Press Release

Promising future for Wafi-Golpu as Harmony reports further significant increase in the Mineral Resource

Mineral Resource of 16 Moz of gold and 4.8 Mt of copper¹

Johannesburg. Thursday, 29 July 2010. Harmony Gold Mining Company Limited (Harmony) is pleased to announce a significant increase in the Mineral Resource at the Wafi-Golpu porphyry copper-gold project in Papua New Guinea (PNG), which is part of the company's 50/50 joint venture with Newcrest Mining Limited. The mineral resource for Wafi-Golpu now contains 16 million ounces (Moz) of gold and 4.8 million tonnes (Mt) of copper. Expressed as gold equivalents, this resource amounts to 38.5 Moz of gold, which spells an exciting and promising future for this project and also provides great opportunities for investors.

The increase in the Mineral Resource is due to the discovery of a new zone of mineralisation directly adjacent to the previously defined Golpu resource. The mineralisation has been extended by the drilling along strike to the northeast and at depth. The estimate is based on an additional 19 179 m of drilling in 22 PQ/HQ/NQ diamond drill holes.

Contained metal at Golpu only, has increased from the 2007 mineral resource (163Mt at 0.57 g/t Au, 1.08% Cu, 132 ppm Mo) as follows:

- Gold increased from 3.0 to 8.8 Moz of gold;
- copper increased from 1.8 to 4.8 Mt of copper;
- molybdenum increased from 22 to 55 kt of molybdenum; and
- on a gold equivalent basis the deposit increased to 30.9 Moz Au equivalent.

Harmony CEO Graham Briggs says, "These results have a profoundly positive impact on our future resource base and drilling results continue to prove that investing in exploration was a very good long term decision".

The drill programme at Golpu is testing an exploration target in the range of 500 to 800 Mt at high grades of between 0.7% and 1.1% copper (Cu) and 0.5 to 0.7g/t gold (Au) for 8 to 18 Moz of gold and 3.5 to 8.8 Mt of copper. This target includes the current resource².

Briggs adds, “We have now added significant size to what is one of the highest grade copper gold porphyries in South East Asia and potential for further growth in this Mineral Resource remains highly promising.”

Over the broader project area including the Wafi gold deposit, a number of targets have been earmarked for follow-up testing, with several that already contain significant gold intercepts. At Golpu, the mineralised footprint of the deposit now extends over 700m of strike and remains open to the north and at depth. The ongoing drilling programme, involving five drill rigs continues to expand high-grade zones of mineralised porphyry.

Below is a diagram of the schematic section 21000N indicating the new resource outline

Wafi-Golpu project mineral resource^{1,2} as at 30 June 2010

Deposit	Tonnes (Mt)	Gold g/t	Copper %	Gold Moz	Copper Kt	Gold equivalent* Moz
Golpu	501	0.54	0.95	8.8	4767	30.9
Nambonga	40	0.79	0.22	1.0	86	1.4
Wafi	96	1.55		4.8		4.8
Wafi Link	7	6.62		1.4		1.4
Total	644	0.77	0.75	16	4853	38.5

*Gold equivalent is calculated using a gold price of US\$950/oz Au and \$4 412/t Cu at 100% recovery for both metals

Golpu mineral resource¹, by resource classification

Resource Code	Lode	Tonnes (Mt)	Grade Cu (%)	Grade Au (g/t)	Grade Mo (ppm)	Contained Cu ('000 t)	Contained Au (Moz)	Contained Mo ('000 t)
Indicated	Supergene	5	2.53	0.44	68	120	0.1	0.3
	Porphyry	85	1.32	0.66	110	1,122	1.8	9.3
Subtotal Indicated		90	1.38	0.65	108	1,242	1.9	9.7
Inferred	Supergene	9	0.77	0.45	65	68	0.1	0.6
	Porphyry	88	1.82	1.10	42	1,606	3.1	3.7
	Metasediment	314	0.59	0.36	132	1,851	3.6	41.5
Subtotal Inferred		411	0.86	0.52	111	3,525	6.9	45.7
Total		501	0.95	0.54	111	4,767	8.8	55.4

Ends.

Note: The Measured and Indicated Mineral Resources are inclusive of those Mineral Resources modified to produce the Ore Reserves. The estimates of Ore Reserves and Mineral Resources in this statement were prepared in accordance with the standards set out in the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code" (December 2004) as published by the Joint Ore Reserve Committee of the Australian Institute of Mining and Metallurgy, Australian Institute of Geoscientists and Minerals Council of Australia (JORC) The JORC Code is the accepted reporting standard for the Australian Stock Exchange (ASX).

The Exploration Results, Mineral Resources and Ore Reserves in the summary tables are based on information compiled by Michael Smith who is a corporate member of the Australian Institute of Mining and Metallurgy and is a Competent Person' as defined by the code for reporting of Mineral Resources and Ore Reserves in relation to the mineralisation being reported on and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. Michael Smith is a full-time employee of Harmony Gold (PNG Services) (Pty) Ltd.

¹ Expressed in 100% terms. Harmony's interest is 50%.
