DRDGOLD GUIDANCE FOR DECEMBER 2010 QUARTER

Johannesburg, South Africa, 21 January 2011: DRDGOLD Limited (JSE: DRD; NASDAQ: DROOY) announced today that it expects its Group gold production for the quarter ended 31 December 2010 to be about 6% higher than in the previous quarter, at around 69 400oz due to steady performance at the Crown and Ergo surface retreatment operations and an improved performance at the Blyvoor underground operation.

Cash operating costs are expected to be about 11% lower, a consequence of higher gold production and a quarter free of power utility Eskom's higher winter tariff.

It is estimated that capital expenditure will be about 31% higher, reflecting development of the Crown-Ergo pipeline.

The information contained in this announcement has not been reviewed or reported on by DRDGOLD's auditors. The detailed report for the quarter and half year ended 31 December 2010 will be released to the market on or about 10 February 2011.
