BAYCORP HOLDINGS, LTD.

NOTES TO FINANCIAL STATEMENTS

NOTE A – THE COMPANY

BayCorp Holdings, Ltd. ("BayCorp" or the "Company") is an unregulated holding company incorporated in Delaware in 1996. As of June 30, 2005, BayCorp had six wholly owned subsidiaries including Great Bay Power Marketing, Inc., Great Bay Hydro Corporation, Nacogdoches Power, LLC, Nacogdoches Gas, LLC, Great Bay Hydro Maine, LLC and BayCorp Ventures, LLC. BayCorp also held a majority interest in HoustonStreet Exchange, Inc. as of June 30, 2005.

Until January 1, 2003, BayCorp had two principal operating subsidiaries that generated and traded wholesale electricity, Great Bay Power Corporation ("Great Bay") and Little Bay Power Corporation ("Little Bay"). Their principal asset was a combined 15% joint ownership interest in the Seabrook Nuclear Power Project in Seabrook, New Hampshire (the "Seabrook Project" or "Seabrook") until November 1, 2002, when BayCorp sold Great Bay's and Little Bay's interest in Seabrook. In December 2002, BayCorp dissolved Great Bay and Little Bay.

Great Bay Power Marketing, Inc. ("Great Bay Power Marketing"), incorporated in Maine as a wholly owned subsidiary, was created to hold the purchased power agreement that Great Bay had with Unitil Power Corporation ("Unitil") and to arrange for the power supply to satisfy the agreement. Effective January 1, 2003, Great Bay Power Marketing assumed the Unitil contract and holds the letter of credit established to secure Great Bay Power Marketing's obligations under the Unitil contract. BayCorp formed BayCorp Ventures, LLC ("BayCorp Ventures"), a Delaware limited liability company, as a wholly owned subsidiary, to serve as a vehicle through which the Company can make investments.

In September 2003, BayCorp formed Great Bay Hydro Corporation ("Great Bay Hydro"), a New Hampshire corporation, as a wholly owned subsidiary. Great Bay Hydro entered into a purchase and sale agreement, dated as of October 30, 2003, with Citizens Communications Company ("Citizens") to acquire the generating facilities in Vermont owned by the Vermont Electric Division of Citizens. Great Bay Hydro completed the acquisition and assumed operating responsibility of the generating facilities on April 1, 2004. The generating facilities include an operating hydroelectric facility of approximately 4 megawatts located in Newport, Vermont, diesel engine generators totaling approximately 7 megawatts located in Newport, Vermont and non-operating hydroelectric facilities in Troy and West Charleston, Vermont.

In October 2004, the Company formed Nacogdoches Power, LLC ("Nacogdoches Power"), a New Hampshire limited liability company, as a wholly owned subsidiary. Nacogdoches Power acquired the development rights to the Sterne Power project in the town of Sacul in Nacogdoches County, Texas. The Sterne project was initially designed and has been permitted as a nominal 1000 MW gas-fired power plant. The project received its air quality permit in December 2002, which is effective through December 7, 2005. An additional eighteen-month extension to the permit may be requested by Nacogdoches Power. A wastewater discharge permit is currently effective through August 1, 2006. Nacogdoches Power has an option to purchase the land for the project and options to acquire easements for transmission lines and/or gas pipelines. Those options have varying expiration dates in 2005 and 2006 and are either being extended or exercised. Nacogdoches Power is seeking to enter into power off-take contracts, although none have been executed. A schedule for the development of the project has not been established. The total cost of the Sterne project will depend on the final plant design and will require substantial additional financing. The amount, type and availability of any such financing has not been determined.

BAYCORP HOLDINGS, LTD.

As part of its efforts to secure a natural gas supply for the Sterne Power project, the Company determined that significant natural gas and oil exploration and production activities were being carried out in Nacogdoches County, Texas near the location of the Sterne Power project. It was through this process that the Company identified the oil and gas development opportunity with Sonerra Resources Corporation ("Sonerra") an independent oil and gas exploration, development and operating company.

In November 2004, BayCorp formed Nacogdoches Gas, LLC ("Nacogdoches Gas"), a New Hampshire limited liability company, as a wholly owned subsidiary. In the fourth quarter of 2004, Nacogdoches Gas entered into agreements with Sonerra, under which Nacogdoches Gas acquired an approximate 10% working interest (of a 77% net revenue interest) in two natural gas and oil producing wells. Nacogdoches Gas entered into an agreement, dated January 7, 2005 with Sonerra, under which Nacogdoches Gas would fund the development of three natural gas and oil wells. This agreement was amended as of March 14, 2005, increasing the number of wells from three to four. In addition, Nacogdoches Gas has an option to participate in Sonerra's continued development of up to fifteen additional natural gas and oil wells over the next two years. Under the agreement with Sonerra, Nacogdoches Gas will receive a priority return until its aggregate investment is recovered.

Since entering the January 7, 2005 agreement with Sonerra, Nacogdoches Gas has funded the development of six wells. The net revenue interest in each of these six wells being funded by Nacogdoches Gas is 77% with the remaining 23% of the net revenues paid to the lessor and other royalty interests. Nacogdoches Gas funded 100% of the cost of developing the first four wells and has a 90% working interest in these wells. This means that Nacogdoches Gas bears 90% of the operating costs of the wells and receives 69.3% of the net revenues from the wells. Nacogdoches Gas funded 85% of the cost of developing the next two wells and has a 76.5% working interest in those wells. This means that Nacogdoches Gas bears 76.5% of the operating costs of these two wells and receives 58.9% of the net revenues from the wells.

The first of the six wells, Round Mountain, a James Lime horizontal natural gas well, began production in January 2005 and through the end of June 2005 has produced 211 million cubic feet of natural gas. The second well, Wicked Wolf, a James Lime horizontal natural gas well, began production in early March 2005 and through the end of June 2005 has produced approximately 180 million cubic feet of natural gas. The fourth well, Whirlwind, a James Lime horizontal natural gas well, began production in May 2005 and has produced approximately 79 million cubic feet of natural gas. The fifth and sixth wells, Looking Glass and Thunder Chief, both James Lime horizontal natural gas wells, are being developed.

The third well developed under its joint development agreement with Sonerra, Painted Horse, was drilled as a vertical well. After initial promising flow rates, this well did not produce commercial amounts of natural gas. There is currently no production from this well, and Sonerra and Nacogdoches Gas are evaluating their options for this well. These options include completion in another interval, which would require additional funding, or abandonment of the well. The estimated cost of this well is approximately \$2.1 million. Due to the impairment of this well, the Company has written off the cost of this well and recorded exploration expense of approximately \$2.1 million. This amount is reflected in the accompanying financial statements. The cost of this well will be included in the total costs that are to be recovered from producing wells before BayCorp's net working interest is reduced from 90% to 50% in accordance with the joint development agreement with Sonerra.

In April 2005, Nacogdoches Gas funded the acquisition of certain natural gas production assets in Nacogdoches County, Texas formerly owned by SunStone Corporation ("SunStone") for approximately \$3.4 million. Nacogdoches Gas acquired these assets in accordance with the terms of the January 7, 2005

BAYCORP HOLDINGS, LTD.

agreement with Sonerra and the Acquisition Agreement dated as of March 22, 2005 among Sonerra, Pinnacle Energy Group, L.C. and Nacogdoches Gas. Under its agreement with Sonerra, Nacogdoches Gas will have a 90% interest and Sonerra will have a 10% interest in these assets until 110% of the \$3.4 million purchase price of the SunStone assets and all of the funding provided by Nacogdoches Gas for wells drilled under the January 7, 2005 agreement is recovered. Once Nacogdoches Gas recovers its investment and other operating costs, its interest in all assets will become 50% and Sonerra will own the other 50%. The Company accounted for this acquisition using purchase accounting.

In March 2005, BayCorp formed Great Bay Hydro Maine, LLC ("GBH Maine"), a Maine limited liability company, as a wholly owned subsidiary, and formed Great Bay Hydro Benton, LLC ("GBH Benton"), also a Maine limited liability company, as a wholly owned subsidiary of GBH Maine. On March 16, 2005, GBH Maine and GBH Benton acquired Benton Falls Associates, L.P. ("Benton Falls"), a limited partnership that owns a 4.3 megawatt hydroelectric generation plant in Benton, Maine from The Arcadia Companies for approximately \$2.2 million. The purchase of Benton Falls was accounted for under the purchase method of accounting and the purchase price was allocated to fixed assets. The Company assumed operating responsibility for Benton Falls, the output of which is sold to Central Maine Power Corporation ("CMP") under a power purchase agreement ("CMP PPA") that expires in December 2007. The rates under the CMP PPA are indexed to CMP's standard rates for energy and capacity purchases established annually by the Maine Public Utilities Commission. The estimated average rate for July 2005 through December 2005 (based on projected monthly generation) is approximately \$52.77 per megawatt hour ("MWh"). The results of operations of Benton Falls are included in the Company's financial statements as of the date of acquisition.

BayCorp also owns shares representing approximately 59.8% of the outstanding common shares of HoustonStreet Exchange, Inc. ("HoustonStreet"), which was incorporated in Delaware in 1999. HoustonStreet developed and operates HoustonStreet.com, an Internet-based independent crude oil and refined products trading exchange in the United States. A recapitalization of HoustonStreet was completed in the second quarter of 2004, and as a result, BayCorp's ownership interest in HoustonStreet increased above 50% and BayCorp began consolidating its financial statements with HoustonStreet as of May 1, 2004. Prior to May 1, 2004, BayCorp held a minority interest in HoustonStreet and accounted for HoustonStreet under the equity method.

Sale of Seabrook Ownership

In April 2002, FPL Energy Seabrook, LLC ("FPL Energy Seabrook"), a subsidiary of FPL Group, Inc., agreed to purchase 88.2% of the 1,161 MW Unit 1 and 88.2% of the partially constructed Unit 2 of Seabrook, for \$836.6 million, which included Great Bay's and Little Bay's approximate aggregate 15% ownership share, subject to certain adjustments, with payment deliverable fully in cash at closing. FPL Energy Seabrook assumed nearly all of the Company's Seabrook liabilities including the decommissioning liability for the acquired portion of Seabrook. On November 1, 2002, the Company closed the sale of its interests in Seabrook and received approximately \$113 million in cash for its interests in the Seabrook Project.

NOTE B - DEBT FINANCING

On March 15, 2005, the Company and all of its wholly owned subsidiaries entered into a \$10,250,000 Convertible Note (the "First Note") and a Pledge Agreement with Sloan Group Ltd., a Bahamas corporation (the "Sloan Group"). The debt, which accrues interest at 8% per annum and is due and payable in full on

BAYCORP HOLDINGS, LTD.

December 15, 2005, is convertible by the Sloan Group at any time between November 15, 2005 and December 15, 2005 (or any time after the occurrence and during the continuance of a material event of default under the First Note) into shares of BayCorp's common stock, \$.01 par value at a price of \$14.04 per share. The First Note does not allow BayCorp to prepay the debt and provides for a 2% premium on the interest rate in the event of a default. Payment of the First Note may be accelerated in the event of a material event of default.

On May 24, 2005, the Company and all of its wholly owned subsidiaries, entered into a \$10,000,000 multiple-draw convertible debt facility (the "Second Note") and an Amended and Restated Pledge Agreement (the "Amended Pledge Agreement") with the Sloan Group. Any draws under the Second Note, which will accrue interest at 8% and be due on December 15, 2005, are convertible at any time between November 15, 2005 and December 15, 2005 into shares of the Company's common stock at a price of \$14.04 per share.

In addition to BayCorp, the borrowers under the First and Second Notes include the following subsidiaries of BayCorp: GBH Maine, Great Bay Power Marketing, Great Bay Hydro, BayCorp Ventures, Nacogdoches Power and Nacogdoches Gas. Under the Amended Pledge Agreement, BayCorp pledged its equity interests in GBH Maine and Nacogdoches Gas, GBH Maine pledged its equity interests in GBH Benton and Benton Falls, and GBH Benton pledged its equity interests in Benton Falls. Nacogdoches Gas, GBH Maine and GBH Benton pledged any equity interest that they may obtain in other entities while the debt is outstanding, and Nacogdoches Gas and Nacogdoches Power pledged certain of their contract rights.

NOTE C – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited financial statements included herein have been prepared on behalf of the Company pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") and include, in the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of interim period results. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted or condensed pursuant to such rules and regulations. The Company believes, however, its disclosures herein, when read in conjunction with the Company's audited financial statements for the year ended December 31, 2004 as filed in Form 10-K on March 31, 2005, are adequate to make the information presented not misleading. The Company's significant accounting policies are described in Note 1 of Notes to Consolidated Financial Statements included in the Company's 10-K. The results for the interim periods are not necessarily indicative of the results to be expected for the full fiscal year.

Principles of Consolidation

BayCorp's Consolidated Financial Statements include the accounts of the Company and all its subsidiaries. In November 2004, BayCorp formed Nacogdoches Gas, which has acquired working interests in natural gas and oil producing wells. The Company records in its financial statements its proportional share of well revenues and expenses. The Company consolidates all majority-owned and controlled subsidiaries and applies the equity method of accounting for investments between 20% and 50%. All significant intercompany transactions have been eliminated. All sales of subsidiary stock are accounted for as capital transactions in the consolidated financial statements.

In January 2003, the Financial Accounting Standards Board ("FASB") issued Interpretation No. ("FIN") 46, Consolidation of Variable Interest Entities - An Interpretation of ARB No. 51, as amended by FIN 46R.

BAYCORP HOLDINGS, LTD.

The interpretation requires that a company consolidate the financial statements of an entity that cannot finance its activities without outside financial support, and for which that company provides the majority of support. The Company deemed that its investment, HoustonStreet, was not a variable interest entity. Therefore, prior to May 1, 2004 and when BayCorp held a minority interest in HoustonStreet, the Company accounted for HoustonStreet under the equity method. A recapitalization of HoustonStreet was completed effective May 1, 2004, and as a result, BayCorp's ownership interest in HoustonStreet increased above 50%. As a result of this recapitalization, BayCorp began consolidating HoustonStreet as of May 1, 2004.

Energy Marketing

Forward contracts, including the purchased power contract with Unitil dated as of April 1, 1993 (the "Unitil PPA" or "PPA"), meeting the definition of a derivative and not designated and qualifying for the normal purchases and normal sales exception or as a hedge under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133) are recorded at fair value with changes in fair value recorded in earnings. In accordance with FASB's Emerging Issues Task Force Issue No. 02-03, *Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities* (EITF Issue No. 02-03), revenues related to derivative instruments classified as trading are reported net of related cost of sales.

Stock Based Compensation

The Company accounts for its stock option plans in accordance with SFAS No. 123, "Accounting for Stock Based Compensation." Awards under the Company's plans vest over periods ranging from one to three years. The Company recorded compensation expense of \$57,000 in the six months ended March 31, 2005 and 2004 based on the fair value of options granted determined using the Black-Scholes option pricing model. The Company did not grant options during the six months ended June 30, 2005 or during the six months ended June 30, 2004.

Depletion of Oil and Gas Properties

The Company follows the successful efforts method of accounting for its natural gas and oil activities. Under the successful efforts method, lease acquisition costs and all development costs are capitalized. Unproved properties are reviewed quarterly to determine if there has been an impairment of the carrying value, and any such impairment is charged to expense in that period. Exploratory drilling costs are capitalized until the results are determined. If proved reserves are not discovered, the exploratory drilling costs are expensed. Other exploratory costs, such as seismic costs and geological and geophysical expenses, are expensed as incurred. The provision for depletion is based upon the units of production method.

Asset Retirement Obligation

The Company has adopted the provisions of Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations" ("SFAS 143"). SFAS 143 requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred if a reasonable estimate of fair value can be made, and the corresponding cost is capitalized as part of the carrying amount of the related long-lived asset. The liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. If the liability is settled for an amount other than the recorded amount, a gain or loss is recognized. The Company has asset retirement obligations associated with the future plugging and abandonment of proved properties and related facilities. The estimated liability

BAYCORP HOLDINGS, LTD.

is based upon historical experience in plugging and abandoning wells, estimated remaining lives of those wells, estimates as to the cost to plug and abandon the wells in the future, and federal and state regulatory requirements. The liability is discounted using an assumed credit-adjusted risk-free interest rate. Revisions to the liability could occur due to changes in estimates of plugging and abandonment costs, changes in the risk-free interest rate or remaining lives of the wells, or if federal or state regulators enact new plugging and abandonment requirements.

NOTE D – COMMITMENTS AND CONTINGENCIES

Purchased Power Agreements

Great Bay was party to a purchased power contract, the Unitil PPA, that provided for Great Bay to sell to Unitil 0.8696% of the energy and capacity of Seabrook, or approximately 10 MWs. The Unitil PPA commenced on May 1, 1993 and continues through October 31, 2010. On November first of each year the purchase price is subject to increase at the rate of inflation less four percent.

In anticipation of the Seabrook sale, the Unitil PPA was amended as of November 1, 2002. The amendment primarily modified the existing Unitil PPA to reduce the amount of power delivered to 9.06 MWs and the price that Unitil pays for power to \$50.34 per MW hour, subject to an annual increase at the rate of inflation less four percent, and provided that Great Bay would supply the power regardless of whether Seabrook is providing the power.

The amendment also provided alternative security for Unitil's benefit, to replace and discharge the mortgage on Seabrook that secured Great Bay's performance of the Unitil PPA. In connection with the amended Unitil PPA, the Company was required to deposit \$2.5 million into a restricted account for the benefit of Unitil should Great Bay default. The amount is reflected as restricted cash in the accompanying balance sheet. The amendment received Federal Energy Regulatory Commission ("FERC") approval. Great Bay assigned the Unitil PPA to Great Bay Power Marketing as of January 1, 2003.

Unitil has an option, expiring November 1, 2005, to extend the Unitil PPA for up to 12 years, until 2022. If Unitil exercises its option to extend the PPA, the purchase price for power for the first year of the extended term, beginning November 1, 2010, will be \$65.00 per MW hour (in 1992 dollars) multiplied by a factor that equals the cumulative inflation from October 1992 through October 2010. For the remaining term of the extension, the purchase price will be increased annually by the rate of inflation over the previous year.

Forward contracts (including the Unitil PPA) meeting the definition of a derivative and not designated and qualifying for the normal purchases and normal sales exception under Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133) are recorded at fair value. In accordance with the FASB's Emerging Issues Task Force ("EITF") issue no. 02-03 the inception gain (initial value of \$2.1 million) on the Unitil PPA has been deferred and will be recognized over the life of the contract. The fair value of the contract was a negative \$6.9 million as of June 30, 2005 and was negative \$3.4 million as of December 31, 2004. The deferred gain on the contract was \$1.4 million as of June 30, 2005 and \$1.5 million as of December 31, 2004. These amounts are reflected in the Company's balance sheet.

On March 17, 2003, Unitil announced the approval of a contract with Mirant Americas Energy Marketing, LP ("Mirant"), which provided for the sale of Unitil's existing power supply entitlements,

BAYCORP HOLDINGS, LTD.

including the PPA with Great Bay Power Marketing, effective on May 1, 2003. Great Bay Power Marketing's PPA with Unitil has not been assigned to Mirant. Rather, Unitil has appointed Mirant as their agent for purposes of administering the PPA with Great Bay Power Marketing and Mirant is purchasing Unitil's entitlement under the PPA.

NOTE E – OIL AND GAS ACTIVITIES

The following summarizes selected information with respect to oil and gas producing activities.

| | <u>Six Months ended June 30, 2005</u> (in thousands) |
|---------------------------------|--|
| Oil and Gas properties: | |
| Properties subject to depletion | \$ 12,192 |
| Unproved properties | 3,474 |
| Total | 15,666 |
| Accumulated depletion | <u>689</u> |
| Net | <u>\$14,977</u> |

The Company's proved oil and gas reserves are located in the United States. The following schedule is presented in accordance with SFAS No. 69 ("SFAS 69"), "Disclosures about Oil and Gas Producing Activities," to provide users with a common base for preparing estimates of future cash flows and comparing reserves among companies.

Reserves of crude oil, condensate, natural gas liquids and natural gas are estimated by engineering consultants and are adjusted to reflect contractual agreements and royalty rates in effect at the end of each year. Many assumptions and judgmental decisions are required to estimate reserves. Reported quantities are subject to future revisions, some of which may be substantial, as additional information becomes available from reservoir performance, new geological and geophysical data, additional drilling, technological advancements, price changes and other economic factors.

The SEC defines proved reserves as those volumes of crude oil, condensate, natural gas liquids and natural gas that geological and engineering data demonstrate with reasonable certainty are recoverable from known reservoirs under existing economic and operating conditions. Proved developed reserves are those proved reserves which can be expected to be recovered from existing wells with existing equipment and operating methods. Proved undeveloped reserves are volumes expected to be recovered as a result of additional investments for drilling new wells to offset productive units, recompleting existing wells, and/or installing facilities to collect and transport production.

Production quantities shown are net volumes withdrawn from reservoirs. These may differ from sales quantities due to inventory changes, and especially in the case of natural gas, volumes consumed for fuel and/or shrinkage from extraction of natural gas liquids.

BAYCORP HOLDINGS, LTD.

Quantities of Proved Natural Gas Reserves (Mmcf):

| | |
|---------------------------------------|--------------|
| Balance December 31, 2004 | 149 |
| Revisions | 0 |
| Extensions, discoveries and additions | 0 |
| Purchases | 7,068 |

| Production | <u>(369)</u> |
| Balance, June 30, 2005 | 6,848 |

NOTE F - INVESTMENT IN HOUSTONSTREET

A recapitalization at HoustonStreet was completed in the second quarter of 2004 and as a result, BayCorp owns shares representing approximately 59.8% of the outstanding common shares of HoustonStreet. In accordance with EITF Topic D-84, the Company followed step acquisition accounting to consolidate HoustonStreet. The fair value of current assets exceeded BayCorp's net investment in HoustonStreet by \$278,000 resulting in negative goodwill upon application of step acquisition accounting. As a result, the Company recognized an extraordinary gain of \$278,000 in the second quarter of 2004 in accordance with SFAS No. 141 "Business Combinations."

Prior to the recapitalization, BayCorp held a minority ownership interest in HoustonStreet and accounted for HoustonStreet under the equity method. Summarized financial information for HoustonStreet, prior to consolidation, is as follows:

| <u>HoustonStreet:</u> | <u>March 31, 2004</u> (in thousands) |
|--------------------------------|---|
| Total Assets | \$ 564 |
| Total Liabilities | 13,835 |
| Net Sales | 168 |
| Net Income (Loss) | (342) |
| Company's equity in Net Income | (170) |

NOTE G - EQUITY

On January 31, 2003, BayCorp commenced an issuer tender offer to purchase up to 8,500,000 shares of its common stock at a price of \$14.85 per share (the "Tender Offer" or "Offer"). At the extended Tender Offer expiration date of March 18, 2003, 9,207,508 shares had been properly tendered and not withdrawn (including options surrendered for repurchase and cancellation.) The Company exercised its discretion to purchase up to an additional 2% of outstanding shares, purchasing a total of 8,673,887 shares (and surrendered options) at a purchase price of \$14.85, representing approximately 94.3% of the shares (and options) tendered, excluding odd lots, which were purchased without proration. Payment for all such shares and options was completed by March 24, 2003. The Company distributed approximately \$123,622,000 to tendering stockholders and option holders.

As of June 30, 2005 there were 571,364 shares outstanding and options to purchase 199,119 shares.

BayCorp has never paid cash dividends on its common stock.

BAYCORP HOLDINGS, LTD.

NOTE H – SEGMENT INFORMATION

The Company has adopted SFAS No. 131, "Disclosures about Segments of an Enterprise and Related Information." SFAS No. 131 establishes standards for the reporting of information about operating segments in annual and interim financial statements. Operating segments are defined as components of an enterprise for which separate financial information is available that is evaluated regularly by the chief operating decision maker(s) in deciding how to allocate resources and in assessing performance. SFAS No. 131 also requires disclosures about products and services, geographic areas and major customers.

BayCorp is a holding company for Great Bay Power Marketing, Great Bay Hydro, BayCorp Ventures, Nacogdoches Power, Nacogdoches Gas, GBH Maine and HoustonStreet. The Company operates primarily in three segments, each of which is managed separately because each segment sells distinct products and services. Great Bay Power Marketing, Great Bay Hydro and GBH Maine constitute the electricity generation and trading business segment, whose principal assets are the Unitil PPA and hydroelectric facilities of approximately 4 megawatts located in Newport, Vermont, diesel engine generators totaling approximately 7 megawatts located in Newport, Vermont and non-operating hydroelectric facilities in Troy and West Charleston, Vermont and a 4.3 megawatt hydroelectric generation plant in Benton, Maine. Nacogdoches Gas constitutes the oil and gas production and sales segment, whose principal assets are its interests in oil and gas wells in East Texas. HoustonStreet, representing the crude oil and refined products trading exchange segment, developed and operates HoustonStreet.com, an Internet-based independent crude oil and refined products trading exchange in the United States.

Management utilizes more than one measurement and multiple views of data to measure segment performance and to allocate resources to the segments. However, the dominant measurements are consistent with the company's consolidated financial statements and, accordingly, are reported on the same basis herein. Management evaluates the performance of its segments and allocates resources to them primarily based on cash flows and overall economic returns.

BAYCORP HOLDINGS, LTD.

NOTE I – NEW ACCOUNTING PRONOUNCEMENTS

FASB Statement No. 123 (Revised 2004), *Share-Based Payment* (SFAS 123R) was issued in December 2004. SFAS 123R replaces SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), and supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*. SFAS 123R requires companies to recognize in the financial statements the compensation cost related to share-based payment transactions with employees. The compensation cost is measured based upon the fair value of the instrument issued. Share-based compensation transactions with employees covered within SFAS 123R include share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans.

SFAS 123R will be effective as of the first annual reporting period that begins after December 15, 2005. Since January 2003, the Company used the fair value based method recognition of compensation expense and is required to apply the modified prospective application transition method under SFAS 123R. The modified prospective application transition method requires the application of this standard to all new awards issued after the effective date, all modifications, repurchased or cancellations of existing awards after the effective date, and unvested awards at the effective date.

For unvested awards, the compensation cost related to the remaining service period that has not been rendered at the effective date will be determined by the compensation cost calculated currently under SFAS 123. The Company will be adopting the modified prospective application of SFAS 123R. Based on the current options outstanding, the Company anticipates the adoption of this statement to not result in the recognition of any incremental compensation cost to be recognized in the year of adoption.

In May 2005, the FASB issued FASB Statement No. 154, "Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3" (SFAS No. 154). Previously, APB No. 20, "Accounting Changes" and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements" required the inclusion of the cumulative effect of changes in accounting principle in net income of the period of the change. SFAS No. 154 requires companies to recognize a change in accounting principle, including a change required by a new accounting pronouncement when the pronouncement does not include specific transition provisions, retrospectively to prior periods' financial statements. The Company will assess the impact of a retrospective application of a change in accounting principle in accordance with SFAS No. 154 when such a change arises after the effective date of January 1, 2006.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

BayCorp derived its revenues primarily through energy sales activities by Great Bay Power Marketing, Great Bay Hydro, GBH Maine and Nacogdoches Gas in the first six months of 2005. In the first six months of 2004, the Company derived its revenues from six months of operation at Great Bay Power Marketing, three months of operation at Great Bay Hydro and two months of operation from HoustonStreet.

Great Bay Power Marketing currently holds one purchased power contract with Unitil. On April 1, 2004, Great Bay Hydro completed an acquisition of generating facilities including an operating hydroelectric facility of approximately 4 megawatts located in Newport, Vermont, diesel engine generators totaling approximately 7 megawatts located in Newport, Vermont and non-operating hydroelectric facilities in Troy

BAYCORP HOLDINGS, LTD.

and West Charleston, Vermont. Great Bay Hydro assumed operating responsibility of the generating facilities on April 1, 2004. Great Bay Hydro uses the output of the Newport plant as a physical hedge for meeting a portion of the Company's contractual obligations under the Unitil PPA.

On March 16, 2005, GBH Maine and GBH Benton acquired Benton Falls Associates, L.P., a limited partnership that owns Benton Falls, a 4.3 megawatt hydroelectric generation plant in Benton, Maine, from The Arcadia Companies for approximately \$2.2 million. The Company assumed operating responsibility for Benton Falls, the output of which is sold to CMP under a power purchase agreement that expires in December 2007. The rates under the CMP PPA are indexed to CMP's standard rates for energy and capacity purchases established annually by the Maine Public Utilities Commission.

In the fourth quarter of 2004, Nacogdoches Gas entered into agreements with Sonerra under which Nacogdoches Gas acquired an approximate 10% working interest in two natural gas and oil producing wells. Nacogdoches Gas entered into an agreement dated January 7, 2005 with Sonerra, under which Nacogdoches Gas would fund the development of three natural gas and oil wells. This agreement was amended as of March 14, 2005, increasing the number of wells from three to four. In addition, Nacogdoches Gas has an option to participate in Sonerra's continued development of up to fifteen additional natural gas and oil wells over the next two years. Under the agreement with Sonerra, Nacogdoches Gas will fund the total cost of the new wells (with the provision that up to 25% of the working interest may be funded and acquired by other parties) and will receive a priority return of 90% of the working interest funded until its aggregate investment is recovered. Once Nacogdoches Gas has recovered all of its investment in the wells from the net proceeds of all wells and any other revenues from the assets acquired under the development agreement, Sonerra and Nacogdoches Gas will own equal amounts of the working interests funded. The working interests include undivided leasehold interests in the gas units and the production and gathering equipment.

Since entering the January 7, 2005 agreement with Sonerra, Nacogdoches Gas has funded the development of six wells. The net revenue interest in each of these six wells being funded by Nacogdoches Gas is 77% with the remaining 23% of the net revenues paid to the lessor and other royalty interests. Nacogdoches Gas funded 100% of the cost of developing the first four wells and has a 90% working interest in these wells. This means that Nacogdoches Gas bears 90% of the operating costs of the wells and receives 69.3% of the net revenues from the wells. Nacogdoches Gas funded 85% of the cost of developing the next two wells and has a 76.5% working interest in those wells. This means that Nacogdoches Gas bears 76.5% of the operating costs of these two wells and receives 58.9% of the net revenues from the wells.

The first of the six wells, Round Mountain, a James Lime horizontal natural gas well, began production in January 2005 and through the end of June 2005 has produced 211 million cubic feet of natural gas. The second well, Wicked Wolf, a James Lime horizontal natural gas well, began production in early March 2005 and through the end of June 2005 has produced approximately 180 million cubic feet of natural gas. The fourth well, Whirlwind, a James Lime horizontal natural gas well, began production in May 2005 and has produced approximately 79 million cubic feet of natural gas. The fifth and sixth wells, Looking Glass and Thunder Chief, both James Lime horizontal natural gas wells, are being developed.

The third well developed under its joint development agreement with Sonerra, Painted Horse, was drilled as a vertical well. After initial promising flow rates, this well did not produce commercial amounts of natural gas. There is currently no production from this well, and Sonerra and Nacogdoches Gas are evaluating their options for this well. These options include completion in another interval, which will require additional funding, or abandonment of the well. The estimated cost of this well is approximately \$2.1 million. Due to the impairment of this well, the Company has written off the cost of this well and

BAYCORP HOLDINGS, LTD.

recorded exploration expense of approximately \$2.1 million. This amount is reflected in the accompanying financial statements. The cost of this well will be included in the total costs that are to be recovered from producing wells before BayCorp's net working interest is reduced from 90% to 50% in accordance with the joint development agreement with Sonerra.

Expenses for the first six months of 2005 and 2004 primarily consisted of the cost of purchased power, production related costs, general and administrative costs and unrealized losses for the mark to market of the Unitil PPA.

As of May 1, 2004, BayCorp began consolidating HoustonStreet for financial reporting purposes and HoustonStreet revenues and expenses are reflected in the Company's financials as of that date. See "Note F. Investment in HoustonStreet."

The following discussion focuses solely on operating revenues and operating expenses and is presented in a substantially consistent manner for all of the periods presented.

Results of Operations: Second Quarter of 2005 Compared to the Second Quarter of 2004

Operating Revenues

BayCorp's operating revenues increased by approximately \$2,031,000 to \$3,474,000 in the second quarter of 2005 as compared to \$1,443,000 in the second quarter of 2004. Total revenues for the second quarter of 2005 included approximately \$996,000 generated from Great Bay Power Marketing's long-term power sales contract with Unitil and approximately \$17,000 in net revenues from Great Bay Power Marketing's energy commodity trading activity. The gross retail sales volume of energy commodity trading activity was approximately \$583,000 and the related cost of sales was approximately \$566,000. In addition, in the second quarter of 2005, Great Bay Hydro generated revenues of approximately \$389,000 and GBH Maine generated revenues of approximately \$406,000 from the sale of electricity. Nacogdoches Gas generated revenues of approximately \$1,397,000 from the sale of natural gas and HoustonStreet generated revenues of approximately \$270,000. Operating revenues in the second quarter of 2004 included Great Bay Power Marketing revenues of approximately \$1,004,000, Great Bay Hydro revenues of approximately \$283,000 and HoustonStreet revenues of approximately \$150,000.

The Company realized an average selling price for electricity sold under the Unitil sales contract of 5.03 cents per kilowatt hour ("kWh") for the second quarters of both 2005 and 2004. The cost of power purchased to supply this contract was approximately 5.83 cents per kWh for the second quarter of 2005 and approximately 5.05 cents per kWh for the second quarter of 2004. For the second quarter of 2005, the Company realized an average selling price for electricity generated and sold by Great Bay Hydro of approximately 5.84 cents per kWh.

Expenses

Great Bay Power Marketing purchases power to satisfy its power supply obligation under the Unitil PPA. Purchased power expenses increased by approximately \$155,000, or 15.5%, to \$1,153,000 in the second quarter of 2005 as compared to \$998,000 in the second quarter of 2004.

The Company recorded a non-cash charge for an unrealized loss on the mark-to-market of its long term energy sales contract and recorded the amortization of the deferred inception gain on this contract for a total

BAYCORP HOLDINGS, LTD.

net unrealized loss of approximately \$1,399,000 in the second quarter of 2005 as compared to a net unrealized loss of approximately \$716,000 in the second quarter of 2004. The mark-to-market value of this long-term contract is based on current projections of power prices over the life of the contract. Forward power prices increased during the second quarter of 2004 and have continued to rise into the second quarter of 2005 primarily due to increases in the forward price of natural gas. In the New England Power Pool ("NEPOOL"), power generating plants are usually dispatched in the order of increasing variable costs. The plants that are called upon to supply the last amount of demand are considered to be on the margin and set the price of power for all plants selling into the market. Since the completion of a significant amount of new gas-fired generation in NEPOOL, plants that use natural gas as a fuel source are frequently on the margin and therefore set the price of power in NEPOOL. Accordingly, the price of power in NEPOOL is highly influenced by the price of natural gas.

Production and transmission expenses were approximately \$2,317,000 in the second quarter of 2005. Production expenses associated with Nacogdoches Gas operations were approximately \$2,300,000; included in production expenses was approximately \$2,115,000 for exploration expense related to Painted Horse, the third well developed under its joint development agreement with Sonerra. After initial promising flow rates, this well did not produce commercial amounts of natural gas. There is currently no production from this well, and Sonerra and Nacogdoches Gas are evaluating their options for this well. These options include completion in another interval, which would require additional funding, or abandonment of the well. Under successful efforts accounting, the Company has expensed impairment costs associated with this well.

Administrative and general expenses increased approximately \$219,000, or 37.4%, to \$805,000 in the second quarter of 2005 as compared to \$586,000 in the second quarter of 2004. This increase was primarily attributable to administrative and general expenses associated with the Company's operations at Nacogdoches Gas, Nacogdoches Power and at HoustonStreet. There were no administrative and general expenses associated with Nacogdoches Gas and Nacogdoches Power in the second quarter of 2004, and two months of HoustonStreet expenses were recorded in the second quarter of 2004.

Depreciation, depletion and amortization was approximately \$429,000 in the second quarter of 2005 and reflects approximately \$399,000 in depletion expense of Nacogdoches lease acquisition costs and development costs for the second quarter of 2005. Under the successful efforts method, lease acquisition costs and all development costs are capitalized. The provision for depletion is based upon the units of production method. In addition, the Company recorded approximately \$30,000 for depreciation of plant and equipment at the Company's hydro facilities in the second quarter of 2005. There were no depletion, depreciation or amortization expenses in the second quarter of 2004.

Taxes other than income increased approximately \$44,000, to \$61,000 in the second quarter of 2005 as compared to \$17,000 in the second quarter of 2004 primarily due to Great Bay Hydro and GBH Maine property taxes. There was no property tax expense in the second quarter of 2004.

The Company recorded other deductions of approximately \$94,000 in the second quarter of 2005 as compared to other income of approximately \$711,000 in the second quarter of 2004. Included in other deductions in the second quarter of 2005 was approximately \$225,000 in interest expense associated with the debt financing provided by the Sloan Group. See "Note B. Debt Financing." Offsetting this expense was other income of approximately \$126,000 from a Nuclear Electric Insurance Limited ("NEIL") insurance distribution received in the second quarter of 2005. Other income in the second quarter of 2004 primarily reflected receipt by the Company of approximately \$672,000 for closing adjustments and other costs specific to the Company's sale of its interests in Seabrook.

BAYCORP HOLDINGS, LTD.

In the second quarter of 2004, the Company recognized an extraordinary gain of \$278,000 upon the consolidation of HoustonStreet. As of May 1, 2004, BayCorp's ownership in HoustonStreet was 59.7%, and in accordance with EITF Topic D-84, the Company followed step acquisition accounting to consolidate HoustonStreet. The fair value of current assets exceeded BayCorp's net investment in HoustonStreet by \$278,000 resulting in negative goodwill upon application of step acquisition accounting.

Net Loss

As a result of the above factors, for the second quarter of 2005, the Company recorded a net loss of approximately \$2,809,000, or \$4.98 per share, as compared to net income of approximately \$95,000, or \$0.16 per share, for the second quarter of 2004.

Results of Operations: First Six Months of 2005 Compared to the First Six Months of 2004

Operating Revenues

BayCorp's operating revenues increased by approximately \$3,357,000 to \$5,834,000 in the first six months of 2005 as compared to \$2,477,000 in the first six months of 2004. Total revenues for the first six months of 2005 included approximately \$1,981,000 generated from Great Bay Power Marketing's long-term power sales contract with Unitil and approximately \$42,000 in net revenues from Great Bay Power Marketing's energy commodity trading activity. The gross retail sales volume of energy commodity trading activity was approximately \$1,096,000 and the related cost of sales was approximately \$1,054,000. In addition, in the first six months of 2005, Great Bay Hydro generated revenues of approximately \$533,000, and GBH Maine generated revenues of approximately \$438,000 from the sale of electricity. Nacogdoches Gas generated revenues of approximately \$2,327,000 from the sale of natural gas, and HoustonStreet generated revenues of approximately \$513,000. Consolidated operating revenues in the first six months of 2004 were approximately \$2,038,000 from Great Bay Power Marketing, \$283,000 from Great Bay Hydro and \$156,000 from HoustonStreet.

The Company realized an average selling price for electricity sold under the Unitil sales contract of 5.03 cents per kWh for the first six months of both 2005 and 2004. The cost of power purchased to supply this contract was approximately 5.97 cents per kWh for the first six months of 2005 and approximately 5.38 cents per kWh for the first six months of 2004. The Company realized an average selling price for electricity generated and sold by Great Bay Hydro of approximately 5.93 cents per kWh and 5.16 cents per kWh for the six months ended June 30, 2005 and 2004, respectively, and Great Bay Hydro's cost of generating power was approximately 3.14 cents per kWh and 1.95 cents per kWh for the six months ended June 30, 2005 and 2004, respectively. For the first six months of 2005, the Company realized an average selling price for electricity generated and sold by GBH Maine of approximately 5.74 cents per kWh and GBH Maine's cost of generating power was approximately 2.02 cents per kWh.

Expenses

Great Bay Power Marketing purchases power to satisfy its power supply obligation under the Unitil PPA. Purchased power expenses increased by approximately \$222,000, or 10.4%, to \$2,351,000 in the first six months of 2005 as compared to \$2,129,000 in the first six months of 2004.

BAYCORP HOLDINGS, LTD.

The Company recorded a non-cash charge for an unrealized loss on the mark-to-market of its long term energy sales contract and recorded the amortization of the deferred inception gain on this contract for a total net unrealized loss of approximately \$3,388,000 in the first six months of 2005 as compared to a net unrealized loss of approximately \$2,353,000 in the first six months of 2004. The mark-to-market value of this long-term contract is based on current projections of power prices over the life of the contract. Forward power prices increased during the first six months of 2004 and have continued to rise into the first six months of 2005 primarily due to increases in the forward price of natural gas.

Production and transmission expenses were approximately \$2,528,000 in the first six months of 2005 as compared to approximately \$22,000 in the first six months of 2004. Production expenses associated with Nacogdoches Gas operations were approximately \$2,428,000 in the first six months of 2005; included in production expenses was approximately \$2,115,000 for exploration expense related to the impairment of Painted Horse, the third well developed under its joint development agreement with Sonerra. Production expenses in the first six months of 2004 were specific to Great Bay Hydro operations.

Administrative and general expenses increased approximately \$532,000, or 53.2%, to \$1,532,000 in the first six months of 2005 as compared to \$1,000,000 in the first six months of 2004. This increase was primarily attributable to administrative and general expenses associated with the Company's operations at Nacogdoches Gas, Nacogdoches Power and at HoustonStreet. There were no administrative and general expenses associated with Nacogdoches Gas and Nacogdoches Power in the first six months of 2004 and two months of HoustonStreet expenses were recorded in the first six months of 2004.

Depreciation, depletion and amortization expense was approximately \$699,000 in the first six months of 2005 and reflected approximately \$669,000 in depletion of Nacogdoches Gas lease acquisition costs and development costs for the first six months of 2005. Under the successful efforts method of accounting, lease acquisition costs and all development costs are capitalized. The provision for depletion is based upon the units of production method. In addition, the Company recorded approximately \$30,000 for depreciation of plant and equipment at the Company's hydro facilities in the first six months of 2005. There was no depletion, depreciation or amortization expense in the first six months of 2004.

Taxes other than income increased approximately \$91,000, to \$121,000 in the first six months of 2005 as compared to \$30,000 in the first six months of 2004 primarily due to Great Bay Hydro and GBH Maine property taxes. There was no property tax expense in the first six months of 2004.

The Company recorded other deductions of approximately \$8,000 in the first six months of 2005 as compared to other income of approximately \$775,000 in the first six months of 2004. Included in other deductions in the first six months of 2005 was approximately \$261,000 in interest expense associated with the debt financing provided by the Sloan Group. See "Note B. Debt Financing." Offsetting this expense, was other income of approximately \$144,000 from a NEIL insurance distribution received in the first six months of 2005 and an accrual adjustment of approximately \$92,000. Other income in the first six months of 2004 primarily reflected receipt by the Company of one-time payments totaling approximately \$686,000 for closing adjustments and other costs specific to the Company's sale of its interests in Seabrook in November 2002.

Income tax income in the first six months of 2005 reflects receipt by the Company of \$225,000 from the State of New Hampshire for overpayment of prior year state income taxes.

BAYCORP HOLDINGS, LTD.

In the first six months of 2004, the Company recognized an extraordinary gain of \$278,000 upon the consolidation of HoustonStreet.

Net Loss

As a result of the above factors, for the first six months of 2005, the Company recorded a net loss of approximately \$4,613,000, or \$8.22 per share, as compared to a net loss of approximately \$2,002,000, or \$3.28 per share, for the first six months of 2004.

Liquidity and Capital Resources

As of June 30, 2005, BayCorp had approximately \$2,260,000 in cash and cash equivalents. The Company had approximately \$2,500,000 in restricted cash as required by the terms of the Unitil PPA and approximately \$436,000 in restricted cash as required by the terms of the CMP PPA. The total restricted cash is reflected as a long term asset in the Company's financial statement. The Company also had approximately \$522,000 in a cash deposit at ISO New England ("ISO NE"). The Company purchases a portion of its power needed for resale from ISO NE, and ISO NE requires financial assurance to protect NEPOOL against a payment default of one of its participants. The amount of collateral needed is calculated based upon formulas developed by ISO NE and NEPOOL. This deposit is reflected as an Other Long Term Asset in the Company's financial statements. The Company believes that such cash, together with the anticipated proceeds from the sale of electricity by Great Bay Power Marketing, Great Bay Hydro and GBH Maine, proceeds from the sale of natural gas and oil by Nacogdoches Gas, and advances taken on the Second Note facility with Sloan, will be sufficient to enable the Company and its wholly owned subsidiaries to meet their cash requirements for operations in 2005.

On March 15, 2005, the Company and all of its wholly owned subsidiaries entered into a \$10,250,000 Convertible Note and a Pledge Agreement with Sloan Group Ltd., a Bahamas corporation. On May 24, 2005, the Company and all of its wholly owned subsidiaries, entered into a \$10,000,000 multiple-draw convertible debt facility and an Amended and Restated Pledge Agreement with the Sloan Group. The total debt, including any draws under the Second Note, which will accrue interest at 8% and be due on December 15, 2005, is convertible at any time between November 15, 2005 and December 15, 2005 (or any time after the occurrence and during the continuance of a material event of default under the First or Second Note) into shares of the Company's common stock, \$.01 par value, at a price of \$14.04 per share. The Notes do not allow BayCorp to prepay the debt and provides for a 2% premium on the interest rate in the event of a default. Payment may be accelerated in the event of a material event of default, which is customary for this type of financing. See "Note B. Debt Financing." If payment on the First or Second Note is required on December 15, 2005, the Company would need to seek additional financing. There is no assurance that the Company or its subsidiaries would be able to obtain such financing or that the terms on which any additional financing is available would be acceptable.

The Company had a net loss in the first six months of 2005 of approximately \$4,613,000. There was a non-cash charge for an unrealized loss on the mark-to-market of the Unitil PPA of approximately \$3,520,000 and a non-cash recognition of deferred gain on the Unitil PPA of approximately \$132,000. The value of this contract is based on current projections of power prices over the life of the contract. Forward power prices increased during the first six months of 2005 primarily due to increases in the forward price of natural gas. Power generating plants that use natural gas as a fuel source are frequently on the margin and therefore are setting the forward price of power in NEPOOL. Accordingly, the price of power in NEPOOL is highly dependent on the price of natural gas. Other non-cash charges included compensation expense of

BAYCORP HOLDINGS, LTD.

approximately \$57,000 for the variable accounting of certain employee stock options, approximately \$45,000 for HoustonStreet minority interest and approximately \$699,000 for depreciation, depletion and amortization.

An increase in accounts receivable in the first six months of 2005 of approximately \$816,000 was primarily attributable to accounts receivable at Nacogdoches Gas. An increase of approximately \$452,000 in prepaids and other assets was primarily attributable to \$436,000 that has been escrowed as required by the terms of the CMP PPA with GBH Maine. An increase in accounts payable and accrued expenses of approximately \$269,000 was primarily attributable to an increase in accounts payable as of June 30, 2005.

Cash flows from investing activities included cash expenditures of approximately \$2,129,000 for fixed assets as part of the Benton Falls purchase. See "Note A. The Company." Investing activities in the first six months of 2005 also included investments by Nacogdoches Gas of approximately \$17,000,000 for interests in six oil and natural gas wells. See "Note A. The Company."

The Company had no long-term contractual obligations as of June 30, 2005.

Following the sale of Seabrook in the fourth quarter of 2002 and the completion of the Company's Tender Offer in the first quarter of 2003, the Company evaluated and pursued energy-related investment opportunities. The Company continues to focus on the acquisition of energy-related assets.

BayCorp has continued to seek to acquire either complete or partial ownership interests in electric generating facilities. This is an area where BayCorp has a solid understanding of the market and the value of and risks related to those assets. There are also a large number of generating assets that have been offered or are currently being offered for sale. These plants consist of both merchant and contracted facilities using a variety of fuels and located both domestically and internationally. There is, however, substantial competition for the acquisition of these assets, with a number of new participants entering the market, including private equity funds, hedge funds, insurance companies, Canadian income funds and investment banks. The Company remains focused on pursuing opportunities and assets that it believes will provide a return to stockholders commensurate with the risks.

Generally, BayCorp has targeted the following operating assets: (1) merchant plants in regions with developed wholesale power markets such as New England, New York, PJM and Texas, (2) international assets that have stable, long-term off-take contracts, and (3) merchant or contracted renewable assets. BayCorp is also pursuing other energy-related investments including development of new power generation facilities and hydrocarbon (natural gas and oil) reserves and the further development of HoustonStreet, its online trading platform.

BayCorp's first acquisition following its sale of Seabrook was the acquisition through Great Bay Hydro of the Vermont generating plants owned by the Vermont Electric Division of Citizens. The generating facilities include an operating hydroelectric facility of approximately 4 MWs located in Newport, Vermont, diesel engine generators totaling approximately 7 MWs located in Newport, Vermont and non-operating hydroelectric facilities in Troy and West Charleston, Vermont. Great Bay Hydro assumed operating responsibility for these facilities on April 1, 2004 and is using the output of the Newport plant as a physical hedge for a portion of BayCorp's contractual obligation to supply 9.06 megawatts to Unitil through 2010.

Great Bay Hydro paid a nominal purchase price to Citizens for the generating facilities and 650 acres of real property associated with the generating facilities, and this amount is reflected in the Company's

BAYCORP HOLDINGS, LTD.

financial statements. In addition, Citizens agreed to indemnify Great Bay Hydro for the reasonably anticipated costs of complying with the requirements of the new operating license issued by the FERC on November 21, 2003. On September 28, 2004, Great Bay Hydro agreed to terminate Citizens' indemnification requirements in exchange for Citizens' payment to Great Bay Hydro of approximately \$4.4 million. The Company's balance sheet as of June 30, 2005 reflects short-term and long-term liabilities of \$400,000 and \$2,479,000, respectively, for the estimated remaining cost of FERC compliance. The Company expects to complete the FERC license requirements within those amounts. For the six months ended June 30, 2005, the Company spent approximately \$328,000 for FERC compliance.

In November 2004, BayCorp formed Nacogdoches Gas. In the fourth quarter of 2004 Nacogdoches Gas entered into agreements with Sonerra, under which Nacogdoches Gas acquired an approximate 10% working interest (of a 77% net revenue interest) in two natural gas and oil producing wells. Nacogdoches Gas entered into an agreement, dated January 7, 2005 with Sonerra, under which Nacogdoches Gas would fund the development of three natural gas and oil wells. This agreement was amended as of March 14, 2005, increasing the number of wells from three to four. In addition, Nacogdoches Gas has an option to participate in Sonerra's continued development of up to fifteen additional natural gas and oil wells over the next two years. Under the agreement with Sonerra, Nacogdoches Gas will receive a priority return until its aggregate investment is recovered.

Since entering the January 7, 2005 agreement with Sonerra, Nacogdoches Gas has funded the development of six wells. The net revenue interest in each of these six wells being funded by Nacogdoches Gas is 77% with the remaining 23% of the net revenues paid to the lessor and other royalty interests. Nacogdoches Gas funded 100% of the cost of developing the first four wells and has a 90% working interest in these wells. This means that Nacogdoches Gas bears 90% of the operating costs of the wells and receives 69.3% of the net revenues from the wells. Nacogdoches Gas funded 85% of the cost of developing the next two wells and has a 76.5% working interest in those wells. This means that Nacogdoches Gas bears 76.5% of the operating costs of these two wells and receives 58.9% of the net revenues from the wells.

The total cost of an individual well typically ranges from \$2.0 million to \$3.5 million and includes the acquisition of leases for the land, the drilling and completion of the wells and the construction of extensions of the gas gathering system. The total cost depends on the type of well, the amount of land required for the production unit, the length of gas gathering pipeline and the completion technique. If Nacogdoches Gas exercises its option to participate in additional well prospects, it will need to raise additional capital to do so.

Other exploration and production companies are operating in Nacogdoches County and may seek to acquire land in or near the project area being developed by Sonerra and Nacogdoches Gas. Nacogdoches Gas has no employees.

Various federal, state and local laws relating to the discharge of materials into the environment, or otherwise relating to the protection of the environment, directly impact the development of oil and gas wells and their costs. These laws and regulations govern, among other things, emissions to the atmosphere, discharges of pollutants into the waters of the United States, underground injection of waste water, the generation, storage, transportation and disposal of waste materials and the protection of public health, natural resources and wildlife. The anticipated costs of development of oil and natural gas wells by Nacogdoches Gas and Sonerra includes funding for the measures necessary to meet environmental compliance requirements and no additional environmental compliance costs are anticipated.

BAYCORP HOLDINGS, LTD.

In April 2005, Nacogdoches Gas funded the acquisition of certain natural gas production assets in Nacogdoches County, Texas formerly owned by SunStone for approximately \$3.4 million. Nacogdoches Gas acquired these assets in accordance with the terms of the January 7, 2005 agreement with Sonerra and the Acquisition Agreement dated as of March 22, 2005 among Sonerra, Pinnacle Energy Group, L.C. and Nacogdoches Gas. Under its agreement with Sonerra, Nacogdoches Gas will have a 90% interest and Sonerra will have a 10% interest in these assets until 110% of the \$3.4 million purchase price of the SunStone assets and all of the funding provided by Nacogdoches Gas for wells drilled under the January 7, 2005 agreement is recovered. Once Nacogdoches Gas recovers its investment and other operating costs, its interest in all assets will become 50% and Sonerra will own the other 50%.

In March 2005, BayCorp formed GBH Maine and GBH Benton. On March 16, 2005, GBH Maine and GBH Benton acquired Benton Falls Associates, a limited partnership that owns a 4.3 megawatt hydroelectric generation plant in Benton, Maine from The Arcadia Companies for approximately \$2.2 million. The Company assumed operating responsibility for Benton Falls, the output of which is sold to CMP under a power purchase agreement that expires in December 2007. The rates under the CMP PPA are indexed to CMP's standard rates for energy and capacity purchases established annually by the Maine Public Utilities Commission.

The Company intends to pursue investments that will require additional equity or debt financing. The Company believes that such financing is available, but there can be no assurance that the Company would be successful in obtaining such financing. If the Company is not successful in obtaining additional financing, the Company may not be able to pursue certain investment alternatives. In such a case, the Company may be limited to opportunities that it can pursue given its current resources. The Company believes that such cash, together with the anticipated proceeds from the sale of electricity by Great Bay Power Marketing, Great Bay Hydro and GBH Maine, proceeds from the sale of natural gas and oil by Nacogdoches Gas, and advances taken on the Second Note facility with Sloan, will be sufficient to enable the Company and its wholly owned subsidiaries to meet their cash requirements for operations in 2005. If payment on the First or Second Note is required on December 15, 2005, the Company would need to seek additional financing. There is no assurance that the Company or its subsidiaries would be able to obtain such financing or that the terms on which any additional financing is available would be acceptable. If the Company is unsuccessful in identifying and making additional investments, the Company may pursue alternative strategies, including sale of the Company or its assets, or deregistration.

Critical Accounting Policies

Preparation of the Company's financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities and revenues and expenses. Note 1 to the Consolidated Financial Statements in the Company's Form 10-K, filed March 31 2005, is a summary of the significant accounting policies used in the preparation of the Company's financial statements. Please see "Note C – Summary of Significant Accounting Policies" above.

Forward Looking Statements and Certain Factors That May Affect Future Results

This Quarterly Report contains forward-looking statements. For this purpose, any statements contained in this report that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," "intends" and similar expressions are intended to identify forward-looking statements. There are a number of important factors

BAYCORP HOLDINGS, LTD.

that could cause the results of BayCorp and/or its subsidiaries to differ materially from those indicated by such forward-looking statements. These factors include, without limitation, those set forth below and elsewhere in this report.

Business Opportunities and Development. As described in "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources," the Company has evaluated and pursued energy-related investment opportunities, has focused on the acquisition of natural gas and oil, electric generating assets and other energy-related investments and is considering the further development of HoustonStreet. There can be no assurance that the Company will be able to identify business opportunities that it believes to be attractive, or that it will be successful in pursuing any such opportunities, in view of factors that include competition for the acquisition of assets, the fact that many energy-related activities are subject to government regulatory requirements, the Company's limited resources and the need to obtain debt or equity financing in order to pursue certain opportunities. Further, in particular, there can be no assurance that the Company's oil and gas exploration activities generally or any particular well drilling activity will be productive or will produce sufficient gas and gas sales revenues to be profitable or to return the Company's investment.

History of Losses. BayCorp reported operating losses in 2004 and in 2003 and reported operating income for 2002 and 2001. Prior to 2001, BayCorp had never reported an operating profit for any year since its incorporation.

Liquidity Need. As of June 30, 2005, BayCorp had approximately \$5.2 million in cash and cash equivalents, restricted cash and short-term investments. On March 15, 2005, BayCorp closed a \$10.25 million convertible debt financing with the Sloan Group. On May 24, 2005, the Company entered into a \$10,000,000 multiple-draw convertible debt facility with the Sloan Group and as of June 30, 2005, the Company had drawn approximately \$3.4 million against this debt facility. On July 12, 2005, the Company drew approximately \$3.2 million. The total debt, which accrues interest at 8% and is due on December 15, 2005, is convertible at any time between November 15, 2005 and December 15, 2005 into shares of the Company's common stock at a price of \$14.04 per share. BayCorp used proceeds from these financings to finance the acquisition of Benton Falls by GBH Maine and GBH Benton and to finance the development of natural gas and oil wells in East Texas under its Project Development Agreement with Sonerra and for other strategic and general corporate purposes.

The Company believes that such cash, together with the anticipated proceeds from the sale of electricity by Great Bay Power Marketing, Great Bay Hydro and Benton Falls, and from the sale of natural gas and oil by Nacogdoches Gas, and advances taken on the Second Note, will be sufficient to enable the Company and its wholly owned subsidiaries to meet their cash requirements for operations in 2005. If payment on the First or Second Note is required on December 15, 2005, the Company would need to seek additional financing. The direction of the Company's business and circumstances, foreseen or unforeseen, may cause cash requirements to be materially higher than anticipated and the Company or its wholly-owned subsidiaries may be required to raise additional capital, either through a debt financing or an equity financing, to meet ongoing cash requirements. There is no assurance that the Company or its subsidiaries would be able to raise such capital or that the terms on which any additional capital is available would be acceptable. Moreover, the Company's need to raise additional capital in order to pursue certain opportunities may affect the Company's competitive position with respect to such opportunities. If additional funds are raised by issuing equity securities, dilution to then existing stockholders will result.

BAYCORP HOLDINGS, LTD.

Purchased Power Price Risk. The price of electricity is subject to fluctuations resulting from changes in supply and demand. The Company is party to a purchased power contract with Unitil that provides for Great Bay Power Marketing to sell to Unitil 9.06 MWs at \$50.34 per MWh. The Unitil PPA continues through October 31, 2010, and Unitil has an option, expiring November 1, 2005, to extend the Unitil PPA for up to 12 years until 2022. The Company must purchase power to meet its obligation under the PPA. The prices at which Great Bay Power Marketing must purchase its power supply could increase significantly from current levels.

Extensive Government Regulation of Electric Energy Industry. The electric energy industry is subject to extensive regulation by federal and state agencies. Great Bay Power Marketing, Great Bay Hydro and GBH Maine are subject to the jurisdiction of the FERC and, as a result, are required to file with FERC all contracts for the sale of electricity. FERC's jurisdiction also includes, among other things, the sale, lease, merger, consolidation or other disposition of facilities, interconnection of certain facilities, accounts, service and property records. The Sterne Power project is subject to the terms of its environmental permits. The Sterne Power project currently has an air quality permit and a wastewater discharge permit issued by the Texas Commission on Environmental Quality. Extensions of those permits and additional environmental permits will be required prior to the start of operation of the project. In addition, prior to operation of the Sterne Power project, Nacogdoches Power may seek designation by FERC as an EWG.

Extensive Government Regulation of Oil and Gas Industry. There are numerous federal and state laws and regulations governing the oil and gas industry that are often changed in response to the current political or economic environment. Compliance with this regulatory burden is often difficult and costly and may carry substantial penalties for noncompliance. The following are some specific regulations that may affect oil and gas activities. The impact of these or future legislative or regulatory initiatives cannot be predicted.

Federal Energy Bill. After failing to pass legislation in 2003 and 2004, Congress is currently considering a new energy bill. The potential effect of this legislation is unknown, but it may include certain tax incentives for oil and gas producers and changes in the federal regulatory framework.

Federal Regulation of Natural Gas. The interstate transportation and certain sales for resale of natural gas, including transportation rates charged and various other matters, is subject to federal regulation by FERC. Federal wellhead price controls on all domestic gas were terminated on January 1, 1993, so gathering systems are currently not subject to FERC regulation. The impact of future government regulation on any natural gas facilities cannot be predicted. Although FERC's regulations should generally facilitate the transportation of gas produced from producing properties and the direct access to end-user markets, the future impact of these regulations on marketing production or on gas transportation business cannot be predicted. BayCorp and its subsidiaries, however, should not be affected differently than competing producers and marketers.

Federal Regulation of Oil. Sales of crude oil, condensate and natural gas liquids are not currently regulated and are made at market prices. The net price received from the sale of these products is affected by market transportation costs. Under rules adopted by FERC effective January 1995, interstate oil pipelines can change rates based on an inflation index, though other rate mechanisms may be used in specific circumstances.

State Regulation. Oil and gas operations are subject to various types of regulation at the state and local levels. Such regulation includes requirements for drilling permits, the method of developing new fields, the spacing and operations of wells, and waste prevention. The production rate may be regulated and the

BAYCORP HOLDINGS, LTD.

maximum daily production allowable from oil and gas wells may be established on a market demand or conservation basis. These regulations may limit production by well and the number of wells that can be drilled. To the extent that such gas is produced, transported and consumed wholly within one state, such operations may, in certain instances, be subject to the state's administrative authority charged with regulating pipelines. The rates that can be charged for gas, the transportation of gas, and the construction and operation of such pipelines would be subject to the regulations governing such matters. Certain states have recently adopted regulations with respect to gathering systems, and other states are considering similar regulations. Whether new regulations will be adopted or, if adopted, the effect these rules may have on gathering systems cannot be predicted.

Federal, State or Native American Leases. Operations on federal, state or Native American oil and gas leases are subject to numerous restrictions, including nondiscrimination statutes. Such operations must be conducted pursuant to certain on-site security regulations and other permits and authorizations issued by the Bureau of Land Management, Minerals Management Service and other agencies.

Environmental Regulations. Various federal, state and local laws regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, directly impact oil and gas exploration, development and production operations, and consequently may impact operations and costs. These laws and regulations govern, among other things, emissions to the atmosphere, discharges of pollutants into waters of the United States, underground injection of waste water, the generation, storage, transportation and disposal of waste materials, and protection of public health, natural resources, and wildlife. These laws and regulations may impose substantial liabilities for noncompliance and for any contamination resulting from operations and may require the suspension or cessation of operations in affected areas. To date, BayCorp has not expended any material amounts to comply with such regulations, and management does not currently anticipate that future compliance will have a materially adverse effect on BayCorp's consolidated financial position or results of operations. BayCorp is committed to environmental protection and believes that it is in substantial compliance with applicable environmental laws and regulations. There are no known issues that have a significant adverse effect on the permitting process or permit compliance status of any of its facilities or operations. BayCorp expects that it will make expenditures in efforts to comply with environmental regulations and requirements. These costs are considered a normal, recurring cost of ongoing operations and not an extraordinary cost of compliance with government regulations.

Risks Related to HoustonStreet. HoustonStreet's revenues depend on continued and expanded use of Internet-based wholesale energy trading platforms. Electronic trading of wholesale energy may not achieve widespread market acceptance or emerge as a sustainable business. In addition, HoustonStreet will need to enhance trading liquidity in order to increase and sustain revenues. As a technology dependent business, HoustonStreet's business could suffer due to computer or communications systems interruptions or failures, technological change or adverse competitive developments. Further, as electronic commerce evolves, federal, state and foreign agencies could adopt regulations covering issues such as user privacy, content and taxation of products and services. If enacted, government regulations could materially adversely affect HoustonStreet's business. Although HoustonStreet currently is not aware that it infringes any other patents, it is possible that HoustonStreet's technology infringes patents held by third parties. If HoustonStreet were to be found infringing, the owner of the patent could sue HoustonStreet for damages, prevent HoustonStreet from making, selling or using the owner's patented technology or could impose substantial royalty fees for those privileges. If any of the foregoing risks materialize, or other risks develop that adversely affect HoustonStreet, or if HoustonStreet fails to grow its revenues and net income, BayCorp could lose all of the value of its investment in HoustonStreet.

BAYCORP HOLDINGS, LTD.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Commodity Price Risk

Great Bay Power Marketing is a party to the Unitil PPA, which as amended, provides for the sale of 9.06 MWs of power to Unitil at \$50.34 MWh through October 31, 2010. Unitil has an option, which expires November 1, 2005, to extend the Unitil PPA for up to 12 years, from November 1, 2010 through October 30, 2022. Great Bay Power Marketing purchases power to meet its obligation under this contract and, as such, is exposed to market price fluctuations for the price of power.

The Unitil PPA was entered into for purposes other than trading and is subject to commodity price risk. The prices of electricity are subject to fluctuations resulting from changes in supply and demand. Great Bay Power Marketing tracks market exposure on its forward firm energy contract in a mark-to-market model that is updated daily with current market prices and is reflected in the Company's balance sheet. The positive, or negative, value of the forward firm power commitment represents an estimation of the gain, or loss, that Great Bay Power Marketing would have experienced if open firm commitments were covered at then-current market prices. Great Bay Power Marketing had net unrealized losses in the first six months of 2005 and 2004 of approximately \$3,388,000 and \$2,353,000, respectively, on its forward firm energy contract.

The Company does not purchase derivative commodity instruments to hedge its exposure to commodity price risk. The generation and sale of electricity by Great Bay Hydro of approximately 4 megawatts functions as a physical hedge against the commodity risk.

The following table provides information about the Company's forward firm energy contract that is subject to changes in commodity prices, showing the fair value of the contract as of June 30, 2005 and 2004 and the unrealized loss for those periods.

| | <u>June 30, 2005</u> | <u>June 30, 2004</u> |
|------------------------|------------------------|----------------------|
| | (Dollars in thousands) | |
| Fair Value | (\$6,944) | (\$ 2,481) |
| Unrealized Gain (Loss) | (\$3,520) | (\$2,485) |

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Chairman, CEO, and President and the Vice President of Finance of the Company have reviewed and evaluated the effectiveness of disclosure controls and procedures (as defined in the Securities Exchange Act of 1934 (the "Exchange Act") Rules 240.13a and 15(e)) as of the end of the fiscal quarter covered by this Quarterly Report. Based on that evaluation, the Chairman, CEO, and President and the Vice President of Finance have concluded that their current disclosure controls and procedures are, in all material respects, effective and timely, providing them with material information relating to that required to be disclosed in the reports the Company files or submits under the Exchange Act.

The Company's management, including the Chairman, CEO and President and the Vice President of Finance, does not expect that the Company's disclosure controls and procedures or its internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, provides reasonable, not absolute, assurance that the objectives of the control system are met. The design of a control system reflects resource constraints; the benefits of controls must be considered relative to their costs.

BAYCORP HOLDINGS, LTD.

Because there are inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been or will be detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns occur because of simple error or mistake. Controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events. There can be no assurance that any design will succeed in achieving its stated goals under all future conditions; over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with the policies or procedures. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Changes in Internal Controls

There have not been any significant changes in the Company's internal controls or, to its knowledge, in other factors that have materially affected, or are reasonably likely to materially affect, these controls subsequent to the date of their evaluation. The Company is not aware of any significant deficiencies or material weaknesses and, therefore, no corrective actions were taken.

Part II – OTHER INFORMATION

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

Share Repurchase Plan.

The following table summarizes repurchases of BayCorp stock during the quarter ended June 30, 2005:

| Period | Shares Repurchased | Average Price Per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs | Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1) |
|-------------------------|--------------------|-------------------------|--|--|
| April 1 - June 30, 2005 | 0 | -- | -- | 100,024 |

- (1) On September 29, 2003, the Company announced that its Board of Directors had authorized the repurchase of up to ten percent of its fully diluted common stock on the open market or in negotiated transactions. On September 15, 2004 the Company announced that its Board of Directors had authorized the repurchase of up to an additional 100,000 shares of its common stock on the open market or in negotiated transactions. The Board of Directors did not establish expiration dates for either of these plans.

Item 4. Submission of Matters to a Vote of Security Holders

The Company held its Annual Meeting of Stockholders on May 17, 2005. Proxies for the meeting were solicited pursuant to Regulation 14A, and there were no solicitations in opposition to management's nominees for Directors. All such nominees were elected. At the Annual Meeting, the following matters were voted on:

BAYCORP HOLDINGS, LTD.

1. Six members were elected to the Board of Directors to serve until the next Annual Meeting of Stockholders of the Company and until their successors are duly elected and qualified. The following table sets forth the number of votes cast for and withheld for each nominee for Director.

| <u>Name</u> | <u>For</u> | <u>Withheld</u> |
|-------------------------|------------|-----------------|
