## RESULTS FOR THE FOURTH QUARTER AND YEAR ENDED 30 JUNE 2013

### KEY FEATURES

#### Quarter on quarter

- ↑ Gold production increased by 12% to 8 588kg (276 109oz)
  - increase in tonnes milled of 9%
  - increase in total recovered grade of 2%
- ↑ Cash operating costs decreased by 3% to R351 109/kg (US\$1 156/oz)
- ↑ Operating profit<sup>1</sup> lower at R639 million (US\$68 million)
- ↑ Headline loss per share of 186 SA cents (US\$20 cents)
  - reversal of the Hidden Valley deferred tax asset of R547 million (US\$55 million)<sup>3</sup>
  - retrenchment costs

#### Year on Year

- ↑ 7% increase in underground grade
- ↑ Lowest recorded annual LTIFR<sup>2</sup>
- ↑ Evander sale transaction completed
- ↑ Watershed agreement signed with Kusasaletu labour
- ↑ Gold production decreased by 2% to 35 374kg (1 137 297oz)
- ↑ Cash operating costs increased to R327 210/kg (US\$1 154/oz)
- ↑ Operating profit<sup>1</sup> lower at R4.5 billion (US\$511 million)
- ↑ Headline profit per share\* of 47 SA cents (5 US cents)
  - reversal of the Hidden Valley deferred tax asset of R547 million (US\$55 million)<sup>3</sup>
  - losses related to temporary closure at Kusasaletu
  - retrenchment costs
- ↑ No final dividend declared (interim dividend of 50 SA cents paid)

\* Includes discontinued operation

1. Operating profit is comparable to the term production profit in the segment report in the financial statements and not to the operating profit line in the income statement

2. LTIFR = Lost Time Injury Frequency Rate

3. Translated at a spot rate of US\$/R9.98 at 30 June 2013

## RESULTS FOR THE FOURTH QUARTER AND YEAR ENDED 30 JUNE 2013

		Quarter June 2013	Quarter March 2013 <sup>#</sup>	Q-on-Q variance %	Year ended June 2013 <sup>#</sup>	Year ended June 2012 <sup>#</sup>	Variance %

## Forward-looking statements

*This report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts.*

*These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements.*

*These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgement of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report.*

*Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions; availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.*

## Competent person's declaration

Harmony reports in terms of the South African Code for the Reporting of Exploration results, Mineral Resources and Ore Reserves (SAMREC). Harmony employs an ore reserve manager at each of its operations who takes responsibility for reporting mineral resources and mineral reserves at his operation.

**The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:**

Resources and Reserves South Africa: Jaco Boshoff, Pr. Sci. Nat., who has 18 years' relevant experience and is registered with the South African Council for Natural Scientific Professions (SACNASP).

Resources and Reserves Papua New Guinea: Gregory Job, BSc, MSc, who has 25 years relevant experience and is a member of the Australian Institute of Mining and Metallurgy (AusIMM).

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited. These competent persons consent to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Mineral Resource and Reserve information as at 30 June 2013 is included in this report.

## Chief executive officer's review

Harmony is a globally competitive gold mining company, focused on growing profits. In the current gold price environment it is no longer growth at all costs. Investors are seeking returns and do not favour large capital projects. This is the new reality that we are dealing with.

During the past quarter we have concluded our strategic plans for financial year 2014. Key considerations were:

- free cash flow
- applying conservative financial modelling
- risk mitigation
- retaining our balance sheet strength
  - reducing all costs (including head office costs)
  - reducing capital expenditure
- continue to increase our grade
- plans that will enable us to withstand the volatility of the gold price

Our strategic plans were approved assuming a gold price of R400 000/kg. We believe that our plans are realistic and we have taken into account possible risks to execute our strategy. Our safety and health initiatives, improved productivity, the correct allocation of capital, a quality reserve base, improved grade, reduced costs, experienced teams and proper business planning will secure a sustainable business.

### 1. SAFETY

The year on year fatality injury frequency rate improved by 33% from 0.15 (rate per million man hours) in FY12 to 0.10 (rate per million man hours) in financial year 2013 (FY13) – the lowest ever recorded in the history of Harmony. Although Harmony achieved a significant year on year improvement, a lot more needs to be done to eliminate fatalities. A total of 10 people lost their lives due to mine accidents in Harmony during FY13, compared to 15 people in FY12. A major reduction in the number of fall of ground related fatalities was achieved with only one fall of ground related fatality recorded in FY13.

The lost time injury rate improved by 21% year on year from 6.67 (rate per million man hours) to 5.28 (rate per million man hours) – this is the lowest annual rate in the history of Harmony.

It is with regret that I have to report that two people were fatally injured in two separate accidents during the June 2013 quarter. They were Potso Peter Kotjomela, a scraper winch operator at Phakisa and Lebohang Michael Chake, a development team leader at Kusasalethu. The board, management and I wish to express our sincere condolences to the friends and families of these colleagues.

### 2. HEALTH

Over the past three years we have built a centralised health function to focus on the roll out of our pro-active health strategy, as well as standardising health protocols across the South African operations. We have invested a substantial amount of resources, i.e. finance, information technology and skills in improving our record keeping systems and processes in an attempt to monitor employee health individually and collectively to improve the overall health and wellness of our employees.

40% of our workforce is on chronic medication and are continuously monitored. Although HIV/Aids remains our biggest health risk, the actuarial prevalence rate for Harmony has reduced from 27% to 24% over the past five years. Between 10% to 20% of the employees of the individual mines are now on antiretroviral therapy (ART). During the past financial year all Harmony's employees and contractors were

offered voluntary counselling and testing for HIV/Aids, with 40% volunteering to be tested.

Although there has been an improvement in sick absenteeism over the past financial year from 5.13% to 4.55%, we believe that there is still massive room for improvement in this area and it will be a key focus for the health team for the next year.

## 3. OPERATIONAL AND FINANCIAL RESULTS

### Year on year

Gold production for the year ending June 2013 was 35 374kgs, 2% lower than the same period last year, mainly due to the labour disruptions at Kusasalethu during the December 2012, March 2013 and June 2013 quarters.

In line with Harmony's strategic initiative to improve the quality of ounces mined, year on year underground grade increased by 7%. Recovered grade was the main driver towards the increase in gold production across the various operations and improvements were recorded at most operations.

The following operations improved their gold production when compared to financial year 2012 (FY12):

- *Joel* – gold production was 565kg (21%) higher, mainly as a result of an 11% improvement in the recovered grade to 5.28g/t (4.78g/t in FY12), whilst tonnes milled increased by 10% year on year;
- *Bambanani* – gold production was 556kg (54%) higher due to a 49% increase in the recovered grade from 6.57g/t in FY12 to 9.79g/t for the year under review. Tonnes milled increased by 3% year on year;
- *Doornkop* – gold production was higher at 556kg (18%), recovered grade increased by 9% from 3.31g/t to 3.60g/t in FY13. Tonnes milled increased by 9%;
- *Target 3* – gold production increased by 503kg (45%) – recovered grade increased by 42% to 5.03g/t from 3.55g/t in FY12;
- *Masimong* – gold production increased by 396kg (12%), as a result of a 21% increase in the recovered grade to 4.17g/t (3.45g/t in FY12);
- *Target 1* – gold production was 337kg (9%) higher; recovered grade increased by 20% from 4.61g/t in FY12 to 5.53g/t in financial year 2013 (FY13);
- *Kalgold* – gold production was 291kg (28%) higher; recovered grade increased by 22% to 0.95g/t compared to 0.78g/t in FY12. Tonnes milled increased 4% year on year;
- *Unisel* – gold production increased by 220kg (14%); tonnes milled increased by 13% in FY13;
- *Steyn 2* – gold production increased by 147kg (45%), with the operation being in production for the whole year. Tonnes milled increased by 24% whilst recovered grade increased by 31% to 10.15g/t (7.74g/t in FY12).

The following operations require more attention in the next year, as their production performance was less than acceptable:

- *Kusasalethu* produced a total of 2 740 kilograms of gold, 2 893 kilograms (–51%) less than in financial year 2012 due to labour unrest;
- *Tshepong* produced 1 133kg gold less (–21%) than the previous financial year. The decrease in gold production is mainly as a result of a 16% decrease in tonnes milled for financial year 2013. A decrease in the recovery grade to 3.99g/t, 7% lower than the 4.29g/t recorded in FY12, also contributed towards the decrease in production;
- *Dumps* – 230kg less gold produced (–15%); a 26% decrease in the recovery grade was the main contributor towards the decrease in gold produced. Tonnes milled increased by 11%. The decrease in grade is due to the depletion of all the higher grade waste dumps;

## Results for the fourth quarter and year ended 30 June 2013

- *Hidden Valley* produced 118kg (–4%) less gold year on year. The recovery grade decreased by 8% to 1.43g/t from 1.56g/t in FY12, whilst tonnes milled increased by 4%;
- *Phakisa* produced 107kg (–4%) less gold than in the previous financial year, due to the ventilation shaft failure in the March and June 2013 quarters resulting in tonnes milled being 2% lower than in FY13, with the recovered grade 3% lower at 4.75g/t (4.88g/t in FY12).

A total net loss of R2.4 billion was recorded, compared to a net profit of R2.6 billion for the 2012 financial year, mainly due to the impairment of the Hidden Valley asset and labour disruptions at Kusasaletu and its subsequent temporary closure.

The total basic loss per share is 548 SA cents for the year ended 30 June 2013, compared to earnings of 614 SA cents per share in the previous year. Total headline earnings per share decreased from 565 SA cents to 47 SA cents per share.

### Quarter on quarter

We continue to manage that which is in our control – production and costs. Gold production for the June 2013 quarter increased by 12% to 8 588kg compared to the previous quarter. This was mainly due to the build-up in production at Kusasaletu, after the labour unrest at the mine during the second to fourth quarters of the financial year.

Operating profit for the June 2013 quarter was 22% lower, due to a 9% decrease in the gold price received, as well as an 8% increase in cash operating cost. Cash operating costs in the June 2013 quarter increased by R225 million when compared to the March 2013 quarter, due to the build-up in production at Kusasaletu, annual electricity increases, as well as winter electricity tariffs.

We are making good progress with our cost cutting project, Project 400. We have reduced our capital expenditure, as well as our services, exploration, procurement and corporate costs.

The rand per kilogram unit cost for the June 2013 quarter decreased by 3% to R351 109/kg in the past quarter, mainly due to the 12% increase in gold produced for the June 2013 quarter.

Total capital expenditure for the June 2013 quarter was R804 million – R127 million higher than the previous quarter – mainly as a result of a R93 million increase in capital expenditure at Kusasaletu.

On 19 July 2013 Harmony announced that the carrying value of its 50% holding in Hidden Valley would be written down to its net recoverable value. The reason for the impairment is the reduction in the US dollar gold and silver prices and Hidden Valley's poor production performance. An amount of US\$268 million (approximately R2.7 billion) has been written down. In addition, an amount of R58 million in respect of Harmony's South African assets has been impaired. The impairments have reduced the reported net profit, but do not have an impact on reported cash balances and free cash flow.

The net loss for the June 2013 quarter was R3 499 million, compared to a R124 million net loss recorded for the March 2013 quarter, mainly due to the impairment of assets of R2 675 million and the derecognition of the deferred tax asset of R547 million for the Hidden Valley operation.

The total basic loss per share for the June 2013 quarter increased from 29 SA cents to 809 SA cents per share. The total headline loss per share increased from 47 SA cents to 186 SA cents.

### Hidden Valley

The various efficiency improvement and cost reduction projects continue at Hidden Valley showing significant improvements in the mining grade control, road maintenance (cost and productivity), truck loading efficiency and smaller mobile fleet requirements.

The restructuring of the joint venture's management to meet both the financial and strategic objectives of the business progressed well during the past quarter.

### 4. GOLD MARKET

We are in gold mining for the long haul and believe that R400 000/kg is a sustainable gold price to assume in the current gold price climate. With the Rand/dollar exchange rate being weaker, it has been a huge advantage to be predominately a South African producer.

The rand gold price received during the quarter decreased by 9% to R427 534/kg, from R470 030/kg in the previous quarter. This was mainly due to a 14% decrease in the US dollar gold price from US\$1 639/oz in the March 2013 quarter to US\$1 407/oz during the past quarter. This decrease was however partially offset by a 6% weakening in the rand against the dollar from US\$/R8.92 in the previous quarter to US\$/R9.45 in the June 2013 quarter.

Year on year, the R/kg gold price received increased by 8% while the US\$/oz price decreased by 5%, due to the R/US\$ exchange rate weakening by 14%.

### 5. RESERVES AND RESOURCES

As at 30 June 2013, Harmony's Mineral Reserves amounted to 51.5 million ounces (Moz) of gold, a 2.8% decrease from the 52.9Moz declared on 30 June 2012. The 2.8% decrease collectively represents mined Reserves during the year, a change in surface sources Reserves, together with some scope changes. The geographical representation of Reserves has not changed from the previous year.

Harmony's attributable gold equivalent Mineral Resources are declared as 147.7Moz as at 30 June 2013, a 1.7% decrease year-on-year from the 150.2Moz declared on 30 June 2012. The 1.7% decrease is due to mining and geology changes.

Our large Resource and Reserve base supports our belief that we have a solid base of assets containing quality ounces.

### 6. WAFI-GOLPU PROJECT

Regardless of the quality of the ore body, developing Golpu in line with the 2012 pre-feasibility study in the current gold and copper price climate does not deliver an adequate return on investment and therefore requires to be repositioned. We had various concerns regarding the substantial capital that will be injected into the project and are considering ways in which to develop a project with lower capital requirements and which will be a modular, expandable mine.

Harmony's contribution to drilling and project expenditure for the next two financial years will be funded from our cash flow, after which external funding options will be considered. During this phase we will ensure that Golpu's development strategy is aligned with the strategy of Harmony, which is to grow investor returns.

A low risk, modular, expandable development approach involves less risk and is expected to result in an improved project value. The decision to apply a modular expandable solution is a different approach to that proposed in the 2012 pre-feasibility study.

### 7. EMPLOYEE RELATIONS

The labour relations climate remained volatile in the industry prior to the start of the 2013 round of wage negotiations in the gold sector. Harmony experienced two work stoppages during the quarter led by the National Union of Mine Workers (NUM) at Doornkop and Tshepong. The issues raised during these industrial actions were mainly operational and have since been resolved, or are in the process of being addressed through the existing mine-based structures.

A recognition agreement was signed by management and the Association of Mineworkers and Construction Union (AMCU) for Masimong during the week of the 15 July 2013. AMCU now represents a third of Masimong's total workforce and at Kusasaletu, AMCU represents 74% of the employees.

The gold sector wage negotiations started on 11 July 2013 at the Chamber of Mines. We believe that good sense will prevail and that strikes will be averted. The labour disruptions at Kusasaletu alone cost Harmony approximately R1.2 billion. It is not in the interest of the company, the employees or the industry to further be subjected to such losses.

There are a number of initiatives being implemented to contain the labour situation, both at company and industry level. Some of these include the following:

- Workshops with all the unions in the company;
- Engagement with the unions on signing of the code of conduct by individual employees similar to the one signed at Kusasaletu;
- General managers' mass meetings;
- Communication campaigns with employees and unions across all our South African operations;
- Re-introduction of the mine productivity bonus;
- Continued engagement with the other gold mining companies.

#### 8. DISPOSAL OF A 30% INTEREST IN THE PHOENIX OPERATION

On 20 March 2013 Harmony signed transaction and funding agreements to give effect to an empowerment transaction to dispose

of 30% of its Free State based Phoenix tailings operation (Phoenix) to BB-BEE shareholders. The BB-BEE shareholders include Sikhuliso Resources (Proprietary) Limited, Kopano Resources (Proprietary) Limited, Mazincazelane Investments (Proprietary) Limited and the Malibongwe Women Development Trust, as well as a community trust that has been created by Harmony.

#### 9. DIVIDEND

In view of the fact that Harmony did not record a profit for the last six months, the board has decided not to declare a final dividend. An interim dividend of 50 SA cents was paid during FY13.

#### CONCLUSION

Harmony's strategy has been consistent in that we seek to optimise operational delivery, grow our cash flow and share our profits with all our stakeholders. There are times when pursuing one's strategy, tough decisions are required – such as the temporary closure of Kusasaletu. We will continue to do what is right for our shareholders and stakeholders to sustain the future of the company.

**Graham Briggs**

*Chief executive officer*

## Financial overview

### QUARTER ON QUARTER

#### Net loss

The net loss for the June 2013 quarter was R3 499 million compared to a R124 million net loss for the March 2013 quarter, mainly due to impairment of assets of R2 675 million and the reversal of a deferred tax asset of R547 million for the Hidden Valley operation.

#### Impairment of assets

Following the sharp decrease in the gold price, an impairment of assets of R2 733 million was recorded during the June 2013 quarter, consisting of an impairment of R2 675 million for the Hidden Valley operation and R58 million for the SA operations. The impairment results from a lower than expected life-of-mine profit, due to the reduction in the US dollar gold and silver prices assumptions and Hidden Valley's poor production performance.

#### Other items in Cost of Sales

Other items in Cost of Sales for the June 2013 quarter includes a change in estimate of the value of static gold in lock-up and other stockpiles of R29 million and restructuring costs of R39 million, following the introduction of voluntary retrenchment packages in South Africa and the restructuring at the Hidden Valley operation. Offsetting this is a net credit of R40 million for rehabilitation following the reduction of the rehabilitation liability, primarily as a result of the rehabilitation projects in the Free State area.

#### Other expenses

Included in other expenses in the June 2013 quarter is a loss of R161 million for the foreign exchange movement (March 2013:

R150 million) on the US\$ denominated syndicated facility, resulting from the Rand weakening from US\$/R9.22 at 31 March 2013 to US\$/R9.98 at 30 June 2013. Also included is an amount of R23 million for the once-off share-based payment expense related to the Phoenix transaction.

#### Deferred tax

A deferred tax expense of R547 million was recorded following the derecognition of the Hidden Valley deferred tax asset during the June 2013 quarter, as it is no longer deemed recoverable in the current gold price environment.

#### Loss per share

Total basic loss per share increased in the June 2013 quarter from 29 SA cents to 809 SA cents per share. Total headline loss per share increased from 47 SA cents to 186 SA cents per share.

### YEAR ON YEAR

#### Exploration expenditure

Exploration expenditure for the year ended 30 June 2013 increased to R673 million compared to R500 million for the previous year, mainly due to R652 million spent on the PNG projects. Expenditure on resource definition drilling amounted to R233 million, exploration amounted to R251 million, while the feasibility studies accounted for R168 million of the total for the year. These expenses are expected to decrease in future as a result of the optimisation process reductions agreed to by both the joint venture partners.

#### Profit from discontinued operations

Profit from discontinued operations for the year ended 30 June 2013 includes the group profit of R102 million recorded on the sale of Evander in the March 2013 quarter, following the fulfilment of all conditions

## Results for the fourth quarter and year ended 30 June 2013

precedent. The remaining R212 million represents profits for Evander for the eight months ended February 2013. Included in the amount for the year ended 30 June 2012 is the profit on sale of Evander 6 and Twistdraai to Taung Gold Limited of R230 million (before tax).

### Loss per share

Total basic loss per share amounted to 548 SA cents in the year ended 30 June 2013, compared to earnings of 614 SA cents per share in the previous year. Total headline earnings per share decreased from 565 SA cents to 47 SA cents per share.

## Operational overview

### GROUP OPERATIONAL RESULTS FOR THE QUARTER ENDED 30 JUNE 2013

#### Continuing operations

Indicator	Units	June 2013	March 2013	% variance
Underground tonnes	000	1 592	1 381	15
Surface tonnes	000	3 174	3 005	6
<b>Total tonnes</b>	<b>000</b>	<b>4 766</b>	<b>4 386</b>	<b>9</b>
Underground grade	g/t	4.37	4.50	(3)
Surface grade	g/t	0.51	0.49	4
<b>Total grade</b>	<b>g/t</b>	<b>1.80</b>	<b>1.76</b>	<b>2</b>
<b>Gold produced</b>	<b>Kg</b>	<b>8 588</b>	<b>7 699</b>	<b>12</b>
<b>Cash operating costs</b>	<b>R/kg</b>	<b>351 109</b>	<b>362 491</b>	<b>3</b>
<b>Operating profit</b>	<b>R'000</b>	<b>639 220</b>	<b>821 283</b>	<b>(22)</b>

Gold production improved by 12% quarter-on-quarter to 8 588kg largely due to a 9% increase in tonnes milled and a 2% increase in total recovered grade to 1.80g/t.

Underground grade decreased by 3% quarter on quarter to 4.37g/t due to the lock-up of gold at Kusasalethu and the marginally lower plant call factor in Harmony One plant which treats the majority of the tonnes in the Free State region. Increased focus remains on the top 20 high grade panels at each operation, the quality of the sweepings, stoping width and off reef mining discipline to ensure an increase in grades and output.

Cash operating costs improved by 3% to R351 109/kg from the previous quarter. Total cash operating costs at all the shafts increased during the quarter, due to higher electricity tariffs – which includes one month of winter tariffs and an increased rate since April's official increase – an increase in bonuses due to higher production outputs and an increase in plant costs due to higher volumes milled.

#### Kusasalethu

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	212	33	>100
Grade	g/t	3.25	1.48	>100
Gold produced	kg	688	49	>100
Cash operating costs	R/kg	577 337	6 564 347	91
Operating loss	R'000	(121 535)	(285 680)	57

The phased re-opening process of employees returning to Kusasalethu, post its temporary closure, was concluded on 26 April 2013. Every employee signed the code of conduct, received training on the

### Borrowings

Total borrowings increased by R722 million to R2 538 million in the year ended 30 June 2013. This is due to a total drawdown of US\$80 million (R678 million) and a foreign exchange translation loss of R351 million recorded on the US\$ syndicated facility in the year ended 30 June 2013. This was partially offset by the total repayment of R305 million made during the year ended 30 June 2013 on the rand facilities.

guarantees and undertakings agreed to in the agreement, and underwent health and safety inductions. Daily operations are peaceful and productive.

During the June 2013 quarter, Kusasalethu produced 688kg of gold at a recovered grade of 3.25g/t. Cash operating cost improved to R577 337/kg, due to increased gold production. Normalised cost levels in R/kg are however only expected in the coming quarter.

The operating loss decreased quarter on quarter to R122 million, due to increased gold production.

#### Doornkop

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	242	249	(3)
Grade	g/t	3.55	3.60	(1)
Gold produced	kg	859	897	(4)
Cash operating costs	R/kg	332 516	295 429	(13)
Operating profit	R'000	79 158	150 231	(47)

Doornkop's recovered grade remained stable at 3.55g/t while tonnes milled decreased by 3% quarter on quarter to 242 000t. The decrease in tonnes was due to illegal labour disruptions during the quarter, lasting about four days, resulting in a 4% decrease in gold production to 859kg. The appropriate action was taken regarding the labour unrest and no further disruptions were reported during the quarter.

Lower gold production and an increase in electricity, plant and stores costs during the quarter, resulted in a 13% increase in operating costs to R332 516/kg, impacting on the operating profit quarter on quarter.

#### Phakisa

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	133	109	22
Grade	g/t	4.38	4.44	(1)
Gold produced	kg	583	484	20
Cash operating costs	R/kg	444 168	505 324	12
Operating profit	R'000	(8 941)	(18 147)	51

Phakisa had an improved production quarter despite the underground fire which resulted in a mine stoppage of ten days, followed by a gradual start-up.

Tonnes milled increased by 22% quarter on quarter to 133 000t while recovered grade remained stable at 4.38g/t. Gold produced increased by 20% to 583kg. Cash operating costs improved by 12% to R444 168/kg, due to the increase in gold production. The remedial work at Freddie's No. 3 ventilation shaft is on track and is expected to be completed by the end of calendar year 2013.

### Tshepong

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	211	262	(19)
Grade	g/t	3.86	3.93	(2)
Gold produced	kg	815	1 029	(21)
Cash operating costs	R/kg	418 310	340 586	(23)
Operating profit	R'000	2 069	131 961	(98)

During the June 2013 quarter, gold production was 21% lower quarter on quarter at 815kg, due to several labour disruptions, as well as the fire at Phakisa mine, (a linked underground section was halted for ten days due to the impact of the Phakisa fire in this section). These issues have been resolved and Tshepong should perform better in the next quarter.

Cash operating costs for the quarter increased in line with the decrease in gold production to R418 310/kg resulting in a lower operating profit of R2 million for the quarter.

### Masimong

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	210	181	16
Grade	g/t	4.00	4.41	(9)
Gold produced	kg	839	799	5
Cash operating costs	R/kg	289 795	287 596	(1)
Operating profit	R'000	114 723	144 950	(21)

Gold production increased by 5% to 839kg quarter on quarter, due to a 16% increase in tonnes milled to 210 000t. The recovered grade decreased by 9% to 4.00g/t and the management team has undertaken to focus more on clean mining during the next quarter.

Cash operating costs increased slightly to R289 795/kg due to the increase in electricity tariffs.

Masimong recorded an operating profit of R115 million during the quarter, compared to R145 million during the March 2013 quarter.

### Hidden Valley (held in Morobe Mining Joint Ventures – 50% of attributable production reflected)

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	457	440	4
Grade	g/t	1.58	1.34	18
Gold produced	kg	722	591	22
Cash operating costs	R/kg	487 898	515 012	5
Operating loss	R'000	(52 066)	(20 924)	>(100)

Gold production increased by 22% from 591kg in the previous quarter to 722kg, while silver production decreased with 7% from 205 651oz to 191 429oz. Gold production increased due to improved grades delivered to the mill and improved recoveries in the treatment plant, which yielded an 18% increase in recovered grade at 1.58g/t for the quarter. The increase in tonnes milled of 4% quarter-on-quarter to 457 000t, is due to improved mobile fleet availability and an improvement in management of the fleet in the pit.

The main reason for the decrease in silver production is that the over land conveyor was not operating for most of the quarter and more ore was processed out of the Hamata pit which is closer to the plant, but has a low silver content.

Cash operating costs improved quarter on quarter by 5% to R487 898/kg, due to higher gold production.

The operating loss for the quarter of R52 million was as a result of the lower gold price received and the increase in total cash operating costs.

The crusher upgrade was wet commissioned on the 20 June 2013. Good progress was made with the performance testing of the system. This will decrease the expected ore movement cost per ton for the coming quarter.

The restructuring of the joint venture management structure to meet both the financial and strategic objectives of the business progressed well during the past quarter. The following major cost saving initiatives will continue to reduce the cash cost per ounce during the September 2013 quarter:

- continuation of organisational restructuring started in the June 2013 quarter;
- eliminating the need for truck haulage to the treatment plant with the commissioning of the upgraded crusher and OLC system;
- re-negotiation of all major contracts.

### Target 1

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	179	182	(2)
Grade	g/t	5.01	5.02	(0.2)
Gold produced	kg	897	913	(2)
Cash operating costs	R/kg	281 223	248 585	(13)
Operating profit	R'000	147 189	195 795	(25)

Gold production at Target 1 is slightly down at 897kg, mainly due to lower tonnes milled of 179 000t compared to 182 000t during the previous quarter. Grade remained flat at 5.01g/t. Cash operating costs increased by 13% quarter on quarter to R281 223/kg, due to higher electricity costs and maintenance costs on the equipment and the fridge plants.

Despite the higher costs and the lower gold price received, Target 1 recorded an operating profit of R147 million during the quarter.

### Bambanani

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	55	34	62
Grade	g/t	11.16	8.76	27
Gold produced	kg	614	298	>100
Cash operating costs	R/kg	201 467	388 477	48
Operating profit	R'000	143 445	23 983	>100

Gold production more than doubled from 298kg in the previous quarter to 614kg in the June 2013 quarter. The increase in production comes from both a 27% increase in grade to 11.16g/t and a 62% increase in tonnes milled to 55 000t.

Bambanani is Harmony's lowest cash operating cost producer for the June 2013 quarter, with a 48% decrease in cash operating costs to R201 467/kg, mainly due to higher gold production. As a result, operating profit was substantially higher at R143 million.

## Results for the fourth quarter and year ended 30 June 2013

### Joel

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	151	139	9
Grade	g/t	4.63	5.60	(17)
Gold produced	kg	699	779	(10)
Cash operating costs	R/kg	243 308	207 107	(17)
Operating profit	R'000	133 094	186 638	(29)

Although tonnes milled increased by 9% quarter-on-quarter to 151 000t, grade declined by 17% to 4.63g/t, resulting in a 10% decrease in gold production to 699kg.

Joel is the second lowest cost producer in the company at R243 308/kg. Despite lower gold production, Joel recorded an operating profit of R133 million.

### Unisel

Indicator	Units	June 2013	March 2013	% variance
Tonnes milled	000	114	99	15
Grade	g/t	3.75	4.28	(12)
Gold produced	kg	427	424	1
Cash operating costs	R/kg	331 747	318 934	(4)
Operating profit	R'000	40 262	63 267	(36)

Gold production at Unisel increased slightly to 427kg. The 12% decrease in recovered grade was off-set by the 15% increase in tonnes milled at 114 000t for the quarter. The decrease in grade was mainly as a result of lower face grades and an increase in stoping widths.

Unisel recorded an operating profit of R40 million during the quarter, with cash operating costs 4% higher at R331 747/kg as a result of higher electricity, stores and plant costs.

### Target 3

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	73	81	(10)
Grade	g/t	5.74	5.05	14
Gold produced	kg	419	409	2
Cash operating costs	R/kg	297 759	308 220	3
Operating profit	R'000	61 329	65 148	(6)

Gold production increased by 2% quarter on quarter, despite the 10% decrease in tonnes milled at 73 000t.

Recovered grade was 14% higher quarter on quarter at 5.74g/t, as a result of the increase in face grades and an improvement in the mine call factor.

The operating profit generated was 6% lower at R61 million quarter on quarter, as a result of the lower gold price received. Cash operating costs were 3% lower at R297 759/kg, due to increased gold production.

### Steyn 2

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	12	12	–
Grade	g/t	10.08	11.58	(13)
Gold produced	kg	121	139	(13)
Cash operating costs	R/kg	257 736	228 295	(13)
Operating profit	R'000	19 868	33 485	(41)

Tonnes milled remained flat quarter on quarter at 12 000t. Recovered grade decreased to 10.08g/t from a 30% increase recorded in the previous quarter to a 13% decrease in the current quarter. A further emphasis has been placed on clean mining to improve grades going forward.

Operating profit decreased to R20 million mainly due to the 13% decrease in gold production to 121kg.

### TOTAL SOUTH AFRICAN SURFACE OPERATIONS

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	2 717	2 565	6
Grade	g/t	0.33	0.35	(6)
Gold produced	kg	905	888	2
Cash operating costs	R/kg	324 401	312 931	(4)
Operating profit	R'000	80 625	150 576	(46)

Tonnes milled at the South African surface operations increased by 6% to 2 717 000t, mainly due to higher volumes at Phoenix – resulting in a 2% increase in gold production quarter on quarter from 888kg of gold to 905 kg of gold.

Recovered grade decreased from 0.35g/t to 0.33g/t quarter-on-quarter, mainly due to lower grades at Phoenix and the surface dumps.

Cash operating costs for the June 2013 quarter were 4% higher at R324 401/kg, while operating profits decreased quarter-on-quarter to R81 million, mainly due to lower gold prices received.

### Kalgold

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	367	332	11
Grade	g/t	0.97	0.93	4
Gold produced	kg	357	309	16
Cash operating costs	R/kg	320 417	354 346	10
Operating profit	R'000	27 082	45 459	(40)

Kalgold's gold production increased by 16% quarter-on-quarter to 357kg, mainly due to an 11% increase in tonnes milled to 367 000t in the June 2013 quarter, supported by a 4% increase in recovered grade at 0.97g/t.

Cash operating costs improved by 10% from the previous quarter to R320 417/kg, due to higher gold production. Total cash operating costs increased due to higher plant costs following maintenance.

Operating profit was lower at R27 million, due to a lower gold price received and an increase in total cash operating costs quarter-on-quarter.

### Phoenix (tailings)

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	1 471	1 325	11
Grade	g/t	0.14	0.16	(13)
Gold produced	kg	202	216	(6)
Cash operating costs	R/kg	317 396	254 986	(24)
Operating profit	R'000	24 005	45 371	(47)

Tonnes treated increased by 11% to 1 471 000t, due to the early commissioning of the St Helena cyclone dam. The decrease in recovered grade to 0.14g/t is as a result of lower dissolution during the quarter. Gold production was 6% lower at 202kg as a result. Phoenix's operating profit decreased from R45 million to R24 million, due to lower gold production and higher cash operating costs as a result of higher than planned reagents and plant rehabilitation costs during the quarter.

### Surface dumps

Indicator	Units	June 2013	March 2013	% variance
Tonnes	000	879	908	(3)
Grade	g/t	0.39	0.40	(3)
Gold produced	kg	346	363	(5)
Cash operating costs	R/kg	332 601	312 157	(7)
Operating profit	R'000	29 538	59 746	(51)

Gold production was 5% lower at 346kg during the quarter. Preference was given at the plants to the increased ore deliveries from the underground operations and therefore less capacity was available for surface dumps.

A R30 million operating profit was recorded during the quarter, much lower than the March 2013 quarter, due to lower gold production, a lower gold price received and higher cash operating costs.

### MINERAL RESOURCES AND MINERAL RESERVES AS AT 30 JUNE 2013

Harmony's statement of Mineral Resources and Mineral Reserves as at 30 June 2013 is produced in accordance with the South African Code for the Reporting of Mineral Resources and Mineral Reserves (SAMREC Code) and the Australian Code (JORC Code). The Mineral Resources are reported inclusive of the Mineral Reserves.

The Company's attributable gold equivalent Mineral Resources are declared as 147.7 million ounces (Moz) as at 30 June 2013, a 1.7% decrease year-on-year from the 150.2Moz declared on 30 June 2012. The 1.7% decrease collectively represents mined Resources during the year, together with some geology changes. The gold Resource ounces in South Africa represent 72%, while Papua New Guinea (PNG) gold and gold equivalent ounces represent 28% of Harmony's total Resources as at 30 June 2013.

As at 30 June 2013, Harmony's Mineral Reserves amounted to 51.5Moz of gold, a 2.8% decrease from the 52.9Moz declared on 30 June 2012. The 2.8% decrease collectively represents mined Reserves during the year, change in surface sources Reserves, together with some scope changes. The gold Reserve ounces in South Africa represent 58% while PNG gold and gold equivalent ounces represent 42% of Harmony's total Reserves as at 30 June 2013.

There were no changes in the Reserves and Resources of Wafi-Golpu (jointly held by Harmony and Newcrest Mining Limited in a 50/50 joint venture) since the pre-feasibility study was completed in 2012 (refer Figure 1 below). On a 100% basis, Golpu continues to host a high grade, quality reserve of 450Mt, containing 12.4Moz of gold and 5.4 million tonnes (Mt) of copper (38.9Moz on a gold equivalent\* basis).

The company's detailed Resources and Reserves declaration will be published in the FY13 Annual Report, which will be made available to shareholders towards the end of October 2013.

**Figure 1.** Geographical distribution of Mineral Resources and Mineral Reserves as at 30 June 2013

#### Gold resources including gold equivalent\* (30 June 2013)

#### Gold reserves including gold equivalent\* (30 June 2013)

\* 30 June 2013 Gold equivalent based on US\$1 400/oz Au, US\$3.10/lb Cu and US\$23.00/oz Ag at 100% recovery for all metals

In converting the Mineral Resources to Mineral Reserves the following parameters were applied:

- a gold price of R400 000/kg;
- the Hidden Valley operations and Wafi-Golpu project in the Morobe Mining Joint Venture used prices of US\$1 250/oz Au, US\$21/oz Ag, US\$15/lb Mo and US\$3.10/lb Cu. For Wafi-Golpu, gold equivalent ounces are calculated assuming a US\$1 400/oz Au and US\$3.10/lb Cu and for Hidden Valley US\$23.00/oz Ag was assumed with 100% recovery for all metals.

Harmony's South African Resources to Reserves conversion process as well as four operations Target 1, Masimong, Kalgold and the Phoenix Project were reviewed and audited by SRK Consulting Engineers and Scientists for compliance with the South African Code for Reporting Mineral Resources and Mineral Reserves – SAMREC Code and Sarbanes-Oxley requirements. Harmony's Papua New Guinea Mineral Resources and Mineral Reserves have been independently reviewed by AMC Consultants Pty Ltd for compliance with the standards set out in the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code.

The company's detailed Resources and Reserves declaration will be published in the FY13 Annual Report, which will be made available to shareholders towards the end of October 2013. We use certain terms in this document such as 'Measured', 'Indicated' and 'Inferred' Resources, which the United States (US) Securities and Exchange Commission (SEC) guidelines strictly prohibit US-registered companies from including in their filings with the SEC. US investors are urged to closely consider the disclosure in our Form 20-F.

**Note:** Au= gold; Cu = copper; Ag = Silver

## Results for the fourth quarter and year ended 30 June 2013

### MINERAL RESOURCES STATEMENT

The following tables summarise the Mineral Resources for the South African and Papua New Guinea operations and projects:

#### SA underground operations

	Tonnes (Mt)	g/t	Gold (‘000 Kg)	Gold (‘000 Oz)
<b>Measured</b>	97.0	8.23	799	25 684
<b>Indicated</b>	98.2	8.33	818	26 296
<b>Inferred</b>	190.7	7.07	1 348	43 337
<b>Total</b>	385.9	7.68	2 965	95 317

#### SA surface operations

	Tonnes (Mt)	g/t	Gold (‘000 Kg)	Gold (‘000 Oz)
<b>Measured</b>	382.3	0.30	116	3 743
<b>Indicated</b>	680.6	0.25	172	5 518
<b>Inferred</b>	107.6	0.64	68	2 205
<b>Total</b>	1 170.5	0.30	356	11 466

#### South Africa total

	Tonnes (Mt)	Gold (‘000 Kg)	Gold (‘000 Oz)
<b>Measured</b>	479.3	915	29 427
<b>Indicated</b>	778.8	990	31 814
<b>Inferred</b>	298.3	1 416	45 542

## Exploration highlights

### INTERNATIONAL (PAPUA NEW GUINEA)

#### Morobe Mining Joint Venture (MMJV) (50% Harmony)

##### Wafi-Golpu

##### Remodelling and future of the Wafi-Golpu project

Further to what is said in the chief executive's review about this project on page 4, the Golpu and Wafi deposit remodelling incorporating the latest ore body data has been completed. This scope included the estimation of metallurgical recovery for all processing options available which are dependent on oxidation, rock-type and metal grades.

During the quarter a total of 12 237.7m were drilled. The rig fleet has decreased from 7 to 5 rigs during the month in preparation for the plan of 4 rigs operating on the project in FY14. Another drill rig will be demobbed by the end of the first week of July. Two rigs are currently assigned to the Golpu Resource Definition program, 2 rigs currently assigned to brownfields exploration and 1 rig is completing the final decline path geotechnical hole, after which it will be demobbed.

Drilling in the June 2013 quarter targeted the Golpu Upper Mine Zone volume which demonstrated grade continuity and extended porphyry

content in the south western quadrant, between Golpu and Golpu West. Intercepts include:

- WR459 615.8m @ 0.57g/t Au, 0.54% Cu from 490m
- WR464 546m @ 0.43g/t Au, 0.84% Cu from 224m
- WR474 752m @ 0.48g/t Au, 0.91% Cu from 118m
- WR475 1 014m @ 0.34g/t Au, 0.68% Cu from 274m
- WR476 566m @ 0.70g/t Au, 1.37% Cu from 548m
- WR479^ 1 084m @ 0.71g/t Au, 1.31% Cu from 114m
- WR481 646m @ 0.53g/t Au, 0.81% Cu from 125m
- WR484^ 504m @ 0.48g/t Au, 1.15% Cu from 179m

^ Partial result reported

Since the Golpu Mineral Resource in June 2012, the majority of drilling has been focussed in the upper mineralised zone with 20 holes for 22 194m. This program has extended high grade mineralisation 50m to the north and demonstrated high grade continuity of multiple porphyry intercepts enabling the northern porphyry shape to be defined a single north-south trending intrusive complex.

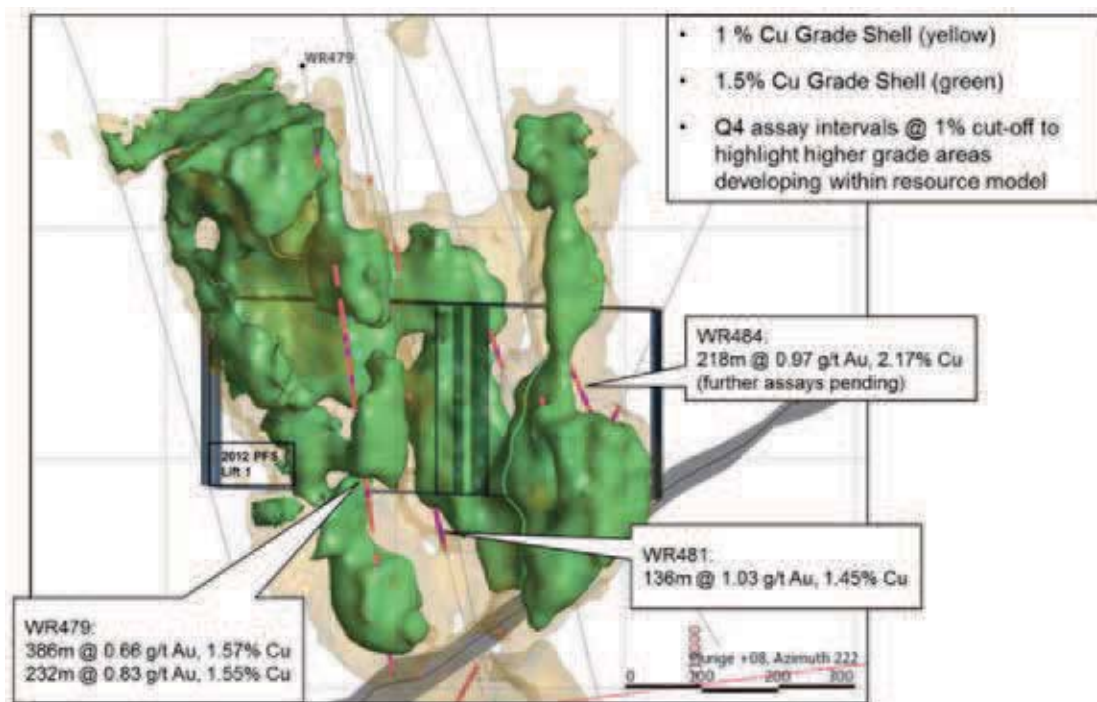

Figure 1. Figure showing the Upper Mine intercepts Results

The results of the combined drilling indicate increased gold and copper grades immediately above the Reid Fault in the vicinity of the Upper Mine Zone (Lift 1 PFS volume). The drill spacing in this area is now approximately 100m, enabling detailed geological interpretations and modelling.

June 2013 Quarter intercepts in the lower mineralised volume include:

- WR472W\_1 1 240m @ 0.43 g/t Au, 0.55% Cu from 1 008m

WR472W\_1 was completed to 2 250.1m, the deepest hole drilled to date at Golpu. The hole demonstrated continuity of porphyry and associated mineralisation throughout the PFS lift 2/3 volumes and beyond to the 3450mRL, 150m deeper than any previous drilling.

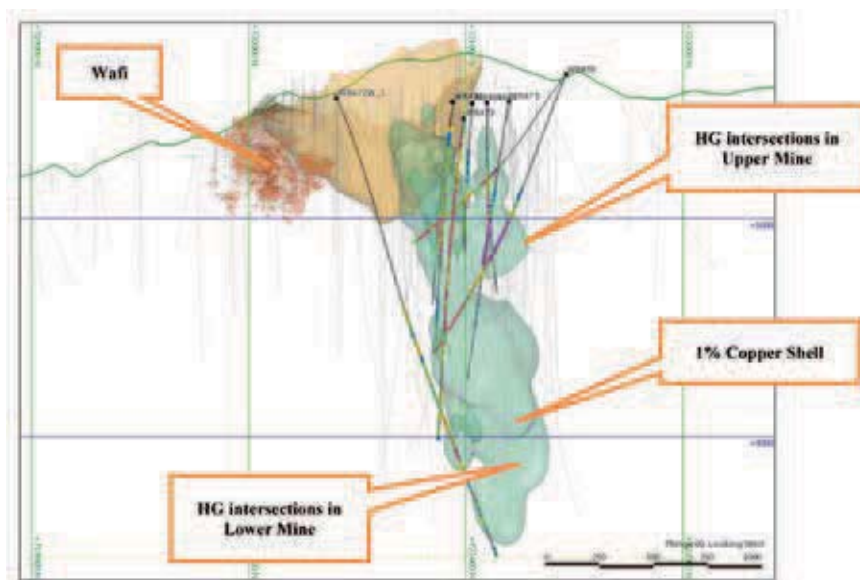

Since the Golpu June 2012 Mineral Resource update 4 holes for 8 107m have been drilled targeting the lower mineralised volume below the Reid Fault. The holes demonstrate vertical continuity of porphyry and associated mineralisation at depth. Mineralisation remains open below the Lower Mine Zone (PFS lift 3 volume).

Brownfields drilling continued in two areas testing shallow epithermal high grade gold targets around the defined diatreme margin and porphyry copper-gold mineralisation at the Miapili prospect, 600m NE of Golpu.

## Results for the fourth quarter and year ended 30 June 2013

The mineralisation style in WR483 is similar to previous Northern Zone holes WR392, WR397 and WR426. Mineralisation is quartz-carbonate-pyrite veining in strongly argillic altered sediment. The intercepts are 100m north and 100m west of WR392 and WR426.

**Figure 2.** Figure showing the Upper and Lower Mine intercepts from the June 2013 quarter

Brownfields exploration assay results this quarter from the Northern Zone epithermal prospect returned multiple high grade gold intercepts from WR483:

WR483 12m @ 1.12g/t Au from 98m

WR483 32m @ 3.16 g/t Au from 272m

WR483 20m @ 7.38 g/t Au from 320m

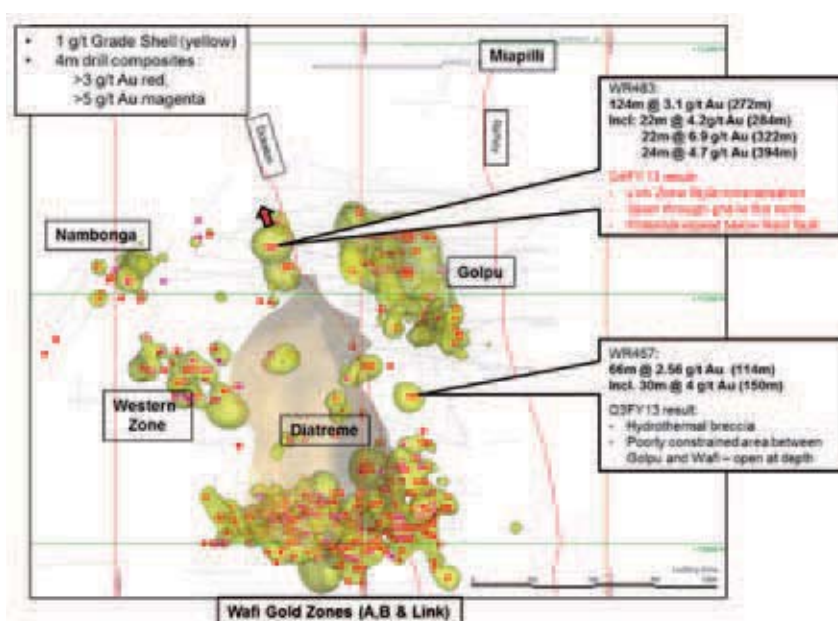

WR483 22m @ 4.83 g/t Au from 364m

The Northern Zone appears to be a Wafi Link Zone analogue with similar 30° – 35° east dipping orientation. Based on the current four

intercepts, Northern Zone has dimensions of at least 100m (east-west) and 200m (north-south) and remains open to the north. As with Link Zone, Northern Zone exhibits multiple high grade intercepts within a broad gold zone.

Drilling at Miapili is underway to test for porphyry copper-gold mineralisation to the west and below WR315 (534m @ 0.34 g/t Au and 0.08% Cu). Assays are not yet available.

The intersection of porphyry mineralisation in this hole would extend the Golpu northwesterly trend and currently represents the highest potential for a new porphyry discovery within the Wafi Golpu project.

**Figure 3.** New gold intersections in the Northern Zone indicate a potential high grade Link Zone like structure

The accompanying notes are an integral part of these condensed consolidated financial statements.

All items in Other comprehensive income will be reclassified subsequently to profit or loss when specific conditions are met.

The condensed consolidated provisional financial statements (condensed consolidated financial statements) have been prepared by Harmony Gold Mining Company Limited's corporate reporting team headed by Mr Herman Perry, supervised by the financial director, Mr Frank Abbott. They have been approved by the Board of Harmony Gold Mining Company Limited. The condensed consolidated financial statements for the 12 months ended 30 June 2013 were reviewed by the group's external auditors, PricewaterhouseCoopers Incorporated (see note 18).

1. Includes capital expenditure for Wafi-Golpu and other international projects of R133 million in the June 2013 quarter (March 2013: R148 million) (June 2012: R122 million) and R537 million in the 12 months ended 30 June 2013 (June 2012: R314 million).

The accompanying notes are an integral part of these condensed consolidated financial statements.

## NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 30 June 2013 (Rand)

### 1. Accounting policies

#### Basis of accounting

The condensed consolidated provisional financial statements are prepared in accordance with the requirements of the JSE Limited Listings Requirements for provisional reports and the requirements of the Companies Act of South Africa. The Listings Requirements require provisional reports to be prepared in accordance with the framework concepts, the measurement and recognition requirements of International Financial Reporting Standards (IFRS), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and contain the information required by IAS 34 Interim Financial Reporting. The accounting policies applied in the preparation of the condensed consolidated provisional financial statements are in terms of IFRS and are consistent with those applied in the previous consolidated annual financial statements.

### 2. Cost of sales

	Quarter ended			Year ended	
	30 June 2013 (Unaudited)	31 March 2013 (Unaudited)	30 June 2012 (Unaudited)	30 June 2013 (Audited)	30 June 2012 (Audited)
Figures in million					
Production costs – excluding royalty	2 799	2 658	2 623	11 183	9 791
Royalty expense	45	49	16	217	120
Amortisation and depreciation	501	459	548	1 942	1 921
Impairment/(reversal of impairment) of assets <sup>1</sup>	2 733	–	(60)	2 733	(60)

Care and maintenance cost of restructured shafts	16	16	19	68	88
Employment termination and restructuring costs <sup>3</sup>	39	–	11	46	81
Share-based payments <sup>4</sup>	45	95	21	266	87
Other <sup>5</sup>	35	(4)	127	37	126
<b>Total cost of sales</b>	<b>6 173</b>	<b>3 283</b>	<b>3 325</b>	<b>16 468</b>	<b>12 137</b>

1. The impairment in the June 2013 quarter consists of an impairment of R2.68 billion on Hidden Valley, R31 million on St Helena and R27 million on Steyn 2. The net reversal in the June 2012 quarter consists mainly of a reversal of R194 million for Target 1 and an impairment of R126 million on Steyn 2. Refer to note 10 for further detail.
2. The credit in the June 2013 quarter relates to a change in estimate following the annual reassessment. The decrease in the 2012 and 2013 years resulted due to the rehabilitation projects completed in the Free State area during both years.
3. Included in the June 2013 quarter are amounts relating to the restructuring at Hidden Valley and the introduction of voluntary retrenchment packages in South Africa. The amounts for the 2012 financial year relates to restructuring at the Bambanani shaft.
4. Refer to note 3 for details.
5. Included in the June 2013 quarter are amounts relating to the change in estimate of gold in lock-up and other stockpiles. The June 2012 quarter includes amounts relating to the change in estimate of gold in lock-up.

### 3. Share-based payments

This includes the cost relating to the new Employee Share Ownership Plan (ESOP) awards that were granted in August 2012. In terms of the ESOP rules, all employees other than management were awarded a minimum of 100 Scheme Shares and 200 Share Appreciation Rights (SARs), with employees with service longer than 10 years receiving an additional 10%. Both the Scheme Shares and SARs vest in five equal portions on each anniversary of the award. In addition these employees qualify for an additional cash bonus under the SARs in the event that the share price growth is less than R18 per share. The effect of the bonus puts the employees in the position they would have been in had the share price increased by R18 per share since issue date.

Harmony issued 3.5 million shares to the Tlhakanelo Share Trust on 31 August 2012. In addition, 6 817 880 SARs were issued. In terms of IFRS 2, *Share-based Payment*, the SARs includes an equity-settled portion as well as a cash-settled portion related to the cash bonus. The cash-settled portion has been recognised in the balance sheet, the fair value of which will be remeasured at each reporting date. At the annual general meeting on 28 November 2012, the shareholders authorised the acceleration of the vesting from August to March each year.

During the March 2013 quarter, the first portion of the Scheme Shares and SARs awarded in August 2012 vested, resulting in all qualifying employees receiving a minimum value of R1 912 before tax, amounting to a total value of R58 million being distributed in April 2013. During March 2013, new qualifying employees who have not previously received an offer were awarded 80 Scheme Shares and 160 SARs which will vest in four equal portions on each anniversary of the award. A total of 97 040 Scheme Shares and 194 080 SARs were issued by the Tlhakanelo Share Trust for this award.

### 4. Profit on sale of property, plant and equipment

Included in the amount is the transaction for the sale of the Merriespruit South mining right to Witwatersrand Consolidated Gold Resources Limited (Wits Gold) that was completed, resulting in a profit of R60 million during the December 2012 quarter.

## 5. Other expenses – net

- (a) Included in the June 2013 quarter is a foreign exchange translation loss of R161 million (March 2013: R150 million) on the US dollar denominated loan. The effect of foreign exchange changes for the 12 months totals a translation loss of R351 million (June 2012: R45 million). Refer to note 12 for further details.
- (b) On 20 March 2013 Harmony signed transaction and funding agreements to give effect to an empowerment transaction to dispose of 30% of its Free State based Phoenix tailings operation (Phoenix) to BB-BEE shareholders, which includes a free-carry allocation of 5% to a Community Trust that has been created and is currently controlled by Harmony. The transaction closed on 25 June 2013, following the fulfilment of the last condition precedent. In terms of the agreements Phoenix was transferred to a newly incorporated subsidiary (PhoenixCo). The fair value of the net assets for purposes of the transaction was set at R450 million.

The awards to the BEE partners have been accounted for as an in-substance option as the BEE partners will only share in the upside of their equity interest in PhoenixCo until the date the financing provided by Harmony is fully repaid. On this date the options will be exercised. The award of the options to the BEE partners is accounted for as an equity-settled share based payment arrangement. The in-substance options carry no vesting conditions and the fair value of the options of R23 million has been expensed on the grant date, 25 June 2013.

## 6. Impairment of investments

A decline in the fair value of the investment in Witwatersrand Consolidated Gold Resource Limited (Wits Gold) during the year resulted in an impairment of R88 million (2012: R144 million) recorded in the income statement.

## 7. Deferred taxation

The net deferred taxation debit in the income statement in the June 2013 quarter is primarily due to the derecognition of the deferred tax asset amounting to R547 million previously recorded for the Hidden Valley operation.

The net deferred taxation debit in the income statement in the June 2012 quarter is mainly due to the annual reassessment of the Life-of-Mine deferred tax rates amounting to R270 million.

## 8. Disposal groups classified as held for sale and discontinued operations

### *Evander Gold Mines Limited*

Harmony entered into an agreement to sell its 100% interest in Evander Gold Mines Limited (Evander) to a wholly owned subsidiary of Pan African Resources Plc for R1.5 billion, less certain distributions, during May 2012. The last condition was met on 14 February 2013 and the transaction was completed on 28 February 2013. In terms of the agreement Harmony received a distribution of R210 million and a purchase consideration of R1 314 million. A group profit of R102 million was recorded in the March 2013 quarter.

## 9. Earnings and net asset value per share

	Quarter ended			Year ended	
	30 June 2013 (Unaudited)	31 March 2013 (Unaudited)	30 June 2012 (Unaudited)	30 June 2013	30 June 2012 (Audited)

<b>Total headline (loss)/earnings</b>	<b>(804)</b>	<b>(202)</b>	<b>(27)</b>	<b>204</b>	<b>2 432</b>

\* There is no taxation effect on these items

\*\* Write-off of the Hidden Valley deferred tax asset of R547 million is not added back as it is not permitted per the South African Institute of Chartered Accountants Circular on Headline Earnings

#### Net asset value per share

	At 30 June 2013	At 31 March 2013 (Unaudited)	At 30 June 2012 (Audited)
Number of shares in issue	435 289 890	435 257 691	431 564 236
Net asset value per share (cents)	7 422	8 208	7 897

#### 10. Property, plant and equipment and impairment

One of the most significant assumptions that influence the life-of-mine plans and therefore impairment amount is the expected future gold price. During this year's testing, we used a short term gold price of US\$1 250, medium term gold price of US\$1 300 and long term gold price of US\$1 400 per ounce for Hidden Valley and an overall price of R400 000/kg for the South African operations. A 10% decrease in the gold price used in the models would have resulted in an additional impairment at Steyn 2 of R17 million, Target 1 of R350 million and the Hidden Valley operation of R1.96 billion.

#### 11. Investment in Rand Refinery

During the June 2013 quarter, an additional 1.4% interest in Rand Refinery was purchased for R14 million. This is in addition to the 7.16% interest purchased for R72 million in two tranches during the March 2013 and December 2012 quarter. Harmony holds just over 10% interest in Rand Refinery as at 30 June 2013.

## 12. Borrowings

The Nedbank revolving credit facility was repaid in full during the December 2011 quarter and the full R850 million facility is available until December 2013. The balance on Nedbank term facilities at 30 June 2013 is R458 million.

Two drawdowns of US\$40 million each (R330 million and R348 million) were made from the US\$300 million syndicated revolving credit facility during the September and December 2012 quarters, respectively. This takes the drawn level to US\$210 million. The facility is repayable by September 2015.

The weakening of the Rand against the US dollar resulted in a foreign exchange translation loss of R161 million being recorded against the borrowings balance in the June 2013 quarter, in addition to the R150 million recorded in the March 2013 quarter. The effect of foreign exchange changes for the 12 months totals a translation loss of R351 million (2012: R45 million).

## 13. Commitments and contingencies

	At 30 June 2013	At 31 March 2013 (Unaudited)	At 30 June 2012 (Audited)
<b>Figures in million</b>			
<b>Capital expenditure commitments</b>			
Contracts for capital expenditure	416	594	519
Authorised by the directors but not contracted for	1 545	958	2 257
	<b>1 961</b>	<b>1 552</b>	<b>2 776</b>

This expenditure will be financed from existing resources and, where appropriate, borrowings.

### Contingent liability

For a detailed disclosure on contingent liabilities refer to Harmony's annual report for the financial year ended 30 June 2012, available on the group's website ([www.harmony.co.za](http://www.harmony.co.za)). There were no significant changes in contingencies since 30 June 2012, with the exception of the items discussed below.

Following the disclosure made in Harmony's annual report for the financial year ended 30 June 2012 relating to silicosis, Harmony and its subsidiaries, alongside other mining companies operating in South Africa (other respondents) were served with another application to certify a class during January 2013. Harmony, its subsidiaries and other respondents are awaiting a consolidated and supplemented certification application of the two separate applications served.

## 14. Subsequent events

There are no subsequent events to report.

## 15. Segment report

The segment report follows on page 30.

## 16. Reconciliation of segment information to consolidated income statements and balance sheet

	<b>7 409</b>	<b>5 904</b>

\* The reconciliation was done up to the first recognisable line item on the income statement. The reconciliation will follow the income statement after that.

## 17. Related parties

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the group, directly or indirectly, including any director (whether executive or otherwise) of the group. During the year, Harmony shares were purchased by certain directors as set out below:

Graham Briggs	14 347 shares
Frank Abbott	73 900 shares
Ken Dicks	20 000 shares

## 18. Audit review

The condensed consolidated financial statements for the year ended 30 June 2013 on pages 20 to 30 have been reviewed in accordance with the International Standards on Review Engagements 2410 – “Review of interim financial information performed by the independent Auditors of the entity” by PricewaterhouseCoopers Inc. Their unqualified review opinion is available for inspection at the company’s registered office.
