EMPEROR REPORTS PORGERA SALE COMPLETION AND EMPEROR CAPITAL RETURN UPDATE

Emperor Mines Limited (“Emperor”), a 78.72% indirect subsidiary of DRDGOLD listed on the ASX Limited (“ASX”), today reports the completion of the sale of Emperor’s 20% interest in the Porgera Joint Venture (“the PJV Interest”) to Barrick Gold Corporation for a cash consideration of US\$255 million (“the Porgera transaction”).

Emperor Chief Executive Officer, Brad Gordon, said today that the completion of the sale meant that Emperor had now paid out its debt facilities in full, and was well placed to pursue growth opportunities.

“As of today, the Company has retired all of its debt facilities, and has, as previously announced, closed out all forward gold hedging, leaving the company debt and hedge free and with free cash in excess of A\$125 million.”

“Our significant net cash position following the completion of this transaction provides us with considerable flexibility in harnessing growth options and to pursue select opportunities identified over recent months,” Mr Gordon said.

The completion of the Porgera transaction allows Emperor to now undertake a proposed capital return to Emperor shareholders of A\$0.05c for every Emperor ordinary share held (“the Capital Return”), which was approved by Emperor shareholders at a General Meeting conducted on 30 July. Subsequent to the completion of the Capital Return, Emperor anticipates holding a net cash position in excess of A\$70 million

The Capital Return was subject to the following conditions:

- Emperor shareholder approval; and
- completion of the sale of the PJV Interest in Papua New Guinea.

Following completion of the Porgera transaction, the conditions for the Capital Return are now fully satisfied.

TIMETABLE

The Capital Return will take effect in accordance with the following timetable approved by the ASX:

Event

Date

Successful completion of sale of the PJV Interest	Friday, 17 August 2007
Emperor shares commence trading on “ex capital return” basis	Tuesday, 21 August 2007
Record Date for determining entitlements to participate in the Capital Return	Monday, 27 August 2007
Despatch date for payment of Capital Return to Emperor shareholders	Monday, 3 September 2007

PAYMENT METHOD

The payment of the Capital Return will be satisfied by sending a cheque to those persons who are Emperor shareholders as at the Record Date.

TAX CONSIDERATIONS FOR THE CAPITAL RETURN

Emperor is applying to the Australian Taxation Office for a Class Ruling confirming the tax position related to the Capital Return and will notify Emperor shareholders of the outcome of this submission in due course. It is strongly recommended that Emperor shareholders seek their own specific taxation advice in relation to the tax treatment of the Capital Return taking into account their particular circumstances.

EMPEROR SIGNS INDONESIAN ALLIANCE AGREEMENT

Emperor Mines Limited (“Emperor”), a 78.72% indirect subsidiary of DRDGOLD listed on the ASX Limited, today reports that it has signed an Alliance Agreement with a group of Indonesian and Australian investors to explore a large gold-silver-copper project in eastern Java.

The Alliance Agreement between Emperor, Indonesian company PT Indo Multi Niaga and BVI company IndoAust Mining Limited sets out the framework for entering into a Joint Venture Agreement and undertaking further exploration on a property of approximately 116km² located in the South Eastern portion of Java.

The agreement paves the way to a full Joint Venture Agreement, which would see Emperor spend up to A\$5million over five years, to earn a 51% interest in the project. An option exists for Emperor to earn a further 19% interest in the project by funding additional exploration. Emperor may then fund Feasibility studies to a capped amount, subject to certain conditions including the obtaining of relevant permits and licences.

Emperor Executive General Manager - Exploration and New Business, Malcolm Norris, said that the property has been previously explored and drilled by Golden Valley Mines and by Placer Dome during 1999/2000, with highly encouraging results.

“Historical drilling has defined a broad zone of approximately 2km x 2km of near surface Au-Ag mineralisation at the site, which will be the focus of ongoing drilling activity under the Alliance Agreement during the remainder of 2007 and early 2008,” Mr Norris said.

“We undertook diligence reviews of this prospect and the associated alliance agreement in June and July of this year, and are pleased to have now confirmed our position as an alliance partner in the project.

The Au-Ag system is interpreted as an upper level high-sulphidation system, overlying a porphyry copper system. Previous drilling results (see full results below) include:

- 278.6m @ 0.53g/t Au, 29 g/t Ag, which includes 24m @ 1.55g/t Au, 106g/t Ag;
- 87m @ 1.81g/t Au & 12.66ppm Ag, which includes 15m @ 6.24g/t Au, and;

[illegible]

COMPETENCE AND RESPONSIBILITY

The information in this report that relates to Exploration Results is based on information compiled by Malcolm Norris, who is a member of The Australasian Institute of Mining and Metallurgy.

Malcolm Norris is a full-time employee of Emperor Mines Limited.

Malcolm Norris has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Malcolm Norris consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
