KEY FEATURES

Quarter on quarter

- ↑ 6% increase in gold production to 9 435kg (303 341oz)
- ↑ 8% increase in production profit at R913 million (US\$85 million)
- ↑ Grade continues to increase
 - 4% improvement in underground recovered grade at 4.84g/t
 - on back of 5% improvement in recovered grade for the year ended 30 June 2014
- ↑ 18% increase in revenue to R4.4 billion (US\$412 million)
- ↑ Net debt reduced from R1.0 billion to R771 million (from US\$98 million to US\$68 million)
- ↑ Net loss reduced by 78% to R266 million loss (US\$25 million)

Harmony's Integrated Annual Report and the Form 20-F filed with the United States' Securities and Exchange Commission for the financial year ended 30 June 2014 are available on our website at
<http://www.harmony.co.za/investors/reporting/annual-reports>.

FORWARD-LOOKING STATEMENTS

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements. These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgement of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in the countries in which we operate; the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions; increases or decreases in the market price of gold; the occurrence of hazards associated with underground and surface gold mining; the occurrence of labour disruptions; availability, terms and deployment of capital; changes in government regulations, particularly mining rights and environmental regulations; fluctuations in exchange rates; currency devaluations and other macro-economic monetary policies; and socio-economic instability in the countries in which we operate.

COMPETENT PERSON'S DECLARATION

Harmony reports in terms of the South African Code for the Reporting of Exploration results, Mineral Resources and Ore Reserves (SAMREC). In South Africa Harmony appoints an ore reserve manager at each of its operations who takes responsibility for the compilation and reporting of mineral resources and mineral reserves at their operations. In Papua New Guinea, competent persons are appointed for the mineral resources and mineral reserves for specific projects and operations.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

Resources and Reserves South Africa: Jaco Boshoff, BSc (Hons), MSc, MBA, Pr. Sci. Nat., who has 19 years' relevant experience and is registered with the South African Council for Natural Scientific Professions (SACNASP) and a member of the South African Institute of Mining and Metallurgy (SAIMM).

Resources and Reserves Papua New Guinea: Gregory Job, BSc, MSc, who has 25 years relevant experience and is a member of the Australian Institute of Mining and Metallurgy (AusIMM).

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited. These competent persons consent to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Mineral Resource and Reserve information as at 30 June 2014 has not changed.

MESSAGE FROM THE CHIEF EXECUTIVE OFFICER

1. SAFETY

During the quarter, we continued our efforts to improve our safety. These actions included regular visits by senior management to underground workplaces, creating safety awareness through increased communication and engagement with our employees and enforcing safety accountability at each of our operations. A majority of our operations reported safety achievements during the quarter.

It is with deep regret that I report that two people were fatally injured in two separate incidences. They were Mhanjelwa Cebani (driller at Doornkop) and Mmaneo Florisa Muso (tramming crew supervisor at Tshepong). My sincere condolences go to the families, friends and colleagues of these employees.

2. GOLD MARKET

We are gold bulls and believe that the company must continue to be competitive in times of low gold prices to ensure that when the gold price strengthens, we will reap the benefits for all our stakeholders.

During the September 2014 quarter the US dollar gold price received remained stable at US\$1 282/oz (US\$1 289/oz in the June 2014 quarter). As a South African gold producer we continue to benefit from a weaker Rand. A 2% weakening in the Rand US dollar exchange rate to R10.77/US\$ resulted in a 2% increase in the Rand gold price received for the September 2014 quarter. The Rand gold price received increased from R435 775/kg in the previous quarter to R443 690/kg in the quarter under review.

Our business plans for the financial year (FY15) were designed to ensure that the company is profitable and cash generative at a gold price of R425 000/kg. As 91% of our gold production is produced in South Africa, the Rand US dollar exchange rate remains important.

We continue to assess our operational performance at current gold price levels (see paragraphs 8 and 9 below). Corporate and service costs have been reduced and we continue to look at ways of further reducing it.

3. OPERATIONAL RESULTS

Harmony's underground grade continued to improve quarter on quarter. In the September 2014 quarter, underground recovered grade improved by 4% to 4.84g/t, on the back of a 5% year-on-year increase in recovered grade at the end of June 2014.

Quarter on quarter gold production increased by 6% (500 kilograms) to 9 435kg. The following operations contributed to higher gold production:

- Bambanani increased its tonnes milled by 20%, whilst recovered grade improved by 10% to 12.32g/t
- Target 1 improved recovered grade by 18% to 5.69g/t while tonnes milled decreased by 11%
- Target 3 improved recovered grade by 25% to 5.46g/t in the quarter under review. Tonnes milled increased by 14%
- Phakisa increased its tonnes milled by 8%. Recovered grade was 3% higher at 5.41g/t
- Doornkop increased its recovered grade by 38% to 4.55g/t
- Unisel improved both tonnes milled and recovered grade by 16% and 5% respectively
- Masimong increased tonnes milled by 19%, but recovered grade decreased by 5% to 3.77g/t, due to increased stoping

width during the quarter. Masimong's grade is expected to return to its previous level in the next quarter

- Kalgold improved both tonnes milled and recovered grade by 1% and 20% respectively
- Phoenix tailings increased tonnes milled with 3% and improved recovered grade from 0.12g/t to 0.14g/t

Gold production at Tshepong, Joel and Hidden Valley were lower due to lower face grades being mined at Tshepong and Joel and the ore blend between the Hamata and Kaveroi pits at Hidden Valley. Kusasalethu did not achieve its planned production during the quarter, due to equipment failures in the metallurgical plant.

Production at the surface dumps reduced by 1% (-3kg) mainly due to a 2% decrease in tonnes milled while the recovered grade remained stable at 0.35g/t.

4. FINANCIAL RESULTS

4.1 Revenue

Revenue increased by R668 million (18%) to R4 431 million as a result of the 16% increase in gold sold to 9 987kg and a 2% increase in the Rand gold price received at R443 690/kg in the September 2014 quarter.

4.2 Production costs

The increase in production costs in the September 2014 quarter is mainly as a result of gold stock movements of R301 million due to more gold being sold than produced. Increases in electricity costs (due to winter tariffs) and the annual labour cost increase accounted for R272 million of the total increase.

4.3 Amortisation and depreciation

Depreciation increased by R124 million, mainly due to the increase in production and an increase in the depreciation rates at certain mines following the completion of the new business plans.

4.4 Other (expenses)/income – net

The increase to R187 million in expenses in the September 2014 quarter is mainly due to the foreign exchange translation loss of R192 million recorded on the US dollar syndicated loan, resulting from the Rand weakening from R10.61/US\$1 at 30 June 2014 to R11.32/US\$1 at 30 September 2014.

4.5 Loss per share

The loss per share of 61 SA cents for the September 2014 quarter reduced from the loss per share of 282 SA cents for the June 2014 quarter.

4.6 Borrowings

The drawn down amount on the US dollar syndicated loan remained unchanged at US\$270 million. However, the weakening of the Rand against the dollar exchange rate resulted in an increase in the balance in Rand terms. The balance is due at the end of September 2015 and has been reclassified to current liabilities.

4.7 Cash and cash equivalents

Cash balances increased by R452 million to R2 281 million mainly as a result of the increase in revenue from more gold produced and sold, as well as increased receipts from debtors during the quarter.

5. RECOGNITION AWARD FOR HARMONY'S CARBON DISCLOSURE AND REPORTING

Harmony has been recognised by the CDP South Africa as the top scorer in the CDP South Africa Climate Change Report 2014 published on 15 October 2014. CDP represents 767 investors globally who owns around US\$92 trillion in assets.

Harmony attained a score of 100% for carbon disclosure and band “A” performance for leadership in respect of energy and climate change. CDP assesses companies’ responses against two parallel scoring schemes, namely performance and disclosure. The highest scoring companies for performance and/or disclosure enter the Climate Performance Leadership Index and/or the Climate Disclosure Leadership Index.

Harmony is the only South African company to have received platinum awards in both the disclosure category and performance categories.

6. WHITE RIVERS EXPLORATION (PTY) LIMITED (“WHITE RIVERS”) TRANSACTION

Harmony and White Rivers entered into an agreement on 12 September 2014, the main objective being to establish an exploration joint venture to explore and develop potential gold resources at White Rivers’ Beisa Project and abutting exploration areas within Harmony’s adjacent Target mine. Entering into the joint venture allows both Harmony and White Rivers the opportunity to further enhance the value that mining contributes in the Free State, extending the life of mining communities beyond Harmony’s current life of mine.

Under the terms of the agreement, Harmony will have an initial 35% interest in the exploration joint venture, with White Rivers funding and managing exploration activities to prefeasibility study level.

7. EXPLORATION

7.1 Golpu

Golpu’s new prefeasibility study is close to being finalised. Our considerations for the new targeted outcome include:

- return on investment
- project with lower capital
- near term cash flow

We aim to share the details of the prefeasibility study with the market in December 2014.

7.2 Kili Teke – more good news from Papua New Guinea

Some exciting initial results were reported from one of Harmony’s 100% owned exploration areas, Kili Teke in the Papua New Guinea highlands (near Porgera). The results from surface sampling outline a kilometer scale, copper-gold geochemical porphyry with values of around 2.7% copper and 5.2 g/t gold.

8. TARGET 3 PLACED ON CARE AND MAINTENANCE

Following the suspension of mining operations at Target 3 at the end of the September 2014 quarter, the mine has been placed on care and maintenance.

9. POST QUARTER END – KUSASALETHU

As per the announcement released on 31 October 2014 (refer www.harmony.co.za/investors), Harmony management decided to close Kusasalethu for a two week period with the aim to remove all illegal miners, as well as complete all security and access control measures. No production will occur during this period and employees will be sent on leave.

The decision comes after a third underground fire in October 2014 month was started by illegal miners. Although no one was

harmed in any of these fires, it did result in ten production days lost in October.

Harmony is adopting an uncompromising stance towards these activities and is working with organised labour and the regulatory authorities to do so. Harmony is implementing increased security and improved clocking-in systems to tighten control on who enters and exits its mines. The company also regularly inspects closed-up sections to ensure that they remain sealed off and cannot be accessed illegally.

These illegal mining activities pose a threat not only to the illegal miners’ own health and safety, but also to the safety of employees. Very often these activities result in damage to property and mining equipment and disruption to operations due to negligence, sabotage, theft and vandalism. The activities of illegal miners can also cause pollution, underground fires and deplete mineral deposits, potentially making the future mining of such deposits uneconomical.

Kusasalethu’s production has continued to be problematic and management is working on an alternative plan to return the mine to profitability.

10. IN CONCLUSION

Our efforts to improve efficiencies are aimed not only at mining and processing, but in every aspect of our business. We believe that Harmony remains undervalued and that its successes are not currently factored into the share price.

Graham Briggs
Chief executive officer

THE INVESTMENT CASE FOR HARMONY

Firstly, we are the most efficient South African gold miner, by focusing on ways to improve our safety, production and cash operating costs. In addition, we are a company that’s focused on the future. An investment in us is not just for short-term gain – we aim to provide increasing long-term benefits. We are able to do this primarily by funding our own capital, which puts us in control of our business and enables us to make decisions that have a real impact on our profitability.

Secondly, we produce more than one million ounces of gold and being a leveraged gold company means that should the gold price rise our margins would improve dramatically in percentage terms. Management clearly understands this and we continue to make tough decisions in loss-making operations when the gold price softens. However, Harmony has a huge potential upside when the gold price strengthens, as we believe it will in the medium to long term.

One of our key strengths at Harmony is our understanding of where we operate – on both an economic and a social level. The countries in which we operate and have experience, South Africa and Papua New Guinea, are both emerging economies. They are developing countries and we are able to contribute to local communities in a way that can make a lasting difference. For this reason, we wholeheartedly embrace our social licences to mine and endeavour to go beyond compliance.

The final reason to invest in Harmony is Golpu. It’s a resource that we’re sure will develop into a world-class copper gold mine, and will allow us to sustain our business well into the future.

¹ Includes capital expenditure for Wafi-Golpu and other international projects of R15 million in the September 2014 quarter (June 2014 quarter: R12 million) (September 2013 quarter: Rnil) and R12 million in the year ended 30 June 2014.

* Cash generated by operating activities and cash utilised by investing activities previously reported as R470 million and (R656 million) restated to R489 million and (R675 million) respectively in the June 2014 quarter. This is mainly related to the change in accounting policy for IFRIC 20.

Cash generated by operating activities and cash utilised by investing activities previously reported as R235 million and (R627 million) restated to R292 million and (R684 million) respectively in the September 2013 quarter. This is mainly related to the change in accounting policy for IFRIC 20.

The accompanying notes are an integral part of these condensed consolidated financial statements.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

for the three months ended 30 September 2014 (Rand)

1. Accounting policies

Basis of accounting

The condensed consolidated financial statements for the three months ended 30 September 2014 have been prepared in accordance with IAS 34, Interim Financial Reporting, JSE Listings Requirements, SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and Financial Pronouncements as issued by the Financial Reporting Standards Council, and in the manner required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for the year ended 30 June 2014, which have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting Standards Board.

The following accounting standards, amendments to standards and new interpretations have been adopted with effect from 1 July 2014 and had no impact on the financial results of the group:

IFRSs Annual Improvements 2010 – 2012 Cycle

IAS 32 Amendment – Presentation – Offsetting Financial Assets and Financial Liabilities

IAS 36 Amendment – Impairment of Assets – Recoverable amount disclosures for non-financial assets

IFRIC 21 Levies

2. Cost of sales

Figures in million	Quarter ended			Year ended 30 June 2014 (Audited)
	30 September 2014 (Unaudited)	30 June 2014 (Unaudited)	30 September 2013 (Unaudited)	
Production costs – excluding royalty	3 486	2 891	2 943	11 761
Royalty expense	32	25	38	127
Amortisation and depreciation	650	526	577	2 143
Impairment of assets ¹	–	1 410	–	1 439
Rehabilitation expenditure/(credit) ²	14	(9)	15	8
Care and maintenance cost of restructured shafts	17	13	17	66
Employment termination and restructuring costs ³	48	40	94	274
Share-based payments	73	44	51	270
Other	(1)	1	–	–
Total cost of sales	4 319	4 941	3 735	16 088

¹ The impairment in the June 2014 quarter consists of an impairment of R1.38 billion on Phakisa, R7 million on Steyn 2 and R21 million on St Helena.

² Included in the total for the June 2014 quarter is a credit of R21 million relating to the change in estimate following the annual reassessment.

³ Included in the totals for the year ended June 2014 and the June 2014 and September 2013 quarters are amounts relating to the restructuring at Hidden Valley, while all periods include amounts relating to the voluntary retrenchment packages offered in South Africa. The September 2014 quarter total includes amounts provided for employees of Target 3.

Headline (loss)/earnings	(266)	129	20	114

¹ There is no taxation effect on these items.

4. Investment in associate

Harmony holds a 10.38% share in Rand Refinery. Due to the issues experienced at Rand Refinery following the implementation of a new Enterprise Resource Planning (ERP) system on 1 April 2013, and the fact that the annual financial statements for the year ended 30 September 2013 have not been finalised, Harmony has provided for its full share of loss for the inventory discrepancy. Therefore, Harmony has recognised a R127 million loss in the June 2014 quarter to account for its share of this discrepancy.

As a precautionary measure following the challenges experienced by the implementation of the software system, Rand Refinery's shareholders have extended Rand Refinery an irrevocable, subordinated loan facility of up to R1.2 billion, which can only be drawn down when there is confirmation that an actual loss has been incurred. The facility, if drawn down, is convertible to equity after a period of two years. Harmony's maximum commitment in terms of this facility will be R140 million. Interest on the facility will be JIBAR plus a margin of 3.5%. The agreements relating to the facility were signed on 23 July 2014.

5. Borrowings

There were no draw downs made from the US\$300 million syndicated revolving credit facility during the September 2014 quarter and the drawn level remains at US\$270 million. The weakening of the Rand against the US\$ resulted in a foreign exchange translation loss of R192 million being recorded in the September 2014 quarter (June 2014 quarter: R11 million), increasing the borrowings balance and Other (expenses)/income – net. The facility is repayable by September 2015. As a result, the borrowings balance was reclassified to current liabilities.

At 30 September 2014, the full amount was available on the Nedbank revolving credit facility of R1.3 billion. The facility is available until December 2016.

6. Other non-current liabilities

During the September 2014 quarter, negotiations were entered into with the claimants in the matter relating to the pumping and treatment cost of fissure water in the Klerksdorp, Orkney, Stilfontein and Hartbeesfontein (KOSH) Basin. Payment was made to Simmer and Jack Investments Proprietary Limited as full and final settlement during the quarter, while the full and final settlement to AngloGold Ashanti Limited was made in October 2014. The amount owing to AngloGold Ashanti Limited was reclassified to trade and other payables at 30 September 2014.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS CONTINUED

for the three months ended 30 September 2014 (Rand)

7. Financial risk management activities

Fair value determination

The following table presents the group's assets and liabilities that are measured at fair value by level within the fair value hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset, either directly or indirectly (that is, as prices) or indirectly (that is derived from prices);

Level 3: Inputs for the asset that are not based on observable market data (that is unobservable inputs).

Figures in million	At 30 September 2014 (Unaudited)	At 30 June 2014 (Audited)	At 30 September 2013 (Unaudited)
Available-for-sale financial assets¹			
Level 1	—	—	37
Level 2	—	—	—
Level 3	4	4	5
Fair value through profit or loss²			
Level 1	—	—	—
Level 2	632	798	933
Level 3	—	—	—

¹ Level 1 fair values are directly derived from actively traded shares on the JSE.

Level 3 fair values have been valued by the directors by performing independent valuations on an annual basis.

² The majority of the level 2 fair values are directly derived from the Shareholders Weighted Top 40 index (SWIX 40) on the JSE, and are discounted at market interest rate.

8. Commitments and contingencies

Figures in million	At 30 September 2014 (Unaudited)	At 30 June 2014 (Audited)	At 30 September 2013 (Unaudited)
Capital expenditure commitments:			
Contracts for capital expenditure	206	157	351
Authorised by the directors but not contracted for	2 359	519	1 835
	2 565	676	2 186

This expenditure will be financed from existing resources and, where appropriate, borrowings.

Contingent liabilities

For a detailed disclosure on contingent liabilities refer to Harmony's annual financial statements for the financial year ended 30 June 2014, available on the group's website (www.harmony.co.za). There were no significant changes in contingencies since 30 June 2014, except as discussed below:

- (a) During July 2014, Harmony extended an irrevocable, subordinated loan facility to Rand Refinery. The facility, if drawn down, is convertible to equity after a period of two years. Harmony's maximum commitment in terms of this facility is R140 million. Refer to note 4 for further details.

9. Related parties

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the group, directly or indirectly, including any director (whether executive or otherwise) of the group. There have been no transactions with related parties during the September 2014 quarter.

10. Subsequent events

- (a) Refer to note 6 for subsequent changes relating to the KOSH matter.
- (b) Target 3 was closed at the end of the September 2014 quarter and placed on care and maintenance. The section 189 process is still continuing and expected to impact approximately 350 employees. Retrenchment costs are expected to be approximately R25 million.
- (c) On 31 October 2014, Harmony announced that it would be closing Kusasalethu for two weeks, following three underground fires started by illegal miners during October 2014. During this period, management aims to remove all illegal miners as well as complete all security and access control measures needed to tighten control on entry and exit from the mine. No production will occur during this period and employees will be sent on leave. This stoppage, together with the ten production days lost in October 2014 as a result of the fires, will have a negative impact on Kusasalethu's results and therefore on the group's results for the December 2014 quarter.

11. Segment report

The segment report follows on page 15.

12. Reconciliation of segment information to condensed consolidated income statements and balance sheets

Figures in million	Three months ended	
	30 September 2014 (Unaudited)	30 September 2013 (Unaudited)
The "Reconciliation of segment information to condensed consolidated financial statements" line item in the segment report is broken down in the following elements, to give a better understanding of the differences between the financial statements and segment report:		
Reconciliation of production profit to gross profit		
Total segment revenue	4 431	4 018
Total segment production costs	(3 518)	(2 981)
Production profit per segment report	913	1 037
Depreciation	(650)	(577)
Other cost of sales items	(151)	(177)
Gross profit as per income statements¹	112	283

¹ The reconciliation was done up to the first recognisable line item on the income statement. The reconciliation will follow the income statement after that.

Figures in million	At 30 September 2014 (Unaudited)	At 30 September 2013 (Unaudited)
Reconciliation of total segment mining assets to consolidated property, plant and equipment		
Property, plant and equipment not allocated to a segment		
Mining assets	779	1 155
Undeveloped property	5 139	5 139
Other non-mining assets	143	74
Wafi-Golpu assets	1 140	981
	7 201	7 349
