective interest method. Other invested assets primarily consist of residual collateralized mortgage obligations and partnership interests.

Realized capital gains and losses are determined using the specific identification basis.

Aggregate Reserve for Life Policies and Contracts

Life, annuity, and accident and health reserves are developed by actuarial methods and are determined based on published tables using statutorily specified interest rates and valuation methods that will provide, in the aggregate, reserves that are greater than or equal to the minimum or guaranteed policy cash value or the amounts required by law. Interest rates range from 2.0% to 6.0%.

The Company waives the deduction of deferred fractional premiums upon the death of the insured. It is the Company's practice to return a pro rata portion of any premium paid beyond the policy month of death, although it is not contractually required to do so for certain issues.

The methods used in the valuation of substandard policies are as follows:

For life, endowment and term policies issued substandard, the standard reserve during the premium-paying period is increased by 50% of the gross annual extra premium. Standard reserves are held on Paid-Up Limited Pay contracts.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Aggregate Reserve for Life Policies and Contracts (continued)

For reinsurance accepted with table rating, the reserve established is a multiple of the standard reserve corresponding to the table rating.

For reinsurance with flat extra premiums, the standard reserve is increased by 50% of the flat extra.

The amount of insurance in force for which the gross premiums are less than the net premiums, according to the standard of valuation required by the Texas Department of Insurance, is \$230,502,000 at December 31, 2002. The amount of premium deficiency reserves for policies on which gross premiums are less than the net premiums is \$2,166,000 at December 31, 2002. The Company anticipates investment income as a factor in the premium deficiency calculation in accordance with SSAP 54, Individual and Group Accident and Health Contracts.

The tabular interest has been determined from the basic data for the calculation of policy reserves for all direct ordinary life insurance and for the portion of group life insurance classified as group Section 79. The method of determination of tabular interest of funds not involving life contingencies is as follows: current year reserves, plus payments, less prior year reserves, less funds added.

Reinsurance

Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on bases consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Reserves are based on the terms of the reinsurance contracts and are consistent with the risks assumed. Premiums and benefits ceded to other companies have been reported as a reduction of premium revenue and benefits expense. Amounts applicable to reinsurance ceded for reserves and unpaid claim liabilities have been reported as reductions of these items, and expense allowances received in connection with reinsurance ceded have been reflected in operations.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Participating Insurance

Participating business approximates less than 1.0% of the Company's ordinary life insurance in force and 1.0 % of premium income. The amount of dividends to be paid is determined annually by the Board of Directors. Amounts allocable to participating policyholders are based on published dividend projections or expected dividend scales. Dividends of \$28,000 and \$54,000 were incurred in 2002 and 2001, respectively.

Nonadmitted Assets

Nonadmitted assets are summarized as follows:

	December 31	
	2002	2001
	<i>(In thousands)</i>	
Amount receivable under reinsurance		
contents	\$ -	\$16,827
Deferred federal income taxes	45,685	69,630
Agents' debit balances	3,159	2,842
Other	283	2,079
Total nonadmitted assets	<u>\$49,127</u>	<u>\$91,378</u>

Changes in nonadmitted assets are generally reported directly in surplus as an increase or decrease in nonadmitted assets. The change in unrealized capital gains and losses is reported directly in surplus as a change in unrealized capital gains or losses.

Claims and Claims Adjustment Expenses

Claims expenses represent the estimated ultimate net cost of all reported and unreported claims incurred through December 31, 2002. The Company does not discount claims and claims adjustment expense reserves. Such estimates are based on actuarial projections applied to historical claims payment data. Such liabilities are considered to be reasonable and adequate to discharge the Company's obligations for claims incurred but unpaid as of December 31, 2002.

Cash Flow Information

Cash and short-term investments include cash on hand, demand deposits and short-term fixed maturity instruments (with a maturity of less than one year at date of acquisition).

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

1. Nature of Operations and Significant Accounting Policies (continued)

Cash Flow Information (continued)

The Company borrowed and repaid \$605,590,000 in 2002 and borrowed and repaid \$16,800,000 during 2001. These borrowings were on a short-term basis, at an interest rate that approximated current money market rates and excludes borrowings from dollar roll transactions. Interest paid on borrowed money was \$66,000 and \$25,000 during 2002 and 2001, respectively.

Separate Accounts

Separate account assets and liabilities held by the Company represent funds held for the benefit of the Company's variable life and annuity policy and contract holders who bear all of the investment risk associated with the policies. Such policies are of a non-guaranteed nature. All net investment experience, positive or negative, is attributed to the policy and contract holders' account values. The assets and liabilities of these accounts are carried at fair value.

Reserves related to the Company's mortality risk associated with these policies are included in life and annuity reserves. The operations of the separate accounts are not included in the accompanying statements of operations.

Reclassifications

Certain prior year amounts in the Company's statutory basis financial statements have been reclassified to conform to the 2002 financial statement presentation.

2. Permitted Statutory Basis Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the State of Texas. The Texas Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Texas for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Texas Insurance Laws. The NAIC *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Texas. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

The Company is required to identify those significant accounting practices that are permitted, and obtain written approval of the practices from the Texas Division of Insurance. As of December 31, 2002 and 2001, the Company had no such permitted accounting practices.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

3. Accounting Changes

The Company prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Texas. Effective January 1, 2001, the State of Texas required that insurance companies domiciled in the State of Texas prepare their statutory basis financial statements in accordance with the NAIC *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the State of Texas insurance commissioner.

Accounting changes adopted to conform to the provisions of the NAIC *Accounting Practices and Procedures Manual* are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is reported as an adjustment to unassigned surplus in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

As a result of these changes, the Company reported a change of accounting principle, as an adjustment that increased unassigned surplus, by \$21,557,000 as of January 1, 2001. These changes are primarily attributed to an increase in unassigned surplus of approximately \$16,738,000 related to deferred tax assets and \$4,819,000 related to prepayment penalties on bonds and mortgage loans released from the IMR liability.

During 2001, the Company refined its method of estimating reinsurance reserve credits. Under the new method, the Company estimated the credits to be \$41,000,000 as of December 31, 2001. For 2001, this change resulted in increased net income and surplus of \$35,800,000 over the previous method.

4. Investments (continued)

The amortized cost and fair value of investments in bonds at December 31, 2002, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
<i>(In Thousands)</i>		
December 31, 2002		
Maturity:		
Due in 1 year or less	\$ 563	\$ 566
Due after 1 year through 5 years	363,279	375,302
Due after 5 years through 10 years	571,025	604,077
Due after 10 years	325,232	343,075
	1,260,099	1,323,020
Mortgage-backed securities	590,015	600,763
Other structured securities	278,708	292,490
Total	\$2,128,822	\$2,216,273

At December 31, 2002 and 2001, investments in certificates of deposit and bonds, with an admitted asset value of \$9,085,000 and 9,608,000, respectively, were on deposit with state insurance departments to satisfy regulatory requirements.

Reconciliation of bonds from amortized cost to carrying value as of December 31, 2002 and 2001 is as follows:

	2002	2001
<i>(In Thousands)</i>		
Amortized cost	\$2,128,822	\$2,062,432
Less nonadmitted bonds	5,589	1,654
Carrying value	\$2,123,233	\$2,060,778

Proceeds from the sale of investments in bonds and other fixed maturity interest securities were \$1,723,620,000 and \$706,078,000 in 2002 and 2001, respectively. Gross gains of \$23,175,000 and \$13,018,000 and gross losses of \$39,535,000 and \$7,978,000 during 2002 and 2001, respectively, were realized on those sales.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

4. Investments (continued)

Major categories of net investment income are summarized as follows:

	2002	2001
	<i>(In Thousands)</i>	
Income:		
Bonds	\$146,536	\$137,690
Mortgage loans	39,409	39,905
Policy loans	5,182	4,990
Other	365	6,314
Total investment income	191,492	188,899
Investment expenses	(10,874)	(13,312)
Net investment income	\$180,618	\$175,587

As part of its overall investment strategy, the Company has entered into agreements to purchase securities as follows:

	2002	2001
	<i>(In Thousands)</i>	
Investment purchase commitments	\$81,676	\$11,123

The Company entered into reverse dollar repurchase agreements to increase its return on investments and improve liquidity. Reverse dollar repurchase agreements involve a sale of securities and an agreement to repurchase substantially the same securities as those sold. The reverse dollar repurchase agreements are accounted for as short term collateralized financing and the repurchase obligation is reported in borrowed money. The repurchase obligation totaled \$135,387,000 at December 31, 2002. The securities underlying these agreements are mortgage-backed securities with a book value and fair value of \$134,246,000 at December 31, 2002. The securities have a weighted average coupon of 5.8% and have maturities ranging from December 2017 through December 2032. The primary risk associated with short-term collateralized borrowings is that the counterparty may be unable to perform under the terms of the contract. The Company's exposure is limited to the excess of the net replacement cost of the securities over the value of the short-term investments, which was not material at December 31, 2002. The Company believes the counterparties to the dollar roll agreements are financially responsible and that the counterparty risk is minimal.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

4. Investments (continued)

The Company participates in reverse repurchase transactions. Such transactions include the sale of corporate securities to a major securities dealer and a simultaneous agreement to repurchase the same security in the near term. The proceeds are invested in new securities of intermediate durations. The terms of the reverse repurchase agreement call for payment of interest at a rate of 1.4%. The agreements mature prior to the end of January 2003. The amount due on these agreements included in borrowed money was \$56,000,000 at December 31, 2002. The securities underlying these agreements are mortgage-backed securities with a book value and fair value of \$68,552,000. The securities have a weighted average coupon of 6.5% and have a maturity of August 2032.

The maximum and minimum lending rates for long-term mortgage loans during 2002 were 7.7% and 4.7%. Fire insurance is required on all properties covered by mortgage loans and must at least equal the excess of the loan over the maximum loan which would be permitted by law on the land without the buildings.

The maximum percentage of any loan to the value of collateral at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 75.0% on commercial properties. As of December 31, 2002, the Company held no mortgages with interest more than 180 days overdue. Total interest due as of December 31, 2002, is \$37,000.

5. Derivative Financial Instruments Held for Purposes Other than Trading

The Company enters into interest rate and currency contracts, including swaps, caps, floors, and options, to reduce and manage risks, which include the risk of a change in the value, yield, price, cash flows, exchange rates or quantity of, or a degree of exposure with respect to, assets, liabilities, or future cash flows, which the Company has acquired or incurred. Hedge accounting practices are supported by cash flow matching, scenario testing and duration matching.

The derivatives are reported in a manner that is consistent with the hedged asset or liability. All derivatives are reported at amortized cost with the exception of the S&P Options. The S&P Options are reported at fair value since the liabilities that are being hedged are reported at fair value. The unrealized gains or losses from the S&P Options are reported in investment income. Upon termination of a derivative that qualified for hedge accounting, the gain or loss is deferred in IMR or adjusts the basis of the hedged item.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

5. Derivative Financial Instruments Held for Purposes Other than Trading (continued)

Premiums paid for the purchase of interest rate contracts are included in other invested assets and are being amortized to interest expense over the remaining terms of the contracts or in a manner consistent with the financial instruments being hedged.

Amounts paid or received, if any, from such contracts are included in interest expense or income. Accrued amounts payable to or receivable from counterparties are included in other liabilities or other invested assets.

Gains or losses realized as a result of early terminations of interest rate contracts are amortized to investment income over the remaining term of the items being hedged to the extent the hedge is considered to be effective; otherwise, they are recognized upon termination.

Interest rate contracts that are matched or otherwise designated to be associated with other financial instruments are recorded at fair value if the related financial instruments mature, are sold, or are otherwise terminated or if the interest rate contracts cease to be effective hedges. Changes in the fair value of derivatives are recorded as investment income. The Company manages the potential credit exposure from interest rate contracts through careful evaluation of the counterparties' credit standing, collateral agreements, and master netting agreements.

The Company is exposed to credit loss in the event of nonperformance by counterparties on interest rate contracts; however, the Company does not anticipate nonperformance by any of these counterparties. The amount of such exposure is generally the unrealized gains in such contracts.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

5. Derivative Financial Instruments Held for Purposes Other than Trading (continued)

The table below summarizes the Company's interest rate contracts included in other invested assets at December 31, 2002 and 2001:

	December 31, 2002		
	Notional Amount	Carrying Value	Fair Value
	<i>(In Thousands)</i>		
Interest rate contracts:			
Options owned	\$ 51,000	\$ 1,151	\$ 1,151
Total derivatives	\$ 51,000	\$ 1,151	\$ 1,151

	December 31, 2001		
	Notional Amount	Carrying Value	Fair Value
	<i>(In Thousands)</i>		
Interest rate contracts:			
Swaps	\$ 20,000	\$ -	\$ 824
Options owned	42,000	1,023	1,023
Total derivatives	\$ 62,000	\$ 1,023	\$ 1,847

6. Concentrations of Credit Risk

The Company held less-than-investment-grade corporate bonds with an aggregate book value of \$150,367,000 and \$267,314,000 and an aggregate market value of \$138,464,000 and \$252,412,000 at December 31, 2002 and 2001, respectively. Those holdings amounted to 7.1% of the Company's investments in bonds and 4.9% of total admitted assets at December 31, 2002. The holdings of less-than-investment-grade bonds are widely diversified and of satisfactory quality based on the Company's investment policies and credit standards.

The Company held unrated bonds of \$79,044,000 and \$107,617,000 with an aggregate NAIC market value of \$80,614,000 and \$106,401,000 at December 31, 2002 and 2001, respectively. The carrying value of these holdings amounted to 3.7% of the Company's investment in bonds and 2.6% of the Company's total admitted assets at December 31, 2002.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

6. Concentrations of Credit Risk

At December 31, 2002, the Company's commercial mortgages involved a concentration of properties located in Pennsylvania (10.9%) and California (10.3%). The remaining commercial mortgages relate to properties located in 32 other states. The portfolio is well diversified, covering many different types of income-producing properties on which the Company has first mortgage liens. The maximum mortgage outstanding on any individual property is \$18,958,000.

7. Annuity Reserves

At December 31, 2002 and 2001, the Company's annuity reserves, including those held in separate accounts and deposit fund liabilities that are subject to discretionary withdrawal with adjustment, subject to discretionary withdrawal without adjustment, and not subject to discretionary withdrawal provisions are summarized as follows:

	December 31, 2002	
	Amount	Percent
	<i>(In Thousands)</i>	
Subject to discretionary withdrawal (with adjustment):		
At book value less surrender charge	\$ 1,521	3%
Subtotal	1,521	3
Subject to discretionary withdrawal (without adjustment) at book value with minimal or no charge or adjustment	44,220	87
Not subject to discretionary withdrawal	5,290	10
Total annuity reserves and deposit fund liabilities before reinsurance	51,031	100%
Less reinsurance ceded	8,717	
Net annuity reserves and deposit fund liabilities	\$42,314	

	December 31, 2001	
	Amount	Percent
	<i>(In Thousands)</i>	
Subject to discretionary withdrawal (with adjustment):		
At book value less surrender charge	\$ 1,882	5%
Subject to discretionary withdrawal (without adjustment) at book value with minimal or no charge or adjustment	28,369	77
Not subject to discretionary withdrawal	6,410	18
Total annuity reserves and deposit fund liabilities before reinsurance	36,661	100%
Less reinsurance ceded	-	
Net annuity reserves and deposit fund liabilities	\$ 36,661	

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

8. Employee Benefit Plans

The Company utilizes the employees of ING and its affiliates, primarily LOG. The benefit plan charges allocated to the Company were not significant for the years ended December 31, 2002 and 2001, respectively.

The Company has an unfunded noncontributory, nonqualified deferred compensation plan covering certain agents in the General Agency Sales Division.

9. Separate Accounts

Separate account assets and liabilities represent funds segregated by the Company for the benefit of certain policy and contract holders who bear the investment risk. All such policies are of a nonguaranteed return nature. Revenues and expenses on the separate account assets and related liabilities equal the benefits paid to the separate account policy and contract holders. Separate account assets consist primarily of common stocks.

Premiums, deposits, and other considerations received for the years ended December 31, 2002 and 2001 were \$25,219,000 and \$30,061,000, respectively.

A reconciliation of the amounts transferred to and from the separate accounts is presented below:

	2002	2001
	<i>(In Thousands)</i>	
Transfers as reported in the summary of operations of the Separate Accounts Statement:		
Transfers to separate accounts	\$25,151	\$31,395
Transfers from separate accounts	5,818	11,247
Net transfers to separate accounts	19,333	20,148
Reconciling adjustments:		
Miscellaneous transfers	-	(60)
Transfers as reported in the Statement of Operations	\$19,333	\$ 20,088

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

9. Separate Accounts (continued)

	December 31	
	2002	2001
	<i>(In Thousands)</i>	
Reserves for separate accounts by withdrawal characteristics:		
Subject to discretionary withdrawal:		
With market value adjustment	\$ -	\$ -
At book value without market value adjustment less current surrender charge of 5% or more	51,148	59,560
At market value	-	-
At book value without market value adjustment less current surrender charge of less than 5%	10,194	13,884
Subtotal	61,342	73,444
Not subject to discretionary withdrawal	-	-
Total separate account aggregate reserves	<u>\$61,342</u>	<u>\$73,444</u>

10. Reinsurance

The Company is involved in both ceded and assumed reinsurance with other companies for the purpose of diversifying risk and limiting exposure on larger risks. As of December 31, 2002, the Company's retention limit for acceptance of risk on life insurance policies had been set at various levels up to \$5,000,000.

To the extent that the assuming companies become unable to meet their obligations under these treaties, the Company remains contingently liable to its policyholders for the portion reinsured. To minimize its exposure to significant losses from retrocessionaire insolvencies, the Company evaluates the financial condition of the retrocessionaire and monitors concentrations of credit risk.

Assumed premiums amounted to \$22,000 and \$14,000 for the years ended December 31, 2002 and 2001, respectively.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

10. Reinsurance (continued)

The Company's ceded reinsurance arrangements reduced certain items in the accompanying financial statements by the following amounts:

	2002	2001
	<i>(In Thousands)</i>	
Premiums	\$ 475,568	\$ 32,313
Benefits paid or provided	39,335	41,989
Policy and contract liabilities at year end	639,223	167,075

Effective July 2, 2002, the Company entered into a reinsurance agreement with LOG. The Company ceded 100% of its "Home Service" life and accident and health insurance policies to LOG and LOG ceded certain life insurance policies to the Company. Both, the Texas Department of Insurance and the Georgia Department of Insurance have approved the agreement. At December 31, 2002, the Company had ceded net reserves of \$438,339,000 relative to the agreement.

11. Federal Income Taxes

The Company files a consolidated federal income tax return with ING AIH, and other US affiliates. The method of tax allocation is governed by a written tax sharing agreement. The tax sharing agreement provides that each member of the consolidated return shall reimburse ING AIH for its respective share of the consolidated federal income tax liability and shall receive a benefit for its losses at the statutory rate.

The components of the net deferred tax asset (liability) at December 31 are as follows:

	December 31	
	2002	2001
	<i>(In Thousands)</i>	
Total gross deferred tax assets	\$71,918	\$84,111
Total deferred tax liabilities	(13,647)	(1,899)
Net deferred tax asset	58,271	82,212
Deferred tax asset nonadmitted	(45,685)	(69,630)
Net admitted deferred tax asset	12,586	12,582
Decrease (increase) in nonadmitted asset	\$23,945	\$ (17,931)

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

11. Federated Income Taxes (continued)

Significant components of income taxes incurred as of December 31 are:

	December 31	
	2002	2001
	<i>(In Thousands)</i>	
Federal tax expense on operations	\$ 1,857	\$ 8,169
Federal tax (benefit) expense on capital gains	(3,907)	91
Total current taxes incurred	<u>\$(2,050)</u>	<u>\$ 8,260</u>

The main components of deferred tax assets and deferred tax liabilities are as follows:

Deferred tax assets resulting from book/tax differences in:

	2002	2001
	<i>(In Thousands)</i>	
Investments	\$ 5,689	\$ 5,162
Deferred acquisition costs	47,780	50,066
Insurance reserves	11,356	24,324
Unrealized loss on investments	2,686	1,236
Litigation reserve	2,916	3,301
Nonadmitted assets	1,205	-
Other	286	22
Total deferred tax assets	71,918	84,111
Deferred tax assets nonadmitted	(45,685)	(69,630)
Admitted deferred tax assets	<u>\$26,233</u>	<u>\$14,481</u>

Deferred tax liabilities resulting from book/tax differences in:

Insurance Reserves	\$11,700	\$ 96
Due & deferred premium	1,316	1,271
Investments	461	480
Other	170	52
Total deferred tax liabilities	13,647	1,899
Net admitted deferred tax asset	<u>\$12,586</u>	<u>\$12,582</u>

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

11. Federal Income Taxes (continued)

The change in net deferred income taxes is comprised of the following:

	December 31		
	2002	2001	Change
	<i>(In Thousands)</i>		
Total deferred tax assets	\$71,918	\$84,111	\$(12,193)
Total deferred tax liabilities	13,647	1,899	11,748
Net deferred tax asset (liability)	\$58,271	\$82,212	(23,941)
Tax effect of items in surplus:			
Unrealized gains (losses)			(1,449)
Change in nonadmitted assets			(1,205)
Change in net deferred income tax			\$(26,595)

The provision for federal income tax expense and change in deferred taxes differs from the amount obtained by applying the statutory federal income tax rate to income (including capital losses) before income taxes for the following reasons:

	Year Ended December 31, 2002
	<i>(In Thousands)</i>
Ordinary income	\$57,597
Capital gains (losses)	(12,313)
Total pre-tax book income	45,284
Provision computed at statutory rate	15,849
Interest maintenance reserve	(1,987)
Refinement of deferred tax balances	10,459
Other	224
Total	24,545
Federal income taxes incurred	(2,050)
Change in net deferred income taxes	26,595
Total statutory income taxes	\$24,545

The amount of federal income taxes incurred that will be available for recoupment in the event of future net losses is \$12,390,000 and \$23,300,000 from 2002 and 2001, respectively.

Under the inter-company tax sharing agreement, the Company has a receivable from ING AIH of \$34,632,000 and \$18,689,000 for federal income taxes as of December 31, 2002 and 2001, respectively.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

12. Capital and Surplus

Under Texas insurance regulations, the Company is required to maintain a minimum total capital and surplus of \$1,500,000. Without prior approval of the Texas Insurance Commissioner ("Commissioner"), dividends to shareholders are limited by the laws of the Company's state of incorporation. Dividends, whose fair market value together with that of other dividends or distributions made within the preceding twelve months, may not exceed the greater of 10 percent of such insurer's surplus as regards policyholders as of the 31st day of December next preceding, but shall not include pro rata distributions of any class of the insurer's own securities. The Company declared regular dividends of \$31,300,000 and \$5,000,000 in 2002 and 2001, respectively. An extraordinary dividend of \$88,700,000 was also declared in December 2002 and was recorded as dividends payable at December 31, 2002. Dividends declared in 2001 were paid in January 2002. The Company may not pay a dividend in 2003 without prior approval from the Commissioner.

The Company had no special surplus funds at December 31, 2002.

13. Fair Values of Financial Instruments

In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the financial instrument. Accordingly, the aggregate fair value amounts presented herein do not represent the underlying value of the Company.

Life insurance liabilities that contain mortality risk and all nonfinancial instruments have been excluded from the disclosure requirements. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk, such that the Company's exposure to changing interest rates is minimized through the matching of investment maturities with amounts due under insurance contracts.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

13. Fair Values of Financial Instruments (continued)

The carrying amounts and fair values of the Company's financial instruments are summarized as follows:

	December 31			
	2002		2001	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	<i>(In Thousands)</i>

Separate account assets	77,841	77,841	92,257	92,257
Liabilities:				
Individual annuities	10,214	10,214	13,345	13,345
Policy holder funds	20,445	22,721	16,802	16,802
Separate account Liabilities	77,841	77,841	92,257	92,257

The following methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments in the accompanying financial statements and notes thereto:

Cash and short-term investments: The carrying amounts reported in the accompanying balance sheets for these financial instruments approximate their fair values.

Fixed maturities and equity securities: The fair values for bonds, preferred stocks and common stocks, reported herein, are based on quoted market prices, where available. For securities not actively traded, fair values are estimated using values obtained from independent pricing services or, in the case of private placements, collateralized mortgage obligations and other mortgage derivative investments, are estimated by discounting the expected future cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 0% and 15% over the total portfolio. Fair values determined on this basis can differ from values published by the NAIC Securities Valuation Office. Fair value as determined by the NAIC as of December 31, 2002 and 2001 is \$2,134,787,000 and \$2,063,206,000, respectively.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

13. Fair Values of Financial Instruments (continued)

Mortgage loans: Estimated fair values for commercial real estate loans were generated using a discounted cash flow approach. Loans in good standing are discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads applied on new loans with similar characteristics. The amortizing features of all loans are incorporated in the valuation. Where data on option features is available, option values are determined using a binomial valuation method, and are incorporated into the mortgage valuation. Restructured loans are valued in the same manner; however, these loans were discounted at a greater spread to reflect increased risk.

Derivative financial instruments: Fair values for on-balance-sheet derivative financial instruments (caps, options and floors) and off-balance-sheet derivative financial instruments (swaps) are based on broker/dealer valuations or on internal discounted cash flow pricing models taking into account current cash flow assumptions and the counterparties' credit standing.

Other investment-type insurance contracts: The fair values of the Company's deferred annuity contracts are estimated based on the cash surrender values. The carrying values of other policyholder liabilities, including immediate annuities, dividend accumulations, supplementary contracts without life contingencies, and premium deposits, approximate their fair values.

The carrying value of all other financial instruments approximates their fair value.

14. Commitments and Contingencies

The Company is a party to threatened or pending lawsuits arising from the normal conduct of its business. Due to the climate in insurance and business litigation, suits against the Company sometimes include claims for substantial compensatory, consequential or punitive damages and other types of relief. Moreover, certain claims are asserted as class actions, purporting to represent a group of similarly situated individuals. While it is not possible to forecast the outcome of pending lawsuits, in light of existing insurance, reinsurance and established reserves, it is the opinion of management that the disposition of such lawsuits will not have a materially adverse effect on the Company's operations or financial position.

The Company is involved in regulatory market conduct examinations regarding its historical premium practices. The Company has reached an agreement to resolve these market conduct examinations with regulators. It also has agreed to a settlement with a nationwide class of Industrial Life insurance policyholders to resolve any claims they may have regarding its historical premium setting practices. All estimated costs of settlement, including attorneys' fees, are included in current litigation reserves. This agreement is subject to court approval.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

14. Commitments and Contingencies (continued)

The Company leases office space under various noncancelable operating lease agreements that expire through September 2003. Rental expense for 2002 and 2001 was approximately \$8,000.

At December 31, 2002, the minimum aggregate rental commitments are as follows:

Year	Operating Leases (In Thousands)
1-2003	\$12
2-2004	-
3-2005	-
4-2006	-
5-2007	-
Thereafter	-

15. Financing Agreements

The Company maintains a revolving loan agreement with SunTrust Bank, Atlanta ("SunTrust Bank"). Under this agreement, which expires July 31, 2003, the Company can borrow up to \$75,000,000 from SunTrust Bank. Interest on any of the Company's borrowing accrues at an annual rate equal to the cost of funds for SunTrust Bank for the period applicable for the advance plus 0.225% or a rate quoted by SunTrust Bank to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$25,000 for the year ended December 31, 2002. At December 31, 2002, the Company had no amounts payable to SunTrust Bank.

The Company also maintains a revolving loan agreement with Bank of New York, New York ("Bank of NY"). Under this agreement, the Company can borrow up to \$75,000,000 from the Bank of NY. Interest on any borrowing accrues at an annual rate equal to the cost of funds for the Bank of NY for the period applicable for the advance plus 0.225% or a rate quoted by the Bank of NY to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$23,000 for the year ended December 31, 2002. At December 31, 2002, the Company had no amounts payable to the Bank of NY.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

16. Related Party Transactions

Affiliates

Management and service contracts and all cost sharing arrangements with other affiliated ING US Life Insurance Companies are allocated among companies in accordance with normal, generally accepted expense and cost allocation methods.

Inter-insurer Services Agreement: The Company has entered into a services agreement with certain of its affiliated insurance companies in the United States ("affiliated insurers") whereby the affiliated insurers provide certain administrative, management, professional, advisory, consulting and other services to each other. Net amount paid under these agreements was \$33,651,000 and \$39,393,000 for the year ended December 31, 2002 and 2001, respectively.

Investment Management: The Company has entered into an investment advisory agreement and an administrative services agreement with ING Investment Management, LLC ("IIM") under which IIM provides the Company with investment management and asset liability management services. Total fees under the agreement were approximately \$6,089,000 and \$4,345,000 for the year ended December 31, 2002 and 2001, respectively.

Revolving Loan Agreement: The Company maintains a revolving loan agreement with ING AIH to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Under this agreement, which expires September 1, 2007, the Company can borrow up to \$14,100,000 from ING AIH. Interest on any of the Company's borrowings is charged at the rate of ING AIH's cost of funds for the interest period plus 0.15%. Under this agreement, the Company incurred interest expense of \$18,000 for the year ended December 31, 2002. At December 31, 2002, the Company had no amounts payable to ING AIH.

Tax Sharing Agreements: The Company has entered into federal tax sharing agreements with members of an affiliated group as defined in Section 1504 of the Internal Revenue Code of 1986, as amended. The agreement provides for the manner of calculation and the amounts/timing of the payments between the parties as well as other related matters in connection with the filing of consolidated federal income tax returns. The Company has also entered into a state tax sharing agreement with ING AIH and each of the specific subsidiaries that are parties to the agreement. The state tax agreement applies to situations in which ING AIH and all or some of the subsidiaries join in the filing of a state or local franchise, income tax or other tax return on a consolidated, combined or unitary basis.

Southland Life Insurance Company

Notes to Financial Statements - Statutory Basis (continued)

16. Related Party Transactions (continued)

Reinsurance Agreement: Effective July 2, 2002, the Company entered into a reinsurance agreement with LOG. The Company ceded 100% of its "Home Service" life and accident and health insurance policies to LOG and LOG ceded certain life insurance policies to the Company. Both, the Texas Department of Insurance and the Georgia Department of Insurance have approved the agreement. At December 31, 2002, the Company had ceded net reserves of \$438,339,000 relative to the agreement.

Service Agreement with ING Financial Advisers, LLC: The Company has entered into a services agreement with ING Financial Advisers, LLC ("ING FA") to provide certain administrative, management, professional advisory, consulting and other services to the Company for the benefit of its customers. Charges for these services are to be determined in accordance with fair and reasonable standards with neither party realizing a profit nor incurring a loss as a result of the services provided to the Company. The Company will reimburse ING FA for direct and indirect costs incurred on behalf of the Company.

17. Guaranty Fund Assessments

Insurance companies are assessed the costs of funding the insolvencies of other insurance companies by the various state guaranty associations, generally based on the amount of premium companies collect in that state.

The Company accrues the cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) and the amount of premiums written in each state. The Company reduces the accrual by credits allowed in some states to reduce future premium taxes by a portion of assessments in that state. The Company has estimated this liability to be \$643,000 and \$1,143,000 as of December 31, 2002 and 2001, respectively, and has recorded a reserve. The Company has also recorded an asset of \$337,000 and \$919,000 as of December 31, 2002 and 2001, respectively, for future credits to premium taxes for assessments already paid.

18. Regulatory Risk-Based Capital

Life and health insurance companies are subject to certain Risk-Based Capital ("RBC") requirements as specified by the NAIC. Under those requirements, the amount of capital and surplus maintained by a life and health insurance company is to be determined based on the various risk factors related to it. At December 31, 2002, the Company meets the RBC requirements.

Report of Independent Auditors

Board of Directors and Stockholder
Southland Life Insurance Company

We have audited the accompanying statutory basis balance sheets of Southland Life Insurance Company ("the Company"), a wholly owned subsidiary of ING America Insurance Holdings, Inc., as of December 31, 2003 and 2002, and the related statutory basis statements of operations, changes in capital and surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1 to the financial statements, the Company presents its financial statements in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Texas ("Texas Department of Insurance"), which practices differ from accounting principles generally accepted in the United States. The variances between such practices and accounting principles generally accepted in the United States are described in Note 1. The effects on the financial statements of these variances are not reasonably determinable but are presumed to be material.

In our opinion, because of the effects of the matter described in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States, the financial position of Southland Life Insurance Company at December 31, 2003 and 2002 or the results of its operations or its cash flows for the years then ended.

However, in our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Southland Life Insurance Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended, in conformity with accounting practices prescribed or permitted by the Texas Department of Insurance.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

1. Nature of Operations and Significant Accounting Policies

Southland Life Insurance Company (the "Company") is a wholly owned, Texas domiciled subsidiary of ING America Life Corporation (the "Parent"), which is a wholly owned subsidiary of ING America Insurance Holdings, Inc. ("ING AIH"). The Parent has another insurance subsidiary, Life Insurance Company of Georgia ("LOG"), in addition to a minor non-insurance subsidiary.

The Company's market focus is on the middle-income consumer. The life insurance products offered address retirement accumulation, wealth transfer and estate planning, and death protection needs. Products include universal life, survivorship and traditional life insurance and products with low expense loads to institutional and individual customers. Operations are conducted through independent producers. An increasing portion of the Company's business is no-load products, sold to individuals, by fee-based financial planners, businesses and institutions. The Company is presently licensed in forty-nine states (all states except New York), the District of Columbia, and Puerto Rico.

The preparation of financial statements of insurance companies requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Basis of Presentation

The accompanying financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Texas Department of Insurance, which practices differ from accounting principles generally accepted in the United States ("GAAP"). The most significant variances from GAAP are as follows:

Investments: Investments in bonds and mandatorily redeemable preferred stocks are reported at amortized cost or market value based on the National Association of Insurance Commissioners ("NAIC") rating; for GAAP, such fixed maturity investments are designated at purchase as held-to-maturity, trading or available-for-sale. Held-to-maturity investments are reported at amortized cost, and the remaining fixed maturity investments are reported at fair value with unrealized capital gains and losses reported in operations for those designated as trading and as a separate component of other comprehensive income in stockholder's equity for those designated as available-for-sale.

For structured securities, when a negative yield results from a revaluation based on new prepayment assumptions (i.e., undiscounted cash flows are less than current book value), an other than temporary impairment is considered to have occurred and the asset is written down to the value of the undiscounted cash flows. For GAAP, assets are re-evaluated based on the discounted cash flows using a current market rate. Impairments are recognized when there has been an adverse change in cash flows and the fair value is less than book. The asset is then written down to fair value.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

SSAP 31 applies to derivative transactions prior to January 1, 2003. The Company also follows the newly adopted hedge accounting guidance in SSAP 86 for derivative transactions entered into or modified on or after January 1, 2003. Under this guidance, derivatives that are deemed effective hedges are accounted for in a manner which is consistent with the underlying hedged item. Derivatives used in hedging transactions that do not meet the requirements of SSAP 86 as an effective hedge are carried at fair value with the change in value recorded in surplus as unrealized gains or losses. Embedded derivatives are not accounted for separately from the host contract. Under GAAP, the effective and ineffective portions of a single hedge are accounted for separately, an embedded derivative within a contract that is not clearly and closely related to the economic characteristics and risk of the host contract is accounted for separately from the host contract and valued and reported at fair value, and the change in fair value for cash flow hedges is credited or charged directly to a separate component of shareholder's equity rather than to income as required for fair value hedges.

Redeemable preferred stocks rated as high quality or better are reported at cost or amortized cost. All other redeemable preferred stocks are reported at the lower of cost, amortized cost, or market value and nonredeemable preferred stocks are reported at market value or the lower of cost or market value as determined by the Securities Valuation Office of the NAIC ("SVO").

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/losses are reported in unassigned surplus along with adjustment for federal income taxes.

Valuation Reserves: The asset valuation reserve ("AVR") is determined by a NAIC-prescribed formula and is reported as a liability rather than as a valuation allowance or an appropriation of unassigned surplus. The change in AVR is reported directly to unassigned surplus.

Under a formula prescribed by the NAIC, the Company defers the portion of realized gains and losses on sales of fixed-income investments, principally bonds and mortgage loans, attributable to changes in the general level of interest rates, and amortizes those deferrals over the remaining period to maturity based on groupings of individual securities sold in five-year bands. The net deferral is reported as the interest maintenance reserve ("IMR") in the accompanying balance sheets.

Realized gains and losses on investments are reported in operations net of federal income tax and transfers to the IMR. Under GAAP, realized capital gains and losses are reported in the statements of operations on a pretax basis in the period that the asset giving rise to the gain or loss is sold and credit impairments are charged to income when there has been a decline in value deemed other than temporary.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Valuation allowances, if necessary, are established for mortgage loans based on the difference between the net value of the collateral, determined as the fair value of the collateral less estimated costs to obtain and sell, and the recorded investment in the mortgage loan. Under GAAP, such allowances are based on the present value of expected future cash flows discounted at the loan's effective interest rate or, if foreclosure is probable, on the estimated fair value of the collateral.

The initial valuation allowance and subsequent changes in the allowance for mortgage loans as a result of a temporary impairment are charged or credited directly to unassigned surplus, rather than being included as a component of earnings as would be required under GAAP.

Policy Acquisition Costs: The costs of acquiring and renewing business are expensed when incurred. Under GAAP, acquisition costs related to traditional life insurance, to the extent recoverable from future policy revenues, are deferred and amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policy benefit reserves. For universal life insurance and investment products, to the extent recoverable from future gross profits, acquisition costs are amortized generally in proportion to the present value of expected gross margins from surrender charges and investment, mortality, and expense margins.

Premiums: Life premiums are recognized as revenue when due. Premiums for annuity policies with mortality and morbidity risk, except for guaranteed interest and group annuity contracts, are also recognized as revenue when due. Premiums received for annuity policies without mortality or morbidity risk and for guaranteed interest and group annuity contracts are recorded using deposit accounting. In deposit accounting, premiums are credited to an appropriate policy reserve account, without recognizing premium income.

Under GAAP, premiums for traditional life insurance products, which include those products with fixed and guaranteed premiums and benefits and consist primarily of whole life insurance policies, are recognized as revenue when due. Group insurance premiums are recognized as premium revenue over the time period to which the premiums relate. Revenues for universal life, annuities and guaranteed interest contracts consist of policy charges for the cost of insurance, policy administration charges, amortization of policy initiation fees and surrender charges assessed during the period.

Benefit and Contract Reserves: Life policy and contract reserves under statutory accounting practices are calculated based upon both the net level premium and Commissioners' Reserve Valuation methods using statutory rates for mortality and interest. GAAP requires that policy reserves for traditional products be based upon the net level premium method utilizing reasonably conservative estimates of mortality, interest, and withdrawals prevailing when the policies were sold. For interest-sensitive

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

products, the GAAP policy reserve is equal to the policy fund balance plus an unearned revenue reserve which reflects the unamortized balance of early year policy loads over renewal year policy loads.

Reinsurance: For business ceded to unauthorized reinsurers, statutory accounting practices require that reinsurance credits permitted by the treaty be recorded as an offsetting liability and charged against unassigned surplus. Under GAAP, an allowance for amounts deemed uncollectible would be established through a charge to earnings. Statutory income recognized on certain reinsurance treaties representing financing arrangements is not recognized on a GAAP basis.

Policy and contract liabilities ceded to reinsurers have been reported as reductions of the related reserves rather than as assets as required under GAAP.

Commissions allowed by reinsurers on business ceded are reported as income when received rather than being deferred and amortized with deferred policy acquisition costs as required under GAAP.

Nonadmitted Assets: Certain assets designated as "nonadmitted," principally deferred federal income tax assets, disallowed interest maintenance reserves, non-operating software, past-due agents' balances, furniture and equipment, intangible assets, and other assets not specifically identified as an admitted asset within the NAIC *Accounting Practices and Procedures Manual* are excluded from the accompanying balance sheets and are charged directly to unassigned surplus.

Universal Life and Annuity Policies: Revenues for universal life and annuity policies consist of the entire premium received and benefits incurred represent the total of death benefits paid and the change in policy reserves. Under GAAP, premiums received in excess of policy charges would not be recognized as premium revenue and benefits would represent the excess of benefits paid over the policy account value and interest credited to the account values.

Policyholder Dividends: Policyholder dividends are recognized when declared rather than over the term of the related policies.

Deferred Income Taxes: Deferred tax assets are provided for and admitted to an amount determined under a standard formula. This formula considers the amount of differences that will reverse in the subsequent year, taxes paid in prior years that could be recovered through carrybacks, surplus limits and the amount of deferred tax liabilities available for offset. Any deferred tax assets not covered under the formula are non-admitted. Deferred taxes do not include any amounts for state taxes. Under GAAP, a deferred tax asset is recorded for the amount of gross deferred tax assets that are expected to be realized in future years and a valuation allowance is established for the portion that is not realizable.

Southland Life Insurance Company

Notes to Financial Statements – Statutory Basis

Statements of Cash Flows: Cash and short-term investments in the statements of cash flows represent cash balances and investments with initial maturities of one year or less. Under GAAP, the corresponding caption of cash and cash equivalents include cash balances and investments with initial maturities of three months or less.

Reconciliation to GAAP

The effects of the preceding variances from GAAP on the accompanying statutory basis financial statements have not been determined, but are presumed to be material.

Other significant accounting practices are as follows:

Investments

Investment instruments are stated at values prescribed by the NAIC, as follows:

Bonds not backed by other loans are principally stated at amortized cost using the interest method.

Single class and multi-class mortgage-backed/asset-backed securities are valued at amortized cost using the interest method including anticipated prepayments. Prepayment assumptions are obtained from dealer surveys or internal estimates and are based on the current interest rate and economic environment. The retrospective adjustment method is used to value all such securities except for higher-risk asset backed securities, which are valued using the prospective method. The Company has elected to use the book value as of January 1, 1994, as the cost for applying the retrospective method to securities purchased prior to that date where historical cash flows are not readily available.

Redeemable preferred stocks rated as high quality or better are reported at cost or amortized cost. All other redeemable preferred stocks are reported at the lower of cost, amortized cost, or market value and nonredeemable preferred stocks are reported at market value or the lower of cost or market value as determined by the SVO.

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/losses are reported in unassigned surplus along with adjustment for federal income taxes.

The Company analyzes the general account investments to determine whether there has been an other than temporary decline in fair value below the amortized cost basis. Management considers the length of the time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

issuer, future economic conditions and market forecasts, and the Company's intent and ability to retain the investment in the issuer for a period of time sufficient to allow for recovery in market value. If it is probable that all amounts due according to the contractual terms of a debt security will not be collected, an other than temporary impairment is considered to have occurred.

The Company uses options as part of its overall interest rate risk management strategy for certain life insurance and annuity products. As the Company only uses derivatives for hedging purposes, the Company values all derivative instruments on a consistent basis with the hedged item. Upon termination, gains and losses on those instruments are included in the carrying values of the underlying hedged items and are amortized over the remaining lives of the hedged items as adjustments to investment income or benefits from the hedged items. Any unamortized gains or losses are recognized when the underlying hedged items are sold.

S&P Options are reported at fair value since the liabilities that are being hedged are reported at fair value. The unrealized gains or losses from the S&P Options are reported in investment income. Upon termination of a derivative that qualified for hedge accounting, the gain or loss is deferred in IMR or adjusts the basis of the hedged item.

Mortgage loans are reported at amortized cost, less allowance for impairments.

Contract loans are reported at unpaid principal balances.

For reverse dollar repurchase agreements, Company policies require a minimum of 95% of the fair value of securities posted as collateral under reverse agreements to be maintained. Cash collateral received is invested in short-term investments and the offsetting liability is included in miscellaneous liabilities.

Reverse dollar repurchase agreements are accounted for as collateral borrowings, where the amount borrowed is equal to the sales price of the underlying securities.

Short-term investments are reported at amortized cost. Short-term investments include investments with maturities of less than one year at the date of acquisition.

Partnership interests, which are included in other invested assets, are reported at the underlying audited GAAP equity of the investee.

Realized capital gains and losses are determined using the specific identification basis.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Cash on hand includes cash equivalents. Cash equivalents are short-term investments that are both readily convertible to cash and have an original maturity date of three months or less.

Aggregate Reserve for Life Policies and Contracts

Life, annuity, and accident and health reserves are developed by actuarial methods and are determined based on published tables using statutorily specified interest rates and valuation methods that will provide, in the aggregate, reserves that are greater than or equal to the minimum or guaranteed policy cash value or the amounts required by law. Interest rates range from 2.25% to 6.00%.

The Company waives the deduction of deferred fractional premiums upon the death of the insured. It is the Company's practice to return a pro rata portion of any premium paid beyond the policy month of death, although it is not contractually required to do so for certain issues.

The methods used in the valuation of substandard policies are as follows:

For life, endowment and term policies issued substandard, the standard reserve during the premium-paying period is increased by 50% of the gross annual extra premium. Standard reserves are held on Paid-Up Limited Pay contracts.

For reinsurance accepted with table rating, the reserve established is a multiple of the standard reserve corresponding to the table rating.

For reinsurance with flat extra premiums, the standard reserve is increased by 50% of the flat extra.

The amount of insurance in force for which the gross premiums are less than the net premiums, according to the standard of valuation required by the Texas Department of Insurance, is \$192,115,000 at December 31, 2003. The amount of premium deficiency reserves for policies on which gross premiums are less than the net premiums is \$2,153,000 at December 31, 2003. The Company anticipates investment income as a factor in the premium deficiency calculation in accordance with Statements of Statutory Accounting Principles ("SSAP") Number 54, *Individual and Group Accident and Health Contracts*.

The tabular interest has been determined from the basic data for the calculation of policy reserves for all direct ordinary life insurance and for the portion of group life insurance classified as group Section 79. The method of determination of tabular interest of funds not involving life contingencies is as follows: current year reserves, plus payments, less prior year reserves, less funds added.

Southland Life Insurance Company

Notes to Financial Statements – Statutory Basis

Reinsurance

Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on bases consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Reserves are based on the terms of the reinsurance contracts and are consistent with the risks assumed. Premiums and benefits ceded to other companies have been reported as a reduction of premium revenue and benefits expense. Amounts applicable to reinsurance ceded for reserves and unpaid claim liabilities have been reported as reductions of these items, and expense allowances received in connection with reinsurance ceded have been reflected in operations.

Participating Insurance

Participating business approximates less than 1% of the Company's ordinary life insurance in force and 1% of premium income. The amount of dividends to be paid is determined annually by the Board of Directors. Amounts allocable to participating policyholders are based on published dividend projections or expected dividend scales. Policyholder dividends of \$11,000 and \$28,000 were incurred in 2003 and 2002, respectively.

Nonadmitted Assets

Nonadmitted assets are summarized as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Deferred federal income taxes	\$ 59,090	\$ 45,685
Debit suspense	7,220	-
Agents' debit balances	3,128	3,159
Other	68	80
Total nonadmitted assets	<u>\$ 69,506</u>	<u>\$ 48,924</u>

Changes in nonadmitted assets are generally reported directly in unassigned surplus as an increase or decrease in nonadmitted assets. The change in unrealized capital gains and losses is reported directly in unassigned surplus as a change in unrealized capital gains or losses.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Claims and Claims Adjustment Expenses

Claims expenses represent the estimated ultimate net cost of all reported and unreported claims incurred through December 31, 2003. The Company does not discount claims and claims adjustment expense reserves. Such estimates are based on actuarial projections applied to historical claims payment data. Such liabilities are considered to be reasonable and adequate to discharge the Company's obligations for claims incurred but unpaid as of December 31, 2003.

Cash Flow Information

Cash and short-term investments include cash on hand, demand deposits and short-term fixed maturity instruments with a maturity of less than one year at date of acquisition.

The Company borrowed and repaid \$259,250,000 in 2003 and borrowed and repaid \$605,590,000 during 2002. These borrowings were on a short-term basis, at an interest rate that approximated current money market rates and excludes borrowings from dollar roll transactions. Interest paid on borrowed money was \$15,000 and \$66,000 during 2003 and 2002, respectively.

Separate Accounts

Separate account assets and liabilities held by the Company represent funds held for the benefit of the Company's variable life and annuity policy and contract holders who bear all of the investment risk associated with the policies. Such policies are of a non-guaranteed nature. All net investment experience, positive or negative, is attributed to the policy and contract holders' account values. The assets and liabilities of these accounts are carried at fair value.

Reserves related to the Company's mortality risk associated with these policies are included in life and annuity reserves. The operations of the separate accounts are not included in the accompanying statements of operations.

Reclassifications

Certain prior year amounts in the Company's statutory basis financial statements have been reclassified to conform to the 2003 financial statement presentation.

SOUTHLAND LIFE INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

2. Permitted Statutory Basis Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the State of Texas. The Texas Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Texas for determining and reporting the financial condition and results of operations of an insurance company for determining its solvency under the Texas Insurance Laws. The NAIC *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Texas. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

The Company is required to identify those significant accounting practices that are permitted, and obtain written approval of the practices from the Texas Department of Insurance. As of December 31, 2003 and 2002, the Company had no such permitted accounting practices.

SOUTHLAND LIFE INSURANCE COMPANY

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

As of December 31, 2003, the aggregate market values of debt securities with unrealized losses and the time period that cost exceeded market value are as follows:

	Less than 6 months below cost	More than 6 months and less than 12 months below cost	More than 12 months below cost	Total
	<i>(In Thousands)</i>			
Fair value	\$ 279,058	\$ 214,375	\$ 41,985	\$ 535,418
Unrealized loss	4,792	10,180	6,486	21,458

Of the losses more than 6 months and less than 12 months in duration of \$10,180,000, there were \$2,542,000 in unrealized losses that are primarily related to interest rate movement or spread widening for other than credit-related reasons. Business and operating fundamentals are performing as expected. The remaining unrealized losses of \$7,638,000 as of December 31, 2003 included the following significant items:

\$1,519,000 of unrealized losses related to mortgage-backed and structured securities reviewed for impairment under the guidance prescribed by SSAP 43 *Loan-backed and Structured Securities*. This category includes U.S. government-backed securities, principal protected securities and structured securities which did not have an adverse change in cash flows for which the fair value was \$63,277,000.

\$2,966,000 of unrealized losses related to the energy/utility industry, for which the fair value was \$51,899,000. During 2003, the energy sector recovered due to a gradually improving economic picture and the lack of any material accounting irregularities similar to those experienced in the prior two years. Current analysis indicates debt will be serviced in accordance with the contractual terms.

\$2,566,000 of unrealized losses related to non-domestic issues, with no unrealized loss exposure per country in excess of \$1,084,000 for which the fair value was \$33,425,000. Credit exposures are well diversified in these markets including banking, metals, food, and beverage companies.

\$587,000 of unrealized losses related to the telecommunications/cable/media industry, for which the fair value was \$7,385,000. During 2003, the sector recovered somewhat due to a gradually improving economy and reduced investor concern with management decisions even though it remains challenged by over capacity. Exposure is primarily focused in the largest and most financially secure companies in the sector.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Of the unrealized losses more than 12 months in duration of \$6,486,000, there were \$5,169,000 of unrealized losses related to mortgage-backed and structured securities reviewed for impairment under the guidance prescribed by SSAP 43 *Loan-backed and Structured Securities*. This category includes U.S. government-backed securities, principal protected securities and structured securities which did not have an adverse change in cash flows for which the fair value was \$28,342,000. The remaining unrealized losses of \$1,317,000 as of December 31, 2003 included the following significant items:

\$216,000 of unrealized losses related to the airline industry, for which the fair value was \$4,080,000. During 2003, the airline industry continued to suffer from decreased passenger volumes and a gradually improving economy. The majority of the airline investments are comprised of Enhanced Equipment Trust Certificates ("EETC"). Current analysis indicates the specific collateral backing EETC investments is predominantly represented by newer models that are expected to be retained as individual airlines reduce their fleets.

\$855,000 of unrealized losses related to the energy/utility industry, for which the fair value was \$8,169,000. During 2003, the energy sector recovered due to a gradually improving economic picture and the lack of any material accounting irregularities similar to those experienced in the prior two years. Current analysis indicates that the debt will be serviced in accordance with the contractual terms.

The remaining unrealized losses totaling \$246,000 relate to a fair value of \$1,394,000.

The amortized cost and fair value of investments in bonds at December 31, 2003, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	<i>(In Thousands)</i>	
Maturity:		
Due in 1 year or less	\$ 18,189	\$ 18,447
Due after 1 year through 5 years	416,692	437,047
Due after 5 years through 10 years	794,658	833,534
Due after 10 years	441,746	459,019
Total maturities	1,671,285	1,748,047
Mortgage-backed securities	443,858	447,437
Commercial mortgage-backed securities	96,711	105,169
Other asset-backed securities	146,514	145,717
Total	<u>\$ 2,358,368</u>	<u>\$ 2,446,370</u>

Southland Life Insurance Company

Notes to Financial Statements – Statutory Basis

At December 31, 2003 and 2002, investments in certificates of deposit and bonds, with an admitted asset value of \$10,063,000 and \$9,085,000, respectively, were on deposit with state insurance departments to satisfy regulatory requirements.

Reconciliation of bonds from amortized cost to carrying value as of December 31, 2003 and 2002 is as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Amortized cost	\$ 2,358,368	\$ 2,128,822
Less nonadmitted bonds	2,878	5,589
Carrying value	<u>\$ 2,355,490</u>	<u>\$ 2,123,233</u>

Proceeds from the sale of investments in bonds and other fixed maturity interest securities were \$1,993,423,000 and \$2,738,471,000 in 2003 and 2002, respectively. Gross gains of \$41,810,000 and \$36,767,000 and gross losses of \$10,021,000 and \$40,154,000 during 2003 and 2002, respectively, were realized on those sales.

Major categories of net investment income are summarized as follows:

	Year ended December 31	
	2003	2002
	<i>(In Thousands)</i>	
Income:		
Bonds	\$ 135,779	\$ 146,536
Mortgage loans	39,859	39,409
Contract loans	3,656	5,182
Other	3,306	365
Total investment income	182,600	191,492
Investment expenses	(10,858)	(10,874)
Net investment income	<u>\$ 171,742</u>	<u>\$ 180,618</u>

As part of its overall investment strategy, the Company has entered into agreements to purchase securities as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Investment purchase commitments	\$ 25,959	\$ 81,676

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The Company entered into reverse dollar repurchase agreements to increase its return on investments and improve liquidity. Reverse dollar repurchase agreements involve a sale of securities and an agreement to repurchase substantially the same securities as those sold. The reverse dollar repurchase agreements are accounted for as short term collateralized financing and the repurchase obligation is reported in borrowed money. The repurchase obligation totaled \$89,626,000 and \$135,601,000 at December 31, 2003 and 2002, respectively. The securities underlying these agreements are mortgage-backed securities with a book value of \$88,908,000 and \$134,246,000 and fair value of \$89,840,000 and \$136,380,000 at December 31, 2003 and 2002, respectively. The securities have a weighted average coupon rate of 5.8% and have maturities ranging from December 2018 through December 2033. The primary risk associated with short-term collateralized borrowings is that the counterparty may be unable to perform under the terms of the contract. The Company's exposure is limited to the excess of the net replacement cost of the securities over the value of the short-term investments, which was not material at December 31, 2003. The Company believes the counterparties to the reverse dollar repurchase agreements are financially responsible and that the counterparty risk is minimal.

The Company participates in reverse repurchase transactions. Such transactions include the sale of corporate securities to a major securities dealer and a simultaneous agreement to repurchase the same security in the near term. The proceeds are invested in new securities of intermediate durations. The terms of the reverse repurchase agreement call for payment of interest at a rate of 1.07%. The agreements mature prior to the end of January 2004. The amount due on these agreements included in borrowed money was \$20,400,000 and \$56,000,000 at December 31, 2003 and 2002, respectively. The securities underlying these agreements are mortgage-backed securities with a book value of \$20,562,000 and \$58,404,000 and fair value of \$20,756,000 and \$59,009,000 at December 31, 2003 and 2002, respectively. The securities have a weighted average coupon of 5.0% and have a maturity of December 2033.

The maximum and minimum lending rates for long-term mortgage loans during 2003 were 7.75% and 4.74%, respectively. Fire insurance is required on all properties covered by mortgage loans and must at least equal the excess of the loan over the maximum loan which would be permitted by law on the land without the buildings.

The maximum percentage of any loan to the value of collateral at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 76.0% on commercial properties. As of December 31, 2003, the Company held no mortgages with interest more than 180 days overdue. Total interest due as of December 31, 2003 and 2002, is \$33,000 and \$37,000, respectively.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

In the course of the Company's asset management, securities are sold and reacquired within 30 days of the sale date to enhance the Company's return on the investment portfolio or to manage interest rate risk. The table below summarizes the number of transactions, book value, and the gain/loss of the Company's financial instruments with securities sold and reacquired within 30 days of the sale date:

	Number of Transactions	Book Value	Cost of Securities Repurchased	Gains
NAIC 4	1	\$ 1,000,000	\$ 4,000,000	\$ 47,500
NAIC 6	1	100,422	100,422	-

4. Derivative Financial Instruments Held for Purposes Other than Trading

The Company may utilize derivative financial instruments to reduce and manage risks, which may include the risk of a change in the value, yield, price, cash flows, exchange rates or quantity of, or a degree of exposure with respect to, assets, liabilities, or future cash flows, which the Company has acquired or incurred. Hedge accounting practices are supported by cash flow matching, scenario testing and duration matching.

The Company uses S&P options to hedge against an increase in the S&P Index. Such increase results in increased reserve liabilities. The change in the value of the options offsets this expense. The options are accounted for in a consistent manner with the underlying reserve liabilities. Both are carried at fair value with the change in value recorded in the statement of operations. If the options mature in the money, the amount received is recorded in income.

The Company is exposed to credit loss in the event of nonperformance by counterparties on S&P options, however, the Company does not anticipate nonperformance by any of these counterparties. The amount of such exposure is generally the unrealized gains in such contracts.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The table below summarizes the Company's derivative contracts included in other invested assets at December 31, 2003 and 2002:

	Notional Amount	Carrying Value	Fair Value
		<i>(In Thousands)</i>	
December 31, 2003			
S&P options owned	\$ 42,000	\$ 4,025	\$ 4,025
Total derivatives	<u>\$ 42,000</u>	<u>\$ 4,025</u>	<u>\$ 4,025</u>
December 31, 2002			
S&P options owned	\$ 51,000	\$ 1,151	\$ 1,151
Total derivatives	<u>\$ 51,000</u>	<u>\$ 1,151</u>	<u>\$ 1,151</u>

5. Concentrations of Credit Risk

The Company held less-than-investment-grade corporate bonds with an aggregate book value of \$238,007,000 and \$150,367,000 and an aggregate market value of \$249,510,000 and \$138,464,000 at December 31, 2003 and 2002, respectively. Those holdings amounted to 10.1% of the Company's investments in bonds and 7.7% of total admitted assets at December 31, 2003. The holdings of less-than-investment-grade bonds are widely diversified and of satisfactory quality based on the Company's investment policies and credit standards.

The Company held unrated bonds of \$68,326,000 and \$79,044,000 with an aggregate NAIC market value of \$66,694,000 and \$80,614,000 at December 31, 2003 and 2002, respectively. The carrying value of these holdings amounted to 2.9% of the Company's investment in bonds and 2.2% of the Company's total admitted assets at December 31, 2003.

At December 31, 2003, the Company's commercial mortgages involved a concentration of properties located in Pennsylvania (12.1%) and California (11.0%). The remaining commercial mortgages relate to properties located in 31 other states. The portfolio is well diversified, covering many different types of income-producing properties on which the Company has first mortgage liens. The maximum mortgage outstanding on any individual property is \$12,300,000.

SOUTHLAND LIFE INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

6. Annuity Reserves

At December 31, 2003 and 2002, the Company's annuity reserves, including those held in separate accounts and deposit fund liabilities that are subject to discretionary withdrawal with adjustment, subject to discretionary withdrawal without adjustment, and not subject to discretionary withdrawal provisions are summarized as follows:

	<u>Amount</u>	<u>Percent</u>
	<i>(In Thousands)</i>	
December 31, 2003		
Subject to discretionary withdrawal (with adjustment):		
At book value less surrender charge	\$ 54	0.1 %
Subject to discretionary withdrawal (without adjustment):		
At book value with minimal or no charge or adjustment	46,857	90.9
Not subject to discretionary withdrawal	<u>4,613</u>	<u>9.0</u>

Less reinsurance ceded	<u>8,717</u>	
Net annuity reserves and deposit fund liabilities	<u><u>\$ 42,314</u></u>	

7. Employee Benefit Plans

The Company utilizes the employees of ING and its affiliates. The benefit plan charges allocated to the Company were not significant for the years ended December 31, 2003 and 2002.

The Company has an unfunded, noncontributory, nonqualified deferred compensation plan covering certain agents in the General Agency Sales Division.

SOUTHLAND LIFE INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

8. Separate Accounts

Separate account assets and liabilities represent funds segregated by the Company for the benefit of certain policy and contract holders who bear the investment risk. All such policies are of a nonguaranteed return nature. Revenues and expenses on the separate account assets and related liabilities equal the benefits paid to the separate account policy and contract holders. Separate account assets consist of investments in mutual funds.

Premiums, deposits, and other considerations received for the years ended December 31, 2003 and 2002 were \$22,076,000 and \$25,219,000, respectively.

A reconciliation of the amounts transferred to and from the separate accounts is presented below:

	Year ended December 31	
	2003	2002
	<i>(In Thousands)</i>	
Transfers as reported in the Summary of Operations of the Separate Accounts Statement:		
Transfers to separate accounts	\$ 22,197	\$ 25,151
Transfers from separate accounts	(12,429)	(5,818)
Net transfers to separate accounts	9,768	19,333
Transfers as reported in the Statement of Operations	<u>\$ 9,768</u>	<u>\$ 19,333</u>

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The general nature and characteristics of the separate accounts business follows:

	Nonguaranteed Separate Accounts
	<i>(In Thousands)</i>
December 31, 2003	
Premium, consideration or deposits for year ended December 31, 2003	\$ 22,076
Reserves for accounts with assets at:	
Fair value	\$ 80,843
Total reserves	\$ 80,843
Reserves for separate accounts by withdrawal characteristics:	
Subject to discretionary withdrawal:	
At book value without market value adjustment less current surrender charge of 5% or more	\$ 71,253
At book value without market value adjustment less current surrender charge of less than 5%	9,590
Total separate account aggregate reserves	\$ 80,843
December 31, 2002	
Premium, consideration or deposits for year ended December 31, 2002	\$ 25,219
Reserves for accounts with assets at:	
Fair value	\$ 61,342
Total reserves	\$ 61,342
Reserves for separate accounts by withdrawal characteristics:	
Subject to discretionary withdrawal:	
At book value without market value adjustment less current surrender charge of 5% or more	\$ 51,148
At book value without market value adjustment less current surrender charge of less than 5%	10,194
Total separate account aggregate reserves	\$ 61,342

9. Reinsurance

The Company is involved in both ceded and assumed reinsurance with other companies for the purpose of diversifying risk and limiting exposure on larger risks. To the extent that the assuming companies become unable to meet their obligations under these treaties, the Company remains contingently liable to its policyholders for the portion reinsured. To minimize its exposure to significant losses from retrocessionaire insolvencies, the Company evaluates the financial condition of the retrocessionaire and monitors concentrations of credit risk.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Assumed premiums amounted to \$12,000 and \$22,000 for the years ended December 31, 2003 and 2002, respectively.

The Company's ceded reinsurance arrangements reduced certain items in the accompanying financial statements by the following amounts:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Premiums	\$ 68,133	\$ 475,568
Benefits paid or provided	75,158	39,335
Policy and contract liabilities at year end	670,713	639,223

10. Federal Income Taxes

The Company files a consolidated federal income tax return with ING AIH, and other US affiliates. The method of tax allocation is governed by a written tax sharing agreement. The tax sharing agreement provides that each member of the consolidated return shall reimburse ING AIH for its respective share of the consolidated federal income tax liability and shall receive a benefit for its losses at the statutory rate.

The components of the net deferred tax asset (liability) are as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Total deferred tax assets	\$ 85,637	\$ 71,918
Total deferred tax liabilities	(12,286)	(13,647)
Net deferred tax asset	73,351	58,271
Deferred tax asset nonadmitted	(59,090)	(45,685)
Net admitted deferred tax asset	<u>\$ 14,261</u>	<u>\$ 12,586</u>
Increase (decrease) in nonadmitted asset	<u>\$ (13,405)</u>	<u>\$ 23,945</u>

SOUTHLAND LIFE INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

Current income taxes incurred consisted of the following major components:

	Year ended December 31	
	2003	2002
	<i>(In Thousands)</i>	
Federal taxes on operations	\$ 25,214	\$ 1,857
Federal taxes on capital gains	9,868	(3,907)
Total current taxes incurred	<u>\$ 35,082</u>	<u>\$ (2,050)</u>

The main components of deferred tax assets and deferred tax liabilities are as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Deferred tax assets resulting from book/tax differences in:		
Deferred acquisition costs	\$ 48,391	\$ 47,780
Insurance reserves	25,757	11,356
Investments	3,231	5,689
Nonadmitted assets	3,717	1,205
Unrealized loss on investments	675	2,686
Litigation accruals	2,832	2,916
Other	1,034	286
Total deferred tax assets	85,637	71,918
Deferred tax assets nonadmitted	<u>(59,090)</u>	<u>(45,685)</u>
Admitted deferred tax assets	<u>26,547</u>	<u>26,233</u>
Deferred tax liabilities resulting from book/tax differences in:		
Insurance reserves	10,400	11,700
Investments	510	461
Due and deferred premium	1,180	1,316
Other	196	170
Total deferred tax liabilities	<u>12,286</u>	<u>13,647</u>
Net admitted deferred tax asset	<u>\$ 14,261</u>	<u>\$ 12,586</u>

SOUTHLAND LIFE INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

The change in net deferred income taxes is comprised of the following:

	December 31		
	2003	2002	Change
	<i>(In Thousands)</i>		
Total deferred tax assets	\$ 85,637	\$ 71,918	\$ 13,719
Total deferred tax liabilities	12,286	13,647	(1,361)
Net deferred tax asset	<u>\$ 73,351</u>	<u>\$ 58,271</u>	15,080
Remove current year change in unrealized gains			1,357
Change in net deferred income tax			16,437
Remove other items in surplus:			
Current year change in non-admitted assets			(2,512)
Other			654
Change in deferred taxes for rate reconciliation			<u>\$ 14,579</u>

The provision for federal income taxes incurred and change in deferred taxes is different from that which would be obtained by applying the statutory federal income tax rate to income (including capital items) before income taxes for the following reasons:

	Year Ended
	December 31, 2003
	<i>(In Thousands)</i>
Ordinary income	\$ 38,030
Capital gains	23,492
Total pre-tax book income	<u>\$ 61,522</u>
Provision computed at statutory rate	\$ 21,533
Refinement of deferred tax balances	3,051
Interest maintenance reserve	(2,209)
Amortization of income for reinsurance	(1,774)
Other	(98)
Total	<u>\$ 20,503</u>
Federal income taxes incurred	\$ 35,082
Change in net deferred income taxes	(14,579)
Total statutory income taxes	<u>\$ 20,503</u>

The amount of federal income taxes incurred that will be available for recoupment in the event of future net losses is \$25,963,000 and \$23,887,000 for 2003 and 2002, respectively.

Under the inter-company tax sharing agreement, the Company had a payable to ING AIH of \$2,426,000 and a receivable of \$22,046,000 for federal income taxes as of December 31, 2003 and 2002, respectively.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

11. Capital and Surplus

Under Texas insurance regulations, the Company is required to maintain a minimum total capital and surplus of \$1,500,000. Without prior approval of the Texas Insurance Commissioner ("Commissioner"), dividends to shareholders are limited by the laws of the Company's state of incorporation. Dividends, whose fair market value together with that of other dividends or distributions made within the preceding twelve months, may not exceed the greater of 10% of such insurer's surplus as regards policyholders as of the 31st day of December next preceding, but shall not include pro rata distributions of any class of the insurer's own securities. The Company declared no dividends in 2003. The Company declared regular dividends of \$31,300,000 in 2002. An extraordinary dividend of \$88,700,000 was also declared in December 2002 and was recorded as dividends payable at December 31, 2002. Dividends declared in 2002 were paid in January 2003.

Life and health insurance companies are subject to certain Risk-Based Capital ("RBC") requirements as specified by the NAIC. Under those requirements, the amount of capital and surplus maintained by a life and health insurance company is to be determined based on the various risk factors related to it. At December 31, 2003, the Company meets the RBC requirements.

12. Fair Values of Financial Instruments

In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the financial instrument. Accordingly, the aggregate fair value amounts presented herein do not represent the underlying value of the Company.

Life insurance liabilities that contain mortality risk and all nonfinancial instruments have been excluded from the disclosure requirements. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk, such that the Company's exposure to changing interest rates is minimized through the matching of investment maturities with amounts due under insurance contracts.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The carrying amounts and fair values of the Company's financial instruments are summarized as follows:

	December 31			
	2003		2002	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	(In Thousands)			
Assets:				
Bonds	\$ 2,355,490	\$ 2,446,370	\$ 2,123,233	\$ 2,216,272
Preferred stocks	102	102	102	102
Unaffiliated common stocks	240	240	88	88
Mortgage loans	504,137	561,253	505,343	573,538
Contract loans	64,258	64,258	63,708	63,708
Derivative securities	4,025	4,025	1,151	1,151
Short-term investments	-	-	154,640	154,640
Cash	28,622	28,622	(208)	(208)
Other invested assets	52,825	52,825	16,385	16,385
Separate account assets	100,042	100,042	77,841	77,841
Liabilities:				
Individual annuities	9,886	9,886	10,214	10,214
Deposit type contracts	20,253	20,253	20,408	22,721
Separate account liabilities	9,623	9,623	17,904	17,904

The following methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments in the accompanying financial statements and notes thereto:

Cash and short-term investments: The carrying amounts reported in the accompanying balance sheets for these financial instruments approximate their fair values.

Fixed maturities and equity securities: The fair values for bonds, preferred stocks and common stocks reported herein are based on quoted market prices, where available. For securities not actively traded, fair values are estimated using values obtained from independent pricing services or, in the case of private placements, collateralized mortgage obligations and other mortgage derivative investments, are estimated by discounting the expected future cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 2% and 11% over the total portfolio. Fair values determined on this basis can differ from values published by the SVO. Fair value as determined by the SVO as of December 31, 2003 and 2002 is \$2,365,922,000 and \$2,134,787,000, respectively.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Mortgage loans: Estimated fair values for commercial real estate loans were generated using a discounted cash flow approach. Loans in good standing are discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads applied on new loans with similar characteristics. The amortizing features of all loans are incorporated in the valuation. Where data on option features is available, option values are determined using a binomial valuation method, and are incorporated into the mortgage valuation. Restructured loans are valued in the same manner; however, these loans were discounted at a greater spread to reflect increased risk.

Derivative financial instruments: Fair values for on-balance-sheet derivative financial statements (S&P options) are based on broker dealer valuations.

Other investment-type insurance contracts: The fair values of the Company's deferred annuity contracts are estimated based on the cash surrender values. The carrying values of other policyholder liabilities, including immediate annuities, dividend accumulations, supplementary contracts without life contingencies, and premium deposits, approximate their fair values.

The carrying value of all other financial instruments approximates their fair value.

13. Commitments and Contingencies

The Company is a party to threatened or pending lawsuits arising from the normal conduct of its business. Due to the climate in insurance and business litigation, suits against the Company sometimes include claims for substantial compensatory, consequential or punitive damages and other types of relief. Moreover, certain claims are asserted as class actions, purporting to represent a group of similarly situated individuals. While it is not possible to forecast the outcome of pending lawsuits, in light of existing insurance, reinsurance and established reserves, it is the opinion of management that the disposition of such lawsuits will not have a materially adverse effect on the Company's operations or financial position.

The Company leases office space under a noncancelable operating lease agreement that expired September 2003. Rental expense for 2003 and 2002 was approximately \$6,000 and \$8,000, respectively.

The Company has committed to provide additional capital contributions of \$5,827,000 in partnership investments at December 31, 2003.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Other Matters

Like many financial services companies, certain U.S. affiliates of ING Groep N.V. ("ING"), the Company's ultimate parent, have received informal and formal requests for information since September 2003 from various governmental and self-regulatory agencies in connection with investigations related to mutual funds and variable insurance products. ING has cooperated fully with each request.

In addition to responding to regulatory requests, ING management initiated an internal review of trading in ING insurance, retirement, and mutual fund products. The goal of this review has been to identify whether there have been any instances of inappropriate trading in those products by third parties or by ING investment professionals and other ING personnel. This internal review is being conducted by independent special counsel and auditors. Additionally, ING reviewed its controls and procedures in a continuing effort to deter improper frequent trading in ING products. ING's internal reviews related to mutual fund trading are continuing.

The internal review has identified several arrangements allowing third parties to engage in frequent trading of mutual funds within our variable insurance and mutual fund products, and identified other circumstances where frequent trading occurred despite measures taken by ING intended to combat market timing. Most of the identified arrangements were initiated prior to ING's acquisition of the businesses in question. In each arrangement identified, ING has terminated the inappropriate trading, taken steps to discipline or terminate employees who were involved, and modified policies and procedures to deter inappropriate activity. While the review is not completed, management believes the activity identified does not represent a systemic problem in the businesses involved.

These instances included agreements (initiated in 1998) that permitted one variable life insurance customer of Reliastar Life Insurance Company ("Reliastar"), an affiliate of the Company, to engage in frequent trading, and to submit orders until 4pm Central Time, instead of 4pm Eastern Time. Reliastar was acquired by ING in 2000. The late trading arrangement was immediately terminated when current senior management became aware of it in 2002. ING believes that no profits were realized by the customer from the late trading aspect of the arrangement.

In addition, the review has identified five arrangements that allowed frequent trading of funds within variable insurance products issued by Reliastar and by ING USA Annuity & Life Insurance Company, an affiliate of the Company; and in certain ING Funds. ING entities did not receive special benefits in return for any of these arrangements, which have all been terminated. The internal review also identified two investment professionals who engaged in improper frequent trading in ING Funds.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

ING will reimburse any ING Fund or its shareholders affected by inappropriate trading for any profits that accrued to any person who engaged in improper frequent trading for which ING is responsible. Management believes that the total amount of such reimbursements will not be material to ING or its U.S. business.

14. Financing Agreements

The Company maintains a revolving loan agreement with SunTrust Bank, Atlanta ("SunTrust Bank"). Under this agreement, which expires July 30, 2004, the Company can borrow up to \$75,000,000 from SunTrust Bank. Interest on any of the Company's borrowing accrues at an annual rate equal to the cost of funds for SunTrust Bank for the period applicable for the advance plus 0.225% or a rate quoted by SunTrust Bank to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$2,000 and \$25,000 for the years ended December 31, 2003 and 2002, respectively. At December 31, 2003 and 2002, the Company had no amounts payable to SunTrust Bank.

The Company also maintains a revolving loan agreement with Bank of New York, New York ("BONY"). Under this agreement, the Company can borrow up to \$75,000,000 from the BONY. Interest on any borrowing accrues at an annual rate equal to the cost of funds for the BONY for the period applicable for the advance plus 0.350% or a rate quoted by the BONY to the Company for the borrowing. Under this agreement, the Company incurred no interest expense for the year ended December 31, 2003 and \$23,000 for the year ended December 31, 2002. At December 31, 2003 and 2002, the Company had no amounts payable to the BONY.

15. Related Party Transactions

Affiliates

Management and service contracts and all cost sharing arrangements with other affiliated ING US Life Insurance Companies are allocated among companies in accordance with normal, generally accepted expense and cost allocation methods.

Inter-insurer Services Agreement: The Company has entered into a services agreement with certain of its affiliated insurance companies in the United States ("affiliated insurers") whereby the affiliated insurers provide certain administrative, management, professional, advisory, consulting and other services to each other. Net amounts paid under these agreements were \$23,162,000 and \$33,651,000 for the years ended December 31, 2003 and 2002, respectively.

SOUTHLAND LIFE INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Investment Management: The Company has entered into an investment advisory agreement and an administrative services agreement with ING Investment Management, LLC ("IIM") under which IIM provides the Company with investment management and asset liability management services. Total fees under the agreement were approximately \$8,092,000 and \$6,089,000 for the years ended December 31, 2003 and 2002, respectively.

Reciprocal Loan Agreement: The Company maintains a reciprocal loan agreement with ING AIH to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Under this agreement, which expires February 1, 2006, the Companies can borrow up to \$29,200,000 from one another. Interest on any of the Company's borrowings is charged at the rate of ING AIH's cost of funds for the interest period plus 0.15%. Under this agreement, the Company incurred interest expense of \$13,000 for the year ended December 31, 2003, and interest income of \$14,000 for the year ended December 31, 2003. At December 31, 2003, the Company had no amounts payable to ING AIH.

Tax Sharing Agreements: The Company has entered into federal tax sharing agreements with members of an affiliated group as defined in Section 1504 of the Internal Revenue Code of 1986, as amended. The agreement provides for the manner of calculation and the amounts/timing of the payments between the parties as well as other related matters in connection with the filing of consolidated federal income tax returns. The Company has also entered into a state tax sharing agreement with ING AIH and each of the specific subsidiaries that are parties to the agreement. The state tax agreement applies to situations in which ING AIH and all or some of the subsidiaries join in the filing of a state or local franchise, income tax or other tax return on a consolidated, combined or unitary basis.

Service Agreement with ING Financial Advisors, LLC: The Company has entered into a services agreement with ING Financial Advisors, LLC ("ING FA") to provide certain administrative, management, professional advisory, consulting and other services to the Company for the benefit of its customers. Charges for these services are to be determined in accordance with fair and reasonable standards with neither party realizing a profit nor incurring a loss as a result of the services provided to the Company. The Company will reimburse ING FA for direct and indirect costs incurred on behalf of the Company.

Assets and liabilities, along with related revenues and expenses recorded as a result of transactions and agreements with affiliates may not be the same as those recorded if the Company was not a wholly-owned subsidiary of its parent.

SOUTHLAND LIFE INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

16. Guaranty Fund Assessments

Insurance companies are assessed the costs of funding the insolvencies of other insurance companies by the various state guaranty associations, generally based on the amount of premium companies collect in that state.

The Company accrues the cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations ("NOLHGA") and the amount of premiums written in each state. The Company has recorded \$657,000 and \$643,000 for this liability as of December 31, 2003 and 2002, respectively. The Company has also recorded an asset of \$478,000 and \$337,000 as of December 31, 2003 and 2002, respectively, for future credits to premium taxes for assessments already paid.

Report of Independent Auditors

Board of Directors and Stockholder
Security Life of Denver Insurance Company

We have audited the accompanying statutory basis balance sheets of Security Life of Denver Insurance Company ("the Company" and a wholly owned subsidiary of ING America Insurance Holdings, Inc.) as of December 31, 2002 and 2001, and the related statutory basis statements of operations, changes in capital and surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1 to the financial statements, the Company presents its financial statements in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado (Colorado Division of Insurance), which practices differ from accounting principles generally accepted in the United States. The variances between such practices and accounting principles generally accepted in the United States are described in Note 1. The effects on the financial statements of these variances are not reasonably determinable but are presumed to be material.

In our opinion, because of the effects of the matter described in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States, the financial position of Security Life of Denver Insurance Company at December 31, 2002 and 2001 or the results of its operations or its cash flows for the years then ended.

However, in our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Security Life of Denver Insurance Company at December 31, 2002 and 2001, and the results of its operations and its cash flows for the years then ended, in conformity with accounting practices prescribed or permitted by the Colorado Division of Insurance.

As discussed in Note 3 to the financial statements, in 2001 the Company changed various accounting policies to be in accordance with the revised NAIC Accounting Practices and Procedures Manual, as adopted by the Colorado Division of Insurance.

/s/ Ernst & Young

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies

Security Life of Denver Insurance Company (the Company) is domiciled in Colorado and is a wholly owned subsidiary of ING America Insurance Holdings, Inc. ("ING AIH"). The Company focuses on three markets, the advanced market, reinsurance to other insurers and the investment products market. The life insurance products offered for the advanced market include wealth transfer and estate planning, executive benefits, charitable giving and corporate-owned life insurance. These products include traditional life, interest-sensitive life, universal life, and variable life. Operations are conducted almost entirely on the general agency basis and the Company is presently licensed in all states (approved for reinsurance only in New York and Puerto Rico), the District of Columbia and the U.S. Virgin Islands. In the reinsurance market, the Company offers financial security to clients through a mix of total risk management and traditional life insurance services. In the investment products market, the Company offers guaranteed investment contracts, funding agreements, and trust notes to institutional buyers.

The Company merged with First Columbine Life Insurance Company ("First Columbine"), an affiliate, on December 31, 2002. The transaction was approved by Division of Insurance of the Department of Regulatory Agencies of the State of Colorado (Colorado Division of Insurance) and was accounted for as a statutory merger. No consideration was paid and no common stock was issued in exchange for all of the common shares of First Columbine. The accompanying financial statements have been restated as though the merger took place prior to all periods presented. Pre-merger separate company revenue, net income, and other surplus adjustments for the twelve months ended December 31, 2002 were \$2,784,460,000, \$116,057,000 and \$107,979,000, respectively for the Company and \$249,673,000, \$21,137,000, and \$17,035,000, respectively for First Columbine.

The preparation of financial statements of insurance companies requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Basis of Presentation

The accompanying financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Colorado Division of Insurance, which practices differ from accounting principles generally accepted in the United States ("GAAP"). The most significant variances from GAAP are as follows:

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

Investments: Investments in bonds and mandatorily redeemable preferred stocks are reported at amortized cost or market value based on the National Association of Insurance Commissioners ("NAIC") rating; for GAAP, such fixed maturity investments are designated at purchase as held-to-maturity, trading or available-for-sale. Held-to-maturity investments are reported at amortized cost, and the remaining fixed maturity investments are reported at fair value with unrealized capital gains and losses reported in operations for those designated as trading and as a separate component of other comprehensive income in stockholder's equity for those designated as available-for-sale.

For structured securities, when a negative yield results from a revaluation based on new prepayment assumptions (i.e., undiscounted cash flows are less than current book value), an other than temporary impairment is considered to have occurred and the asset is written down to the value of the undiscounted cash flows. For GAAP, assets are re-evaluated based on the discounted cash flows using a current market rate. Impairments are recognized when there has been an adverse change in cash flows and the fair value is less than book value. The asset is then written down to fair value.

Investments in real estate are reported net of related obligations rather than on a gross basis. Real estate owned and occupied by the Company is included in investments rather than reported as an operating asset as under GAAP, and investment income and operating expenses include rent for the Company's occupancy of those properties. Changes between depreciated cost and admitted asset investment amounts are credited or charged directly to unassigned surplus rather than income as would be required under GAAP.

Derivative instruments that meet the criteria of an effective hedge are valued and reported in a manner that is consistent with the hedged asset or liability. Embedded derivatives are not accounted for separately from the host contract. Under GAAP, the effective and ineffective portions of a single hedge are accounted for separately, an embedded derivative within a contract that is not clearly and closely related to the economic characteristics and risk of the host contract is accounted for separately from the host contract and valued and reported at fair value, and the change in fair value for cash flow hedges is credited or charged directly to a separate component of shareholders' equity rather than to income as required for fair value hedges.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

In addition, the Company invests in structured securities including mortgage-backed securities/collateralized mortgage obligations, asset-backed securities, collateralized debt obligations, and commercial mortgage-backed securities. For these structured securities, management compares the undiscounted cash flows to the carrying value. An other than temporary impairment is considered to have occurred when the undiscounted cash flows are less than the carrying value.

When a decline in fair value is determined to be other than temporary, the individual security is written down to fair value and the loss accounted for as a realized loss.

Valuation Reserves: The asset valuation reserve ("AVR") is determined by a NAIC-prescribed formula and is reported as a liability rather than as a valuation allowance or an appropriation of surplus. The change in AVR is reported directly to unassigned surplus.

Under a formula prescribed by the NAIC, the Company defers the portion of realized gains and losses on sales of fixed-income investments, principally bonds and mortgage loans, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity based on groupings of individual securities sold in five-year bands. The net deferral or interest maintenance reserve ("IMR") is reported as a component of other liabilities in the accompanying balance sheets.

Realized gains and losses on investments are reported in operations net of federal income tax and transfers to the IMR. Under GAAP, realized capital gains and losses are reported in the statements of operations on a pretax basis in the period that the asset giving rise to the gain or loss is sold and valuation allowances are provided when there has been a decline in value deemed other than temporary, in which case the provision for such declines is charged to income.

Valuation allowances, if necessary, are established for mortgage loans based on the difference between the net value of the collateral, determined as the fair value of the collateral less estimated costs to obtain and sell, and the recorded investment in the mortgage loan. Under GAAP, such allowances are based on the present value of expected future cash flows discounted at the loan's effective interest rate or, if foreclosure is probable, on the estimated fair value of the collateral.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis
December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

The initial valuation allowance and subsequent changes in the allowance for mortgage loans as a result of a temporary impairment are charged or credited directly to unassigned surplus, rather than being included as a component of earnings as would be required under GAAP.

Policy Acquisition Costs: The costs of acquiring and renewing business are expensed when incurred. Under GAAP, acquisition costs related to traditional life insurance, to the extent recoverable from future policy revenues, are deferred and amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policy benefit reserves. For universal life insurance and investment products, to the extent recoverable from future gross profits, acquisition costs are amortized generally in proportion to the present value of expected gross margins from surrender charges and investment, mortality, and expense margins.

Premiums: Life premiums are recognized as revenue when due. Premiums for annuity policies with mortality and morbidity risk, except for guaranteed interest and group annuity contracts, are also recognized as revenue when due. Premiums received for annuity policies without mortality or morbidity risk and for guaranteed interest and group annuity contracts are recorded using deposit accounting.

Under GAAP, premiums for traditional life insurance products, which include those products with fixed and guaranteed premiums and benefits and consist primarily of whole life insurance policies, are recognized as revenue when due. Group insurance premiums are recognized as premium revenue over the time period to which the premiums relate. Revenues for universal life, annuities and guaranteed interest contracts consist of policy charges for the cost of insurance, policy administration charges, amortization of policy initiation fees and surrender charges assessed during the period.

Benefit and Contract Reserves: Life policy and contract reserves under statutory accounting practices are calculated based upon both the net level premium and Commissioners' Reserve Valuation methods using statutory rates for mortality and interest. GAAP requires that policy reserves for traditional products be based upon the net level premium method utilizing reasonably conservative estimates of mortality, interest, and withdrawals prevailing when the policies were sold. For interest-sensitive products, the GAAP policy reserve is equal to the policy fund balance plus an unearned revenue reserve which reflects the unamortized balance of early year policy loads over renewal year policy loads.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

Reinsurance: For business ceded to unauthorized reinsurers, statutory accounting practices require that reinsurance credits permitted by the treaty be recorded as an offsetting liability and charged against unassigned surplus. Under GAAP, an allowance for amounts deemed uncollectible would be established through a charge to earnings. Statutory income recognized on certain reinsurance treaties representing financing arrangements is not recognized on a GAAP basis.

Policy and contract liabilities ceded to reinsurers have been reported as reductions of the related reserves rather than as assets as required under GAAP.

Commissions allowed by reinsurers on business ceded are reported as income when received rather than being deferred and amortized with deferred policy acquisition costs as required under GAAP.

Subsidiaries: The accounts and operations of the Company's subsidiaries are not consolidated with the accounts and operations of the Company as would be required under GAAP.

Nonadmitted Assets: Certain assets designated as "nonadmitted," principally deferred federal income tax assets, disallowed interest maintenance reserves, non-operating software, past-due agents' balances, furniture and equipment, intangible assets, and other assets not specifically identified as an admitted asset within the NAIC *Accounting Practices and Procedures Manual* are excluded from the accompanying balance sheets and are charged directly to unassigned surplus.

Employee Benefits: For purposes of calculating the Company's pension and postretirement benefit obligation, only vested participants and current retirees are included in the valuation. Under GAAP, active participants not currently vested are also included.

Universal Life and Annuity Policies: Revenues for universal life and annuity policies consist of the entire premium received and benefits incurred represent the total of death benefits paid and the change in policy reserves. Under GAAP, premiums received in excess of policy charges would not be recognized as premium revenue and benefits would represent the excess of benefits paid over the policy account value and interest credited to the account values.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Basis of Presentation (continued)

Policyholder Dividends: Policyholder dividends are recognized when declared rather than over the term of the related policies.

Deferred Income Taxes: Deferred tax assets are provided for and admitted to an amount determined under a standard formula. This formula considers the amount of differences that will reverse in the subsequent year, taxes paid in prior years that could be recovered through carrybacks, surplus limits and the amount of deferred tax liabilities available for offset. Any deferred tax assets not covered under the formula are non-admitted. Deferred taxes do not include any amounts for state taxes. Under GAAP, a deferred tax asset is recorded for the amount of gross deferred tax assets that are expected to be realized in future years and a valuation allowance is established for the portion that is not realizable.

Surplus Notes: Surplus notes are reported as a component of surplus. Under statutory accounting practices, no interest is recorded on the surplus notes until payment has been approved by the Colorado Division of Insurance. Under GAAP, surplus notes are reported as liabilities and the related interest is reported as a charge to earnings over the term of the note.

Statements of Cash Flows: Cash and short-term investments in the statements of cash flows represent cash balances and investments with initial maturities of one year or less. Under GAAP, the corresponding caption of cash and cash equivalents include cash balances and investments with initial maturities of three months or less.

The effects of the preceding variances from GAAP on the accompanying statutory basis financial statements have not been determined, but are presumed to be material.

Other significant accounting practices are as follows:

Investments

Bonds, preferred stocks, common stocks, short-term investments and derivative instruments are stated at values prescribed by the NAIC, as follows:

Bonds not backed by other loans are principally stated at amortized cost using the interest method.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Investments (continued)

Single class and multi-class mortgage-backed/asset-backed securities are valued at amortized cost using the interest method including anticipated prepayments. Prepayment assumptions are obtained from dealer surveys or internal estimates and are based on the current interest rate and economic environment. The retrospective adjustment method is used to value all such securities except for higher-risk asset backed securities, which are valued using the prospective method.

Redeemable preferred stocks rated as high quality or better are reported at cost or amortized cost. All other redeemable preferred stocks are reported at the lower of cost, amortized cost, or market value and nonredeemable preferred stocks are reported at market value or the lower of cost or market value as determined by the Securities Valuation Office of the NAIC ("SVO").

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/(losses) are reported in unassigned surplus along with adjustment for federal income taxes.

The Company analyzes the general account investments to determine whether there has been an other than temporary decline in fair value below the amortized cost basis. Management considers the length of the time and the extent to which the market value has been less than cost; the financial condition and near-term prospects of the issuer; future economic conditions and market forecasts; and the Company's intent and ability to retain the investment in the issuer for a period of time sufficient to allow for recovery in market value. If it is probable that all amounts due according to the contractual terms of a debt security will not be collected, an other than temporary impairment is considered to have occurred.

The Company uses interest rate swaps, caps and floors, options and certain other derivatives as part of its overall interest rate risk management strategy for certain life insurance and annuity products. As the Company only uses derivatives for hedging purposes, the Company values all derivative instruments on a consistent basis with the hedged item. Upon termination, gains and losses on those instruments are included in the carrying values of the underlying hedged items and are amortized over the remaining lives of the hedged items as adjustments to investment income or benefits from the hedged items. Any unamortized gains or losses are recognized when the underlying hedged items are sold.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

Interest rate swap contracts are used to convert the interest rate characteristics (fixed or variable) of certain investments to match those of the related insurance liabilities that the investments are supporting. The net interest effect of such swap transactions is reported as an adjustment of interest income from the hedged items as incurred.

Interest rate caps and floors are used to limit the effects of changing interest rates on yields of variable rate or short-term assets or liabilities. The initial cost of any such agreement is amortized to net investment income over the life of the agreement. Periodic payments that are receivable as a result of the agreements are accrued as an adjustment of interest income or benefits from the hedged items.

The Company's insurance subsidiaries are reported at their underlying statutory basis net assets plus the admitted portion of goodwill, and the Company's noninsurance subsidiary is reported at the GAAP-basis of its net assets. Dividends from subsidiaries are included in net investment income. The remaining net change in the subsidiaries' equity is included in the change in net unrealized capital gains or losses.

Mortgage loans are reported at amortized cost, less allowance for impairments.

Policy loans are reported at unpaid principal balances.

Land is reported at cost. Real estate occupied by the company is reported at depreciated cost; other real estate is reported at the lower of depreciated cost or fair value. Depreciation is calculated on a straight-line basis over the estimated useful lives of the properties.

For reverse repurchase agreements, Company policies require a minimum of 95% of the fair value of securities purchased under reverse repurchase agreements to be maintained as collateral. Cash collateral received is invested in short-term investments and the offsetting collateral liability is included in miscellaneous liabilities.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Investments (continued)

Reverse dollar repurchase agreements are accounted for as collateral borrowings, where the amount borrowed is equal to the sales price of the underlying securities.

The Company engages in securities lending whereby certain domestic bonds from its portfolio are loaned to other institutions for short periods of time. Collateral, primarily cash, which is in excess of the market value of the loaned securities, is deposited by the borrower with a lending agent, and retained and invested by the lending agent to generate additional income for the Company. The Company does not have access to the collateral. The Company's policy requires a minimum of 102% of the fair value of securities loaned to be maintained as collateral. The market value of the loaned securities is monitored on a daily basis with additional collateral obtained or refunded as the market value fluctuates.

At December 31, 2002 and 2001, the Company had loaned securities (which are reflected as invested assets on the Balance Sheet) with a market value of approximately \$28,903,000 and \$83,278,000, respectively.

Short-term investments are reported at amortized cost. Short-term investments include investments with maturities of less than one year at the date of acquisition.

Other invested assets are reported at amortized cost using the effective interest method. Other invested assets primarily consist of residual collateralized mortgage obligations and partnership interests.

Realized capital gains and losses are determined using the specific identification basis.

Aggregate Reserve for Life Policies and Contracts

Life, annuity, and accident and health reserves are developed by actuarial methods and are determined based on published tables using statutorily specified interest rates and valuation methods that will provide, in the aggregate, reserves that are greater than or equal to the minimum or guaranteed policy cash value or the amounts required by law. Interest rates range from 2% to 11.25%.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Aggregate Reserve for Life Policies and Contracts (continued)

The Company waives the deduction of deferred fractional premiums upon the death of the insured. It is the Company's practice to return a pro rata portion of any premium paid beyond the policy month of death, although it is not contractually required to do so for certain issues.

The methods used in valuation of substandard policies are as follows:

For Life, Endowment and Term policies issued substandard, the standard reserve during the premium-paying period is increased by 50% of the gross annual extra premium. Standard reserves are held on Paid-Up Limited Pay contracts.

For reinsurance accepted with table rating, the reserve established is a multiple of the standard reserve corresponding to the table rating.

For reinsurance with flat extra premiums, the standard reserve is increased by 50% of the flat extra.

The amount of insurance in force for which the gross premiums are less than the net premiums, according to the standard of valuation required by the Colorado Division of Insurance, is \$221,010,946,000 at December 31, 2002. The amount of premium deficiency reserves for policies on which gross premiums are less than the net premiums is \$401,233,000 at December 31, 2002. The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP 54, Individual and Group Accident and Health Contracts.

The tabular interest has been determined from the basic data for the calculation of policy reserves for all direct ordinary life insurance and for the portion of group life insurance classified as group Section 79. The method of determination of tabular interest of funds not involving life contingencies is as follows: current year reserves, plus payments, less prior year reserves, less funds added.

Reinsurance

Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on bases consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Reserves are based on the terms of the reinsurance contracts and are consistent with the risks assumed.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

Premiums and benefits ceded to other companies have been reported as a reduction of premium revenue and benefits expense. Amounts applicable to reinsurance ceded for reserves and unpaid claim liabilities have been reported as reductions of these items, and expense allowances received in connection with reinsurance ceded have been reflected in operations.

Real Estate and Electronic Data Processing Equipment

Electronic data processing equipment are carried at cost less accumulated depreciation. Depreciation for major classes of assets is calculated on a straight-line basis over the estimated useful life.

Participating Insurance

Participating business approximates less than 1% of the Company's ordinary life insurance in force and .5% of premium income. The amount of dividends to be paid is determined annually by the Board of Directors. Amounts allocable to participating policyholders are based on published dividend projections or expected dividend scales. Dividends of \$2,564,000 and \$2,952,000 were incurred in 2002 and 2001, respectively.

Pension Plans

The Company provides noncontributory retirement plans for substantially all employees and certain agents. Pension costs are charged to operations as contributions are made to the plan. The Company also provides a contributory retirement plan for substantially all employees.

Nonadmitted Assets

Nonadmitted assets are summarized as follows:

	December 31, 2002	January 1 2002
	<i>(In Thousands)</i>	
Deferred federal income taxes	\$188,721	\$204,032

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

Changes in nonadmitted assets are generally reported directly in surplus as an increase or decrease in nonadmitted assets. The change in unrealized capital gains and losses is reported directly in surplus as a change in unrealized capital gains or losses.

Claims and Claims Adjustment Expenses

Claims expenses represent the estimated ultimate net cost of all reported and unreported claims incurred through December 31, 2002. The Company does not discount claims and claims adjustment expense reserves. Such estimates are based on actuarial projections applied to historical claim payment data. Such liabilities are considered to be reasonable and adequate to discharge the Company's obligations for claims incurred but unpaid as of December 31, 2002.

Cash Flow Information

Cash and short-term investments include cash on hand, demand deposits and short-term fixed maturity instruments (with a maturity of less than one year at date of acquisition).

The Company borrowed \$6,638,185,000 and repaid \$6,638,185,000 in 2002 borrowed \$7,344,648,000 and repaid \$7,190,001,000 during, 2001. These borrowings were on a short-term basis, at an interest rate that approximated current money market rates and excludes borrowings from reverse dollar repurchase transactions. Interest paid on borrowed money was \$1,161,000 and \$2,133,000, during 2002 and 2001, respectively.

Separate Accounts

Most separate account assets and liabilities held by the Company represent funds held for the benefit of the Company's variable life and annuity policy and contract holders who bear all of the investment risk associated with the policies. Such policies are of a non-guaranteed nature. All net investment experience, positive or negative, is attributed to the policy and contract holders' account values. The assets of these accounts are carried at fair value.

Certain other separate accounts relate to experience-rated group annuity contracts that fund defined contribution pension plans. These contracts provide guaranteed interest returns for one-year only, where the guaranteed interest rate is re-established each year based on the investment experience of the separate account. In no event can the interest rate be less than zero. The assets and liabilities of these separate accounts are carried at book value.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

1. Nature of Operations and Significant Accounting Policies (continued)

Separate Accounts (continued)

Reserves related to the Company's mortality risk associated with these policies are included in life and annuity reserves. The operations of the separate accounts are not included in the accompanying financial statements.

Reclassifications

Certain prior year amounts in the Company's statutory basis financial statements have been reclassified to conform to the 2002 financial statement presentation.

2. Permitted Statutory Basis Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the State of Colorado. The Colorado Division of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Colorado for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Colorado Insurance Laws. The *NAIC Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the state of Colorado. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

The Company is required to identify those significant accounting practices that are permitted, and obtain written approval of the practices from the Colorado Division of Insurance. As of December 31, 2002 and 2001, the Company had no such permitted accounting practices.

3. Accounting Changes and Corrections of Errors

The Company prepares its statutory financial statements in conformity with accounting practices prescribed or permitted by the State of Colorado. Effective January 1, 2001, the State of Colorado required that insurance companies domiciled in the State of Colorado prepare their statutory basis financial statements in accordance with the *NAIC Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the State of Colorado insurance commissioner.

Accounting changes adopted to conform to the provisions of the *NAIC Accounting Practices and Procedures Manual* are reported as changes in accounting principles. The

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

cumulative effect of changes in accounting principles is reported as an adjustment to unassigned surplus in the period of the change in accounting principle. The cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

As a result of these changes, the Company reported a change of accounting principle, as an adjustment that increased unassigned surplus, by \$42,889,000 as of January 1, 2001. These changes are primarily attributed to an increase in unassigned surplus of approximately \$51,588,000 related to deferred tax assets, \$4,815,000 related to prepayment penalties on bonds and mortgage loans released from the IMR liability and \$686,000 related to due and deferred premiums. Offsetting this increase is a reduction of approximately \$12,900,000 and \$1,300,000 related to the Supplemental Employee Retirement Plan and compensated absences liabilities, respectively.

During 2001 the Company discovered an error in the reporting of surplus note interest expense. The prior year's total assets, surplus and net income were overstated by \$5,301,000. An additional error was noted in the prior year's federal income tax recoverable, overstating total assets and surplus by \$2,753,000. A prior period adjustment of \$8,054,000 was recorded through unassigned deficit in 2001 for these items.

4. Investments (continued)

The amortized cost and fair value of investments in bonds at December 31, 2002, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
December 31, 2002	<i>(In Thousands)</i>	
Maturity:		
Due in 1 year or less	\$ 289,616	\$ 291,243
Due after 1 year through 5 years	2,684,607	2,801,080
Due after 5 years through 10 years	2,262,452	2,330,681
Due after 10 years	1,399,809	1,448,479
	\$ 6,636,484	\$ 6,871,483
Mortgage-backed securities	3,792,945	3,861,524
Other structured securities	1,006,646	965,489
Total	\$ 11,436,075	\$ 11,698,496

At December 31, 2002, investments in certificates of deposit and bonds, with an admitted asset value of \$19,054,000, were on deposit with state insurance departments to satisfy regulatory requirements.

Reconciliation of bonds from amortized cost to carrying value as of December 31, 2002 and 2001 is as follows:

	2002	2001
	<i>(In Thousands)</i>	
Amortized cost	\$11,436,075	\$10,653,923
Less nonadmitted bonds	21,510	286
Carrying value	\$11,414,565	\$10,653,637

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

4. Investments (continued)

Proceeds from sales of investments in bonds and other fixed maturity interest securities were \$3,897,661,000 and \$1,516,897,000 in 2002 and 2001, respectively. Gross gains of \$96,957,000 and \$37,511,000 and gross losses of \$91,702,000 and \$50,320,000 during 2002 and 2001, respectively, were realized on those sales. A portion of the gains realized in 2002 and 2001 has been deferred to future periods in the interest maintenance reserve.

Major categories of net investment income are summarized as follows:

	Year ended December 31	
	2002	2001
	<i>(In Thousands)</i>	
Income:		
Bonds	\$753,050	\$677,995
Mortgage loans	170,803	159,194
Policy loans	72,183	77,114
Company-occupied property	4,950	2,416
Derivative Instruments	(109,067)	(28,285)
Other	17,299	16,753
Total investment income	909,218	905,187
Investment expenses	(50,763)	(57,417)
Net investment income	\$858,455	\$847,770

As part of its overall investment strategy, the Company has entered into agreements to purchase securities as follows:

	2002	2001
	<i>(In Thousands)</i>	
Investment purchase commitments	\$218,743	\$224,197

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

4. Investments (continued)

The Company entered into reverse dollar repurchase transactions to increase its return on investments and improve liquidity. Reverse dollar repurchases involve a sale of securities and an agreement to repurchase substantially the same securities as those sold. The reverse dollar repurchases are accounted for as short term collateralized financing and the repurchase obligation is reported in borrowed money. The repurchase obligation totaled \$161,645,000 and \$0, at December 31, 2002 and 2001, respectively. The securities underlying these agreements are mortgage-backed securities with a book value and fair value of \$160,784,000 at December 31, 2002. The securities have a weighted average coupon of 5.9% and have maturities ranging from December 2017 through December 2032. The primary risk associated with short-term collateralized borrowings is that the counterparty may be unable to perform under the terms of the contract. The Company's exposure is limited to the excess of the net replacement cost of the securities over the value of the short-term investments, which was not material at December 31, 2002. The Company believes the counterparties to the reverse dollar repurchase agreements are financially responsible and that the counterparty risk is minimal.

The Company participates in reverse repurchase transactions. Such transactions include the sale of corporate securities to a major securities dealer and a simultaneous agreement to repurchase the same security in the near term. The proceeds are invested in new securities of intermediate durations. The terms of the reverse repurchase agreement call for payment of interest at a rate of 1.39%. The agreements mature prior to the end of January 2003. The amount due on these agreements included in borrowed money is \$7,000,000. The securities underlying these agreements are mortgage-backed securities with a book value and fair value of \$8,071,000. The securities have a weighted average coupon of 6.5% and have a maturity of August 2032.

The maximum and minimum lending rates for long-term mortgage loans during 2002 were 7.7% and 2.5%. Fire insurance is required on all properties covered by mortgage loans and must at least equal the excess of the loan over the maximum loan which would be permitted by law on the land without the buildings.

The maximum percentage of any loan to the value of collateral at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 74.9% on commercial properties. As of December 31, 2002, the Company held no mortgages with interest more than 180 days overdue. Total interest due on mortgages as of December 31, 2002 is \$251,000.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

5. Derivative Financial Instruments Held for Purposes Other than Trading

The Company enters into interest rate and currency contracts, including swaps, caps, floors, and options, to reduce and manage risks, which include the risk of a change in the value, yield, price, cash flows, exchange rates or quantity of, or a degree of exposure with respect to, assets, liabilities, or future cash flows, which the Company has acquired or incurred. Hedge accounting practices are supported by cash flow matching, scenario testing and duration matching.

The Company uses interest rate swaps to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and liabilities. Interest rate swap agreements generally involve the exchange of fixed and floating interest payments over the life of the agreement without an exchange of the underlying principal amount. Currency swap agreements generally involve the exchange of local and foreign currency payments over the life of the agreements without an exchange of the underlying principal amount. Interest rate cap and interest rate floor agreements owned entitle the Company to receive payments to the extent reference interest rates exceed or fall below strike levels in the contracts based on the notional amounts.

Premiums paid for the purchase of interest rate contracts are included in other invested assets and are being amortized to interest expense over the remaining terms of the contracts or in a manner consistent with the financial instruments being hedged.

Amounts paid or received, if any, from such contracts are included in interest expense or income. Accrued amounts payable to or receivable from counterparties are included in other liabilities or other invested assets.

Gains or losses realized as a result of early terminations of interest rate contracts are amortized to investment income over the remaining term of the items being hedged to the extent the hedge is considered to be effective; otherwise, they are recognized upon termination.

Interest rate contracts that are matched or otherwise designated to be associated with other financial instruments are recorded at fair value if the related financial instruments mature, are sold, or are otherwise terminated or if the interest rate contracts cease to be effective hedges. Changes in the fair value of derivatives are recorded as investment income. The Company manages the potential credit exposure from interest rate contracts through careful evaluation of the counterparties' credit standing, collateral agreements, and master netting agreements.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

5. Derivative Financial Instruments Held for Purposes Other than Trading (continued)

The Company is exposed to credit loss in the event of nonperformance by counterparties on interest rate contracts; however, the Company does not anticipate nonperformance by any of these counterparties. The amount of such exposure is generally the unrealized gains in such contracts.

The table below summarizes the Company's interest rate contracts included in other invested assets at December 31, 2002 and 2001 (in thousands):

December 31, 2002			
	Notional Amount	Carrying Value	Fair Value
	<i>(In Thousands)</i>

6. Concentrations of Credit Risk

The Company held less-than-investment-grade corporate bonds with an aggregate book value of \$679,704,000 and \$791,750,000 and an aggregate market value of \$633,205,000 and \$761,729,000 at December 31, 2002 and 2001, respectively. Those holdings amounted to 6.0% of the Company's investments in bonds and 3.8% of total admitted assets at December 31, 2002. The holdings of less-than-investment-grade bonds are widely diversified and of satisfactory quality based on the Company's investment policies and credit standards.

The Company held unrated bonds of \$208,820,000 and \$535,664,000 with an aggregate NAIC market value of \$209,386,000 and \$516,616,000 at December 31, 2002 and 2001, respectively. The carrying value of these holdings amounted to 1.8% of the Company's investment in bonds and 1.2% of the Company's total admitted assets at December 31, 2002.

At December 31, 2002, the Company's commercial mortgages involved a concentration of properties located in California (16.6%) and Florida (8.7%). The remaining commercial mortgages relate to properties located in 42 other states. The portfolio is well diversified, covering many different types of income-producing properties on which the Company has first mortgage liens. The maximum mortgage outstanding on any individual property is \$59,027,000.

Subject to discretionary withdrawal (with adjustment):		
With market value adjustment	\$6,372,196	56.7%
At book value less surrender charge	63,141	0.6%
Subtotal	6,435,337	57.3%
Subject to discretionary withdrawal (without adjustment) at book value with minimal or no charge or adjustment	230,754	2.1%
Not subject to discretionary withdrawal	4,584,361	40.6%
Total annuity reserves and deposit fund liabilities- Before reinsurance	11,250,452	100.0%
Less reinsurance ceded	2,622,390	
Net annuity reserves and deposit fund liabilities	\$8,628,062	

8. Employee Benefit Plans

Pension Plan and Postretirement Benefits

Effective December 31, 2001, the qualified plan of the Company, along with certain other US subsidiaries of ING America, were merged into one plan, which will be recognized in ING America's financial statements. As a result of this plan merger, the Company transferred its qualified pension asset to ING North America Insurance Corporation, an affiliate. In addition, the Company maintains a nonqualified unfunded Supplemental Employees Retirement Plan (SERP).

The Company also provides certain health care and life insurance benefits for retired employees.

In addition, the Company has pension benefit obligation and other benefit obligation for non-vested employees as of December 31, 2002 and 2001 in the amount of \$219,000 and \$260,000, and \$2,956,000 and \$2,086,000, respectively.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

8. Employee Benefit Plans (continued)

Pension Plan and Postretirement Benefits (continued)

Assumptions used in determining the accounting for the SERP and other post-retirement benefit plans as of December 31, 2002 and 2001 were as follows:

	December 31,	
	2002	2001
Weighted-average discount rate	6.75%	7.50%
Rate of increase in compensation level	3.75%	4.50%
Expected long-term rate of return on assets	9.00%	9.25%

The annual assumed rate of increase in the per capita cost of covered benefits (i.e., health care cost trend rate) for the medical plan is 10% graded to 5% thereafter. The health care cost trend rate assumption has a significant effect on the amounts reported. For example, increasing the assumed health care cost trend rates by one percentage point in each year would increase the accumulated postretirement benefit obligation for the medical plan as of December 31, 2002 by \$153,000. Decreasing the assumed health care cost trend rates by one percentage point in each year would decrease the accumulated postretirement benefit obligation for the medical plan as of December 31, 2002 by \$136,000.

401(k) Plan

The Savings Plan is a defined contribution plan, which is available to substantially all employees. Participants may make contributions to the plan through salary reductions up to a maximum of \$11,000 for 2002 and \$10,500 for 2001. Such contributions are not currently taxable to the participants. The Company matches up to 6% of pre-tax eligible pay at 100%. Company matching contributions were, \$1,807,000 and \$1,362,000 for 2002 and 2001, respectively.

9. Separate Accounts

Separate account assets and liabilities represent funds segregated by the Company for the benefit of certain policy and contract holders who bear the investment risk. Revenues and expenses on the separate account assets and related liabilities equal the benefits paid to the separate account policy and contract holders.

Premiums, deposits, and other considerations received for the years ended December 31, 2002 and 2001 were \$213,479,000 and \$239,490,000, respectively. In addition, \$750,860,000 in deposit type contracts was received in 2002. No deposit type contracts were received in 2001.

A reconciliation of the amounts transferred to and from the separate accounts is presented below:

	2002	2001
	<i>(In Thousands)</i>	
Transfers as reported in the summary of operations of the Separate Accounts Statement:		
Transfers to separate accounts	\$ 234,907	\$ 299,309
Transfers from separate accounts	(174,584)	(70,220)
Net transfers to separate accounts	60,323	229,089
Reconciling adjustments:		
Miscellaneous transfers	502	(128)
Transfers as reported in the Statement of Operations	\$ 60,825	\$ 228,961

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

10. Reinsurance

The Company is involved in both ceded and assumed reinsurance with other companies for the purpose of diversifying risk and limiting exposure on larger risks. As of December 31, 2002, the Company's retention limit for acceptance of risk on life insurance policies had been set at various levels up to \$5,000,000.

To the extent that the assuming companies become unable to meet their obligations under these treaties, the Company remains contingently liable to its policyholders for the portion reinsured. To minimize its exposure to significant losses from retrocessionaire insolvencies, the Company evaluates the financial condition of the retrocessionaire and monitors concentrations of credit risk.

Assumed premiums amounted to \$895,515,000 and \$713,221,000 for the years ended December 31, 2002 and 2001, respectively.

The Company's ceded reinsurance arrangements reduced certain items in the accompanying financial statements by the following amounts:

	2002	2001
	<hr/> <i>(In Thousands)</i>	
Premiums	\$392,723	\$1,036,485
Benefits paid or provided	\$216,044	\$240,909
Policy and contract liabilities at year end	\$2,623,310	\$3,179,438

During 2002 and 2001, the Company had ceded blocks of insurance under reinsurance treaties to provide funds for financing and other purposes. These reinsurance transactions, generally known as "financial reinsurance," represent financing arrangements. Financial reinsurance has the effect of increasing current statutory surplus while reducing future statutory surplus as the reinsurers recapture amounts.

11. Federal Income Taxes

The Company and its subsidiaries file a consolidated federal income tax return with its parent, ING AIH, and other US affiliates and subsidiaries. The method of tax allocation is governed by a written tax sharing agreement. The tax sharing agreement provides that each member of the consolidated return shall reimburse ING AIH for its respective share of the consolidated federal income tax liability and shall receive a benefit for its losses at the statutory rate.

Significant components of current income taxes incurred as of December 31 were as follows:

	2002	2001
	<i>(In Thousands)</i>	
Federal taxes on operations	\$ 88,773	\$ 79,572
Federal tax on capital gains	11,366	(2,083)
Total current taxes incurred	\$100,139	\$ 77,489

The main components of deferred tax assets and deferred tax liabilities as of December 31 were as follows:

Deferred tax assets resulting from book/tax differences in:

	2002	2001
	<i>(In Thousands)</i>	
Deferred acquisition costs	\$ 100,924	\$120,704
Insurance reserves	37,406	65,573
Investments	58,691	38,518
Compensation	18,045	25,881

Tax effect of items in surplus:			
Nonadmitted assets			(273)
Unrealized gains (losses)			(6,235)
Change in net deferred income tax			\$ (9,591)

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

11. Federal Income Taxes (continued)

The provision for federal income taxes expense and change in deferred taxes differs from the amount obtained by applying the statutory federal income tax rate to income (including capital losses) before income taxes for the following reasons:

	Year Ended December 31, 2002
	<i>(In Thousands)</i>
Ordinary income	\$269,356
Capital gains (losses)	(13,197)
Total pre-tax book income	<u>\$256,160</u>
Provision computed at statutory rate	\$ 89,656
Refinement of deferred tax balances	17,950
Interest maintenance reserve	4,695
Other	(2,571)
Total	<u>\$109,730</u>
Federal income taxes incurred	\$100,139
Change in net deferred income taxes	9,591
Total statutory income taxes	<u>\$109,730</u>

The amount of federal income taxes incurred that will be available for recoupment in the event of future net losses is \$105,648,772 and \$57,904,074 from 2002 and 2001, respectively.

Under the inter-company tax sharing agreement, the Company has a receivable from ING AIH of \$57,059,000 and \$80,024,000 for federal income taxes as of December 31, 2002 and 2001, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

11. Federal Income Taxes (continued)

Prior to 1984, the Company was allowed certain special deductions for federal income tax reporting purposes that were required to be accumulated in a "policyholders' surplus account" (PSA). In the event those amounts are distributed to shareholders, or the balance of the account exceeds certain limitations prescribed by the Internal Revenue Code, the excess amounts would be subject to income tax at current rates. Income taxes also would be payable at current rates if the Company ceases to qualify as a life insurance company for tax reporting purposes, or if the income tax deferral status of the PSA is modified by future tax legislation. Management does not intend to take any actions nor does management expect any events to occur that would cause income taxes to become payable on the PSA balance. Accordingly, the Company has not accrued income taxes on the PSA balance of \$60,490,378 at December 31, 2002. However, if such taxes were assessed, the amount of the taxes payable would be \$21,171,632. No deferred tax liabilities are recognized related to the PSA.

12. Investment in and Advances to Subsidiaries

The Company has one wholly owned insurance subsidiary at December 31, 2002, Midwestern United Life Insurance Company (Midwestern United). The Company also has three wholly owned noninsurance subsidiaries, First Secured Mortgage Deposit Corporation, Tailored Investments Notes Trust, and ING America Equities, Inc.

ING America Equities, Inc. is a wholesale broker/dealer whose business activities consist only of the distribution of variable life and annuity contracts. ING America Equities, Inc. does not hold customer funds or securities.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

12. Investment in and Advances to Subsidiaries (continued)

Amounts invested in and advanced to the Company's subsidiaries are summarized as follows:

	December 31	
	2002	2001
	<i>(In Thousands)</i>	
Common stock (cost—\$40,756 in 2002 and \$61,318 in 2001)	\$73,186	\$84,348

Summarized financial information for these subsidiaries is as follows:

	2002	2001
	<i>(In Thousands)</i>	
Revenues	\$69,254	\$96,208
Income before net realized gains on investments	18,896	6,833
Net income (loss)	13,640	(2,031)
Admitted assets	255,957	293,080
Liabilities	182,771	208,732

Midwestern United paid a common stock dividend to the Company of \$1,159,000 in 2002 and \$1,210,000 in 2001.

13. Capital and Surplus

Under Colorado insurance regulations, the Company is required to maintain a minimum total capital and surplus of \$1,500,000. Additionally, the amount of dividends which can be paid by the Company to its stockholder without prior approval of the Colorado Division of Insurance is limited to the greater of 10% of statutory surplus or the statutory net gain from operations.

The Company has two surplus notes to a related party for \$65,032,000 and \$100,000,000, which represent the cumulative cash draws on two \$100,000,000 commitments issued by ING AIH through December 31, 2002, less principal payments. In 2001, the surplus notes were assigned by the issuer to an affiliated holding Company, Lion Connecticut Holding, Inc., and were amended and restated. The amended and restated surplus notes have the following repayment conditions.

Security Life of Denver Insurance Company
Notes to Financial Statements – Statutory Basis

December 31, 2002

13. Capital and Surplus (continued)

These subordinated notes bear interest at a variable rate equal to the prevailing rate for 10-year U.S. Treasury bonds plus 1/4% adjusted annually. The principal sum plus accrued interest shall be repaid in five annual installments beginning April 15, 2017 and continuing through April 15, 2021 (Repayment Period). The repayment amount shall be determined and adjusted annually on the last day of December, commencing December 31, 2016, and shall be an amount calculated to amortize any unpaid principal plus accrued interest over the years remaining in the Repayment Period. In the event that the Commissioner of Insurance of the State of Colorado does not grant approval for repayment, then any unpaid annual installment shall be considered unpaid principal plus accrued interest for purposes of calculating subsequent annual installments. Repayment of principal and payment of interest shall be subordinated to the prior payment of, or provision for, all liabilities of the Company, but shall rank superior to the claim, interest and equity of the shares of shareholders of the Company. Such subordination shall be equally applicable in the case of any merger, consolidations, liquidation, rehabilitations, reorganization, dissolution, sale or other disposal of all, or substantially all, of the Company's assets, including the assumption, whether by reinsurance or otherwise, of the major portion of the Company's in force business pursuant to the reinsurance agreement or agreements approved by the Commissioner of Insurance of the State of Colorado.

The repayment of these notes are payable only out of surplus funds of the Company and only at such time as the surplus of the Company, after payment is made, does not fall below the prescribed level. In July 2001, the Company made payments of \$19,227,000 and \$6,614,000 for principal and interest, respectively, after receiving approval from the Commissioner of Insurance of the State of Colorado. There were no principal or interest payments in 2002.

14. Fair Values of Financial Instruments

In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the financial instrument. Accordingly, the aggregate fair value amounts presented herein do not represent the underlying value of the Company.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

14. Fair Values of Financial Instruments (continued)

Life insurance liabilities that contain mortality risk and all nonfinancial instruments have been excluded from the disclosure requirements. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk, such that the Company's exposure to changing interest rates is minimized through the matching of investment maturities with amounts due under insurance contracts.

The carrying amounts and fair values of the Company's financial instruments are summarized as follows:

	December 31		December 31	
	2002		2001	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	<i>(In Thousands)</i>			
Assets:

Payable for securities	2,522	2,522	175,048	175,048

The following methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments in the accompanying financial statements and notes thereto:

Cash and short-term investments: The carrying amounts reported in the accompanying balance sheets for these financial instruments approximate their fair values.

Fixed maturities and equity securities: The fair values for bonds, preferred stocks and common stocks, reported herein, are based on quoted market prices, where available. For securities not actively traded, fair values are estimated using values obtained from independent pricing services or, in the case of private placements, collateralized mortgage obligations and other mortgage derivative investments, are estimated by discounting the expected future cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 2% and 15% over the total portfolio. Fair values determined on this basis can differ from values published by the NAIC Securities Valuation Office. Fair value as determined by the NAIC as of December 31, 2002 and 2001 is \$11,605,230,000 and \$7,461,342,000, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

14. Fair Values of Financial Instruments (continued)

Mortgage loans: Estimated fair values for commercial real estate loans were generated using a discounted cash flow approach. Loans in good standing are discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads applied on new loans with similar characteristics. The amortizing features of all loans are incorporated in the valuation. Where data on option features is available, option values are determined using a binomial valuation method, and are incorporated into the mortgage valuation. Restructured loans are valued in the same manner; however, these loans were discounted at a greater spread to reflect increased risk. All residential loans are valued at their outstanding principal balances, which approximate their fair values.

Residual collateralized mortgage obligations: Residual collateralized mortgage obligations are included in the other invested assets balance. Fair values are calculated using discounted cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 5% and 25% over the total portfolio.

Derivative financial instruments: Fair values for on-balance-sheet derivative financial instruments (caps, options and floors) and off-balance-sheet derivative financial instruments (swaps) are based on broker/dealer valuations or on internal discounted cash flow pricing models taking into account current cash flow assumptions and the counterparties' credit standing.

Investment in surplus notes: Estimated fair value in surplus notes were generated using a discounted cash flow approach. Cash flows were discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads applied on surplus notes with similar characteristics.

Guaranteed investment contracts: The fair values of the Company's guaranteed investment contracts are estimated using discounted cash flow calculations, based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

Off-balance-sheet instruments: The Company accepted additional deposits on existing synthetic guaranteed investment contracts in the amounts of \$233,300,000 and \$709,000,000 in 2002 and 2001, respectively, from trustees of 401(k) plans. Pursuant to the terms of these contracts, the trustees own and retain the assets related to these December 31, 2002 contracts. Such assets had a value of \$1,008,456,091 and \$1,077,456,000 at December 31, 2002 and 2001, respectively. Under synthetic

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

guaranteed investment contracts, the synthetic issuer may assume interest rate risk on individual plan participant initiated withdrawals from stable value options of 401(k) plans. Approximately 100% of the synthetic guaranteed investment contract book values are on a participating basis and have a credited interest rate reset mechanism, which passes such interest rate risk to plan participants.

14. Fair Values of Financial Instruments (continued)

Other investment-type insurance contracts: The fair values of the Company's deferred annuity contracts are estimated based on the cash surrender values. The carrying values of other policyholder liabilities, including immediate annuities, dividend accumulations, supplementary contracts without life contingencies, and premium deposits, approximate their fair values.

The carrying value of all other financial instruments approximates their fair value.

15. Commitments and Contingencies

The Company is a party to threatened or pending lawsuits arising from the normal conduct of business. Due to the climate in insurance and business litigation, suits against the Company sometimes include claims for substantial compensatory, consequential or punitive damages and other types of relief. Moreover, certain claims are asserted as class actions, purporting to represent a group of similarly situated individuals. While it is not possible to forecast the outcome of pending lawsuits, in light of existing insurance, reinsurance and established reserves, it is the opinion of management that the disposition of such lawsuits will not have a materially adverse effect on the Company's operations or financial position.

The Company guarantees certain contractual policy claims of its subsidiary, Midwestern United Life Company. In the unlikely event that Midwestern United Life Company were unable to fulfill its obligations to policyholders, the Company would be obligated to assume the guaranteed policy obligations, but any ultimate contingent losses in connection with such guarantees will not have a material adverse impact on the Company's future operations or financial position.

The Company is a member of the Federal Home Loan Bank of Topeka ("FHLB"). As a member of FHLB, the Company has issued non-putable funding agreements with FHLB. Assets with a book value of \$1,611,858,000 collateralize these agreements. The reserves on these agreements were \$1,410,725,000 at December 31, 2002.

Leases and Other Commitments

The Company leases office space under various non-cancelable operating lease agreements that expire through July 2017. During the years ended December 31, 2002 and 2001, rent expense totaled \$1,082,000 and \$3,118,000 respectively. At December 31, 2002, the minimum aggregate rental commitments are: 2003 - \$692,000; 2004 - \$487,000; 2005 - \$337,000; 2006 - \$173,000; 2007 - \$90,000.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

15. Commitments and Contingencies (continued)

Leases and Other Commitments (continued)

Certain rental commitments have renewal options extending through the year 2007 subject to adjustments in the future periods. The Company is not involved in any material sale-leaseback transactions.

16. Financing Agreements

The Company maintains a revolving loan agreement with SunTrust Bank, Atlanta (the "Bank"). Under this agreement, which expires July 31, 2003, the Company can borrow up to \$125,000,000 from the Bank. Interest on any borrowing accrues at an annual rate equal to the cost of funds for the Bank for the period applicable for the advance plus 0.225% or a rate quoted by the Bank to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$71,000 for the year ended December 31, 2002. At December 31, 2002, the Company had \$0 payable to the Bank.

The Company also maintains a revolving loan agreement with Bank of New York, New York (the "Bank"). Under this agreement, the Company can borrow up to \$100,000,000 from the Bank. Interest on any of the Company borrowing accrues at an annual rate equal to: (1) the cost of funds for the Bank for the period applicable for the advance plus 0.225% or (2) a rate quoted by the Bank to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$25,000 for the year ended December 31, 2002. At December 31, 2002, the Company had \$0 payable to the Bank.

17. Related Party Transactions

Affiliates

Management and service contracts and all cost sharing arrangements with other affiliated ING US Life Insurance Companies are allocated among companies in accordance with normal, generally accepted expense and cost allocation methods.

Investment Management: The Company has entered into an investment advisory agreement and an administrative services agreement with ING Investment Management, LLC ("IIM") under which IIM provides the Company with investment management and asset liability management services. Total fees under the agreement were approximately \$28,414,000 and \$20,992,000 for the year ended December 31, 2002 and 2001, respectively.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

17. Related Party Transactions (continued)

Affiliates (continued)

Inter-insurer Services Agreement: The Company has entered into a services agreement with certain of its affiliated insurance companies in the United States ("affiliated insurers") whereby the affiliated insurers provide certain administrative, management, professional, advisory, consulting and other services to each other. Net amount paid under these agreements was \$40,264,000 and \$42,070,000 for the year ended December 31, 2002 and 2001, respectfully.

Reciprocal Loan Agreement: The Company has entered into a reciprocal loan agreement with ING America to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Under this agreement, which expires April 1, 2011, the Company and ING America can borrow up to \$377,500,000 from one another. Interest on any of the Company's borrowing is charged at the rate of ING America cost of funds for the interest period plus 0.15%. Interest on any ING America borrowings is charged at a rate based on the prevailing interest rate of U.S. commercial paper available for purchase with a similar duration. Under this agreement, the Company incurred interest expense of \$900,000 and interest income of \$3,721,000 for the year ended December 31, 2002. At December 31, 2002, the Company had \$0 payable to ING America and \$66,700,000 receivable from ING AIH.

Tax Sharing Agreements: The Company has entered into federal tax sharing agreements with members of an affiliated group as defined in Section 1504 of the Internal Revenue Code of 1986, as amended. The agreement provides for the manner of calculation and the amounts/timing of the payments between the parties as well as other related matters in connection with the filing of consolidated federal income tax returns. The Company has also entered into a state tax sharing agreement with ING AIH and each of the specific subsidiaries that are parties to the agreement. The state tax agreement applies to situations in which ING AIH and all or some of the subsidiaries join in the filing of a state or local franchise, income tax or other tax return on a consolidated, combined or unitary basis.

Service Agreement with ING Financial Advisors, LLC: The Company has entered into a services agreement with ING Financial Advisors, LLC. ("ING FA") to provide certain administrative, management, professional advisory, consulting and other services to the Company for the benefit of its customers. Charges for these services are to be determined in accordance with fair and reasonable standards with neither party realizing a profit nor incurring a loss as a result of the services provided to the Company.

Security Life of Denver Insurance Company

Notes to Financial Statements – Statutory Basis

December 31, 2002

18. Guaranty Fund Assessments

Insurance companies are assessed the costs of funding the insolvencies of other insurance companies by the various state guaranty associations, generally based on the amount of premium companies collect in that state.

The Company accrues the cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA) and the amount of premiums written in each state. The Company reduces the accrual by credits allowed in some states to reduce future premium taxes by a portion of assessments in that state. The Company has estimated this liability to be \$2,305,000 as of December 31, 2002 and 2001 and has recorded a liability. The Company has also recorded an asset of \$3,035,000 and \$3,805,000 as of December 31, 2002 and 2001, respectively, for future credits to premium taxes for assessments already paid.

19. Regulatory Risk-Based Capital

Life and health insurance companies are subject to certain Risk-Based Capital ("RBC") requirements as specified by the NAIC. Under those requirements, the amount of capital and surplus maintained by a life and health insurance company is to be determined based on the various risk factors related to it. At December 31, 2002, the Company meets the RBC requirements.

Report of Independent Auditors

Board of Directors and Stockholder
Security Life of Denver Insurance Company

We have audited the accompanying statutory basis balance sheets of Security Life of Denver Insurance Company ("the Company" and an indirect, wholly-owned subsidiary of ING America Insurance Holdings, Inc.) as of December 31, 2003 and 2002, and the related statutory basis statements of operations, changes in capital and surplus, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in Note 1 to the financial statements, the Company presents its financial statements in conformity with accounting practices prescribed or permitted by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado ("Colorado Division of Insurance"), which practices differ from accounting principles generally accepted in the United States. The variances between such practices and accounting principles generally accepted in the United States are described in Note 1. The effects on the financial statements of these variances are not reasonably determinable but are presumed to be material.

In our opinion, because of the effects of the matter described in the preceding paragraph, the financial statements referred to above do not present fairly, in conformity with accounting principles generally accepted in the United States, the financial position of Security Life of Denver Insurance Company at December 31, 2003 and 2002 or the results of its operations or its cash flows for the years then ended.

However, in our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Security Life of Denver Insurance Company at December 31, 2003 and 2002, and the results of its operations and its cash flows for the years then ended, in conformity with accounting practices prescribed or permitted by the Colorado Division of Insurance.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

1. Nature of Operations and Significant Accounting Policies

Security Life of Denver Insurance Company (the "Company") is domiciled in Colorado and is a wholly owned subsidiary of Lion Connecticut Holdings Inc., which is a wholly-owned subsidiary of ING America Insurance Holdings, Inc. ("ING AIH"). The Company focuses on three markets: the advanced market, reinsurance to other insurers, and the investment products market. The life insurance products offered for the advanced market include wealth transfer and estate planning, executive benefits, charitable giving and corporate-owned life insurance. These products include traditional life, interest-sensitive life, universal life, and variable life. Operations are conducted almost entirely on the general agency basis and the Company is presently licensed in all states (approved for reinsurance only in New York and Puerto Rico), the District of Columbia and the U.S. Virgin Islands. In the reinsurance market, the Company offers financial security to clients through a mix of total risk management and traditional life insurance services. In the investment products market, the Company offers guaranteed investment contracts, funding agreements, and trust notes to institutional buyers.

The Company merged with First Columbine Life Insurance Company ("First Columbine"), an affiliate, on December 31, 2002. The transaction was approved by the Division of Insurance of the Department of Regulatory Agencies of the State of Colorado ("Colorado Division of Insurance") and was accounted for as a statutory merger. No consideration was paid and no common stock was issued in exchange for all of the common shares of First Columbine. The accompanying financial statements have been restated as though the merger took place prior to all periods presented. Pre-merger separate company revenue, net income, and other surplus adjustments for the twelve months ended December 31, 2002 were \$2,784,460,000, \$116,057,000 and \$107,979,000, respectively, for the Company and \$249,673,000, \$21,137,000, and \$17,035,000, respectively, for First Columbine.

The preparation of financial statements of insurance companies requires management to make estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

Basis of Presentation

The accompanying financial statements of the Company have been prepared in conformity with accounting practices prescribed or permitted by the Colorado Division of Insurance, which practices differ from accounting principles generally accepted in the United States ("GAAP"). The most significant variances from GAAP are as follows:

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Investments: Investments in bonds and mandatorily redeemable preferred stocks are reported at amortized cost or market value based on the National Association of Insurance Commissioners ("NAIC") rating; for GAAP, such fixed maturity investments are designated at purchase as held-to-maturity, trading or available-for-sale. Held-to-maturity investments are reported at amortized cost, and the remaining fixed maturity investments are reported at fair value with unrealized capital gains and losses reported in operations for those designated as trading and as a separate component of other comprehensive income in stockholder's equity for those designated as available-for-sale.

For structured securities, when a negative yield results from a revaluation based on new prepayment assumptions (i.e., undiscounted cash flows are less than current book value), an other than temporary impairment is considered to have occurred and the asset is written down to the value of the undiscounted cash flows. For GAAP, assets are re-evaluated based on the discounted cash flows using a current market rate. Impairments are recognized when there has been an adverse change in cash flows and the fair value is less than book value. The asset is then written down to fair value.

Investments in real estate are reported net of related obligations rather than on a gross basis. Real estate owned and occupied by the Company is included in investments rather than reported as an operating asset as under GAAP, and investment income and operating expenses include rent for the Company's occupancy of those properties. Changes between depreciated cost and admitted asset investment amounts are credited or charged directly to unassigned surplus rather than income as would be required under GAAP.

SSAP 31 applies to derivative transactions prior to January 1, 2003. The Company also follows the newly adopted hedge accounting guidance in SSAP 86 for derivative transactions entered into or modified on or after January 1, 2003. Under this guidance, derivatives that are deemed effective hedges are accounted for in a manner which is consistent with the underlying hedged item. Derivatives used in hedging transactions that do not meet the requirements of SSAP 86 as an effective hedge are carried at fair value with the change in value recorded in surplus as unrealized gains or losses. Embedded derivatives are not accounted for separately from the host contract. Under GAAP, the effective and ineffective portions of a single hedge are accounted for separately, an embedded derivative within a contract that is not clearly and closely related to the economic characteristics and risk of the host contract is accounted for separately from the host contract and valued and reported at fair value, and the change in fair value for cash flow hedges is credited or charged directly to a separate component of shareholder's equity rather than to income as required for fair value hedges.

Redeemable preferred stocks rated as high quality or better are reported at cost or amortized cost. All other redeemable preferred stocks are reported at the lower of cost, amortized cost, or market value and nonredeemable preferred stocks are reported at market value or the lower of cost or market value as determined by the Securities Valuation Office of the NAIC ("SVO").

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/losses are reported in unassigned surplus along with adjustment for federal income taxes.

Valuation Reserves: The asset valuation reserve ("AVR") is determined by an NAIC-prescribed formula and is reported as a liability rather than as a valuation allowance or an appropriation of surplus. The change in AVR is reported directly to unassigned surplus.

Under a formula prescribed by the NAIC, the Company defers the portion of realized gains and losses on sales of fixed-income investments, principally bonds and mortgage loans, attributable to changes in the general level of interest rates, and amortizes those deferrals over the remaining period to maturity based on groupings of individual securities sold in five-year bands. The net deferral or interest maintenance reserve ("IMR") is reported as a component of other liabilities in the accompanying balance sheets.

Realized gains and losses on investments are reported in operations net of federal income tax and transfers to the IMR. Under GAAP, realized capital gains and losses are reported in the statements of operations on a pretax basis in the period that the asset giving rise to the gain or loss is sold and valuation allowances are provided when there has been a decline in value deemed other than temporary, in which case the provision for such declines is charged to income.

Valuation allowances, if necessary, are established for mortgage loans based on the difference between the net value of the collateral, determined as the fair value of the collateral less estimated costs to obtain and sell, and the recorded investment in the mortgage loan. Under GAAP, such allowances are based on the present value of expected future cash flows discounted at the loan's effective interest rate or, if foreclosure is probable, on the estimated fair value of the collateral.

The initial valuation allowance and subsequent changes in the allowance for mortgage loans as a result of a temporary impairment are charged or credited directly to unassigned surplus, rather than being included as a component of earnings as would be required under GAAP.

Policy Acquisition Costs: The costs of acquiring and renewing business are expensed when incurred. Under GAAP, acquisition costs related to traditional life insurance, to the extent recoverable from future policy revenues, are deferred and amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policy benefit reserves. For universal life insurance and investment products, to the extent recoverable from future gross profits, acquisition costs are amortized generally in proportion to the present value of expected gross margins from surrender charges and investment, mortality, and expense margins.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Premiums: Life premiums are recognized as revenue when due. Premiums for annuity policies with mortality and morbidity risk, except for guaranteed interest and group annuity contracts, are also recognized as revenue when due. Premiums received for annuity policies without mortality or morbidity risk and for guaranteed interest and group annuity contracts are recorded using deposit accounting.

Under GAAP, premiums for traditional life insurance products, which include those products with fixed and guaranteed premiums and benefits and consist primarily of whole life insurance policies, are recognized as revenue when due. Group insurance premiums are recognized as premium revenue over the time period to which the premiums relate. Revenues for universal life, annuities and guaranteed interest contracts consist of policy charges for the cost of insurance, policy administration charges, amortization of policy initiation fees and surrender charges assessed during the period.

Benefit and Contract Reserves: Life policy and contract reserves under statutory accounting practices are calculated based upon both the net level premium and Commissioners' Reserve Valuation methods using statutory rates for mortality and interest. GAAP requires that policy reserves for traditional products be based upon the net level premium method utilizing reasonably conservative estimates of mortality, interest, and withdrawals prevailing when the policies were sold. For interest-sensitive products, the GAAP policy reserve is equal to the policy fund balance plus an unearned revenue reserve which reflects the unamortized balance of early year policy loads over renewal year policy loads.

Reinsurance: For business ceded to unauthorized reinsurers, statutory accounting practices require that reinsurance credits permitted by the treaty be recorded as an offsetting liability and charged against unassigned surplus. Under GAAP, an allowance for amounts deemed uncollectible would be established through a charge to earnings. Statutory income recognized on certain reinsurance treaties representing financing arrangements is not recognized on a GAAP basis.

Policy and contract liabilities ceded to reinsurers have been reported as reductions of the related reserves rather than as assets as required under GAAP.

Commissions allowed by reinsurers on business ceded are reported as income when received rather than being deferred and amortized with deferred policy acquisition costs as required under GAAP.

Subsidiaries: The accounts and operations of the Company's subsidiaries are not consolidated with the accounts and operations of the Company as would be required under GAAP.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Nonadmitted Assets: Certain assets designated as "nonadmitted," principally deferred federal income tax assets, disallowed interest maintenance reserves, non-operating software, past-due agents' balances, furniture and equipment, intangible assets, and other assets not specifically identified as an admitted asset within the NAIC *Accounting Practices and Procedures Manual* are excluded from the accompanying balance sheets and are charged directly to unassigned surplus.

Employee Benefits: For purposes of calculating the Company's pension and postretirement benefit obligation, only vested participants and current retirees are included in the valuation. Under GAAP, active participants not currently vested are also included.

Universal Life and Annuity Policies: Revenues for universal life and annuity policies consist of the entire premium received and benefits incurred represent the total of death benefits paid and the change in policy reserves. Under GAAP, premiums received in excess of policy charges would not be recognized as premium revenue and benefits would represent the excess of benefits paid over the policy account value and interest credited to the account values.

Policyholder Dividends: Policyholder dividends are recognized when declared rather than over the term of the related policies.

Deferred Income Taxes: Deferred tax assets are provided for and admitted to an amount determined under a standard formula. This formula considers the amount of differences that will reverse in the subsequent year, taxes paid in prior years that could be recovered through carrybacks, surplus limits, and the amount of deferred tax liabilities available for offset. Any deferred tax assets not covered under the formula are non-admitted. Deferred taxes do not include any amounts for state taxes. Under GAAP, a deferred tax asset is recorded for the amount of gross deferred tax assets that are expected to be realized in future years and a valuation allowance is established for the portion that is not realizable.

Surplus Notes: Surplus notes are reported as a component of surplus. Under statutory accounting practices, no interest is recorded on the surplus notes until payment has been approved by the Colorado Division of Insurance. Under GAAP, surplus notes are reported as liabilities and the related interest is reported as a charge to earnings over the term of the notes.

Statements of Cash Flows: Cash and short-term investments in the statements of cash flows represent cash balances and investments with initial maturities of one year or less. Under GAAP, the corresponding caption of cash and cash equivalents includes cash balances and investments with initial maturities of three months or less.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Reconciliation to GAAP: The effects of the preceding variances from GAAP on the accompanying statutory basis financial statements have not been determined, but are presumed to be material.

Other significant accounting practices are as follows:

Investments

Investments are stated at values prescribed by the NAIC, as follows:

Bonds not backed by other loans are principally stated at amortized cost using the interest method.

Single class and multi-class mortgage-backed/asset-backed securities are valued at amortized cost using the interest method including anticipated prepayments. Prepayment assumptions are obtained from dealer surveys or internal estimates and are based on the current interest rate and economic environment. The retrospective adjustment method is used to value all such securities except for higher-risk asset backed securities, which are valued using the prospective method. The Company has elected to use the book value as of January 1, 1994, as the cost for applying the retrospective method to securities purchased prior to that date where historical cash flows are not readily available.

Redeemable preferred stocks rated as high quality or better are reported at cost or amortized cost. All other redeemable preferred stocks are reported at the lower of cost, amortized cost, or market value and nonredeemable preferred stocks are reported at market value or the lower of cost or market value as determined by the SVO.

Common stocks are reported at market value as determined by the SVO and the related unrealized capital gains/losses are reported in unassigned surplus along with adjustment for federal income taxes.

The Company analyzes the general account investments to determine whether there has been an other than temporary decline in fair value below the amortized cost basis. Management considers the length of time and the extent to which the market value has been less than cost, the financial condition and near-term prospects of the issuer, future economic conditions and market forecasts, and the Company's intent and ability to retain the investment in the issuer for a period of time sufficient to allow for recovery in market value. If it is probable that all amounts due according to the contractual terms of a debt security will not be collected, an other than temporary impairment is considered to have occurred.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The Company uses derivatives such as interest rate swaps, caps and floors as part of its overall interest rate risk management strategy for certain life insurance and annuity products. As the Company only uses derivatives for hedging purposes, the Company values all derivative instruments on a consistent basis with the hedged item. Upon termination, gains and losses on instruments are included in the carrying values of the underlying hedged items and are amortized over the remaining lives of the hedged items as adjustments to investment income or benefits from the hedged items. Any unamortized gains or losses are recognized when the underlying hedged items are sold.

Interest rate swap contracts are used to convert the interest rate characteristics (fixed or variable) of certain investments to match those of the related insurance liabilities that the investments are supporting. The net interest effect of such swap transactions is reported as an adjustment of interest income from the hedged items as incurred.

Interest rate caps and floors are used to limit the effects of changing interest rates on yields of variable rate or short-term assets or liabilities. The initial cost of any such agreement is amortized to net investment income over the life of the agreement. Periodic payments that are receivable as a result of the agreements are accrued as an adjustment of interest income or benefits from the hedged items.

The derivatives are reported in a manner that is consistent with the hedged asset or liability. All derivatives are reported at amortized cost. Upon termination of a derivative that qualified for hedge accounting, the gain or loss is deferred in IMR or adjusts the basis of the hedged item.

The Company's insurance subsidiaries are reported at their underlying statutory basis net assets plus the admitted portion of goodwill, and the Company's noninsurance subsidiary is reported at the GAAP basis of its net assets. Dividends from subsidiaries are included in net investment income. The remaining net change in the subsidiaries' equity is included in the change in net unrealized capital gains or losses.

Mortgage loans are reported at amortized cost, less allowance for impairments.

Contract loans are reported at unpaid principal balances.

Land is reported at cost. Real estate occupied by the Company is reported at depreciated cost; other real estate is reported at the lower of depreciated cost or fair value. Depreciation is calculated on a straight-line basis over the estimated useful lives of the properties.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

For reverse repurchase agreements, Company policies require a minimum of 95% of the fair value of securities purchased under reverse repurchase agreements to be maintained as collateral. Cash collateral received is invested in short-term investments and the offsetting collateral liability is included in miscellaneous liabilities.

Reverse dollar repurchase agreements are accounted for as collateral borrowings, where the amount borrowed is equal to the sales price of the underlying securities.

The Company engages in securities lending whereby certain domestic bonds from its portfolio are loaned to other institutions for short periods of time. Collateral, primarily cash, which is in excess of the market value of the loaned securities, is deposited by the borrower with a lending agent, and retained and invested by the lending agent to generate additional income for the Company. The Company does not have access to the collateral. The Company's policy requires a minimum of 102% of the fair value of securities loaned to be maintained as collateral. The market value of the loaned securities is monitored on a daily basis with additional collateral obtained or refunded as the market value fluctuates.

Short-term investments are reported at amortized cost. Short-term investments include investments with maturities of less than one year at the date of acquisition.

Partnership interests, which are included in other invested assets, are reported at the underlying audited GAAP equity of the investee.

Residual collateralized mortgage obligations, which are included in other invested assets, are reported at amortized cost using the effective interest method.

Realized capital gains and losses are determined using the specific identification method.

Cash on hand includes cash equivalents. Cash equivalents are short-term investments that are both readily convertible to cash and have an original maturity date of three months or less. Short-term investments are carried at amortized cost, which approximates market value.

Aggregate Reserve for Life Policies and Contracts

Life, annuity, and accident and health reserves are developed by actuarial methods and are determined based on published tables using statutorily specified interest rates and valuation methods that will provide, in the aggregate, reserves that are greater than or equal to the minimum or guaranteed policy cash value or the amounts required by law. Interest rates range from 2.0% to 11.25%.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The Company waives the deduction of deferred fractional premiums upon the death of the insured. It is the Company's practice to return a pro rata portion of any premium paid beyond the policy month of death, although it is not contractually required to do so for certain issues.

The methods used in valuation of substandard policies are as follows:

For life, endowment and term policies issued substandard, the standard reserve during the premium-paying period is increased by 50% of the gross annual extra premium. Standard reserves are held on Paid-Up Limited Pay contracts.

For reinsurance accepted with table rating, the reserve established is a multiple of the standard reserve corresponding to the table rating.

For reinsurance with flat extra premiums, the standard reserve is increased by 50% of the flat extra.

The tabular interest has been determined from the basic data for the calculation of policy reserves for all direct ordinary life insurance and for the portion of group life insurance classified as group Section 79. The method of determination of tabular interest of funds not involving life contingencies is as follows: current year reserves, plus payments, less prior year reserves, less funds added.

Reinsurance

Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on a basis consistent with those used in accounting for the original policies issued and the terms of the reinsurance contracts. Reserves are based on the terms of the reinsurance contracts and are consistent with the risks assumed. Premiums and benefits ceded to other companies have been reported as a reduction of premium revenue and benefits expense. Amounts applicable to reinsurance ceded for reserves and unpaid claim liabilities have been reported as reductions of these items, and expense allowances received in connection with reinsurance ceded have been reflected in operations.

Data Processing Equipment

Electronic data processing equipment is carried at cost less accumulated depreciation. Depreciation for major classes of such assets is calculated on a straight-line basis over the estimated useful life of the asset.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Participating Insurance

Participating business approximates less than 1.0% of the Company's ordinary life insurance in force and 0.8% of premium income. The amount of dividends to be paid to participating policyholders is determined annually by the Board of Directors. Amounts allocable to participating policyholders are based on published dividend projections or expected dividend scales.

Pension Plans

The Company provides noncontributory retirement plans for substantially all employees and certain agents. Pension costs are charged to operations as contributions are made to the plan. The Company also provides a contributory retirement plan for substantially all employees.

Nonadmitted Assets

Nonadmitted assets are summarized as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Deferred federal income taxes	\$ 231,293	\$ 188,721
Agents' debit balances	3,335	4,232
Furniture and equipment	1,555	2,217
Deferred and uncollected premium	872	2,801
Non-operating software asset in progress	11,582	14,187
Other	12,265	5,372
Total nonadmitted assets	<u>\$ 260,902</u>	<u>\$ 217,530</u>

Changes in nonadmitted assets are generally reported directly in surplus as an increase or decrease in nonadmitted assets. Certain changes are reported directly in surplus as a change in unrealized capital gains or losses.

Claims and Claims Adjustment Expenses

Claims expenses represent the estimated ultimate net cost of all reported and unreported claims incurred through December 31, 2003. The Company does not discount claims and claims adjustment expense reserves. Such estimates are based on actuarial projections applied to historical claim payment data. Such liabilities are considered to be reasonable and adequate to discharge the Company's obligations for claims incurred but unpaid as of December 31, 2003.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Cash Flow Information

Cash and short-term investments include cash on hand, demand deposits and short-term fixed maturity instruments with a maturity of less than one year at date of acquisition.

Separate Accounts

More than half of the separate account assets and liabilities held by the Company represent funds held for the benefit of the Company's variable life and annuity policy and contract holders who bear all of the investment risk associated with the policies. Such policies are of a non-guaranteed nature. All net investment experience, positive or negative, is attributed to the policy and contract holders' account values. The assets of these accounts are carried at fair value.

Certain other separate accounts relate to experience-rated group annuity contracts that fund defined contribution pension plans. These contracts provide guaranteed interest returns for one year only, where the guaranteed interest rate is re-established each year based on the investment experience of the separate account. In no event can the interest rate be less than zero. The assets and liabilities of these separate accounts are carried at book value.

Reserves related to the Company's mortality risk associated with these policies are included in life and annuity reserves. The operations of the separate accounts are not included in the accompanying financial statements.

Reclassifications

Certain prior year amounts in the Company's statutory basis financial statements have been reclassified to conform to the 2003 financial statement presentation.

2. Permitted Statutory Basis Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the State of Colorado. The Colorado Division of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Colorado for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Colorado Insurance Laws. The NAIC *Accounting Practices and Procedures Manual* has been adopted as a component of prescribed or permitted practices by the State of Colorado. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

The Company is required to identify those significant accounting practices that are permitted, and obtain written approval of the practices from the Colorado Division of Insurance. As of December 31, 2003 and 2002, the Company had no such permitted accounting practices.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Reconciliation of bonds from amortized cost to carrying value is as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Amortized cost	\$ 12,008,325	\$ 11,436,075
Less: nonadmitted bonds	(8,764)	(21,510)
Carrying value	<u>\$ 11,999,561</u>	<u>\$ 11,414,565</u>

As of December 31, 2003, the aggregate market value of debt securities with unrealized losses and the time period that cost exceeded fair value are as follows:

	Less than 6 months below cost	More than 6 months and less than 12 months below cost <i>(In Thousands)</i>	More than 12 months below cost	Total
Fair value	\$ 1,298,604	\$ 1,016,714	\$ 466,032	\$ 2,781,350
Unrealized loss	16,475	46,060	76,500	139,035

Of the unrealized losses more than 6 months and less than 12 months in duration of \$46,060,000 there were \$10,390,000 in unrealized losses that were primarily related to interest rate movement or spread widening for other than credit-related reasons. Business and operating fundamentals are performing as expected. The remaining unrealized losses of \$35,670,000 as of December 31, 2003 included the following significant items:

\$28,305,000 of unrealized losses related to mortgage-backed and structured securities reviewed for impairment under the guidance prescribed by SSAP No. 43 *Loan-backed and Structured Securities*. This category includes U.S. government-backed securities, principal protected securities and structured securities which did not have an adverse change in cash flows for which the fair value was \$497,256,000.

\$2,759,000 of unrealized losses related to the energy/utility industry, for which the fair value was \$100,270,000. During 2003, the energy sector recovered due to a gradually improving economic picture. Current analysis indicates the debt will be serviced in accordance with the contractual terms.

\$2,482,000 of unrealized losses related to non-domestic issues, with no unrealized loss exposure per country in excess of \$873,000 for which the fair value was \$50,047,000. Credit exposures are well diversified in these markets including banking, beverage, healthcare, and sovereign companies.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

\$1,306,000 of unrealized losses related to the telecommunications/cable/media industry, for which the fair value was \$31,220,000. During 2003, the sector recovered somewhat due to a gradually improving economy. Credit exposure is primarily focused in what Company management believes to be the largest and most financially secure companies in the sector.

The remaining unrealized losses totaling \$818,000 relate to a fair value of \$6,638,000.

Of the unrealized losses more than 12 months in duration of \$76,500,000, there were \$3,017,000 in unrealized losses that were primarily related to interest rate movement or spread widening for other than credit-related reasons. Business and operating fundamentals are performing as expected. The remaining unrealized losses of \$73,483,000 as of December 31, 2003 included the following significant items:

\$63,195,000 of unrealized losses related to mortgage-backed and structured securities reviewed for impairment under the guidance prescribed by SSAP No. 43 *Loan-backed and Structured Securities*. This category includes U.S. government-backed securities, principal protected securities and structured securities which did not have an adverse change in cash flows for which the fair value was \$242,380,000.

\$4,633,000 of unrealized losses related to the airline industry, for which the fair value was \$35,286,000. During 2003, the airline industry continued to suffer from decreased passenger volumes offset by a gradually improving economy. The majority of the airline investments are comprised of Enhanced Equipment Trust Certificates ("EETC"). Current analysis indicates the specific collateral backing EETC investments is predominantly represented by newer models that are expected to be retained as individual airlines reduce their fleets.

\$1,823,000 of unrealized losses related to the energy/utility industry, for which the fair value was \$20,862,000. During 2003, the energy sector recovered due to a gradually improving economic picture. Current analysis indicates the debt will be serviced in accordance with the contractual terms.

\$2,444,000 of unrealized losses related to non-domestic issues, with no unrealized loss exposure per country in excess of \$1,700,000 for which the fair value was \$35,813,000. Credit exposures are well diversified in these markets, including banking and other asset-backed securities.

\$1,143,000 of unrealized losses related to the telecommunications/cable/media industry, for which the fair value was \$39,531,000. During 2003, the sector recovered somewhat due to a gradually improving economy. Credit exposure is primarily focused in what Company management believes to be the largest and most financially secure companies in the sector.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The remaining unrealized losses totaling \$245,000 relate to a fair value of \$1,394,000.

The amortized cost and fair value of investments in bonds at December 31, 2003, by contractual maturity, are shown below. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	<i>(In Thousands)</i>	
December 31, 2003		
Maturity:		
Due in 1 year or less	\$ 418,595	\$ 425,646
Due after 1 year through 5 years	2,811,537	2,968,703
Due after 5 years through 10 years	2,349,746	2,468,666
Due after 10 years	1,566,314	1,645,998
	<hr/> 7,146,192	<hr/> 7,509,013
Mortgage-backed securities	3,848,729	3,853,868
Commercial mortgage-backed securities	199,516	206,325
Other structured securities	813,888	781,389
Total	<hr/> <u>\$ 12,008,325</u>	<hr/> <u>\$ 12,350,595</u>

At December 31, 2003, investments in certificates of deposit and bonds, with an admitted asset value of \$23,849,000, were on deposit with state insurance departments to satisfy regulatory requirements.

The Company had loaned securities, which are reflected as invested assets on the balance sheets with a market value of approximately \$22,867,000 and \$28,903,000, at December 31, 2003 and 2002, respectively.

Proceeds from sales of investments in bonds and other fixed maturity interest securities were \$4,985,299,000 and \$5,990,714,000 in 2003 and 2002, respectively. Gross gains of \$84,185,000 and \$139,524,000 and gross losses of \$29,923,000 and \$114,222,000 during 2003 and 2002, respectively, were realized on those sales. A portion of the gains and losses realized in 2003 and 2002 has been deferred to future periods in the IMR.

In the course of the Company's asset management, securities are sold and reacquired within 30 days of the sale date to enhance the Company's return on the investment portfolio or to manage interest rate risk.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The table below summarizes the number of transactions, book value, and gain/loss of the Company's financial instruments with securities sold and reacquired within 30 days of the sale date:

Bonds	Number of Transactions	Book Value	Cost of Securities Repurchased	Gain
NAIC 3	19	\$ 14,652,948	\$ 15,738,289	\$ 177,741

Mortgage loans	175,395	170,803
Contract loans	71,453	72,183
Real estate	4,661	4,950
Derivative investments	(176,141)	(109,067)
Other	7,080	12,633
Total investment income	765,203	909,218
Investment expenses	(57,464)	(50,763)
Net investment income	<u>\$ 707,739</u>	<u>\$ 858,455</u>

As part of its overall investment strategy, the Company has entered into agreements to purchase securities as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Investment purchase commitments	\$ 348,720	\$ 218,743

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The Company entered into reverse dollar repurchase transactions to increase its return on investments and improve liquidity. Reverse dollar repurchases involve a sale of securities and an agreement to repurchase substantially the same securities as those sold. The reverse dollar repurchases are accounted for as short-term collateralized financing and the repurchase obligation is reported in borrowed money. The repurchase obligation totaled \$166,089,000 and \$161,878,000 at December 31, 2003 and 2002, respectively. The securities underlying these agreements are mortgage-backed securities with a book value of \$164,591,000 and \$160,784,000 and fair value of \$166,580,000 and \$163,139,000 at December 31, 2003 and 2002, respectively. At December 31, 2003, the securities have a weighted average coupon rate of 5.8% and have maturities ranging from December 2018 through December 2033. The primary risk associated with short-term collateralized borrowings is that the counterparty may be unable to perform under the terms of the contract. The Company's exposure is limited to the excess of the net replacement cost of the securities over the value of the short-term investments, which was not material at December 31, 2003. The Company believes that the counterparties to the reverse dollar repurchase agreements are financially responsible and that counterparty risk is minimal.

The Company participates in reverse repurchase transactions. Such transactions include the sale of corporate securities to a major securities dealer and a simultaneous agreement to repurchase the same security in the near term. The proceeds are invested in new securities of intermediate durations. The terms of the reverse repurchase agreements call for payment of interest at a rate of 1.07%. The agreements mature prior to the end of January 2004. As of December 31, 2003 and 2002, the amount outstanding on these agreements was \$15,800,000. The securities underlying these agreements are mortgage-backed securities with a book value of \$15,938,000 and \$7,276,000 and fair value of \$16,098,000 and \$7,355,000 at December 31, 2003 and 2002, respectively. The securities have a weighted average coupon of 5.0% and have a maturity of December 2033.

The maximum and minimum lending rates for long-term mortgage loans during 2003 were 7.26% and 2.32%. Fire insurance is required on all properties covered by mortgage loans and must at least equal the excess of the loan over the maximum loan which would be permitted by law on the land without the buildings.

The maximum percentage of any loan to the value of collateral at the time of the loan, exclusive of insured or guaranteed or purchase money mortgages, was 76.0% on commercial properties. As of December 31, 2003, the Company held no mortgages with interest more than 180 days overdue. Total interest due on mortgages is \$57,000, and \$251,000 as of December 31, 2003 and 2002, respectively.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

4. Derivative Financial Instruments Held for Purposes Other than Trading

The Company enters into derivatives such as swaps, caps, floors, and options to reduce and manage risks, which include the risk of a change in the value, yield, price, cash flows, exchange rates or quantity of, or a degree of exposure with respect to, assets, liabilities, or future cash flows which the Company has acquired or incurred. Hedge accounting practices are supported by cash flow matching, scenario testing and duration matching.

The Company uses interest rate swaps to reduce market risks from changes in interest rates and to alter interest rate exposure arising from mismatches between assets and liabilities. Interest rate swap agreements generally involve the exchange of fixed and floating interest payments over the life of the agreement without an exchange of the underlying principal amount. Currency swap agreements generally involve the exchange of local and foreign currency payments over the life of the agreements without an exchange of the underlying principal amount.

Interest rate cap and interest rate floor agreements owned entitle the Company to receive payments to the extent reference interest rates exceed or fall below strike levels in the contracts based on the notional amounts.

Premiums paid for the purchase of interest rate contracts are included in other invested assets on the balance sheets and are being amortized to interest expense over the remaining terms of the contracts or in a manner consistent with the financial instruments being hedged.

Amounts paid or received, if any, from such contracts are included in interest expense or income on the statements of operations. Accrued amounts payable to or receivable from counterparties are included in other liabilities or other invested assets.

Gains or losses realized as a result of early terminations of interest rate contracts are amortized to investment income over the remaining term of the items being hedged to the extent the hedge is considered to be effective; otherwise, they are recognized upon termination. Changes in the fair value of effective hedge derivatives are recorded as investment income. Changes in the fair value of ineffective hedge derivatives are recorded as unrealized gains and losses in surplus. The Company manages the potential credit exposure from interest rate contracts through careful evaluation of the counterparties' credit standing, collateral agreements, and master netting agreements.

Interest rate contracts that are matched or otherwise designated to be associated with other financial instruments are recorded at fair value if the related financial instruments mature, are sold, or are otherwise terminated or if the interest rate contracts cease to be effective hedges. Changes in the fair value of derivatives are recorded as unrealized gains and losses. The Company manages the potential credit exposure from interest rate contracts through careful evaluation of the counterparties' credit standing, collateral agreements, and master netting agreements.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The Company is exposed to credit loss in the event of nonperformance by counterparties on interest rate contracts; however, the Company does not anticipate nonperformance by any of these counterparties. The amount of such exposure is generally the unrealized gains in such contracts.

The table below summarizes the Company's interest rate contracts included in other invested assets at December 31, 2003 and 2002:

	Notional Amount	Carrying Value	Fair Value
		(In Thousands)	
December 31, 2003			
Swaps	\$ 9,977,615	\$ 5,533	\$ (233,030)
Caps owned	525,151	4,498	747
Total derivatives	<u>\$ 10,502,766</u>	<u>\$ 10,031</u>	<u>\$ (232,283)</u>
December 31, 2002			
Swaps	\$ 10,995,346	\$ 15,626	\$ (272,911)
Caps owned	672,372	7,313	1,920
Total derivatives	<u>\$ 11,667,718</u>	<u>\$ 22,939</u>	<u>\$ (270,991)</u>

5. Concentrations of Credit Risk

The Company held less-than-investment-grade corporate bonds with an aggregate book value of \$773,297,000 and \$679,704,000 and an aggregate market value of \$800,996,000 and \$633,205,000 at December 31, 2003 and 2002, respectively. Those holdings amounted to 6.4% of the Company's investments in bonds and 4.5% of total admitted assets at December 31, 2003. The holdings of less-than-investment-grade bonds are widely diversified and of satisfactory quality based on the Company's investment policies and credit standards.

The Company held unrated bonds of \$252,037,000 and \$208,820,000 with an aggregate NAIC market value of \$255,766,000 and \$209,386,000 at December 31, 2003 and 2002, respectively. The carrying value of these holdings amounted to 2.1% of the Company's investment in bonds and 1.5% of the Company's total admitted assets at December 31, 2003.

At December 31, 2003, the Company's commercial mortgages involved a concentration of properties located in California (17.0%) and Florida (9.5%). The remaining commercial mortgages relate to properties located in 41 other states. The portfolio is well diversified, covering many different types of income-producing properties on which the Company has first mortgage liens. The maximum mortgage outstanding on any individual property is \$51,425,000.

6. Annuity Reserves

At December 31, 2003 and 2002, the Company's annuity reserves, including those held in separate accounts and deposit fund liabilities that are subject to discretionary withdrawal (with adjustment), subject to discretionary withdrawal without adjustment, and not subject to discretionary withdrawal provisions are summarized as follows:

	<u>Amount</u>	<u>Percent</u>
	<i>(In Thousands)</i>	
December 31, 2003		
Subject to discretionary withdrawal (with adjustment):		
With market value adjustment	\$ 2,954,534	28.7 %
At book value less surrender charge	<u>31,416</u>	<u>0.3</u>
Subtotal	2,985,950	29.0
Subject to discretionary withdrawal (without adjustment):		
At book value with minimal or no charge or adjustment	264,407	2.6
Not subject to discretionary withdrawal	<u>7,039,545</u>	<u>68.4</u>
Total annuity reserves and deposit fund liabilities		
before reinsurance	10,289,902	<u>100.0 %</u>
Less reinsurance ceded	<u>-</u>	
Net annuity reserves and deposit fund liabilities	<u>\$ 10,289,902</u>	
December 31, 2002		
Subject to discretionary withdrawal (with adjustment):		
With market value adjustment	\$ 4,035,938	39.9 %
At book value less surrender charge	<u>34,035</u>	<u>0.4</u>
Subtotal	4,069,973	40.3
Subject to discretionary withdrawal (without adjustment):		
At book value with minimal or no charge or adjustment	266,917	2.6
Not subject to discretionary withdrawal	<u>5,774,312</u>	<u>57.1</u>
Total annuity reserves and deposit fund liabilities		
before reinsurance	10,111,202	<u>100.0 %</u>
Less reinsurance ceded	<u>-</u>	
Net annuity reserves and deposit fund liabilities	<u>\$ 10,111,202</u>	

The amount of insurance in force for which the gross premiums are less than the net premiums, according to the standard of valuation required by the Colorado Division of Insurance, is \$426,738,180,000 at December 31, 2003. The amount of premium deficiency reserves for policies on which gross premiums are less than the net premiums is \$687,716,000 at December 31, 2003. The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 54, *Individual and Group Accident and Health Contracts*.

7. Employee Benefit Plans

Pension Plan and Postretirement Benefits

The Company sponsors non-contributory defined benefit pension plans covering United States employees.

The Company also provides certain health care and life insurance benefits for retired employees.

A summary of assets, obligations and assumptions of the pension and other postretirement benefits plans are as follows:

	Pension Benefits		Other Benefits	
	2003	2002	2003	2002
	<i>(In Thousands)</i>			
Change in benefit obligation				
Benefit obligation at beginning of year	\$ 11,433	\$ 14,880	\$ 5,658	\$ 5,742
Service cost	-	26	430	445
Interest cost	752	1,098	359	451
Contribution by plan participants	-	-	1,442	265

Amount of prior service cost recognized	(36)	(35)	(123)	483
Total net periodic benefit cost	<u>\$ 1,153</u>	<u>\$ 1,734</u>	<u>\$ 602</u>	<u>\$ 1,719</u>

In addition, the Company has pension benefit obligation and other benefit obligation for non-vested employees as of December 31, 2003 and 2002 in the amount of \$59,000 and \$219,000 and \$3,376,000 and \$2,956,000, respectively.

Assumptions used in determining the accounting for the supplemental employees retirement plan and other post-retirement benefit plans as of December 31, 2003 and 2002 were as follows:

	2003		2002	
Weighted-average discount rate	6.25	%	6.75	%
Rate of increase in compensation level	3.75	%	3.75	%
Expected long-term rate of return on assets	8.75	%	9.00	%

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The annual assumed rate of increase in the per capita cost of covered benefits (i.e. health care cost trend rate) for the medical plan is 10%, graded to 5% thereafter. The health care cost trend rate assumption has a significant effect on the amounts reported. For example, increasing the assumed health care cost trend rates by one percentage point in each year would increase the accumulated postretirement benefit obligation for the medical plan as of December 31, 2003 by \$88,000. Decreasing the assumed health care cost trend rates by one percentage point in each year would decrease the accumulated postretirement benefit obligation for the medical plan as of December 31, 2003 by \$85,000.

401(k) Plan

The ING Savings Plan is a defined contribution plan, which is available to substantially all employees. Participants may make contributions to the plan through salary reductions up to a maximum of \$12,000 for 2003 and \$11,000 for 2002. Such contributions are not currently taxable to the participants. The Company matches up to 6% of pre-tax eligible pay at 100%. Company matching contributions were \$1,893,000 and \$1,807,000 for 2003 and 2002, respectively.

8. Separate Accounts

Separate account assets and liabilities represent funds segregated by the Company for the benefit of certain policy and contract holders who bear the investment risk. Revenues and expenses on the separate account assets and related liabilities equal the benefits paid to the separate account policy and contract holders.

Premiums, deposits, and other considerations received for the years ended December 31, 2003 and 2002 were \$161,513,000 and \$213,479,000, respectively. In addition, \$0 and \$750,860,000 in deposit type contracts were received in 2003 and 2002, respectively.

Reconciling adjustments:		
Miscellaneous transfers	-	502
Transfers as reported in the Statement of Operations	<u>\$ 49,745</u>	<u>\$ 60,825</u>

9. Reinsurance

The Company is involved in both ceded and assumed reinsurance with other companies for the purpose of diversifying risk and limiting exposure on larger risks. To the extent that the assuming companies become unable to meet their obligations under these treaties, the Company remains contingently liable to its policyholders for the portion reinsured. To minimize its exposure to significant losses from retrocessionaire insolvencies, the Company evaluates the financial condition of the retrocessionaire and monitors concentrations of credit risk.

Assumed premiums amounted to \$1,008,909,000 and \$895,515,000 for the years ended December 31, 2003 and 2002, respectively.

The Company's ceded reinsurance arrangements reduced certain items in the accompanying financial statements by the following amounts:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Premiums	\$ 1,136,439	\$ 392,723
Benefits paid or provided	373,139	216,044
Policy and contract liabilities at year end	2,140,008	2,623,310

During 2003 and 2002, the Company had ceded blocks of insurance under reinsurance treaties to provide funds for financing and other purposes. These reinsurance transactions, generally known as "financial reinsurance," represent financing arrangements. Financial reinsurance has the effect of increasing current statutory surplus while reducing future statutory surplus as the reinsurers recapture amounts.

SECURITY LIFE OF DENVER INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

10. Federal Income Taxes

The Company and its subsidiaries file a consolidated federal income tax return with its parent, ING AIH, and other U.S. affiliates and subsidiaries. The method of tax allocation is governed by a written tax sharing agreement. The tax sharing agreement provides that each member of the consolidated return shall reimburse ING AIH for its respective share of the consolidated federal income tax liability and shall receive a benefit for its losses at the statutory rate.

The components of the net deferred tax asset (liability) are as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Total deferred tax assets	\$ 325,643	\$ 260,262
Total deferred tax liabilities	(27,691)	(14,556)
Net deferred tax assets	297,952	245,706
Deferred tax asset nonadmitted	(231,293)	(188,721)
Net admitted deferred tax asset	\$ 66,659	\$ 56,985
(Increase) decrease in nonadmitted asset	\$ (42,572)	\$ 15,311

Current income taxes incurred consisted of the following major components:

	Year ended December 31	
	2003	2002
	<i>(In Thousands)</i>	
Federal taxes on operations	\$ 103,127	\$ 88,773
Federal taxes on capital gains	14,400	11,366
Total current taxes incurred	\$ 117,527	\$ 100,139

SECURITY LIFE OF DENVER INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

The main components of deferred tax assets and deferred tax liabilities are as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Deferred tax assets resulting from book/tax differences in:		
Deferred acquisition costs	\$ 128,958	\$ 100,924
Insurance reserves	73,157	37,406
Investments	65,107	58,691

Due and deferred premium	13,343	11,964
Nonadmitted assets	7,659	9,284
Unrealized loss on investments	3,060	6,607
Litigation accruals	5,934	6,330
Depreciable assets	4,737	5,861
Other	1,257	5,150
Total deferred tax assets	325,643	260,262
Deferred tax assets nonadmitted	(231,293)	(188,721)
Admitted deferred tax assets	94,350	71,541
Deferred tax liabilities resulting from book/tax differences in:		
Investments	5,184	10,959
Due and deferred premiums	21,789	-
Other	717	3,597
Total deferred tax liabilities	27,690	14,556
Net admitted deferred tax asset	\$ 66,660	\$ 56,985

The change in net deferred income taxes is comprised of the following:

	December 31		
	2003	2002	Change
	<i>(In Thousands)</i>		
Total deferred tax assets	\$ 325,643	\$ 260,262	\$ 65,381
Total deferred tax liabilities	27,691	14,556	13,135
Net deferred tax asset	<u>\$ 297,952</u>	<u>\$ 245,706</u>	52,246
Remove current year change in unrealized gains			4,848
Change in net deferred income tax			57,094
Remove other items in surplus:			
Current year change in non-admitted assets			1,670
Other			(1,346)
Change in deferred taxes for rate reconciliation			<u>\$ 57,418</u>

SECURITY LIFE OF DENVER INSURANCE COMPANY
Notes to Financial Statements – Statutory Basis

The provision for federal income taxes expense and change in deferred taxes differs from the amount from that which would be obtained by applying the statutory federal income tax rate to income (including capital items) before income taxes for the following reasons:

	Year Ended December 31, 2003
	<i>(In Thousands)</i>
Ordinary income	\$ 5,943
Capital losses	(30,493)
Total pre-tax book loss	<u>\$ (24,550)</u>
Provision computed at statutory rate	\$ (8,592)
Refinement of deferred tax balances	15,221
Interest maintenance reserve	5,840
Dividend received deduction	(1,299)
Amortization of reinsurance gain	48,834
Other	105
Total	<u>\$ 60,109</u>
Federal income taxes incurred	\$ 117,526
Change in net deferred income taxes	(57,418)
Total statutory income taxes	<u>\$ 60,108</u>

The amount of federal income taxes incurred that will be available for recoupment in the event of future net losses is \$99,153,372 and \$113,183,297 from 2003 and 2002, respectively.

Under the inter-company tax sharing agreement, the Company has a receivable from ING AIH of \$21,850,000 and \$9,951,000 for federal income taxes as of December 31, 2003 and 2002, respectively.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Prior to 1984, the Company was allowed certain special deductions for federal income tax reporting purposes that were required to be accumulated in a "policyholders' surplus account" ("PSA"). In the event those amounts are distributed to shareholders, or the balance of the account exceeds certain limitations prescribed by the Internal Revenue Code, the excess amounts would be subject to income tax at current rates. Income taxes also would be payable at current rates if the Company ceases to qualify as a life insurance company for tax reporting purposes, or if the income tax deferral status of the PSA is modified by future tax legislation. Management does not intend to take any actions nor does management expect any events to occur that would cause income taxes to become payable on the PSA balance. Accordingly, the Company has not accrued income taxes on the PSA balance of \$60,490,000 at December 31, 2003. However, if such taxes were assessed, the amount of the taxes payable would be \$21,171,000. No deferred tax liabilities are recognized related to the PSA.

11. Investment in and Advances to Subsidiaries

The Company has one wholly owned insurance subsidiary at December 31, 2003, Midwestern United Life Insurance Company ("Midwestern United"). The Company also has two wholly owned noninsurance subsidiaries, First Secured Mortgage Deposit Corporation and ING America Equities, Inc ("IAE").

IAE is a wholesale broker/dealer whose business activities consist only of the distribution of variable life and annuity contracts. IAE does not hold customer funds or securities.

Amounts invested in and advanced to the Company's subsidiaries are summarized as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Common stock (cost-\$40,746 in 2003 and \$40,756 in 2002)	\$ 76,187	\$ 73,186

Summarized financial information for these subsidiaries is as follows:

	December 31	
	2003	2002
	<i>(In Thousands)</i>	
Revenues	\$ 56,962	\$ 69,254
Income before net realized gains on investments	2,884	18,896
Net income	3,267	13,640
Admitted assets	258,403	255,957
Liabilities	182,216	182,771

Midwestern United paid no common stock dividend to the Company in 2003 and paid a dividend of \$1,159,000 in 2002.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

12. Capital and Surplus

Under Colorado insurance regulations, the Company is required to maintain a minimum total capital and surplus of \$1,500,000. Additionally, the amount of dividends which can be paid by the Company to its shareholder without prior approval of the Colorado Division of Insurance is limited to the greater of the net gain from operations or 10% of surplus at December 31 of the preceding year.

Life and health insurance companies are subject to certain Risk-Based Capital ("RBC") requirements as specified by the NAIC. Under those requirements, the amount of capital and surplus maintained by a life and health insurance company is to be determined based on the various risk factors related to it. At December 31, 2003, the Company meets the RBC requirements.

The Company has two surplus notes to a related party for \$65,032,000 and \$100,000,000, which represent the cumulative cash draws on two \$100,000,000 commitments issued by ING AIH through December 31, 2003, less principal payments. The surplus notes bear interest at a variable rate equal to the prevailing rate for 10-year U.S. Treasury bonds plus 1/4%, adjusted annually. The principal sum plus accrued interest shall be repaid in five annual installments beginning April 15, 2017 and continuing through April 15, 2021 ("Repayment Period"). The repayment amount shall be determined and adjusted annually on the last day of December, commencing December 31, 2016, and shall be an amount calculated to amortize any unpaid principal plus accrued interest over the years remaining in the Repayment Period. In the event that the Commissioner of Insurance of the State of Colorado does not grant approval for repayment, any unpaid annual installments shall be considered unpaid principal plus accrued interest for purposes of calculating subsequent annual installments. Repayment of principal and payment of interest shall be subordinated to the prior payment of, or provision for, all liabilities of the Company, but shall rank superior to the claim, interest and equity of the shares held by the shareholder of the Company. Such subordination shall be equally applicable in the case of any merger, consolidations, liquidation, rehabilitations, reorganization, dissolution, sale or other disposal of all, or substantially all, of a Company's assets, including the assumption, whether by reinsurance or otherwise, of the major portion of the Company's in force business pursuant to the reinsurance agreement or agreements approved by the Commissioner of Insurance of the State of Colorado.

The repayment of these notes are payable only out of surplus funds of the Company and only at such time as the surplus of the Company, after payment is made, does not fall below the prescribed level. There were no principal or interest payments in 2003 or 2002.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

13. Fair Values of Financial Instruments

In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the financial instrument. Accordingly, the aggregate fair value amounts presented herein do not represent the underlying value of the Company.

Life insurance liabilities that contain mortality risk and all nonfinancial instruments have been excluded from the disclosure requirements. However, the fair values of liabilities under all insurance contracts are taken into consideration in the Company's overall management of interest rate risk, such that the Company's exposure to changing interest rates is minimized through the matching of investment maturities with amounts due under insurance contracts.

The carrying amounts and fair values of the Company's financial instruments are summarized as follows:

	December 31			
	2003		2002	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
	<i>(In Thousands)</i>

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

The following methods and assumptions were used by the Company in estimating the fair value disclosures for financial instruments in the accompanying financial statements and notes thereto:

Cash and short-term investments: The carrying amounts reported in the accompanying balance sheets for these financial instruments approximate their fair values.

Fixed maturities and equity securities: The fair values for bonds, preferred stocks and common stocks reported herein are based on quoted market prices, where available. For securities not actively traded, fair values are estimated using values obtained from independent pricing services or, in the case of private placements, collateralized mortgage obligations and other mortgage derivative investments, are estimated by discounting the expected future cash flows. The discount rates used vary as a function of factors such as yield, credit quality, and maturity, which fall within a range between 2% and 12% over the total portfolio. Fair values determined on this basis can differ from values published by the SVO. Fair value as determined by the SVO as of December 31, 2003 and 2002 is \$12,210,917,000 and \$11,605,230,000, respectively.

Mortgage loans: Estimated fair values for commercial real estate loans were generated using a discounted cash flow approach. Loans in good standing are discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads applied on new loans with similar characteristics. The amortizing features of all loans are incorporated in the valuation. Where data on option features is available, option values are determined using a binomial valuation method, and are incorporated into the mortgage valuation. Restructured loans are valued in the same manner; however, these loans were discounted at a greater spread to reflect increased risk. All residential loans are valued at their outstanding principal balances, which approximate their fair values.

Derivative financial instruments: Fair values for on-balance-sheet derivative financial instruments (caps and floors) and off-balance-sheet derivative financial instruments (swaps) are based on broker/dealer valuations or on internal discounted cash flow pricing models, taking into account current cash flow assumptions and the counterparties' credit standing.

Investment in surplus notes: Estimated fair values in surplus notes were generated using a discounted cash flow approach. Cash flows were discounted using interest rates determined by U.S. Treasury yields on December 31 and spreads applied on surplus notes with similar characteristics.

Guaranteed investment contracts: The fair values of the Company's guaranteed investment contracts are estimated using discounted cash flow calculations, based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Off-balance-sheet instruments: The Company accepted additional deposits on existing synthetic guaranteed investment contracts in the amounts of \$283,806,000 and \$233,300,000 in 2003 and 2002, respectively, from trustees of 401(k) plans. Pursuant to the terms of these contracts, the trustees own and retain the assets related to these December 31, 2003 contracts. Such assets had a book value of \$1,086,097,000 and \$1,008,456,000 at December 31, 2003 and 2002, respectively. Under synthetic guaranteed investment contracts, the synthetic issuer may assume interest rate risk on individual plan participant initiated withdrawals from stable value options of 401(k) plans. Approximately 100% of the synthetic guaranteed investment contract book values are on a participating basis and have a credited interest rate reset mechanism, which passes such interest rate risk to plan participants.

Other investment-type insurance contracts: The fair values of the Company's deferred annuity contracts are estimated based on the cash surrender values. The carrying values of other policyholder liabilities, including immediate annuities, dividend accumulations, supplementary contracts without life contingencies, and premium deposits, approximate their fair values.

The carrying value of all other financial instruments approximates their fair value.

14. Commitments and Contingencies

The Company is a party to threatened or pending lawsuits arising from the normal conduct of business. Due to the climate in insurance and business litigation, suits against the Company sometimes include claims for substantial compensatory, consequential or punitive damages and other types of relief. Moreover, certain claims are asserted as class actions, purporting to represent a group of similarly situated individuals. While it is not possible to forecast the outcome of pending lawsuits, in light of existing insurance, reinsurance and established reserves, it is the opinion of management that the disposition of such lawsuits will not have a materially adverse effect on the Company's operations or financial position.

The Company guarantees certain contractual policy obligations of its subsidiary, Midwestern United. In the unlikely event that Midwestern United was unable to fulfill its obligations to policyholders, the Company would be obligated to assume the guaranteed policy obligations, but any ultimate contingent losses in connection with such guarantees will not have a material adverse impact on the Company's future operations or financial position.

The Company is a member of the Federal Home Loan Bank of Topeka ("FHLB"). As a member of the FHLB, the Company has issued non-putable funding agreements with the FHLB. Assets with a book value of \$1,711,488,000 collateralize these agreements. The reserves on these agreements were \$1,460,459,000 at December 31, 2003.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Guarantee Agreement

The Company, effective January 2002, entered into a Guarantee Agreement with two other ING Affiliates whereby it is jointly and severally liable for \$250,000,000 obligation of another ING affiliate, Security Life of Denver International Limited ("SLDI"). The Company's Board of Directors approved this transaction on April 25, 2002. The three affiliated life insurers were ReliaStar Life Insurance Company, Security-Connecticut (subsequently merged into ReliaStar Life Insurance Company, on October 1, 2003) and the Company. The joint and several guarantees of the two insurers are capped at \$250,000,000. The States of Colorado and Minnesota did not disapprove the guarantee.

Assets and liabilities, and the related revenues and expenses recorded as a result of transactions and agreements with affiliates may not be the same as those recorded if the Company was not a wholly-owned subsidiary of its parent.

Leases and Other Commitments

The Company leases office space under various non-cancelable operating lease agreements that expire July 2009. During the years ended December 31, 2003 and 2002, rent expense totaled \$1,817,000 and \$1,082,000, respectively. At December 31, 2003, the minimum aggregate rental commitments for the upcoming five years are: 2004 - \$583,000; 2005 - \$406,000; 2006 - \$206,000; 2007 - \$110,000; 2008 - \$9,000.

Certain rental commitments have renewal options extending through the year 2009 subject to adjustments in the future periods. The Company is not involved in any material sale-leaseback transactions.

At December 2003, the Company had committed to provide additional capital contributions of \$20,231,000 in partnerships reported in other invested assets on the balance sheets.

Other Matters

Like many financial services companies, certain U.S. affiliates of ING Groep N.V. ("ING"), the Company's ultimate parent, have received informal and formal requests for information since September 2003 from various governmental and self-regulatory agencies in connection with investigations related to mutual funds and variable insurance products. ING has cooperated fully with each request.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

In addition to responding to regulatory requests, ING management initiated an internal review of trading in ING insurance, retirement, and mutual fund products. The goal of this review has been to identify whether there have been any instances of inappropriate trading in those products by third parties or by ING investment professionals and other ING personnel. This internal review is being conducted by independent special counsel and auditors. Additionally, ING reviewed its controls and procedures in a continuing effort to deter improper frequent trading in ING products. ING's internal reviews related to mutual fund trading are continuing.

The internal review has identified several arrangements allowing third parties to engage in frequent trading of mutual funds within the Company's variable insurance and mutual fund products, and identified other circumstances where frequent trading occurred despite measures taken by ING intended to combat market timing. Most of the identified arrangements were initiated prior to ING's acquisition of the businesses in question. In each arrangement identified, ING has terminated the inappropriate trading, taken steps to discipline or terminate employees who were involved, and modified policies and procedures to deter inappropriate activity. While the review is not completed, management believes the activity identified does not represent a systemic problem in the businesses involved.

These instances included agreements (initiated in 1998) that permitted one variable life insurance customer of ReliaStar Life Insurance Company ("ReliaStar"), an affiliate of the Company, to engage in frequent trading, and to submit orders until 4pm Central Time, instead of 4pm Eastern Time. ReliaStar was acquired by ING in 2000. The late trading arrangement was immediately terminated when current senior management became aware of it in 2002. ING believes that no profits were realized by the customer from the late trading aspect of the arrangement.

In addition, the review has identified five arrangements that allowed frequent trading of funds within variable insurance products issued by ReliaStar and by ING USA Annuity & Life Insurance Company, an affiliate of the Company, and in certain ING Funds. ING entities did not receive special benefits in return for any of these arrangements, which have all been terminated. The internal review also identified two investment professionals who engaged in improper frequent trading in ING Funds.

ING will reimburse any ING Fund or its shareholders affected by inappropriate trading for any profits that accrued to any person who engaged in improper frequent trading for which ING is responsible. Management believes that the total amount of such reimbursements will not be material to ING or its U.S. business.

Notes to Financial Statements – Statutory Basis

15. Financing Agreements

The Company maintains a revolving loan agreement with SunTrust Bank, Atlanta (the "Bank"). Under this agreement, which expires July 30, 2004, the Company can borrow up to \$125,000,000 from the Bank. Interest on any borrowing accrues at an annual rate equal to: (1) the cost of funds for the Bank for the period applicable for the advance plus 0.225% or (2) a rate quoted by the Bank to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$7,000 and \$71,000 for the years ended December 31, 2003 and 2002, respectively. Additionally, there were no amounts payable to the Bank at December 31, 2003 or 2002.

The Company also maintains a revolving loan agreement with Bank of New York, New York ("BONY"). Under this agreement, the Company can borrow up to \$100,000,000 from BONY. Interest on any of the Company borrowing accrues at an annual rate equal to: (1) the cost of funds for BONY for the period applicable for the advance plus 0.35% or (2) a rate quoted by BONY to the Company for the borrowing. Under this agreement, the Company incurred interest expense of \$10,000 and \$25,000 for the years ended December 31, 2003 and 2002, respectively. Additionally, there were no amounts payable to BONY at December 31, 2003 or 2002.

The Company borrowed \$3,854,865,000 and repaid \$3,768,515,000 in 2003 and borrowed \$6,638,185,000 and repaid \$6,638,185,000 in 2002. These borrowings were on a short-term basis, at an interest rate that approximated current money market rates and excludes borrowings from reverse dollar repurchase transactions. Interest paid on borrowed money was \$530,000 and \$1,161,000, during 2003 and 2002, respectively.

16. Related Party Transactions

Affiliates

Management and service contracts and all cost sharing arrangements with other affiliated ING United States Life Insurance Companies are allocated among companies in accordance with normal, generally accepted expense and cost allocation methods.

Investment Management: The Company has entered into an asset management agreement and an administrative services agreement with ING Investment Management, LLC ("IIM") under which IIM provides the Company with investment management and asset/liability management services. Total fees under the agreement were approximately \$47,025,000 and \$37,147,000 for the years ended December 31, 2003 and 2002, respectively.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Inter-insurer Services Agreement: The Company has entered into a services agreement with certain of its affiliated insurance companies in the United States ("affiliated insurers") whereby the affiliated insurers provide certain administrative, management, professional, advisory, consulting and other services to each other. Net amount paid under these agreements was \$49,500,000 and \$55,054,000 for the years ended December 31, 2003 and 2002, respectively.

Reciprocal Loan Agreement: The Company has entered into a reciprocal loan agreement with ING AIH to facilitate the handling of unusual and/or unanticipated short-term cash requirements. Under this agreement, which expires July 1, 2011, the Company and ING AIH can borrow up to \$538,400,000 from one another. Interest on any of the Company's borrowing is charged at the rate of ING AIH cost of funds for the interest period plus 0.15%. Interest on any ING AIH borrowings is charged at a rate based on the prevailing interest rate of U.S. commercial paper available for purchase with a similar duration. Under this agreement, the Company incurred interest expense of \$512,000 and interest income of \$2,818,000 for the year ended December 31, 2003. At December 31, 2003, the Company had \$86,350,000 payable to ING AIH and \$106,700,000 receivable from ING AIH. The payable balance is included in borrowed money on the accompanying balance sheets, while the receivable is recorded in cash and short-term investments.

Tax Sharing Agreements: The Company has entered into federal tax sharing agreements with members of an affiliated group as defined in Section 1504 of the Internal Revenue Code of 1986, as amended. The agreement provides for the manner of calculation and the amounts/timing of the payments between the parties as well as other related matters in connection with the filing of consolidated federal income tax returns. The Company has also entered into a state tax sharing agreement with ING AIH and each of the specific subsidiaries that are parties to the agreement. The state tax agreement applies to situations in which ING AIH and all or some of the subsidiaries join in the filing of a state or local franchise, income tax or other tax return on a consolidated, combined or unitary basis.

Service Agreement with ING Financial Advisors, LLC: The Company has entered into a services agreement with ING Financial Advisors, LLC ("ING FA") to provide certain administrative, management, professional advisory, consulting and other services to the Company for the benefit of its customers. Charges for these services are to be determined in accordance with fair and reasonable standards with neither party realizing a profit nor incurring a loss as a result of the services provided to the Company.

Global Medium Term Note Program: In December 2002, the Company established a Global Medium Term Note program secured by funding agreements issued by the Company. The notes, which are offered by ING Security Life Institutional Funding, a special purpose statutory trust, are offered only to U.S. qualified institutional buyers pursuant to Rule 144A of the Securities Act or to foreign buyers pursuant to Regulation S of the Securities Act. During 2003, the program issued notes with an aggregate outstanding principal balance of \$1.9 billion as of December 31, 2003.

SECURITY LIFE OF DENVER INSURANCE COMPANY

Notes to Financial Statements – Statutory Basis

Assets and liabilities, along with related revenues and expenses recorded as a result of transactions and agreements with affiliates, may not be the same as those recorded if the Company was not a wholly-owned subsidiary of its parent.

17. Guaranty Fund Assessments

Insurance companies are assessed the costs of funding the insolvencies of other insurance companies by the various state guaranty associations, generally based on the amount of premium companies collect in that state.

The Company accrues the cost of future guaranty fund assessments based on estimates of insurance company insolvencies provided by the National Organization of Life and Health Insurance Guaranty Associations and the amount of premiums written in each state. The Company has estimated this liability to be \$1,986,000 and \$2,305,000 as of December 31, 2003 and 2002, respectively, and has recorded a liability. The Company has also recorded an asset of \$141,000 and \$3,035,000 as of December 31, 2003 and 2002, respectively, for future credits to premium taxes for assessments already paid.

**Note to Unaudited Pro Forma Statutory Basis Financial Statements as of
June 30, 2004 and June 30, 2003, and for the periods ended December 31, 2003 and 2002**

1. Pro Forma Consolidation

The unaudited pro forma condensed consolidated financial statements have been prepared as a statutory merger, in accordance with the provisions of SSAP No. 68 - Business Combinations and Goodwill in order to present the condensed financial position and results of operations of SLD and SLI, as if the entities had previously been combined. The unaudited pro forma condensed consolidated balance sheets, income statements, statements of changes in capital and surplus and statements of cash flows give effect to the consolidation transaction as if it had occurred on January 1, 2002.

Following is a description of the pro forma adjustments that were made to the financial statements.

- (1) All of the shares of capital stock of SLI will be canceled and retired, and will cease to exist, as of the merger with and into SLD.
