Fiscal 4Q 2018 Highlights

Wireless Service Revenue^[1]

Stabilized year-over-year

Digital Transformation

Increased digital sales and implementing artificial intelligence

Adjusted EBITDA*

Delivered at the high end of our fiscal year guidance

Postpaid Net Additions

Delivered for the 4th consecutive year driven by growth in data devices

Next-Gen Network

Increased network capex by 50% year-over-year

[1] excluding the impact of the new revenue standard

Message from the CEO

“Sprint delivered on its plan for fiscal 2018, as we met all of our financial guidance for the year. While we’ve made progress, there are certainly continued challenges to address, which will continue to put pressure on our service revenue and retail customer growth.”

Michel Combes

Total Connections

The company had **8,000 net losses** in the current quarter compared with 44,000 net additions in the year-ago period and 48,000 net additions in the prior quarter.

Sprint ended the quarter with **54.5 million connections**, including 32.8 million postpaid, 8.8 million prepaid, and 12.9 million wholesale and affiliate connections.

Postpaid net additions were 169,000 during the quarter compared to net additions of 39,000 in the year-ago period and net additions of 309,000 in the prior quarter. The year-over-year increase was primarily driven by data device net additions that were partially offset by lower phone net additions. The sequential decrease was primarily driven by seasonally lower phone net additions. The current quarter included 129,000 net migrations from prepaid to non-Sprint branded postpaid, compared to 44,000 in the prior year and 107,000 in the prior quarter.

Postpaid Net Additions

In Thousands

Postpaid Total Churn and Postpaid Phone Churn

Postpaid phone churn of 1.82 percent compared to 1.68 percent in the year-ago period and 1.84 percent in the prior quarter. The year-over-year increase was mostly driven by customers rolling off promotional offers, while the sequential decrease was impacted by typical seasonality.

Postpaid total churn of 1.81 percent for the quarter compared to 1.78 percent in the year-ago period and 1.85 percent in the prior quarter. The year-over-year increase was primarily driven by higher phone churn that was partially offset by lower data device churn. The sequential decrease was primarily driven by seasonally lower phone churn.

Postpaid phone net losses of 189,000 compared to net additions of 55,000 in the year-ago period and net losses of 26,000 in the prior quarter. The year-over-year decrease was driven by lower gross additions associated with less promotional service pricing, and higher churn. Sequentially, seasonally lower gross additions were partially offset by seasonally lower churn. The current quarter included 129,000 net migrations from prepaid to non-Sprint branded postpaid compared to 44,000 in the prior year and 107,000 in the prior quarter.

Postpaid Phone Net Additions (Losses)
In Thousands

Data Device Net Additions (Losses)
In Thousands

Data device net additions of 358,000 in the quarter compared to net losses of 16,000 in the year-ago period and net additions of 335,000 in the prior quarter. The year-over-year increase was driven by tablets, connected car devices, wearables, and other connected devices.

Average postpaid connections per account of 2.92 at quarter end compared to 2.85 in the year-ago period and 2.89 in the prior quarter. Both the year-over-year and sequential growth were primarily driven by higher data devices per account.

Prepaid net losses of 30,000 during the quarter compared to 170,000 net additions in the year-ago period and 173,000 net losses in the prior quarter. The year-over-year decrease was driven by higher net migrations to postpaid and lower gross additions resulting from the exit of certain channels, while the sequential increase was mostly driven by lower churn. The current quarter included 129,000 net migrations from prepaid to non-Sprint branded postpaid, compared to 44,000 in the prior year and 107,000 in the prior quarter.

Prepaid churn was 4.37 percent compared to 4.30 percent for the year-ago period and 4.83 percent for the prior quarter. The sequential decrease was impacted by seasonality.

Wholesale & affiliate net losses were 147,000 in the quarter compared to net losses of 165,000 in the year-ago period and 88,000 in the prior quarter. The sequential decline was primarily impacted by seasonally lower gross additions.

Retail activations were 5.8 million during the quarter compared to 6.1 million in the year-ago period and 6.5 million in the prior quarter. Year-over-year, the decrease was mostly due to lower prepaid upgrades. Sequentially, the decrease was due to seasonally lower postpaid upgrades and gross additions.

Postpaid Upgrades as a Percent of Total Postpaid Subscribers

Postpaid upgrade rate was 6.0 percent during the quarter compared to 6.4 percent for the year-ago period and 7.7 percent for the prior quarter. Both the year-over-year and sequential decreases were driven by overall industry trends of customers keeping devices longer, while the sequential decrease was also impacted by seasonality.

Postpaid phone connections on unsubsidized service plans

represented 85 percent of the base at the end of the quarter, compared to 80 percent in the year-ago period and 84 percent in the prior quarter.

Postpaid Phone Connections on Unsubsidized Service Plans

Postpaid Device Financing

Total Financed Percentage of Activations
 Phone Financed Percentage of Phone Activations

Postpaid device financing

represented 79 percent of postpaid activations for the quarter compared to 84 percent for the year-ago period and 81 percent in the prior quarter. At the end of the quarter, 50 percent of the postpaid connection base was active on a leasing agreement compared to 47 percent in the year-ago period and 51 percent in the prior quarter.

Postpaid phone financing

represented 87 percent of phone activations for the quarter compared to 90 percent for the year-ago period and 88 percent in the prior quarter.

Network Deployment Continues with Mobile 5G Launch Coming Soon

Sprint made continued progress in the quarter on executing its Next-Gen Network plan.

- Sprint now has 2.5 GHz spectrum deployed on approximately 80 percent of its macro sites.
- Sprint currently has approximately 30,000 outdoor small cells deployed including both mini macros and strand mounts.
- Sprint has deployed approximately 1,500 Massive MIMO radios, which increase the speed and capacity of the LTE network and, with a software upgrade, will provide mobile 5G service in select cities in the coming weeks.

Standards-based 5G is currently on-air in select locations, with commercial service expected to launch in the coming weeks. Chicago, Atlanta, Dallas and Kansas City are expected to be among the first cities to offer commercial 5G service; with Houston, Los Angeles, New York City, Phoenix and Washington D.C. slated to launch by the end of June. The total initial 5G coverage footprint across all nine cities is expected to be more than 1,000 square miles. The company has also announced standards-based 5G devices from LG, HTC, and Samsung that will be available soon.

Building a Digital Disruptor

Sprint continued to leverage digital capabilities to transform the way it engages with customers.

- Postpaid gross additions in digital channels increased approximately 60 percent year-over-year in both the fiscal fourth quarter and for the full fiscal year. Additionally, the company exited the year with nearly 20 percent of postpaid upgrades occurring in a digital channel.
- Approximately 30 percent of all Sprint customer care chats are now performed by virtual agents using artificial intelligence.
- Web conversions improved while online media spend and cost per click were down year-over-year.

Revenue Recognition Changes

The company adopted ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)" as of April 1, 2018 ("new revenue standard").

A summary of the financial impact of the income statement adjustments under the new standard, as compared to the previous revenue standard, is reflected in the table for the current quarter.

The most significant impacts to the financial statement results are as follows:

- Consideration paid to customers or on behalf of customers is included as a reduction of the total transaction price of customer contracts, resulting in a contract asset that is amortized to service revenue over the term of the contract or customer life. As a result, the income statement impact reflects an increase in equipment sales offset by a reduction in wireless service revenue. Under the previous standard, this consideration paid to customers or on behalf of customers was recognized as a reduction to equipment sales or as selling, general and administrative expense.
- Costs to acquire a customer contract or for a contract renewal are now capitalized and amortized to selling, general and administrative expenses over the expected customer relationship period or length of the service contract, respectively. Under the previous standards, such commission costs were expensed as incurred.

IMPACT FROM NEW REVENUE STANDARD				
Three months ended March 31, 2019				
	As Reported - New Revenue Standard	Previous Revenue Standard	Difference	
(in millions)				
Net operating revenues				
Service revenue	\$ 5,656	\$ 5,869	\$	(213)
Equipment sales	1,426	1,057		369
Equipment rentals	1,359	1,373		(14)
Total net operating revenues	8,441	8,299		142
Net operating expenses				
Cost of services	1,645	1,669		(24)
Cost of equipment sales	1,561	1,506		55
Cost of equipment rentals	186	186		-
Selling, general and administrative	2,043	2,117		(74)
Depreciation - network and other	1,113	1,113		-
Depreciation - equipment rentals	1,084	1,084		-
Amortization	133	133		-
Goodwill impairment	2,000	2,000		-
Other, net	350	350		-
Total net operating expenses	10,115	10,158		(43)
Operating loss	(1,674)	(1,859)		185
Total other expenses	(595)	(595)		-
Loss before taxes	(2,269)	(2,454)		185
Income tax benefit	91	130		(39)
Net loss	(2,178)	(2,324)		146
Less: Net loss attributable to noncontrolling interests	4	4		-
Net loss attributable to Sprint Corp.	\$ (2,174)	\$ (2,320)	\$	146
Non-GAAP Financial Measures:				
Adjusted EBITDA*	\$ 3,136	\$ 2,951	\$	185

Net operating revenues of \$8.4 billion for the quarter increased \$358 million year-over-year and decreased \$160 million sequentially. Adjusting for the \$142 million net positive impact this quarter and \$110 million net positive impact last quarter from the new revenue standard, operating revenues would have increased \$216 million year-over-year and decreased \$192 million sequentially. The year-over-year increase was primarily driven by higher equipment rentals, while the sequential decrease was primarily driven by seasonally lower equipment sales.

Net Operating Revenues

Dollars In Billions

Wireless Service Revenue

Dollars In Billions

Wireless service revenue of \$5.4 billion decreased \$164 million year-over-year and \$40 million sequentially. Adjusting for the \$213 million impact this quarter and \$199 million impact last quarter from the new revenue standard, wireless service revenue would have increased \$49 million year-over-year and decreased \$26 million sequentially. The year-over-year increase was mostly due to growth in the retail customer base, partially offset by lower postpaid ARPU. Sequentially, the slight decrease was driven by lower postpaid ARPU.

Wireline revenue of \$314 million for the quarter declined \$30 million year-over-year and \$2 million sequentially. The year-over-year decline was driven by migrating customers from TDM based to Ethernet based IP data services, as well as lower voice volumes, as the company has discontinued standalone voice services.

Postpaid Average Revenue Per User (ARPU) of \$43.25 for the quarter decreased 3 percent year-over-year and 1 percent sequentially. Adjusting for the \$0.74 impact this quarter and \$0.96 impact last quarter from the new revenue standard, ARPU would have declined only 1 percent both year-over-year and sequentially. Both the year-over-year and sequential changes were impacted by higher data device sales, which generally have a lower monthly recurring charge than phones.

Postpaid Average Revenue Per User (ARPU)

--- New revenue standard impact

Prepaid Average Revenue Per User (ARPU)

--- New revenue standard impact

Prepaid Average Revenue Per User (ARPU) of \$33.67 for the quarter decreased 9 percent year-over-year and 2 percent sequentially. Adjusting for the \$4.14 impact this quarter and \$2.96 impact last quarter from the new revenue standard, ARPU would have increased 2 percent year-over-year and 1 percent sequentially.

Equipment rentals, formerly referred to as lease revenue, of \$1.4 billion increased \$223 million year-over-year and \$46 million sequentially. Adjusting for the \$14 million impact this quarter and \$16 million impact last quarter from the new revenue standard, equipment rentals would have increased by \$237 million year-over-year and \$44 million sequentially. Both the year-over-year and sequential growth were driven by the growing number of leasing customers, as well as an increase in average selling price of devices.

Equipment Rentals

Dollars In Billions

Equipment sales of \$1.4 billion increased \$345 million year-over-year and decreased \$163 million sequentially. Adjusting for the \$369 million impact this quarter and \$325 million impact last quarter of the new revenue standard, equipment sales would have decreased \$24 million year-over-year and \$207 million sequentially. Year-over-year, a decrease in retail sales was mostly offset by a higher average selling price per device sold. The sequential decrease was primarily driven by seasonally lower postpaid sales volumes.

Cost of services (CoS) of \$1.6 billion for the quarter decreased \$16 million year-over-year and \$3 million sequentially. Adjusting for the \$24 million impact this quarter and \$23 million impact last quarter of the new revenue standard, cost of services would have increased \$8 million year-over-year and decreased \$2 million sequentially. Year-over-year, lower wireline network costs were partially offset by incremental expenses associated with increased network investments.

Cost of Service

Dollars In Billions

----- New revenue standard impact

Selling, general and administrative

expenses (SG&A) of \$2.0 billion for the quarter increased by \$15 million year-over-year and \$40 million sequentially. Adjusting for the \$74 million impact this quarter and the \$142 million impact last quarter of the new revenue standard, along with merger-related costs that did not impact adjusted EBITDA*, SG&A would have decreased \$41 million year-over-year and \$91 million sequentially. The year-over-year decline was mostly due to lower marketing and selling expenses, partially offset by higher bad debt expense that was associated with more installment billing sales, while the sequential decrease was primarily driven by seasonally lower selling expenses.

Selling, General, and Administrative

Dollars In Billions

----- New revenue standard impact

Cost of equipment sales of \$1.6 billion for the quarter increased \$74 million year-over-year and decreased \$173 million sequentially. Adjusting for the \$55 million impact this quarter and \$19 million impact last quarter of the new revenue standard, cost of equipment sales would have increased \$19 million year-over-year and decreased \$209 million sequentially. The year-over-year increase was driven by a higher average cost per device sold. The sequential decrease was primarily driven by seasonally lower postpaid sales volumes.

Cost of Equipment Sales

Dollars In Billions

----- New revenue standard impact

Cost of equipment rentals, formerly referred to as loss on leased devices, of \$186 million for the quarter increased \$40 million year-over-year and \$4 million sequentially, due to growth in leasing customers.

Depreciation and Amortization

Dollars In Billions

■ Network and Other
■ Equipment Rentals
■ Amortization

Depreciation and amortization expense

of \$2.3 billion for the quarter increased \$71 million year-over-year and decreased \$40 million sequentially. The year-over-year increase was driven primarily by higher network depreciation. The sequential decrease was mostly driven by a decrease in equipment rental depreciation, due to ongoing evaluations of device residual values based on market rates.

Operating loss of \$1.7 billion for the quarter included a preliminary non-cash goodwill impairment charge of \$2 billion, \$185 million net positive impact from the new revenue standard, \$304 million loss from asset dispositions, \$130 million in merger-related costs, \$24 million in litigation and other contingencies, and \$22 million in severance and exit costs. The year-ago period included \$189 million loss from asset dispositions and \$84 million in severance, exit costs, and litigation settlements. The prior period included \$256 million net positive impact from the new revenue standard, \$105 million loss from asset dispositions, \$67 million in merger-related costs, \$50 million in litigation and other contingencies, and \$30 million in severance and exit costs. Adjusting for the items above, operating income would have improved \$112 year-over-year and \$146 million sequentially.

Net loss of \$2.2 billion for the quarter included a preliminary after-tax, non-cash goodwill impairment charge of \$2 billion, compared to net income of \$69 million in the year-ago period and net loss of \$141 million in the prior quarter. The current period included \$146 million net positive impact from the new revenue standard compared to \$202 million in the prior quarter.

Adjusted EBITDA*

Dollars In Billions

Adjusted EBITDA* was \$3.1 billion for the quarter compared to \$2.8 billion in the year-ago period and \$3.1 billion in the prior quarter. Adjusting for the \$185 million net positive impact this quarter and \$256 million impact last quarter from the new revenue standard, adjusted EBITDA* would have improved \$183 million year-over-year and \$106 million sequentially. The year-over-year improvement was primarily driven by higher equipment rentals and partially offset by higher cost of equipment rentals. Sequentially, the increase was primarily driven by seasonally lower selling, general and administrative expenses.

Net cash provided by operating activities

of \$2.8 billion for the quarter compared to \$2.7 billion in the year-ago period and \$2.2 billion in the prior quarter. Year-over-year, the increase was driven by higher Adjusted EBITDA*, partially offset by unfavorable changes in working capital. The sequential increase was primarily due to favorable changes in working capital.

Net Cash Provided by Operating Activities

Dollars In Billions

Adjusted Free Cash Flow *

Dollars In Millions

Adjusted free cash flow* of negative \$539 million for the quarter compared to negative \$240 million in the year-ago period and negative \$908 million in the prior quarter. Year-over-year, the decrease was primarily driven by increased network spending and lower net proceeds of financings related to devices and receivables, partially offset by higher cash flows from operations. Sequentially, the improvement was mostly driven by higher cash flows from operations and seasonally lower spending on leased devices, partially offset by lower net proceeds of financings related to devices and receivables.

Cash paid for network capital expenditures was \$1.1 billion in the quarter compared to \$780 million in the year-ago period and \$1.4 billion in the prior quarter. The year-over-year increase was driven by higher spending on Next-Gen network initiatives, while the sequential decrease was driven by timing of cash payments.

Liquidity and Debt

Dollars In Billions

** Includes maturities due through March 2020

Total general purpose liquidity was \$9.8 billion at the end of the quarter, including \$7.0 billion of cash, cash equivalents and short-term investments. Additionally, the company has approximately \$100 million of availability under a vendor financing agreement that can be used toward the purchase of 2.5GHz network equipment.

^(a) During the three-month period ended March 31, 2018, a non-Sprint branded postpaid offering was introduced allowing prepaid customers to purchase a device under our installment billing program. As a result of the extension of credit, approximately 167,000 prepaid subscribers were migrated from the prepaid subscriber base into the postpaid subscriber base. In addition, net subscriber additions under the non-Sprint branded postpaid offering were 44,000 during the three-month period ended March 31, 2018.

^(b) During the three-month period ended June 30, 2018, we ceased selling devices in our installment billing program under one of our brands and as a result, 45,000 subscribers were migrated back to prepaid.

^(c) Sprint is no longer reporting Lifeline subscribers due to regulatory changes resulting in tighter program restrictions. We have excluded them from our customer base for all periods presented, including our Assurance Wireless prepaid brand and subscribers through our wholesale Lifeline MVNOs.

^(d) As a result of our affiliate agreement with Shentel, certain subscribers have been transferred from postpaid and prepaid to affiliates. During the three-month period ended June 30, 2018, 10,000 and 4,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates. During the three-month period ended March 31, 2018, 29,000 and 11,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates. During the three-month period ended June 30, 2017, 17,000 and 4,000 subscribers were transferred from postpaid and prepaid, respectively, to affiliates.

^(e) During the three-month period ended June 30, 2017, 2,000 Wi-Fi connections were adjusted from the postpaid subscriber base.

^(f) During the three-month period ended September 30, 2017, the Prepaid Data Share platform It's On was decommissioned as the Company continues to focus on higher value contribution offerings resulting in a 49,000 reduction to prepaid end of period subscribers.

^(g) During the three-month period ended December 31, 2017, prepaid end of period subscribers increased by 169,000 in conjunction with the PRWireless HoldCo, LLC joint venture.

^(h) On April 1, 2018, approximately 115,000 wholesale subscribers were removed from the subscriber base with no impact to revenue. During the three-month period ended December 31, 2018, an additional 100,000 wholesale subscribers were removed from the subscriber base with no impact to revenue.

⁽ⁱ⁾ ARPU is calculated by dividing service revenue by the sum of the monthly average number of connections in the applicable service category. Changes in average monthly service revenue reflect connections for either the postpaid or prepaid service category who change rate plans, the level of voice and data usage, the amount of service credits which are offered to connections, plus the net effect of average monthly revenue generated by new connections and deactivating connections. Postpaid phone ARPU represents revenues related to our postpaid phone connections.

^(j) Postpaid ABPA* is calculated by dividing postpaid service revenue earned from postpaid customers plus billings from installment plans and non-operating leases, as well as equipment rentals, by the sum of the monthly average number of postpaid accounts during the period. Installment plan billings represent the substantial majority of the total billings in the table above for all periods presented.

^(k) Postpaid phone ABPU* is calculated by dividing service revenue earned from postpaid phone customers plus billings from installment plans and non-operating leases, as well as equipment rentals, by the sum of the monthly average number of postpaid phone connections during the period. Installment plan billings represent the substantial majority of the total billings in the table above for all periods presented.

NOTES TO THE FINANCIAL INFORMATION (Unaudited)

- (1) As a result of our annual goodwill impairment assessment, we recorded a preliminary non-cash goodwill impairment charge of \$2 billion during the fourth quarter of fiscal year 2018. The substantial portion of this impairment charge is not taxable as goodwill is generally not separately deductible for tax purposes.
- (2) As more of our customers elect to lease a device rather than purchasing one under our subsidized program, there is a significant positive impact to EBITDA* and Adjusted EBITDA* from direct channel sales primarily due to the fact the cost of the device is not recorded as cost of equipment sales but rather is depreciated over the customer lease term. Under our device leasing program for the direct channel, devices are transferred from inventory to property and equipment and the cost of the leased device is recognized as depreciation expense over the customer lease term to an estimated residual value. The customer payments are recognized as revenue over the term of the lease. Under our subsidy model, we recognize revenue from the sale of devices as equipment sales at the point of sale and the cost of the device is recognized as cost of equipment sales. During the three and twelve month periods ended March 31, 2019, we leased devices through our Sprint direct channels totaling approximately \$1,114 million and \$4,931 million, respectively, which would have increased cost of equipment sales and reduced EBITDA* if they had been purchased under our subsidized program.
- The impact to EBITDA* and Adjusted EBITDA* resulting from the sale of devices under our installment billing program is generally neutral except for the impact in our indirect channels from the time value of money element related to the imputed interest on the installment receivable.
- (3) During the fourth, third and second quarters of fiscal year 2018 and the fourth and first quarters of fiscal year 2017, the company recorded losses on dispositions of assets primarily related to cell site construction and network development costs that are no longer relevant as a result of changes in the company's network plans. Additionally, during the first quarter of fiscal year 2017 the company recorded a pre-tax non-cash gain related to spectrum swaps with other carriers.
- (4) For all quarters of fiscal year 2018 and the fourth and third quarters of fiscal year 2017, severance and exit costs consist of lease exit costs primarily associated with tower and cell sites, access exit costs related to payments that will continue to be made under the company's backhaul access contracts for which the company will no longer be receiving any economic benefit, and severance costs associated with reduction in its work force.
- (5) During the first quarter of fiscal year 2018, contract termination costs are primarily due to the purchase of certain leased spectrum assets, which upon termination of the spectrum leases resulted in the accelerated recognition of the unamortized favorable lease balances. During the first quarter of fiscal year 2017, we recorded a \$5 million gain due to reversal of a liability recorded in relation to the termination of our relationship with General Wireless Operations, Inc. (Radio Shack).
- (6) During the fourth, third, second and first quarters of fiscal year 2018, we recorded merger costs of \$130 million, \$67 million, \$56 million and \$93 million, respectively, due to the proposed Business Combination Agreement with T-Mobile.
- (7) During the fourth quarter of fiscal year 2018, litigation expenses and other contingencies consist of unfavorable developments associated with legal matters. During the third quarter of fiscal year 2018, litigation expenses and other contingencies consist of tax matters settled with the State of New York. During the fourth, third and first quarters of fiscal year 2017, litigation expenses and other contingencies consist of reductions associated with legal settlements or favorable developments in pending legal proceedings. In addition, the third quarter of fiscal year 2017 included non-recurring charges of \$51 million related to a regulatory fee matter.
- (8) During the second quarter of fiscal year 2018 we recognized hurricane-related reimbursements of \$32 million. During the fourth, third and second quarters of fiscal year 2017 we recorded hurricane-related costs of \$7 million, \$66 million and \$34 million, respectively, consisting of customer service credits, incremental roaming costs, network repairs and replacements.

* FINANCIAL MEASURES

Sprint provides financial measures determined in accordance with GAAP and adjusted GAAP (non-GAAP). The non-GAAP financial measures reflect industry conventions, or standard measures of liquidity, profitability or performance commonly used by the investment community for comparability purposes. These measurements should be considered in addition to, but not as a substitute for, financial information prepared in accordance with GAAP. We have defined below each of the non-GAAP measures we use, but these measures may not be synonymous to similar measurement terms used by other companies.

Sprint provides reconciliations of these non-GAAP measures in its financial reporting. Because Sprint does not predict special items that might occur in the future, and our forecasts are developed at a level of detail different than that used to prepare GAAP-based financial measures, Sprint does not provide reconciliations to GAAP of its forward-looking financial measures.

The measures used in this release include the following:

EBITDA is operating income/(loss) before depreciation and amortization. **Adjusted EBITDA** is **EBITDA** excluding severance, exit costs, and other special items. **Adjusted EBITDA Margin** represents Adjusted EBITDA divided by non-equipment net operating revenues for Wireless and Adjusted EBITDA divided by net operating revenues for Wireline. We believe that Adjusted EBITDA and Adjusted EBITDA Margin provide useful information to investors because they are an indicator of the strength and performance of our ongoing business operations. While depreciation and amortization are considered operating costs under GAAP, these expenses primarily represent non-cash current period costs associated with the use of long-lived tangible and definite-lived intangible assets. Adjusted EBITDA and Adjusted EBITDA Margin are calculations commonly used as a basis for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the telecommunications industry.

Postpaid ABPA is average billings per account and calculated by dividing postpaid service revenue earned from postpaid customers plus billings from installment plans and non-operating leases, as well as equipment rentals, by the sum of the monthly average number of postpaid accounts during the period. We believe that ABPA provides useful information to investors, analysts and our management to evaluate average postpaid customer billings per account as it approximates the expected cash collections, including billings from installment plans and non-operating leases, as well as equipment rentals, per postpaid account each month.

Postpaid Phone ABPU is average billings per postpaid phone user and calculated by dividing service revenue earned from postpaid phone customers plus billings from installment plans and non-operating leases, as well as equipment rentals by the sum of the monthly average number of postpaid phone connections during the period. We believe that ABPU provides useful information to investors, analysts and our management to evaluate average postpaid phone customer billings as it approximates the expected cash collections, including billings from installment plans and non-operating leases, as well as equipment rentals, per postpaid phone user each month.

Free Cash Flow is the cash provided by operating activities less the cash used in investing activities other than short-term investments and equity method investments. **Adjusted Free Cash Flow** is **Free Cash Flow** plus the proceeds from device financings and sales of receivables, net of repayments. We believe that Free Cash Flow and Adjusted Free Cash Flow provide useful information to investors, analysts and our management about the cash generated by our core operations and net proceeds obtained to fund certain leased devices, respectively, after interest and dividends, if any, and our ability to fund scheduled debt maturities and other financing activities, including discretionary refinancing and retirement of debt and purchase or sale of investments.

Net Debt is consolidated debt, including current maturities, less cash and cash equivalents and short-term investments. We believe that Net Debt provides useful information to investors, analysts and credit rating agencies about the capacity of the company to reduce the debt load and improve its capital structure.

SAFE HARBOR

This release includes “forward-looking statements” within the meaning of the securities laws. The words “may,” “could,” “should,” “estimate,” “project,” “forecast,” “intend,” “expect,” “anticipate,” “believe,” “target,” “plan,” “outlook,” “providing guidance,” and similar expressions are intended to identify information that is not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future — including statements relating to our network, subscriber growth, and liquidity; and statements expressing general views about future operating results — are forward-looking statements. Forward-looking statements are estimates and projections reflecting management’s judgment based on currently available information and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. With respect to these forward-looking statements, management has made assumptions regarding, among other things, the development and deployment of new technologies and services such as 5G; efficiencies and cost savings of new technologies and services; customer and network usage; subscriber additions and churn rates; service, speed, capacity, coverage and quality; availability of devices; availability of various financings; and the timing of various events and the economic environment. Sprint believes these forward-looking statements are reasonable; however, you should not place undue reliance on forward-looking statements, which are based on current expectations and speak only as of the date when made. Sprint undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. In addition, forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our company’s historical experience and our present expectations or projections. Factors that might cause such differences include, but are not limited to, those discussed in Sprint Corporation’s Annual Report on Form 10-K for the fiscal year ended March 31, 2018, our Quarterly Report on Form 10-Q for the quarter ended September 30, 2018 and, when filed, our Annual Report on Form 10-K for the fiscal year ended March 31, 2019. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

About Sprint:

Sprint (NYSE: S) is a communications services company that creates more and better ways to connect its customers to the things they care about most. Sprint served 54.5 million connections as of March 31, 2019 and is widely recognized for developing, engineering and deploying innovative technologies, including the first wireless 4G service from a national carrier in the United States; leading no-contract brands including Virgin Mobile USA, Boost Mobile, and Assurance Wireless; instant national and international push-to-talk capabilities; and a global Tier 1 Internet backbone. Today, Sprint’s legacy of innovation and service continues with an increased investment to dramatically improve coverage, reliability, and speed across its nationwide network and commitment to launching the first 5G mobile network in the U.S. You can learn more and visit Sprint at www.sprint.com or www.facebook.com/sprint and www.twitter.com/sprint.
