Mission and Investment Strategy

Mission

Matthew 25 Fund is an open-ended, non-diversified, investment company that seeks long-term capital appreciation through investments in common stocks and/or securities convertible into common stocks. Income, through dividends or interest, will be a secondary objective.

Investment Strategy

The Fund blends Growth and Value Investing in its securities selection process. **The Fund's** adviser places great emphasis on valuing a business, which then leads to calculating a value for the company's securities. This information is then utilized when buying or selling stocks, in order to increase the potential returns or to reduce the risk of price declines of **the Fund's** investments.

The four categories that the investment adviser evaluates, in order to value a company and its securities, are as follows:

- ☐ Business Economics (Industry and Business Practices)
- ☐ Management Abilities
- ☐ Financial Condition
- ☐ Stock Price

The Adviser believes that **the Fund** will make the most money by investing with the exceptional; accordingly, the adviser's search is for securities possessing the best combinations of a desirable business, with outstanding management and clean financials (low debt and sufficient working capital), and a market price that the adviser deems to be at or below its fair value.

The Fund is willing to invest in the securities of companies with small, medium or large capitalization. In other words, **the Fund** is open to a large universe of public companies so that it may find stocks with the exceptional traits that **the Fund** so desires. Whenever the adviser finds such an investment, the adviser may purchase this stock or its convertible securities with up to 25% of **the Fund's** total assets. **The Fund's** willingness to place a large percentage of its assets in a single

stock does distinguish it from most other funds.

Please see **the prospectus** for complete information, including investment objectives, risks, charges and expenses. Read it carefully before you invest or send money.

What makes the Matthew 25 Fund different from other funds?

1. We offer the returns of a big mutual fund, but with the personal customer service of a small business. We communicate regularly with our shareholders, and we are easily accessible.
2. Mark Mulholland, **the Fund's** Portfolio Manager, is the second largest shareholder of **the Fund**. Unlike some fund managers who simply invest "other people's money," Mark has his assets right along side everyone else. Correspondingly, Mark's investment decisions not only affect his job, but also affect his net worth.
3. **The Fund's** investment style is focused, and has the ability to concentrate its holdings in fewer securities when compared to most mutual funds. The **Matthew 25 Fund** typically holds between 12 and 22 securities and can own up to 25% of its assets in one security.
4. **The Fund** is not restricted by the size of the public companies it may own. It has invested in companies with a market capitalization of \$50 million, and companies with a market capitalization of over \$100 billion. In addition, **the Fund** has purchased foreign securities and may do so in the future.
