Q4 FY14

Results for the fourth quarter FY14 and year ended 30 June 2014

KEY FEATURES

Year on year

- ↗ 3% increase in gold production to 36 453kg (1.17moz)
- ↗ 5% improvement in underground recovered grade at 4.77g/t
- ↗ 4% reduction in all-in sustaining costs for the year from R431 745/kg to R413 433/kg; an 18% reduction in US\$ terms from US\$1 522/oz to US\$1 242/oz
- ↗ 30% reduction in total capital expenditure from R3.6bn (US\$412m) to R2.5bn in FY14 (US\$244m)
- ↗ Net loss of R1.27 billion was recorded in FY14 compared to a net loss of R2.35 billion in FY13
 - an impairment of R1.44 billion mainly in respect of the Phakisa decline shaft
 - employment termination and restructuring cost of R274 million in FY14
- ↗ Headline earnings amounted to 26 SA cents per share (2.5 US cents)
 - excluding Rand Refinery loss, headline earnings would be 55 SA cents per share (5.3 US cents)

Quarter on quarter

- ↗ 7% increase in gold production to 8 935kg (287 266oz)
- ↗ All-in sustaining costs remained stable at R428 383/kg (US\$ 1 267/oz)
- ↗ Headline earnings of 30 SA cents per share (2.9 US cents) for the June 2014 quarter

All figures represent continuing operations unless stated otherwise

RESULTS FOR THE FOURTH QUARTER FY14 ENDED 30 JUNE 2014

		Quarter June 2014	Quarter March 2014	Q – on – Q variance %	Year ended June 2014	Year ended June 2013*	% Variance

Competent person's declaration

Harmony reports in terms of the South African Code for Reporting of Exploration Results, Mineral Resources and Mineral Reserves (SAMREC). In South Africa Harmony appoints an ore reserve manager at each of its operations who takes responsibility for the compilation and reporting of mineral resources and mineral reserves at their operations. In PNG, competent persons are appointed for the mineral resources and mineral reserves for specific projects and operations.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

Resources and Reserves South Africa: Jaco Boshoff, BSc (Hons), MSc, MBA, Pr. Sci. Nat., who has 19 years' relevant experience and

is registered with the South African Council for Natural Scientific Professions (SACNASP) and a member of the South African Institute of Mining and Metallurgy (SAIMM).

Resources and Reserves Papua New Guinea: Gregory Job, BSc, MSc, who has 26 years relevant experience and is a member of the Australasian Institute of Mining and Metallurgy (AusIMM).

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited. These competent persons consent to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Mineral Resource and Reserve information as at 30 June 2014 is included in this report.

FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements. These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgement of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions; availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.

Section 45 (5) (a) compliance announcement

ANNOUNCEMENT FOR COMPLIANCE REASONS ONLY: NOTICE, AS REQUIRED IN TERMS OF SECTION 45 (5) (a) OF THE COMPANIES ACT, 71 OF 2008 (THE ACT) FOR THE GRANTING OF FINANCIAL ASSISTANCE

Notice is hereby given, as required in terms of section 45 (5) (a) of the Act that the Board of directors (the Board) of the company at a meeting held on 11 August 2014, authorised the company to provide financial assistance to any 1 (one) or more related or inter-related companies or corporations of the Company and/or to any 1 (one) or more juristic persons who are members of, or are related to, any such related or inter-related company or corporation in terms of section 45 of the Act,

pursuant to the authority granted to the Board by shareholders at the annual general meeting of the company, held on 5 December 2013.

The aggregate financial exposure of the Company in respect of any financial assistance in terms of this resolution shall not exceed R1 billion.

In terms of section 45 (3) (b) of the Companies Act, the Board is satisfied that:

- immediately after providing financial assistance, the Company would satisfy the solvency and liquidity test as set out in section 4 of the Act; and
- the terms under which the financial assistance is proposed to be given under the resolution are fair and reasonable to the Company.

Message from the chief executive officer

1. OUR STRATEGY

We revisit our strategy throughout the year to ensure that it remains relevant and appropriate, while being responsive and adaptive to both internal and external changes. The Harmony board met early in July 2014 to revisit the company strategy.

We believe that Harmony has four key advantages:

- **We continuously regenerate ourselves in order to be efficient miners** – we keep our costs down, ensure future growth and profitability, and are willing to make difficult decisions that will serve our company in the long run. All decisions are made based on our values, with safety being our core value.
- **We are experienced explorers, mine developers and operators in emerging economies.** We have a diversified portfolio as well as a significant exploration land holding in one of the most prospective geological areas in the world (PNG). In addition, we invest time and money into building win-win relationships with our stakeholders that allow us to confidently manage our socio-political environment and earn our social license to operate.
- **We fund our own capital to ensure future growth and profitability** and invest in our assets even during lower gold price cycles, allowing us to have low debt, financial flexibility and be highly geared against the gold price.
- **Golpu is a large resource of high-grade, low cost copper and gold.** A concept study is progressing on a scalable mine, which will require less capital to start up, but has the potential for a long life that will be flexible and adaptable in multiple copper price cycles. We are also de-risking its development thanks to our project development experience, our operational base and support services in PNG and the orebody's high grade zones.

We want Harmony to be safe, highly profitable and generate the cash necessary to underpin the development of Golpu, be a sought-after investment, be robust at any gold or copper price, have a diverse risk portfolio (with exposure to South Africa, PNG, gold and copper) and to continue growing our quality ounces. Our strategy for 2015 to 2020, is to improve our margins through safely delivering on our plans and increase free cash flow through higher grades and cost control; retain a flexible balance sheet; grow our value per share of our PNG assets, complete the Golpu studies and it is our intention to build the Golpu mine. We also intend identifying acquisition opportunities of open pit mines and bulk projects outside South Africa.

Below is a graphic illustration of our pathway to delivering on our strategy – and a scorecard against which our performance can be measured in future.

2. SAFETY

Safety will continue to be Harmony's first priority. Safety workshops are ongoing and we have increased our efforts to communicate safety

messages to all employees. Our messages stress the value of each life and encourage employees to stick to safety standards, to think before they act and to act on their right to withdraw from an unsafe area. High level audits are ongoing; regular underground visits by members of the executive team and management take place and there are full time safety representatives at each mine.

Although we manage our capital expenditure in a conservative manner, it is not done at the expense of safety. Safety comes before production. Our executive team is involved in a number of industry initiatives in which leading practices are applied, which have the potential to improve health and safety performance significantly. Safety is taken seriously at all levels and takes priority in everything we do.

The lost time- and fatality injury frequency rates have shown an improvement quarter on quarter and a number of operations achieved excellent safety results. It is with great sadness though that three employees lost their lives in three separate accidents during the quarter. My heartfelt condolences go to the family, friends and colleagues of:

Moji Augustinus Matela (team leader at Tshepong), Amos Twala (team leader at Bambanani) and Soba Mboyana (winch operator at Masimong).

An independent review of the Harmony safety strategy was conducted during the quarter and actions were implemented based on the recommendations.

More information on how we approach safety can be found in our safety fact sheet at <http://www.harmony.co.za/investors/news-and-events/fact-sheets>. Details on our safety performance for the past year and our targets for the coming financial year can be found in our integrated report, which will be published towards the end of October 2014.

3. INTERNATIONAL MINING INDUSTRY UNDERWRITERS' (IMI) RISK ASSESSMENT

Our mining assets are insured for both business interruption as well as property risk. IMI is a globally recognised market leader in insuring all types of mining, including underground exposures and is one of the lead insurers partaking in Harmony's asset insurance programme. All our mining assets are subject to an annual risk assessment by specialist engineers and IMI's technical team assesses the merits of each and every risk that IMI underwrites.

Harmony commenced with the annual IMI surveys during 2003. Of significance is the continuous improvement in our operations' scores in comparison with IMI's global average score. IMI's 2014 global mining average is calculated based on 390 mining operations surveyed worldwide. 93% of Harmony's operations scored higher than the global average during 2014 in respect of the measures implemented to manage property and machinery risks. Overall, based on IMI's insurability matrix, a steep improvement in our operations' overall property risk management has been evident especially over the past 3 years. This is indicative of the continued capital investment in our infrastructure to maintain safe operating conditions.

Our South African asset portfolio is subject to routine maintenance which is facilitated through an electronic system, as well as systemised continuous condition monitoring protocols. We continue to invest in security upgrades, metallurgical plant upgrades as well as the upgrade and continuous maintenance of our existing asset portfolio.

4. GOLD MARKET

Harmony remains bullish about gold in the long term. Following the sharp price decline during 2013, capital expenditure in the gold industry has been reduced and many projects have been stalled or delayed. This is expected to lead to a reduction in world gold production, possibly from as early as 2015. Demand from central banks, especially in the East, is increasing and the long term demand trend for gold bars and coins is rising with a notable increase in demand from the East.

In addition, total exchange traded funds' holdings have stabilised and physical demand rebounds strongly when the price declines. This confirms gold's long history as an investment tool and store of value. It remains a secure investment and while the price may fluctuate, gold will always be in demand.

The average rand gold price received decreased from R454 725/kg in financial year 2013 (FY13) to R432 165/kg in financial year 2014 (FY14). The decrease was the result of a 19% decrease in the US dollar gold price received for FY14 – from US\$1 603/oz to US\$1 299/oz. The decrease in the US dollar gold price was partially offset by the weakening of the rand against the US dollar in FY14 to R10.35/US\$ (R8.82/US\$ in FY13).

5. OPERATIONAL RESULTS

Year on year

Gold production for FY14 increased by 3% to 36 453kg, compared to 35 374kg for financial year 2013, with a 4% decrease in all-in sustaining costs from R431 745/kg in FY13, to R413 433/kg in FY14.

The following operations showed marked improvements year on year:

- Kusasalethu (+1 954kg) increased its recovered grade by 7% from 3.85g/t to 4.11g/t. The previous year was severely affected by strikes and the increase in gold production in FY14 indicates the beginning of a return to normal production levels.
- Bambanani (+970kg) increased its recovered grade by 28% to 12.50g/t, while tonnes milled increased by 26% year on year, as the shaft pillar mining begins to ramp up.
- Hidden Valley (+648kg) had a significant turn around in its performance during FY14. A 15% improvement in the gold recovery grade was achieved (from 1.43g/t for FY13 to 1.65g/t in the year under review), while 9% more tonnes (at 2 001 000t) were milled during the year.
- Phakisa (+542kg) continues to build up its production, with a 13% increase in tonnes milled at 577 000t year on year. The recovered grade also improved by 9%, from 4.75g/t to 5.16g/t.
- Target 1 (+526kg) had a very good year, with a 5% improvement in recovered grade to 5.83g/t, well above its reserve grade combined with an 8% increase in tonnes milled at 771 000t.

The following operations' year on year performance was less encouraging:

- Doornkop (-1 028kg) – the accident in the March 2014 quarter and the closure of the Kimberley reef section resulted in a 2% decrease in recovered grade to 3.53g/t, while tonnes milled were also adversely affected.
- Masimong (-898kg) underperformed during the year with a 3% decrease in recovered grade and a 23% decrease in tonnes milled (from 868 000t to 670 000t).
- Joel (-893kg) suffered losses due to the shaft bottom that was flooded. Although this has been rectified, Joel's recovery grade was 19% lower year on year at 4.26g/t and in FY14, tonnes milled for FY14 also decreased by 10%.
- Dumps (-376kg) milled 13% less tonnes in FY14 and recovery grade was 18% lower at 0.31g/t (FY13:0.38g/t).
- Target 3's (-213kg) recovered grade decreased by 7% year on year (from 5.03g/t to 4.69g/t) while tonnes milled decreased by 7% to 301 000t.
- Kalgold (-170kg) recorded a lower recovery grade for FY14 at 0.79g/t and throughput increased by 5% to 1 472 000t.

Production profit for FY14 was R3.8 billion compared to R4.6 billion in FY13, mainly due to a 5% decrease in the rand gold price received and a 4% (R495 million) increase in cash operating costs for FY14.

Operational capital expenditure for FY14 decreased by 19% to R2.5 billion as planned, compared to R3.1 billion in FY13, mainly due to a decrease in capital expenditure at Hidden Valley in Papua New Guinea (PNG).

Quarter on quarter

Gold production for the June 2014 quarter increased by 7% (567kg) from 8 368kg in the March 2014 quarter to 8 935kg in the June quarter. All-in sustaining costs remained steady at R428 383/kg.

Production profit for the quarter was R847 million compared to R924 million in the March 2014 quarter, mainly due to a lower rand gold price. The rand gold price received decreased by 3% from R450 528/kg in the March 2014 quarter to R435 775/kg in the June 2014 quarter. The decrease was as a result of the rand dollar exchange rate strengthening by 3% against the US dollar to R10.51/US\$. The US dollar gold price received for the June 2014 quarter of \$1 289/oz, was slightly lower than in the March quarter 2014.

Cash operating costs increased by 6% (R180 million) in the June 2014 quarter, mainly due to an increase in consumables as well as higher winter electricity tariffs for the South African operations.

Capital expenditure for the June 2014 quarter increased by 17% to R676 million, compared to R579 million in the March 2014 quarter, mainly at the South African underground operations.

6. OUR FY15 BUSINESS PLANS

We completed our business plans for FY15 in August 2014. Particular focus was placed on the following:

- improving operating margins
- robust and realistic operating planning
- increasing free cash flow through higher grades and cost control
- capital expenditure which ensures returns are made within a reasonable period of time.

We believe that our FY15 business plans adhere to the factors set out above. Every effort will be made to ensure that our performance exceeds market expectations.

7. FINANCIAL RESULTS

Year on year

Revenue

The 4% increase in gold sold from 34 970kg in FY13 to 36 288kg in FY14, was more than offset by a 5% decrease in average gold price received, resulting in a decrease in revenue of R220 million year on year.

Production costs

The annual production cost increase was well contained from R11.3 billion in FY13 to R11.9 billion in FY14, or 5%, despite high electricity and labour cost increases.

Other items in cost of sales

Other items included in cost of sales for the year ended 30 June 2014 include employment termination and restructuring costs of R274 million relating mainly to the voluntary retrenchment packages offered in South Africa and the restructuring at the Hidden Valley operation.

Loss per share

The loss per share of 293 SA cents for the year ended 30 June 2014 reduced from the loss per share of 543 SA cents for the year ended 30 June 2013.

Results for the fourth quarter FY14 and year ended 30 June 2014

Borrowings

Total borrowings increased by R322 million to R2 860 million in the year ended 30 June 2014. This is due to a total drawdown of US\$60 million (R612 million) and a foreign exchange translation loss of R155 million recorded on the US\$ syndicated facility during the year. This was partially offset by the repayment of R467 million made during the year on the Nedbank revolving credit facility.

Quarter on quarter

Impairment of assets

The impairment in the June 2014 quarter consists of an impairment of R1.38 billion in respect of Phakisa (includes goodwill of R1.31 billion), R7 million on Steyn 2 and R21 million on St Helena, following the annual life-of-mine reassessment.

The impairment recorded in respect of Phakisa resulted from the combination of a number of factors, including the removal of the decline project from the business plan, new revenue and cost estimates in the business plan, and using higher discount rates as determined by market parameters.

(Loss)/profit from associates

The June 2014 quarter includes the provision of the loss related to the inventory discrepancy at Rand Refinery of R127 million.

Deferred taxation

A deferred tax credit of R337 million was recorded following the net decrease in the deferred tax rates year on year for the South African companies.

Net (loss)/profit

The net loss for the June 2014 quarter was R1.22 billion, compared to a net profit of R31 million in the March 2014 quarter, mainly due to the impairment of R1.41 billion recorded.

(Loss)/profit per share

The loss per share of 282 SA cents in the June 2014 quarter reduced from the earnings per share of 7 SA cents in the March 2014 quarter.

Non-current assets and assets of disposal groups classified as held for sale

The sale of the investment in Witwatersrand Consolidated Gold Resources Limited (Wits Gold) was completed during the June 2014 quarter and the consideration for the sale of R51 million was received in April 2014. The accumulated gains of R14 million were reclassified to the income statement and resulted in a profit on disposal.

8. GOLPU

The Golpu resource definition drilling program is now complete for FY14 and there are no new assay results to report this quarter. A conceptual study report on four, high-grade, sub-level cave start-up mine options was completed which has progressed into pre-feasibility study.

Mine options at 2.5 Mtpa and 5 Mtpa were selected for progression to pre-feasibility study level which will be completed when the gated process has been completed toward the end of the calendar year.

9. EMPLOYEE RELATIONS

The labour relations climate in Harmony and in the gold sector has remained relatively stable over the quarter under review.

10. BIO-ENERGY PROJECT

Harmony is implementing a bio-energy project involving the procreation of biocrops on mine-impacted land in the Free State to generate natural gas as a substitute for fossil fuels in the company's Harmony 1 Gold Plant elution and carbon regeneration circuits. Phase 1 of the project aims to deliver 71,000GJ of energy within 18 months with production being ramped up to generate 187,000GJ within 36 months. This project aims to turn mine-impacted land to account by creating a value-adding use for it and, in so doing, promote skills development and job creation for communities and ensure a sustainable legacy in the Free State.

As part of this process, we will convert electrical and polyfuel heating of elution water at our gold plants to biogas heating.

11. IN CONCLUSION

Our strategy is to focus on improving our margins, growing the value per share of our PNG assets and we intend identifying acquisition opportunities outside South Africa. We remain committed to positioning Harmony as a competitive, value focused gold mining company.

Graham Briggs

Chief Executive Officer

Summary update of Harmony's Mineral Resources and Mineral Reserves as at 30 June 2014

Harmony's statement of Mineral Resources and Mineral Reserves as at 30 June 2014 is produced in accordance with the South African Code for Reporting of Exploration Results, Mineral Resources and Mineral Reserves (SAMREC) and the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC).

This report only provides a summary of the update, while the detailed statement of the Mineral Resources and Mineral Reserves will be published in the Integrated Report on 23 October 2014, which will be available at www.harmony.co.za/investors. The Mineral Resources are reported inclusive of the Mineral Reserves. We use certain terms in this summary such as 'Measured', 'Indicated' and 'Inferred' Resources, which the United States' (US) Securities and Exchange Commission (SEC) guidelines strictly prohibit US-registered companies from including in their filings with the SEC. US investors are urged to closely consider the disclosure in our Form 20-F which will also be available after 23 October 2014.

The Company's attributable gold equivalent Mineral Resources are declared as 133.8 million ounces (Moz) as at 30 June 2014, a 9.4% decrease year-on-year from the 147.7Moz declared on 30 June 2013. The 9.4% decrease collectively represents depletion during the year and geology related changes. The gold Resource ounces in South Africa represent 69%, while Papua New Guinea (PNG) gold and gold equivalent ounces represent 31% of Harmony's total gold equivalent Resources as at 30 June 2014.

As at 30 June 2014, Harmony's attributable gold equivalent Mineral Reserves amounted to 49.5Moz of gold, a 3.9% decrease from the 51.5Moz declared on 30 June 2013. The 3.9% decrease collectively represents depletion during the year, a change in Reserves from surface sources together with some scope changes at some of the underground

operations. The gold Reserve ounces in South Africa represent 57% while the PNG gold and gold equivalent ounces represent 43% of Harmony's total Reserves as at 30 June 2014.

There are no changes in the Reserves of Wafi-Golpu (jointly held by Harmony and Newcrest Mining Limited in a 50/50 joint venture) since the pre-feasibility study was completed in 2012. Changes to the Resources are as a result of additional drilling and a more robust geological model. On a 100% basis, Golpu continues to host high grade, quality Reserves of 450Mt, containing 12.4Moz of gold and 5.4 million tonnes (Mt) of copper.

In converting the Mineral Resources to Mineral Reserves the following parameters were applied:

- for the South African assets a gold price of R425 000/kg;
- the Hidden Valley operations and Wafi-Golpu project in the Morobe Mining Joint Venture applied prices of US\$1 250/oz Au, US\$21/oz Ag, US\$15/lb Mo and US\$3.10/lb Cu. For Wafi-Golpu, gold equivalent ounces are calculated assuming a US\$1400/oz Au and US\$3.10/lb Cu and for Hidden Valley US\$23.00/oz Ag with 100% recovery assumed for all metals.

Harmony's South African Mineral Resources were reviewed and audited by SRK Consulting Engineers and Scientists for compliance with SAMREC. The Golpu Mineral Resources were audited by AMC Consultants Pty Ltd for compliance with the standards set out in JORC Code. Other Harmony Papua New Guinea Mineral Resources and Ore Reserves have been reviewed in previous years, but these reviews were not updated for this declaration as there have been no material changes to calculation methodologies.

Note: Au = gold; Cu = copper; Ag = Silver, Mo = Molybdenum

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the year ended 30 June 2014 (Rand)

1. Accounting policies

Basis of accounting

The condensed consolidated financial statements for the year ended 30 June 2014 have been prepared in accordance with IAS 34, Interim Financial Reporting, JSE Listings Requirements, SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, and in the manner required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for the year ended 30 June 2013, which have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting Standards Board.

The following accounting standards, amendments to standards and new interpretations have been adopted with effect from 1 July 2013.

IFRS 7	Amendment – Disclosures – Offsetting Financial Assets and Financial Liabilities
IFRS 10	Consolidated Financial Statements
IFRS 11	Joint Arrangements
IFRS 12	Disclosure of Interests in Other Entities
IFRS 13	Fair Value Measurement
IFRSs	Annual Improvements 2009 – 2011
IAS 19	Employee Benefits (Revised 2011)
IAS 27	Separate Financial Statements (Revised 2011)
IAS 28	Investments in Associates and Joint Ventures (Revised 2011)
IFRIC 20	Stripping Costs in the Production Phase of a Surface Mine

New standards and amendments which have an impact on the condensed consolidated financial statements of the group are described below:

IAS 19 includes a number of amendments to the accounting for defined benefit plans, including actuarial gains and losses that are now recognised in other comprehensive income (OCI). Actuarial gains and losses recognised in OCI will not be recycled to profit or loss. The impact for the group was immaterial for the prior years.

IFRS 11 requires joint operations to be accounted at the group's interest in the assets, liabilities, revenue and expenses of the joint operation. The group only has a joint arrangement in PNG, through its 50% interest in mining and exploration assets located in Morobe province. These operations are classified as joint operations under IFRS 11. The joint operations were previously accounted for by proportional consolidation. Going forward, the group will account for its interest in assets, liabilities, revenue and expenses of these unincorporated joint operations.

IFRIC 20 clarifies the requirements for accounting for costs of stripping activity in the production phase of surface mining. Stripping assets that cannot be attributed to an identifiable component of the orebody will be written off to retained earnings on adoption of IFRIC 20. Refer to note 2 for further details.

2. Change in accounting policies

IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine

IFRIC 20 – Stripping Costs in the Production Phase of a Surface Mine (IFRIC 20) which became effective on 1 January 2013, clarifies the requirements for accounting for the costs of stripping activity in the production phase of surface mining when two benefits accrue: (i) usable ore that can be used to produce inventory; and (ii) improved access to further quantities of material that will be mined in future periods. Harmony has applied IFRIC 20 on a prospective basis from 1 July 2011 in compliance with the transitional requirements of IFRIC 20.

Harmony previously accounted for stripping costs incurred during the production phase to remove waste material by deferring these costs, which were then charged to production costs on the basis of the average life-of-mine stripping ratio.

A stripping activity asset shall be recognised if all of the following are met:

- (i) it is probable that the future economic benefit (improved access to the orebody) associated with the stripping activity will flow to the entity;
- (ii) the entity can identify the component of the orebody for which access has been improved; and
- (iii) the cost relating to the stripping activity associated with that component can be measure reliably.

The stripping asset shall be depreciated over the expected useful life of the identified component of the orebody based on the units of production method.

Where there were no identifiable components of the orebody to which the predecessor asset relates, the asset was written off to retained earnings at the beginning of the earliest period presented. An amount of R54 million was written off to opening retained earnings on 1 July 2011.

The comparative periods presented have been restated. The restatement had no effect on the condensed consolidated cash flow statements.

The results for the years ended 30 June 2013 and 2012 and the financial position at these dates have been audited but the restatement of the results and balances affected by IFRIC 20 have not been audited.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the year ended 30 June 2014 (Rand)

5. Property, plant and equipment and intangible assets

(a) Impairment

One of the most significant assumptions that influence the life-of-mine plans and therefore impairment is the expected gold price. During this year's planning and testing, we used a long term gold price of US\$1 300 per ounce and exchange rates of R10.17/US\$, A\$0.92/US\$ and PGK0.404/US\$. Post-tax real discount rates ranging between 7.03% and 11.56% (2013: 6.21% and 10.20%), depending on the asset, were used to determine the recoverable amounts (generally fair value less costs to sell).

During the 2014 year, an impairment of R1.38 billion was recognised on Phakisa, following a change in the life-of-mine plan during the annual planning process, combined with the factors discussed above. The change resulted after the completion of a feasibility study on the proposed decline shaft, which showed a large amount of capital required, leading to negative cash flows in the short and medium term. Management therefore decided not to proceed with the sinking of the decline shaft. The impairment comprises of R1.31 billion goodwill and R0.07 billion other assets. The recoverable amount of Phakisa is R4.26 billion.

Impairments on Steyn 2 (R36 million) and St Helena (R21 million) were recognised following the decision not to mine these operations in future. The operations were impaired to the recoverable amount of Rnil.

A 10% decrease in the gold price used in the models as well as a 10% decrease in the silver price for Hidden Valley would have resulted in an additional impairment at Kalgold of R23 million, Phakisa R1.0 billion, Target 1 of R 704 million and Hidden Valley of R1.5 billion.

(b) Profit on sale of property, plant and equipment

During May 2014, the ground swap between Joel mine and Sibanye's Beatrix mine was completed, resulting in a non-cash profit being recognised for the difference between carrying value of the Joel portion and the fair value of the Beatrix portion.

6. Investment in associate

Harmony holds a 10.38% share in Rand Refinery Proprietary Limited (Rand Refinery) as at 30 June 2014 and has equity accounted for its share of the profits based on Rand Refinery's most recent available unaudited management accounts.

Rand Refinery implemented a new Enterprise Resource Planning (ERP) system on 1 April 2013 to conduct its financial and management accounting. Since the implementation of the ERP software, the customisation of the software has been problematic with the result that Rand Refinery has not been able to reconcile certain accounts at 30 September 2013 and therefore has not been able to finalise its annual financial statements for the year. Rand Refinery's management team is currently resolving the problems encountered with the ERP software and is in the process of investigating the transactions processed from 1 April 2013 on the ERP system to determine if any adjustments to their current financial records are required. Thus far a discrepancy has been noted between the actual inventory and the accounting records of approximately 87 000 ounces of gold. Due to the uncertainty surrounding the matter, Harmony has provided for its full share of the loss. Therefore, Harmony has recognised a R127 million loss in the June 2014 quarter to account for its share of this discrepancy.

As a precautionary measure following the challenges experienced by the implementation of the software system, Rand Refinery's shareholders have extended Rand Refinery an irrevocable, subordinated loan facility of up to R1.2 billion, which can only be drawn down when there is confirmation that an actual loss has been incurred. The facility, if drawn down, is convertible to equity after a period of two years. Harmony's maximum commitment in terms of this facility will be R140 million. Interest on the facility will be JIBAR plus a margin of 3.5%. The agreements relating to the facility were signed on 23 July 2014.

7. Non-current assets and assets of disposal groups classified as held for sale

During the December 2013 quarter, a cash offer for Witwatersrand Consolidated Gold Resources Limited's (Wits Gold) entire share capital was made to all Wits Gold shareholders by Sibanye Gold Limited. Harmony has accepted the offer. Following this, the balance which represented Harmony's fair value stake in Wits Gold was classified as a non-current asset held for sale (formerly classified as Investment in financial assets) under IFRS 5. On 14 April 2014, a total consideration of R51 million was received. The accumulated gains recognised in equity were reclassified to the income statement, resulting in a profit on disposal.

8. Borrowings

Two draw downs of US\$30 million each were made from the US\$300 million syndicated revolving credit facility during the September 2013 quarter. There were no draw downs subsequently and the drawn level remains at US\$270 million. The weakening of the Rand against the US\$ resulted in a foreign exchange translation loss of R155 million being recorded for the year, increasing the borrowings balance and Other expenses (net). The facility is repayable by September 2015.

Harmony refinanced its Nedbank revolving credit facility and entered into a new agreement for R1.3 billion revolving credit facility during the December 2013 quarter. At the same time management also agreed an amended set of covenants with the lender group, to give the group more long-term financial flexibility. The interest rate is equivalent to JIBAR + 350 basis points. The outstanding amount at 28 March 2014 of R467 million was repaid. The facility is available until December 2016.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the year ended 30 June 2014 (Rand)

9. Financial risk management activities

Fair value determination

The following table presents the group's assets and liabilities that are measured at fair value by level within the fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly (that is, as prices) or indirectly (that is derived from prices);

Level 3: Inputs for the asset that are not based on observable market data (that is unobservable inputs).

Figures in million	At 30 June 2014 (Reviewed)	At 31 March 2014 (Unaudited)	At 30 June 2013 (Audited)
Available-for-sale financial assets^{1*}			
Level 1	–	51	44
Level 2	–	–	–
Level 3	4	4	5
Fair value through profit or loss^{2*}			
Level 1	–	–	–
Level 2	798	768	1 041
Level 3	–	–	–

¹ Level 1 fair values are directly derived from actively traded shares on the JSE.

Level 3 fair values have been valued by the directors by performing independent valuations on an annual basis to ensure that significant prolonged decline in the value of the investments has not occurred. At the end of the 2013 financial year, the investment in Rand Refinery was reclassified as an investment in associate on obtaining significant influence.

² The majority of the level 2 fair values are directly derived from the Shareholders Weighted Top 40 index (SWIX 40) on the JSE, and are discounted at market interest rate.

* Includes non-current assets or disposal groups held for sale where applicable.

10. Commitments and contingencies

Figures in million	At 30 June 2014 (Reviewed)	At 31 March 2014 (Unaudited)	At 30 June 2013 (Audited)
Capital expenditure commitments:			
Contracts for capital expenditure	157	245	416
Authorised by the directors but not contracted for	519	491	1 545
	676	736	1 961

This expenditure will be financed from existing resources and, where appropriate, borrowings.

Contingent liabilities

For a detailed disclosure on contingent liabilities refer to Harmony's integrated annual report for the financial year ended 30 June 2013, available on the group's website (www.harmony.co.za). There were no significant changes in contingencies since 30 June 2013 except as discussed below.

(a) US class action

Following the dismissal of the appeal by the plaintiff in the United States Supreme Court, the case has been concluded. The matter will be settled once the administrative processes have been completed.

11. Related parties

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the group, directly or indirectly, including any director (whether executive or otherwise) of the group. During the September 2013 quarter, Frank Abbott, financial director, purchased 65 600 shares in the company.

12. Subsequent events

(a) During July 2014, Harmony extended an irrevocable, subordinated loan facility to Rand Refinery. The facility, if drawn down, is convertible to equity after a period of two years. Harmony's maximum commitment in terms of this facility is R140 million. Refer to note 6 for further details.

13. Segment report

The segment report follows on page 23.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the year ended 30 June 2014 (Rand)

14. Reconciliation of segment information to condensed consolidated income statements and balance sheets

	Year ended	
	30 June 2014 (Reviewed)	30 June 2013 (Audited) (Restated)*
Figures in million		
The "Reconciliation of segment information to condensed consolidated financial statements" line item in the segment report is broken down in the following elements, to give a better understanding of the differences between the financial statements and segment report:		
Reconciliation of production profit to gross loss		
Total segment revenue	15 682	16 776
Total segment production costs	(11 888)	(11 854)
Production profit per segment report	3 794	4 922
Discontinued operations	–	(341)
Production profit from continuing operations	3 794	4 581
Depreciation	(2 143)	(2 001)
Impairment	(1 439)	(2 733)
Other cost of sales items	(618)	(393)
Gross loss as per income statements¹	(406)	(546)

¹ The reconciliation was done up to the first recognisable line item on the income statement. The reconciliation will follow the income statement after that.

	At 30 June 2014 (Reviewed)	At 30 June 2013 (Audited) (Restated)*
Figures in million		
Reconciliation of total segment mining assets to consolidated property, plant and equipment		
Property, plant and equipment not allocated to a segment		
Mining assets	787	836
Undeveloped property	5 139	5 139
Other non-mining assets	117	286
Wafi-Golpu assets	1 092	1 148
	7 135	7 409

* The year ended June 2013 results have been restated due to a change in accounting policy. Refer to note 2 for details. The restatements to the comparative information have not been audited.

15. Review report

These condensed consolidated financial statements for the year ended 30 June 2014 on pages 12 to 23 have been reviewed by PricewaterhouseCoopers Inc., who expressed an unmodified review conclusion thereon. A copy of the auditor's review report is available for inspection at the company's registered office, together with the financial statements identified in the auditor's report.
