Disclaimers

These materials and the remarks made in connection with their presentation contain forward looking statements. These forward looking statements involve risks and uncertainties and are based on current expectations and management estimates; actual results may differ materially. The risks and uncertainties which could impact these statements are described in filings that United Natural Foods, Inc. (the "Company") has made under the Securities Exchange Act of 1934, as amended, including its quarterly report on Form 10-Q for the period ended October 27, 2018 filed with the Securities and Exchange Commission (the "SEC") on December 6, 2018 and other filings the Company makes with the SEC, and include, but are not limited to the Company's dependence on principal customers; the Company's sensitivity to general economic conditions, including changes in disposable income levels and consumer spending trends; the Company's ability to realize anticipated benefits of its acquisitions and dispositions, in particular, its acquisition of SUPERVALU; the possibility that restructuring and other charges and costs we may incur in connection with the sale or closure of SUPERVALU's retail operations will exceed current estimates; the Company's reliance on the continued growth in sales of higher margin natural and organic foods and non-food products in comparison to lower margin conventional products; increased competition in the Company's industry as a result of increased distribution of natural, organic and specialty products by conventional grocery distributors and direct distribution of those products by large retailers and online distributors; increased competition as a result of continuing consolidation of retailers in the natural product industry and the growth of supernatural chains; the Company's ability to timely and successfully deploy its warehouse management system throughout its distribution centers and its transportation management system across the Company and to achieve efficiencies and cost savings from these efforts; the addition or loss of significant customers or material changes to the Company's relationships with these customers; volatility in fuel costs; volatility in foreign exchange rates; the Company's sensitivity to inflationary and deflationary pressures; the relatively low margins and economic sensitivity of the Company's business; the potential for disruptions in the Company's supply chain by circumstances beyond its control; the risk of interruption of supplies due to lack of long-term contracts, severe weather, work stoppages or otherwise; moderated supplier promotional activity, including decreased forward buying opportunities; union -organizing activities that could cause labor relations difficulties and increased costs; and the ability to identify and successfully complete acquisitions of other natural, organic and specialty food and non-food products distributors. Any forward-looking statements are made pursuant to the Private Securities Litigation Reform Act of 1995 and, as such, speak only as of the date made. The Company is not undertaking to update any information in the foregoing reports until the effective date of its future reports required by applicable laws. Any estimates of future results of operations are based on a number of assumptions, many of which are outside the Company's control and should not be construed in any manner as a guarantee that such results will in fact occur. These estimates are subject to change and could differ materially from final reported results. The Company may from time to time update these publicly announced estimates, but it is not obligated to do so.

This presentation also contains certain non-GAAP financial measures such as adjusted estimated diluted earnings per common share. The reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures are presented in the appendix to this presentation. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for any measure prepared in accordance with GAAP. The Company believes that presenting these non-GAAP financial measures aids in making period-to-period comparisons and is a meaningful indication of its estimated operating performance. The Company's management utilizes and plans to utilize this non-GAAP financial information to compare the Company's operating performance during certain fiscal periods to the comparable periods in the other fiscal years and, in certain cases, to internally prepared projections.

synergies, we expect to
generate meaningful
shareholder value

Net Sales

Scale, assortment and services drive growth

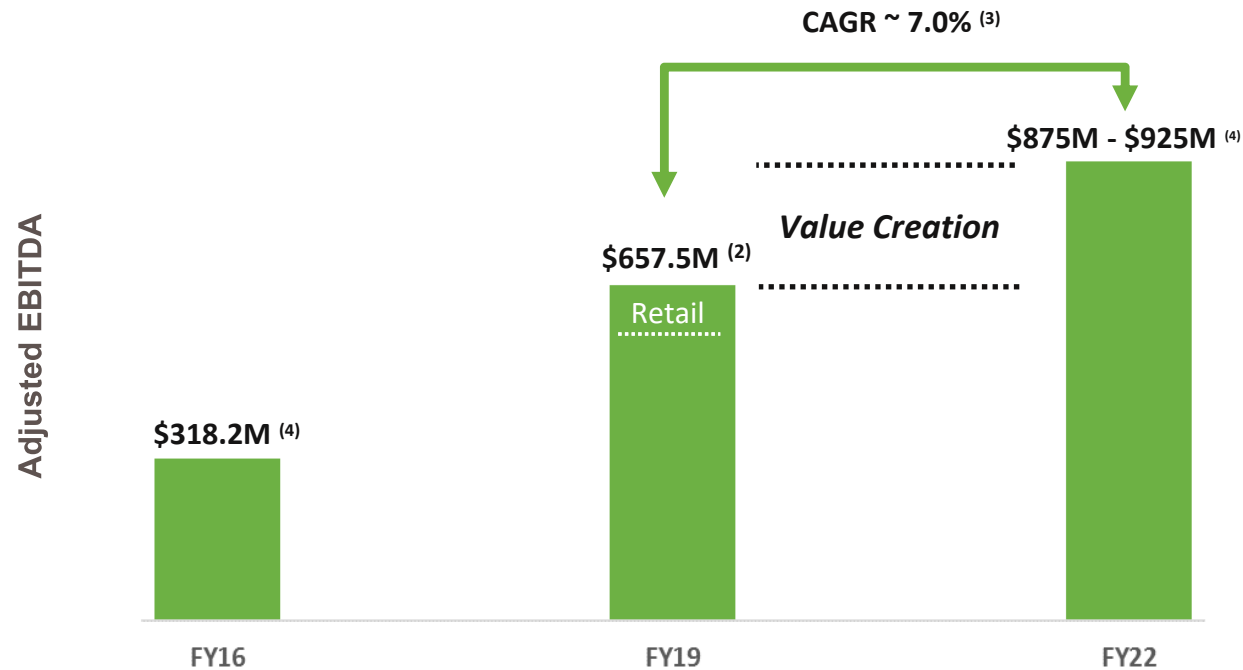

¹ When adjusting for the additional 11 weeks of SUPERVALU sales, prior to the acquisition, not included in FY19.
Retail sales from Cub and Shoppers are not included in net sales; net sales does include wholesale sales to Cub.

² Legacy UNFI only

Adjusted EBITDA ⁽¹⁾

Synergies drive growth

¹ Adjusted EBITDA is an important measure of business performance and is not intended to be a substitute for or be superior to any financial information presented in accordance with generally accepted accounting principles ("GAAP")

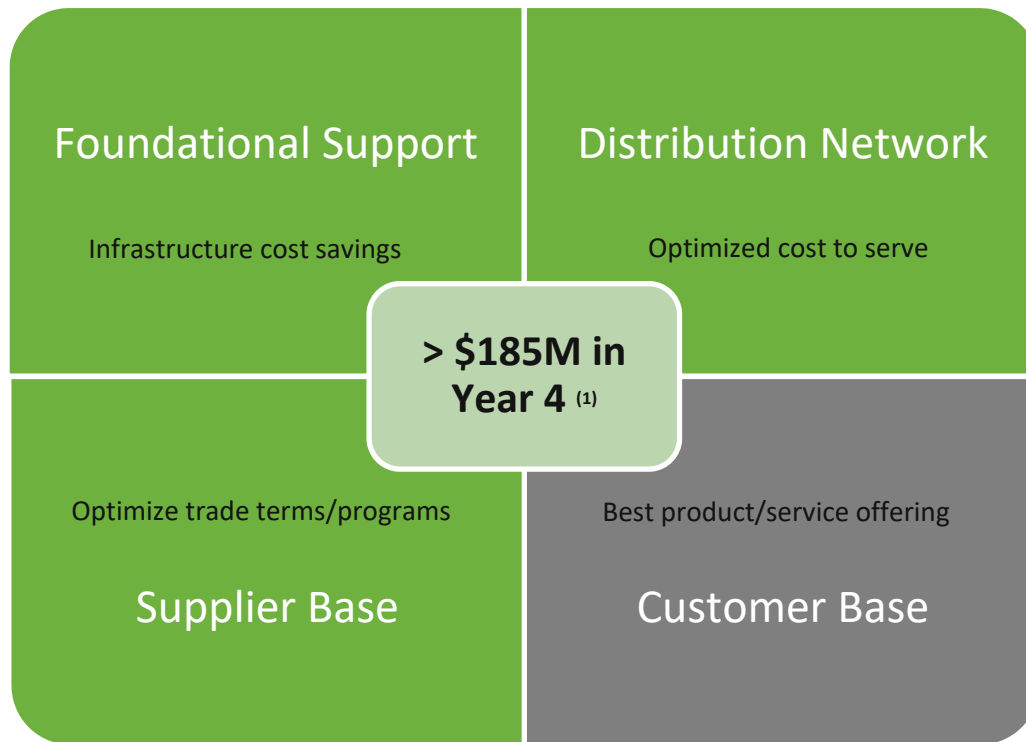

² Midpoint of estimated range; see reconciliation in appendix

³ After adding \$78M to FY19 to reflect a full year contribution from SUPERVALU

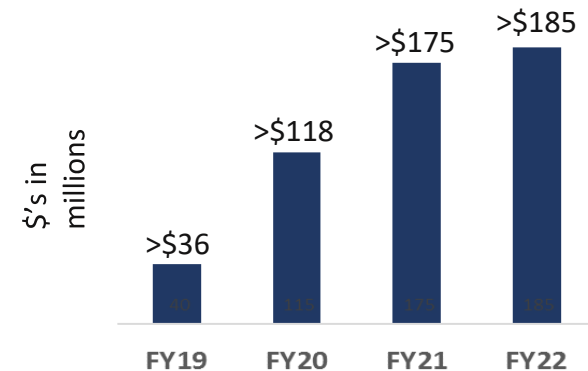

⁴ See reconciliation in appendix

Cost Synergies

Affirming cost synergies of more than \$185M in year 4

Timeline to Achieve

One-Time Costs to Achieve Synergies ⁽²⁾

- ✓ FY19 costs: ~ \$125M
- ✓ FY20 costs: ~ \$35M
- ✓ FY21 to FY24: Cumulative ~ \$65M

¹ Excludes revenue synergies

² Excludes impact of one-time costs related to retail divestitures and store closures. In FY19, one-time retail closure costs related to Shop 'n Save, Shop 'n Save East, and Hornbacher's are estimated to be approximately \$35M - \$40M. This does not include any future charges related to store closures or divestitures at Shoppers or Cub.

Free Cash Flow & Other Key Metrics

Expecting debt reduction over the remainder of FY19

Fiscal 2019

Anticipate net debt reduction of \$0 to \$100M for Q2 to Q4 of FY19

- Neutral to modestly positive free cash flow⁽¹⁾ plus proceeds from asset sales for the remainder of fiscal year⁽²⁾

Capital expenditures of 1.3% to 1.5% of net sales in FY19

- Elevated spend due to distribution center expansions & automation

Longer Term Expectations (FY20 to FY22)

Capital expenditures average 1.0% of net sales

Working capital grows slower than net sales

Tax rate of 28% to 32%⁽³⁾

Evaluating potential tax elections resulting from SUPERVALU acquisition

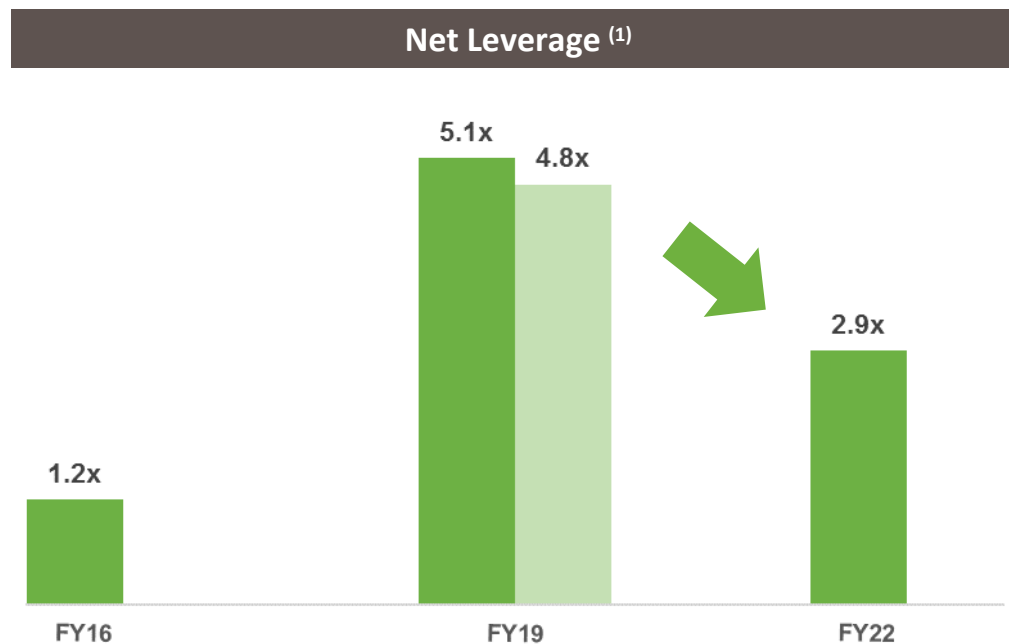

¹ Defined as cash provided by operations (after tax and interest payments) less capital expenditures

² Includes sale of Hornbacher's which closed in Q2 (December 2018); excludes potential sale of Cub or Shoppers

³ The tax rate applied to pre-tax income prior to non-recurring charges identified by the company

De-Leveraging

Leverage expected to decline by 2 turns by end of FY22

- ✓ Target leverage is 2.0 to 2.5x (excluding operating leases) ⁽²⁾
- ✓ Near term plans:
 - No dividends
 - No stock repurchases
 - No additional long-term sale leasebacks
 - No capital raised via equity issuance ⁽³⁾
- ✓ Potential for additional leverage reduction via sale of non-retail assets

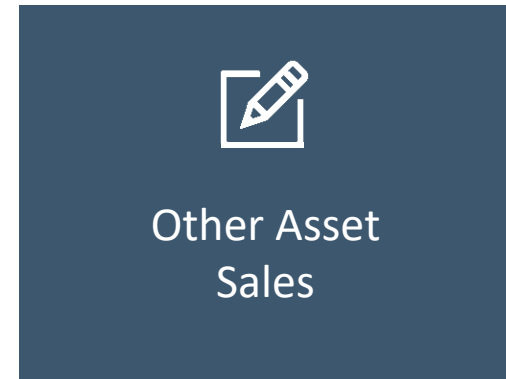

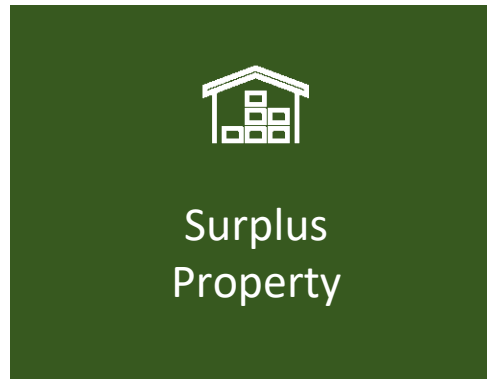

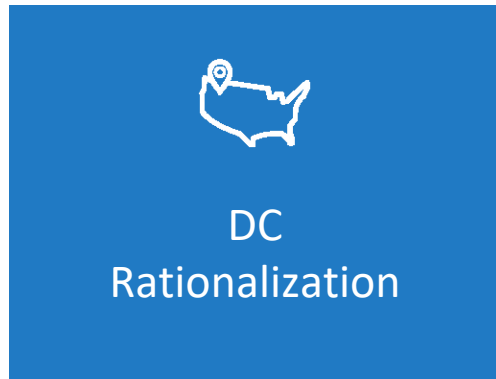

¹ Net leverage = [Face value of total debt less cash] / Adjusted EBITDA; excludes operating leases. FY19 adjusted to include a full year of SUPERVALU contribution.

² Including operating leases where net leverage = [Face value of total debt plus (rent expense x 3) less cash] / Adjusted EBITDAR, the target EBITDAR leverage range is approximately 0.1x to 0.2x higher.

³ Equity will continue to be used for employee stock based compensation, as has been the past practice.

Asset Monetization Opportunities: Beyond Retail

Additional future asset sales expected to further reduce leverage

Estimated proceeds from asset sales beyond retail: \$100M to \$150M ⁽¹⁾

¹ These proceeds are in addition to the "Proceeds from Asset Sales" included in FY19 \$0 to \$100M debt reduction estimate

Debt Structure & Covenants

Ample liquidity and no ongoing financial maintenance covenants

Several years until refinancing required

- \$2.1B ABL matures in 2023
- \$1.8B Term Loan matures in 2025

Ample liquidity

- \$735M at end of Q1 FY19
- Expecting \$700M to \$750M at fiscal year end

Term Loans and ABL credit facilities contain no ongoing financial maintenance covenants

¹ Liquidity is defined as ABL borrowing capacity plus cash

Fiscal 2019 Guidance – 53 weeks

GAAP EPS guidance now includes expected one-time retail store closure & divestiture costs

Net Sales	\$21.5 to \$22.0 billion
Earnings Per Share	<p>\$(0.70) to \$(0.50) compared to prior GAAP EPS guidance of \$(0.19) to \$0.01 per share.</p> <p>Revised GAAP range now includes \$35M to \$40M of expected expenses associated with the divestiture of Shop 'n Save, Shop 'n Save East and Hornbacher's. No other GAAP EPS guidance changes, at this time. Excludes expected future one-time charges related to store closures or divestitures at Shoppers or Cub and any potential impairment to long-lived assets, including goodwill.</p>
Adjusted Earnings Per Share ⁽¹⁾	\$1.69 to \$1.89
Adjusted EBITDA ⁽¹⁾	<p>\$650 to \$665 million</p> <p>Including discontinued operations</p>
Adjusted Interest Expense	<p>\$181 to \$191 million</p> <p>Excludes \$3 million related to the 30-day redemption period of the now retired SUPERVALU notes.</p> <p>Includes non-cash interest expense related to amortization of financing fees and original issue discount.</p>
Taxes	Expect to pay cash taxes related to continuing operations of less than \$20 million

¹ See reconciliation in appendix

Takeaways

- ✓ Synergies enable strong Adjusted EBITDA growth
- ✓ Meaningful opportunities to monetize assets
 - Debt reduction imperative
- ✓ Ample liquidity, no near term debt maturities, and no financial maintenance covenants

Synergies create value

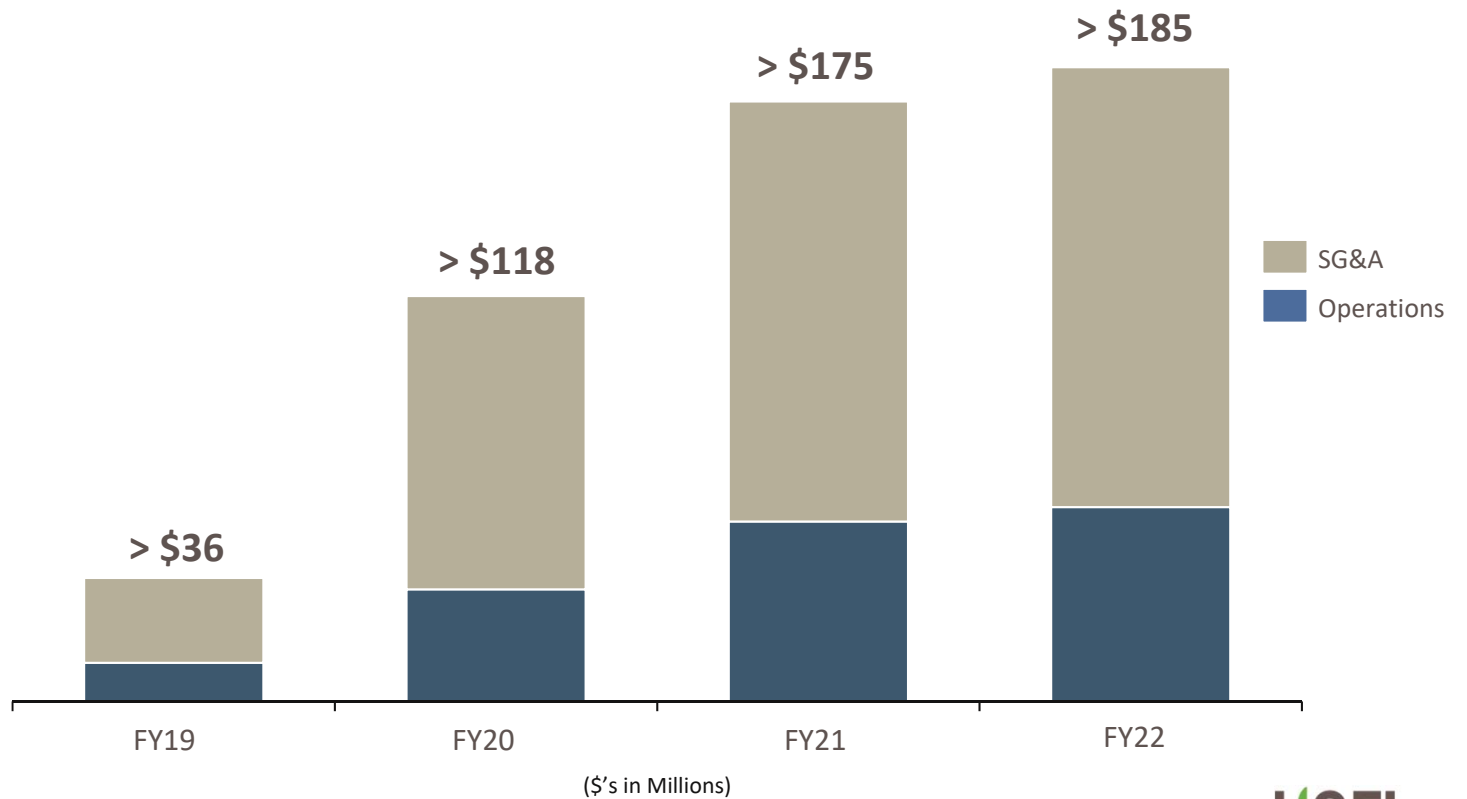

We're on track for delivering more than \$185M in cost synergies in year 4

¹ Excludes revenue synergies

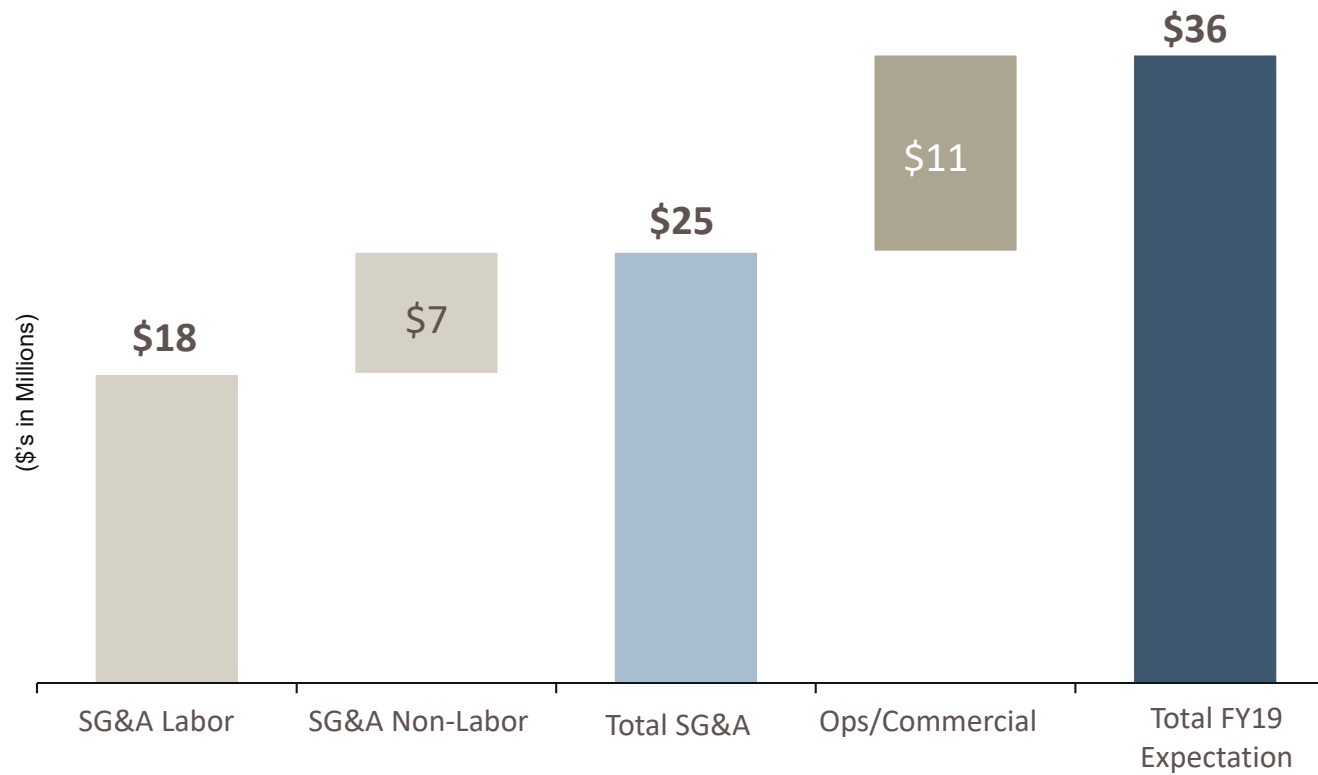

Timing of synergies

Committed to more than \$185M but going after more

Fiscal Year 2019 Synergies

Mix of SG&A, operational and commercial savings

Integration Process

Moving quickly and pragmatically to capture synergies and manage risk

Focus efforts

- Prioritize efforts and investment based on risk adjusted expected returns
- Organize teams around achieving synergy targets
- Keep it simple

Take a Disciplined Approach

- Get momentum with customers, suppliers, and associates
- Drive momentum with executive sponsorship
- Measure, track, and deliver on a regular cadence

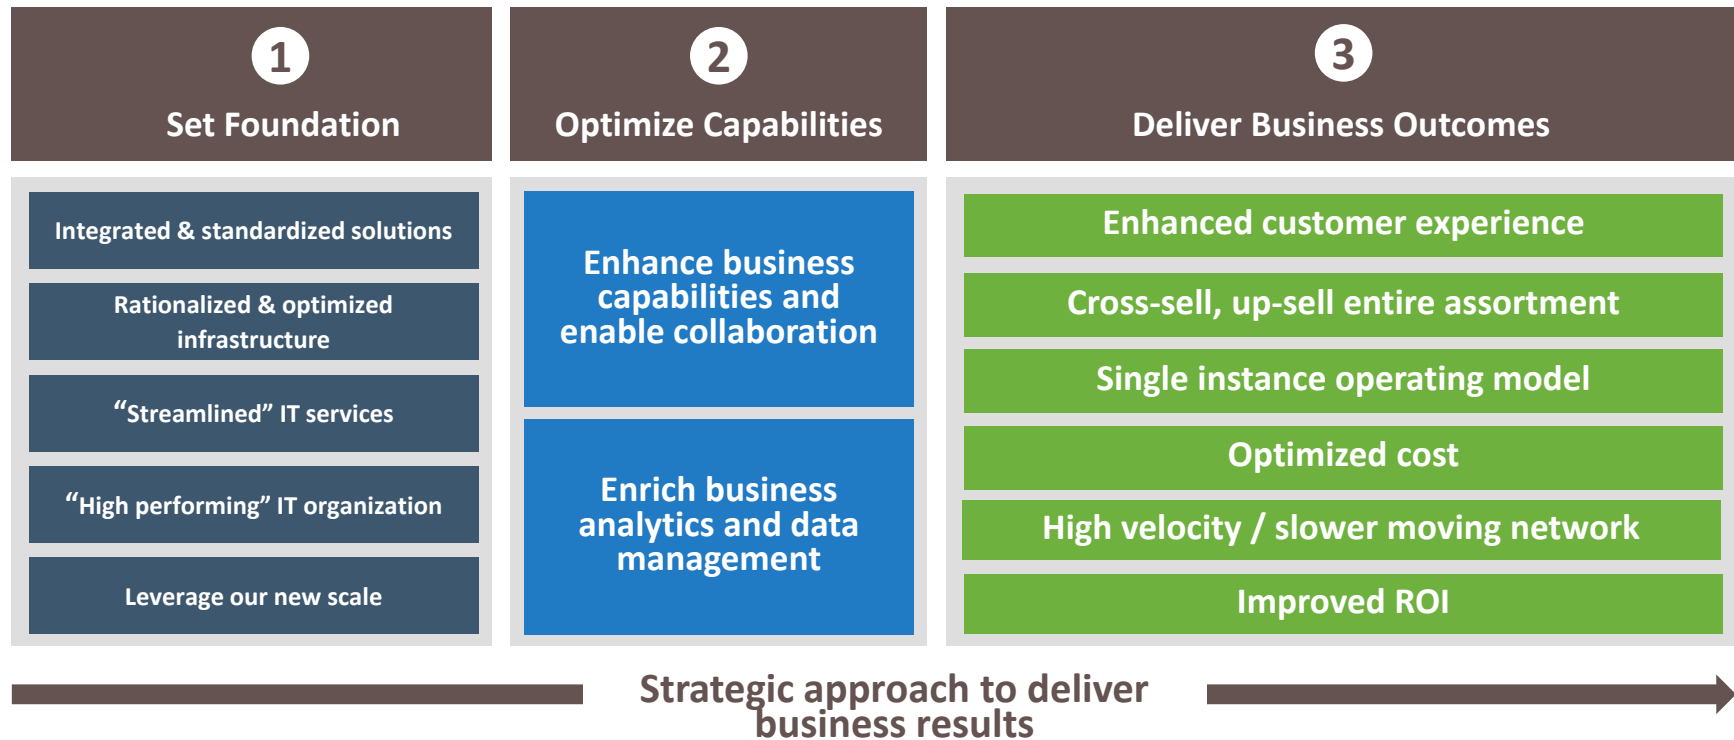

Manage the Change

- Identify what changes, when and build plans to manage
- Manage change with associates, customers, and partners
- Communicate targeted messages regularly

SUPERVALU performance

- ✓ Softness in center store
- ✓ Losses due to network alignment
- ✓ Impact on gross margin

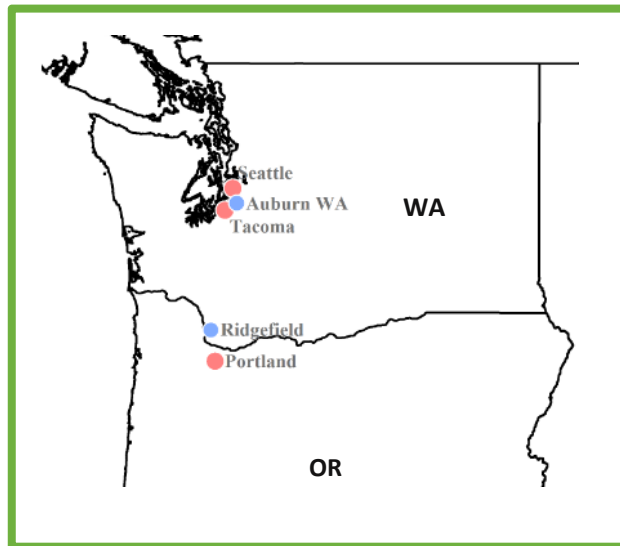

- ✓ Pacific Northwest
- ✓ Harrisburg/Lancaster
- ✓ Florida

Network optimization/realignment specifics

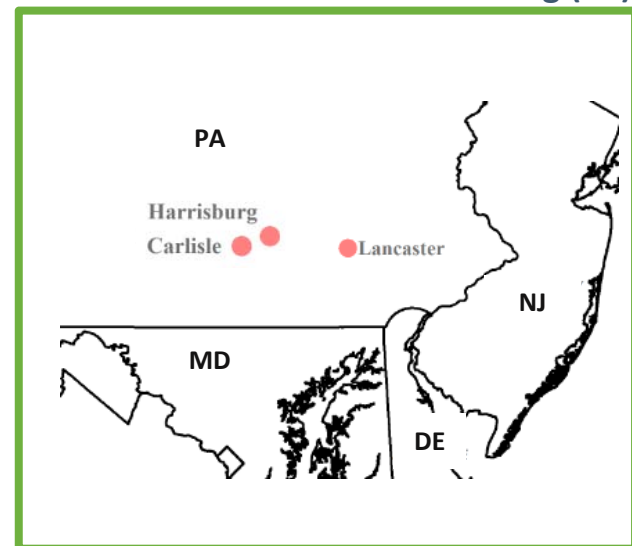

● Legacy SVU
● Legacy UNFI

Pacific Northwest Consolidation

- Optimization:
 - SVU operating synergies modeled from 3 DCs to 1
 - Model will be 1 DC hi velocity and 1 DC slower moving
 - Opportunity to sell real estate and reduce leverage

Move from Lancaster to Harrisburg (PA)

- Realignment:
 - Albertsons exercised option to force relocation from Lancaster to Harrisburg
 - Automation of GM in Carlisle
 - Greenfield start up
 - Reduced operating efficiencies

Takeaways

- ✓ Long-term rationale for the deal remains unchanged
- ✓ On track to deliver > \$185M in cost synergies by year 4
- ✓ Challenges with SUPERVALU business are fixable
- ✓ Path forward on systems and technology integration
- ✓ Balancing speed and managing risk
- ✓ Revenue synergies and reduction in inventory are upside to the value creation

Unlocking The Opportunity for UNFI & Today's Retailer

What Retailers Need Today

Adapting to a competitive environment

- ✓ Complete store offerings
 - Top sellers and new products
- ✓ Consolidated supplier to reduce labor and COGs
- ✓ Insights, expertise and Food Solutions beyond product and price

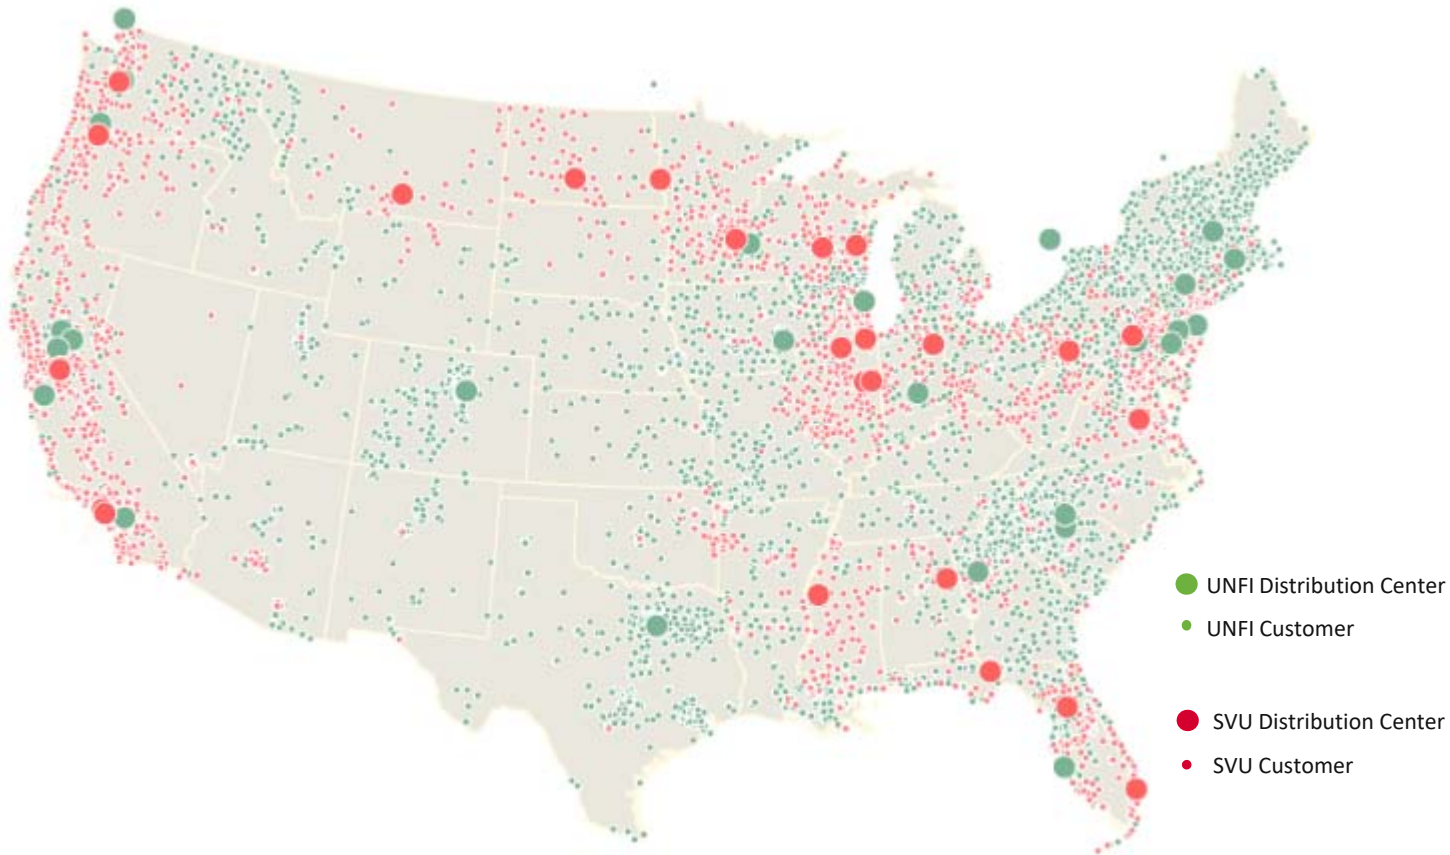

¹ Based on FY2018 Annual Report

Scale Matters

The Most DCs = Closer to the Customer

Unparalleled Product Offering

Over 300,000 SKUs covering the whole store

- ✓ Top suppliers want to work with us
(Access to the broadest customer base)
- ✓ First to market with new products
(Over 1,000 new items per month)
- ✓ Tremendous exclusive brands offering
(Over 6,000 SKUs in 100+ categories)

Scaling the Opportunity

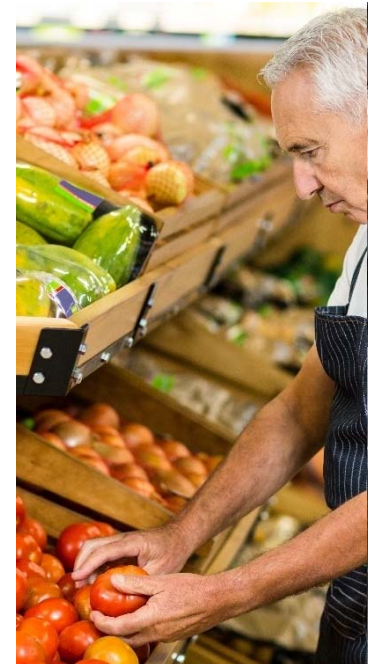

In food distribution scale wins

UNFI

- ✓ Larger drop = higher margin
- ✓ Widest selection = competitive moat
- ✓ Supplier leverage = lower acquisition cost
- ✓ Distribution network = lower cost to serve

RETAILER

- ✓ Fewer drops = lower labor costs
- ✓ Consolidate purchases = lower price
- ✓ Closer to DC = shorter lead times
- ✓ Fewer suppliers = back-of-house savings (AP, credits, etc.)
