ELECTRICITY SUPPLY UPDATE BY DRDGOLD SOUTH AFRICAN OPERATIONS (PTY) LIMITED (“DRDSA”)

DRDSA's Blyvooruitzicht mine has been in a voluntary load shifting arrangement with Eskom since April 2007. In addition, the Blyvooruitzicht mine agreed to further load shifting arrangements on Monday 21 January 2008 to shave a further 10% off its daily consumption. As a result, the impact of loadshedding on these operations has been negligible and shifts are proceeding normally.

One of the surface circuits at the Crown Gold Recoveries' operations is being affected by daily interruptions of approximately 4 hours each out of a continuous 24-hour cycle.

At DRDSA's ERPM mine, voluntary ad hoc load shifting occurs in consultation with Eskom which, up until the date of this announcement, has had a negligible impact on operations.

If the situation changes, DRDGOLD will release a further announcement to update the market.

FURTHER ELECTRICITY SUPPLY UPDATE BY DRDGOLD SOUTH AFRICAN
OPERATIONS (PTY) LIMITED (“DRDSA”)

Subsequent to the announcement released earlier today, shareholders are advised that, at both ERPM and Blyvooruitzicht mines, Eskom has limited power supply to emergency maintenance services and that underground production at these mines has therefore been suspended.

DRDGOLD has asked Eskom to indicate when normal supply will resume, and will update the market when it receives further and more precise particulars.
