## **Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of Harmony Gold Mining Company Limited

In our opinion, the accompanying consolidated balance sheets and the related consolidated income statements, statements of comprehensive income, statements of changes in shareholders' equity and cash flow statements present fairly, in all material respects, the financial position of Harmony Gold Mining Company Limited and its subsidiaries at June 30, 2015 and 2014, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2015 in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of June 30, 2015, based on criteria established in Internal Control—Integrated Framework (2013 Framework) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 15 (b). Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

# NOTES TO THE GROUP FINANCIAL STATEMENTS

for the years ended 30 June 2015

## 1 GENERAL INFORMATION

Harmony Gold Mining Company Limited (the company) and its subsidiaries (collectively Harmony or the group) are engaged in gold mining and related activities, including exploration, extraction and processing. Gold bullion, the group's principal product, is currently produced at its operations in South Africa and Papua New Guinea (PNG).

The company is a public company, incorporated and domiciled in South Africa. The address of its registered office is Randfontein Office Park, Corner Main Reef Road and Ward Avenue, Randfontein, 1759.

The consolidated financial statements were authorised for issue by the board of directors on 23 October 2015.

## 2 ACCOUNTING POLICIES

### BASIS OF PREPARATION

The principal accounting policies applied in the preparation of the consolidated financial statements have been consistently applied in all years presented, except as stated under the heading 'Recent accounting developments'.

The financial statements of the group have been prepared in accordance with, and are in compliance with, International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB) and IFRIC Interpretations (collectively IFRS).

### RECENT ACCOUNTING DEVELOPMENTS

#### New standards, amendments to standards and interpretations to existing standards adopted by the group

The effective dates below are for financial periods beginning on or after the given date.

*The following standards or amendments to standards have become effective but had no impact on the results of the group:*

Pronouncement	Title	Effective date
IFRS 10, IFRS 12 and IAS 27 (Amendments)	Amendments to Consolidated Financial Statements, Disclosures of Interests in Other Entities and Separate Financial Statements - Investment entities	1 January 2014
IFRSs	Annual improvements 2011-2013 cycle	1 July 2014
IAS 19 (Amendments)	Employee Benefits - Defined Benefit Plans: Employee Contributions	1 July 2014
IAS 32 (Amendments)	Financial Instruments: Presentation - Asset and liability offsetting	1 January 2014
IAS 39 (Amendments)	Financial Instruments: Recognition and measurement - Novation of derivatives and continuation of hedge accounting	1 January 2014
IFRIC 21	Levies	1 January 2014

*The following standards or amendments to standards have become effective and had an impact on the disclosure:*

Pronouncement	Title	Effective date
IFRSs	Annual improvements 2010-2012 cycle	1 July 2014
IAS 36 (Amendments)	Impairment of Assets - Recoverable amount disclosures for non-financial assets	1 January 2014

#### New standards, amendments to standards and interpretations to existing standards that are not yet effective and have not been early adopted

At the date of authorisation of these financial statements, the standards, amendments to standards and interpretations listed below were in issue but not yet effective. These new standards and interpretations have not been early adopted by the group and the group plans on adopting these standards, amendments to standards and interpretations on the dates when they become effective.

*The following standards or amendments to standards are not relevant to the group:*

Pronouncement	Title	Effective date
IFRS 14	Regulatory Deferral Accounts	1 January 2016
IAS 16 and IAS 41 (Amendments)	Amendments to Property, Plant and Equipment and Agriculture – Bearer plants	1 January 2016

*The following standards or amendments to standards are not expected to have an impact on the results of the group but will affect the disclosure in the financial statements:*

Pronouncement	Title	Effective date
IAS 16 and IAS 38 (Amendments)	Amendments to Property, Plant and Equipment and Intangible Assets – Clarification of acceptable methods of depreciation and amortisation	1 January 2016

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 2 ACCOUNTING POLICIES continued

### RECENT ACCOUNTING DEVELOPMENTS continued

The following standards, amendments to standards and interpretations to existing standards may possibly have an impact on the group:

Pronouncement	Title	Effective date
IFRS 9	<p><i>Financial Instruments</i></p> <p>This standard on classification and measurement of financial assets and financial liabilities will replace IAS 39, <i>Financial Instruments: Recognition and Measurement</i>. IFRS 9 has two measurement categories: amortised cost and fair value. All equity instruments are measured at fair value.</p> <p>A debt instrument is measured at amortised cost only if the entity is holding it to collect contractual cash flows and the cash flows represent principal and interest. For liabilities, the standard retains most of the IAS 39 requirements. These include amortised-cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The main change is that, in cases where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch.</p> <p><b>Hedge accounting</b> The new requirements in IFRS 9 align hedge accounting more closely with risk management, and so should result in more 'decision-useful' information to users of financial statements. The revised standard also establishes a more principles-based approach to hedge accounting and addresses inconsistencies and weaknesses in the current model in IAS 39.</p> <p><b>Expected credit losses</b> IFRS 9 introduces a new model for the recognition of impairment losses – the expected credit losses (ECL) model. The ECL model constitutes a change from the guidance in IAS 39 and seeks to address the criticisms of the incurred loss model which arose during the economic crisis. In practice, the new rules mean that entities will have to record a day 1 loss equal to the 12-month ECL on initial recognition of financial assets that are not credit impaired (or lifetime ECL for trade receivables).</p> <p>IFRS 9 contains a 'three stage' approach which is based on the change in credit quality of financial assets since initial recognition. Assets move through the three stages as credit quality changes and the stages dictate how an entity measures impairment losses and applies the effective interest rate method. Where there has been a significant increase in credit risk, impairment is measured using lifetime ECL rather than 12-month ECL. The model includes operational simplifications for lease and trade receivables.</p> <p><b>Disclosures</b> Extensive disclosures are required, including reconciliations from opening to closing amounts of the ECL provision, assumptions and inputs and a reconciliation on transition of the original classification categories under IAS 39 to the new classification categories in IFRS 9.</p> <p>The impact of the standard is currently being assessed by management.</p>	1 January 2018
IFRS 10, IFRS 12 and IAS 28 (Amendments)	<p><i>Amendments to Consolidated Financial Statements and Investments in Associates and Joint Ventures</i></p> <p>These amendments address an inconsistency between the requirements in IFRS 10 and those in IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognised when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognised when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary.</p> <p>The impact of the amendment is currently being assessed by management.</p>	1 January 2016
IFRS 11 (Amendments)	<p><i>Joint arrangements - Acquisitions of interests in joint operations</i></p> <p>Amends IFRS 11 Joint Arrangements to require an acquirer of an interest in a joint operation in which the activity constitutes a business (as defined in IFRS 3 <i>Business Combinations</i>) to:</p> <p>Apply all of the business combinations accounting principles in IFRS 3 and other IFRSs, except for those principles that conflict with guidance in IFRS 11. Disclose the information required by IFRS 3 and either IFRSs for business combinations.</p> <p>The amendments apply both to the initial acquisition of an interest in joint operation, and the acquisition of an additional interest in a joint operation (in the latter case, previously held interests are not remeasured).</p> <p>The impact of the standard is currently being assessed by management.</p>	1 January 2016

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 2 ACCOUNTING POLICIES continued

### RECENT ACCOUNTING DEVELOPMENTS continued

The following standards, amendments to standards and interpretations to existing standards may possibly have an impact on the group: continued

Pronouncement	Title	Effective date
IFRS 15	<p><i>Revenue from contracts with customers</i></p> <p>The core principle is that revenue must be recognised when goods or services are transferred to the customer, at the transaction price. The most significant changes that flow from the principle are:</p> <ol style="list-style-type: none"> <li>Any bundled goods or services that are distinct must be separately recognised, and any discounts or rebates on the contract price must generally be allocated to the separate elements.</li> <li>Revenue may be recognised earlier than under current standards if the consideration varies for any reasons (such as for incentives, rebates, performance fees, royalties, success of an outcome etc.) - minimum amounts must be recognised if they are not at significant risk of reversal.</li> <li>The point at which revenue is able to be recognised may shift: some revenue which is currently recognised at a point in time at the end of a contract may now be recognised over the contract term and vice versa.</li> </ol> <p>The impact of the standard is currently being assessed by management.</p>	1 January 2018
IFRSs	<p><i>Annual Improvements 2012-2014 cycle</i></p> <p>IFRS 5 – <i>Non-current Assets Held for Sale and Discontinued Operations</i> – Addresses changes in methods of disposal.</p> <p>IFRS 7 – <i>Financial Instruments: Disclosures</i> – Addresses servicing contracts and the applicability of the amendments to IFRS 7 to condensed interim financial statements.</p> <p>IFRS 19 – <i>Employee Benefits</i> – Addresses issues related to regional markets when determining discount rates.</p> <p>IFRS 34 – <i>Interim Financial Reporting</i> – Addresses disclosure of information 'elsewhere in the interim financial report'.</p> <p>The impact of the improvements are currently being assessed by management.</p>	1 January 2016
IAS 1	<p><i>Presentation of Financial Statements</i></p> <p>In December 2014 the IASB issued amendments to clarify guidance in IAS 1 on materiality and aggregation, the presentation of subtotals, the structure of financial statements and the disclosure of accounting policies.</p> <p>The impact of the amendment is currently being assessed by management.</p>	1 January 2016
IAS 27 (Amendments)	<p><i>Separate Financial Statements</i></p> <p>Amends IAS 27 to restore the option to use the equity method to account for investments in subsidiaries, joint ventures and associates in an entity's separate financial statements.</p> <p>The impact of the amendment is currently being assessed by management.</p>	1 January 2016

### MEASUREMENT BASIS

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and financial liabilities at fair value through profit or loss and cash-settled share-based payments.

### GROUP ACCOUNTING POLICIES

Accounting policies are included in the relevant notes to the consolidated financial statements and have been highlighted in grey shading in the notes to the group financial statements. The accounting policies below are applied throughout the financial statements:

#### 2.1 Consolidation

The group recognises that control is the single basis for consolidation for all types of entities in accordance with IFRS 10 - *Consolidated Financial Statements*.

The consolidated financial information includes the financial statements of the company, its subsidiaries, interest in associates and joint arrangements and structured entities. Where the group has no control over an entity, that entity is not consolidated.

#### Control

The group, regardless of the nature of its involvement with an entity, shall determine whether it is a parent by assessing whether it controls the investee.

The group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

#### (i) Subsidiaries

Subsidiaries are entities over which the group has control. Subsidiaries are fully consolidated from the date on which control is transferred to the group up until when that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated. Accounting policies of subsidiaries have been changed to ensure consistency with the policies adopted by the group.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 2 ACCOUNTING POLICIES continued

### GROUP ACCOUNTING POLICIES continued

#### 2.1 Consolidation continued

##### *(i) Subsidiaries* continued

The group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, liabilities incurred and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the group recognises any non-controlling interests in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired, in the case of a bargain purchase, the difference is recognised directly in the income statement.

##### *(ii) Associates*

Associates are entities in which the group has significant influence, but not control, over operational and financial policies. This may be when there is a shareholding of between 20% and 50% of the voting rights or when significant influence can be otherwise demonstrated, for example where the group has the right of representation on the board of directors of the entity.

Investments in associates are accounted for by using the equity method of accounting, and are initially recognised at cost. The group's investment in associates includes goodwill identified on acquisition. Cumulative post-acquisition movements are adjusted against the carrying amount of the investment. The group's share of the associates' post-acquisition profits or losses is recognised in the income statement, and its share of post-acquisition movement in reserves is recognised in other reserves.

When the group's share of losses in an associate equals or exceeds its interest in the associate, the group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

If an associate is acquired in stages, the cost of the associate is measured as the sum of the consideration paid for each purchase plus a share of investee's profits and other equity movements. Any acquisition-related costs are treated as part of the investment in associate. Any related goodwill is calculated at each stage of the acquisition based on the consideration paid and the share of fair value of net assets acquired at the date of each acquisition.

Where the previously held interest was classified as an available-for-sale financial instrument, any existing gains or losses recognised in the available-for-sale revaluation reserve are reversed through other comprehensive income. The cost basis of the investment is then further adjusted by including the group's share of profits after dividends, other comprehensive income and other equity movements relating to the previously held interest is accounted for in equity.

The carrying value of an associate is reviewed on a regular basis and, if impairment in the carrying value has occurred, it is written off in the period in which such impairment is identified.

Unrealised gains on transactions between the group and its associates are eliminated to the extent of the group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment that should be recognised.

Accounting policies of associates have been reviewed to ensure consistency with the policies adopted by the group.

##### *(iii) Joint arrangements*

Joint arrangements are arrangements of which two or more parties have joint control and are contractually bound. The joint arrangement can either be a joint operation or a joint venture. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement and have the right to the assets, and obligations for the liabilities, relating to the arrangement. These parties are called joint operators. A joint venture is a joint arrangement where the parties that have joint control of the arrangement have rights to the net assets of the arrangement. Those parties are called joint venturers.

For interest in joint operations, the group includes its share of the joint operations' individual income and expenses, assets and liabilities and cash flows on a line-by-line basis with similar items in the group's financial statements.

The group recognises the portion of gains or losses on the sale of assets by the group to the joint operation that is attributable to the other joint operators. The group does not recognise its share of profits or losses from the joint operation that result from the purchase of assets by the group from the joint operation until it resells the assets to an independent party. However, if a loss on the transaction provides evidence of a reduction in the net realisable value of current assets or an impairment loss, the loss is recognised immediately.

The group recognises its interest in a joint venture as an investment and accounts for it using the equity accounting method.

##### *(iv) Structured entities*

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

The accounting treatment for a structured entity will fall into one of the aforementioned categories (i to iii) depending on whether the group has control over that structured entity.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 2 ACCOUNTING POLICIES continued

### GROUP ACCOUNTING POLICIES continued

#### 2.2 Foreign currency translation

##### (i) Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency).

For translation of the rand financial statement items to US dollar, the average of R11.45 (2014: R10.35) (2013: R8.82) per US\$1 was used for income statement items (unless this average was not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case these items were translated at the rate on the date of the transactions) and the closing rate of R12.16 (2014: R10.61) per US\$1 for asset and liability items. Equity items were translated at historic rates. The profit from discontinued operations for the 2013 financial year was translated at the average rate for the eight months (being the period that Evander was part of the group during 2013) of R8.55 per US\$1.

The translation effect from rand to US dollar is included in other comprehensive income in the US\$ financial statements.

References to "A\$" refers to Australian currency, "R" to South African currency, "\$" or "US\$" to United States currency and "K" or "kina" to Papua New Guinean currency.

##### (ii) Transactions and balances

Foreign exchange gains and losses resulting from the settlement of foreign currency transactions and from the translation to year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. Gains and losses recognised in the income statement are included in the determination of "other expenses (net)".

##### (iii) Group companies

The results and financial position of all group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet while equity items are translated at historic rates;
- Income and expenses for each income statement are translated at average exchange rates (the rate on the date of the transaction is used if the average is not a reasonable rate for the translation of the transaction);
- All resulting exchange differences are recognised as a separate component of other comprehensive income.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations, and of borrowings and other currency instruments designated as hedges of such investments, are taken to other comprehensive income. When a foreign operation is sold or control is otherwise lost, exchange differences that were recorded in other comprehensive income are recognised in profit or loss in the period of the disposal or change in control.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign entity and translated at the closing rate.

#### 2.3 Revenue recognition

The group has determined that gold is its primary product and other metals produced as part of the extraction process are considered to be by-products of gold. Revenue arising from metal sales is only recognised when the significant risks and rewards of ownership have been transferred, neither continuing managerial involvement nor effective control over the metals sold has been retained, the amount of revenue and costs incurred can be measured reliably and it is probable that the economic benefits associated with the sale will flow to the group. These conditions are satisfied when the gold has been delivered in terms of the contract and the sales price fixed, as evidenced by the certificate of sale issued by the refinery. The sales price for the majority of the group's gold is based on the gold spot price according to the afternoon London Bullion Market fixing price for gold on the date the sale is concluded.

Revenue further excludes value-added tax. Revenues from silver and other by-product sales are credited to production costs as a by-product credit.

#### 2.4 Exploration expenditure

The group has elected to expense all exploration and evaluation expenditures until it is concluded that the project is technically feasible and commercially viable, and that future economic benefits are therefore probable. The information used to make that determination depends on the level of exploration as well as the degree of confidence in the ore body as set out below.

Exploration and evaluation expenditure on greenfield sites, being those where the group does not have any mineral deposits which are already being mined or developed, is expensed as incurred until the technical and commercial viability of the project has been demonstrated usually through the completion of a final feasibility study. However, in certain instances, the technical and commercial viability of the deposit may be demonstrated at an earlier stage, for example where an extended feasibility study is conducted and the underlying feasibility study in respect of specific components of the mineral deposit has advanced to such a stage that significant commercially viable reserves have been established, and the other criteria for the recognition of an asset have been met.

Exploration and evaluation expenditure on brownfield sites, being those adjacent to mineral deposits which are already being mined or developed, is expensed as incurred until the group is able to demonstrate that future economic benefits are probable through the completion of a feasibility study, after which the expenditure is capitalised as mine development cost. A 'feasibility study' consists of a comprehensive study of the viability of a mineral project that has advanced to a stage where the mining method has been established, and which, if an effective method of mineral processing has been determined, includes a financial analysis based on reasonable assumptions of technical, engineering, operating economic factors and the evaluation of other relevant factors. The feasibility study, when combined with existing knowledge of the mineral property that is adjacent to mineral deposits that are already being mined or developed, allows the group to conclude that the project is technically feasible and commercially viable.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 2 ACCOUNTING POLICIES continued

### GROUP ACCOUNTING POLICIES continued

#### 2.4 Exploration expenditure continued

Exploration and evaluation expenditure relating to extensions of mineral deposits which are already being mined or developed, including expenditure on the definition of mineralisation of such mineral deposits, is capitalised as a mine development cost following the completion of an economic evaluation equivalent to a feasibility study. This economic evaluation is distinguished from a feasibility study in that some of the information that would normally be determined in a feasibility study is instead obtained from the existing mine or development. This information, when combined with existing knowledge of the mineral property already being mined or developed, allows the directors to conclude that the project is technically feasible and commercially viable.

#### 2.5 Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment or when there is an indication of impairment.

Assets that are subject to amortisation are reviewed annually on 30 June for impairment or whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised in the income statement for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Each operating shaft, along with allocated common assets such as plants and administrative offices, is considered to be a cash-generating unit as each shaft is largely independent from the cash flows of other shafts and assets belonging to the group.

Fair value less costs to sell is generally determined by using discounted estimated after-tax future cash flows. Future cash flows are estimated based on quantities of recoverable minerals, expected gold prices (considering current and historical prices, price trends and related factors), production levels, capital expenditure and cash costs of production, all based on life-of-mine plans. Future cash flows are discounted to their present value using a post-tax discount rate that reflects current market assessments of the time value of money and risk specific to the asset. Refer to note 14 for detail.

The term "recoverable minerals" refers to the estimated amount of gold that will be obtained from reserves and resources and all related exploration stage mineral interests (except for other mine-related exploration potential and greenfields exploration potential discussed separately below) after taking into account losses during ore processing and treatment. Estimates of recoverable minerals from such related exploration stage mineral interests will be risk adjusted based on management's relative confidence in such materials.

In estimating future cash flows, assets are grouped at the lowest level for which there are identifiable cash flows that are largely independent of cash flows from other asset groups. With the exception of other mine-related exploration potential and greenfields exploration potential, estimates of future undiscounted cash flows are included on an area of interest basis, which generally represents an individual operating mine, even if the mines are included in a larger mine complex.

In the case of mineral interests associated with other mine-related exploration potential and greenfields exploration potential, cash flows and fair values are individually evaluated based primarily on recent exploration results and recent transactions involving sales of similar properties, if any. Assumptions underlying future cash flow estimates are subject to significant risks and uncertainties.

Impairment losses on goodwill are recognised immediately in the income statement and are not reversed. The impairment testing is performed annually on 30 June or when events or changes in circumstances indicate that it may be impaired.

Non-financial assets other than goodwill that suffered an impairment are reviewed annually for possible reversal of the impairment at 30 June. Reversal of impairments is also considered when there is objective evidence to indicate that the asset is no longer impaired. Where an impairment subsequently reverses, the carrying amount of the asset or CGU is increased to the revised estimate of its recoverable amount, but not higher than the carrying value that would have been determined had no impairment been recognised in prior years.

## 3 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the financial statements in conformity with IFRS requires the group's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The resulting accounting estimates may differ from actual results. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the group statements are:

- Estimate of taxation – note 11;
- Gold mineral reserves and resources – note 14;
- Production start date – note 14;
- Impairment of assets – note 14;
- Depreciation of property plant and equipment – note 14;
- Impairment of goodwill – note 15;
- Valuation of interest in associate – note 20;
- Estimate of exposure and liabilities with regard to rehabilitation costs – note 25;
- Estimate of employee benefit liabilities – note 26;
- Fair value of share-based payments – note 32;
- Assessment of contingencies – note 34.

Please refer to the specific notes for further information on the key accounting estimates and assumptions applied.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 4 FINANCIAL RISK MANAGEMENT

The group's financial instruments expose it to a variety of financial risks: market risk (including currency risk, cash flow interest rate risk and other price risk), credit risk and liquidity risk. The group may use derivative financial instruments to hedge certain risk exposures.

The group's financial assets and liabilities are set out below:

<i>Figures in million (US dollars)</i>	Loans and receivables	Available-for-sale financial assets	Held-to-maturity investments	Fair value through profit or loss	Financial liabilities at amortised cost
<b>At 30 June 2015</b>					
Restricted cash	5	-	-	-	-
Restricted investments	39	-	113	44	-
Trade and other receivables	52	-	-	-	-
Cash and cash equivalents	88	-	-	-	-
Borrowings	-	-	-	-	280
Other non-current liabilities	-	-	-	-	2
Trade and other payables	-	-	-	-	48
<b>At 30 June 2014</b>					
Restricted cash	5	-	-	-	-
Restricted investments	39	-	103	75	-
Trade and other receivables	65	-	-	-	-
Cash and cash equivalents	172	-	-	-	-
Borrowings	-	-	-	-	270
Other non-current liabilities	-	-	-	-	2
Trade and other payables	-	-	-	-	50

Risk management is carried out by a central treasury department (group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges certain selected financial risks in close cooperation with the group's operating units. The board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and the investment of excess liquidity.

### MARKET RISK

#### (i) Foreign exchange risk

The group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar (US\$). Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the entity's functional currency. Harmony's revenues are sensitive to the R/US\$ exchange rate as all revenues are generated by gold sales denominated in US\$. Harmony generally does not enter into forward sales, derivatives or other hedging arrangements to establish an exchange rate in advance for the sale of its future gold production.

The group is exposed to foreign exchange risk arising from borrowings and cash denominated in a currency other than the functional currency of that entity. Harmony generally does not enter into forward sales, derivatives or other hedging arrangements to manage this risk.

The group has reviewed its foreign currency exposure on financial assets and financial liabilities and has identified the following sensitivities for a 10% change in the exchange rate that would affect profit or loss. Management considers a range between 10% and 20% to be a reasonable change.

<i>Figures in million</i>	US dollar	
	2015	2014
<i>Sensitivity analysis - borrowings</i>		
<b>Rand against US\$</b>		
Increase by 10%	25	27
Decrease by 10%	(25)	(27)

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 4 FINANCIAL RISK MANAGEMENT continued

### MARKET RISK continued

#### (ii) Other price risk

The group is exposed to the risk of fluctuations in the fair value of the available-for-sale and fair value through profit or loss financial assets as a result of changes in market prices (other than changes in interest rates and foreign currencies). Harmony generally does not use any derivative instruments to manage this risk.

##### *Sensitivity analysis*

A 1% increase in the share price of the available-for-sale investments at the reporting date, with all other variables held constant, would not have had a material impact on other comprehensive income for 2014 and 2015.

Certain of the restricted investments are linked to the Shareholder Weighted Top 40 Index (SWIX 40) and the Top 40 index on the JSE. A 1% increase in the SWIX 40 and Top 40 index at the reporting date, with all other variables held constant, would have increased profit or loss by US\$0.3 million (2014: US\$0.4 million); an equal change in the opposite direction would have decreased profit or loss by US\$0.1 million (2014: US\$0.2 million).

##### Commodity price sensitivity

The profitability of the group's operations, and the cash flows generated by those operations, are affected by changes in the market price of gold. Harmony generally does not enter into forward sales, derivatives or others hedging arrangements to establish a price in advance for the sale of future gold production.

#### (iii) Interest rate risk

The group's interest rate risk arises mainly from long-term borrowings. The group has variable interest rate borrowings. Variable rate borrowings expose the group to cash flow interest rate risk. The group has not entered into interest rate swap agreements.

##### *Sensitivity analysis - borrowings*

A change of 100 basis points in interest rates at the reporting date would have increased/(decreased) profit or loss before tax by the amounts shown below. This analysis assumes that all other variables remain constant. The analysis is performed on the same basis for 2014.

<i>Figures in million</i>	US dollar	
	2015	2014
Increase by 100 basis points	(3)	(3)
Decrease by 100 basis points	3	3

Interest rate risk arising from long-term borrowings is offset by cash and cash equivalents, restricted cash and restricted investments held at variable rates.

##### *Sensitivity analysis - financial assets*

A change of 100 basis points in interest rates at the reporting date would have increased/(decreased) profit or loss before tax by the amounts shown below. This analysis assumes that all other variables remain constant. The analysis is performed on the same basis for 2014.

<i>Figures in million</i>	US dollar	
	2015	2014
Increase by 100 basis points	3	3
Decrease by 100 basis points	(3)	(3)

### CREDIT RISK

Credit risk is the risk that a counterparty may default or not meet its obligations timeously. Financial instruments, which subject the group to concentrations of credit risk, consist predominantly of restricted cash, restricted investments, trade and other receivables (excluding non-financial instruments) and cash and cash equivalents.

Exposure to credit risk on trade and other receivables is monitored on a regular basis. Refer to note 19 for management's assessment. The credit risk arising from restricted cash, cash and cash equivalents and restricted investments is managed by ensuring amounts are only invested with financial institutions of good credit quality. The group has policies that limit the amount of credit exposure to any one financial institution.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 4 FINANCIAL RISK MANAGEMENT continued

### CREDIT RISK continued

*Cash and cash equivalents and restricted cash*

#### Financial institutions' credit rating by exposure

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Credit rating</b>		
AAA	-	5
AA+	35	63
AA <sup>1</sup>	26	64
AA <sup>-1</sup>	26	34
A <sup>+1</sup>	6	11
<b>Cash and cash equivalents and restricted cash</b>	<b>93</b>	<b>177</b>
AA	3	3
AA-	-	1
A+	2	1
<b>Total restricted cash</b>	<b>5</b>	<b>5</b>

<sup>1</sup> Includes restricted cash.

Environmental trust funds are held with financial institutions who have the following credit ratings: AA+ US\$40.8 million (2014: US\$55.6 million), AA US\$135.9 million (2014: US\$147.4 million) and A+ US\$15.5 million (2014: US\$9.3 million).

The social plan trust fund of US\$3.8 million (2014: US\$4.4 million) has been invested in unit trusts comprising shares in listed companies.

The group's maximum exposure to credit risk is represented by the carrying amount of all financial assets determined to be exposed to credit risk, amounting to US\$341.0 million as at 30 June 2015 (2014: US\$459.8 million).

### LIQUIDITY RISK

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, and the availability of funding through an adequate amount of committed credit facilities.

In the ordinary course of business, the group receives cash from its operations and is required to fund working capital and capital expenditure requirements. The cash is managed to ensure that surplus funds are invested in a manner to achieve market-related returns and to provide sufficient liquidity at the minimum risk. The group is able to actively source financing at competitive rates.

The following are the contractual maturities of financial liabilities (including principal and interest payments):

<i>Figures in million</i>	US dollar	
	Current	More than 1 year
<b>2015</b>		
Other non-current liabilities	-	2
Borrowings		
Due between 0 to six months	5	-
Due between six to 12 months	5	-
Due between one to two years	-	42
Due between two to five years	-	255
Trade and other payables (excluding non-financial liabilities)	48	-
	<b>58</b>	<b>299</b>
<b>2014</b>		
Other non-current liabilities	-	2
Borrowings		
Due between 0 to six months	4	-
Due between six to 12 months	4	-
Due between one to two years	-	272
Due between two to five years	-	-
Trade and other payables (excluding non-financial liabilities)	50	-
	<b>58</b>	<b>274</b>

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 4 FINANCIAL RISK MANAGEMENT continued

### CAPITAL RISK MANAGEMENT

The primary objective of managing the group's capital is to ensure that there is sufficient capital available to support the funding requirements of the group, in a way that optimises the cost of capital and matches the current strategic business plan.

The group manages and makes adjustments to the capital structure, which consists of debt and equity, as and when borrowings mature or when funding is required. This may take the form of raising equity, market or bank debt or hybrids thereof. In doing so, the group ensures it stays within the debt covenants agreed with lenders. The group may also sell assets to reduce debt or schedule projects to manage the capital structure.

The group follows a conservative approach to debt and prefers to maintain low levels of gearing. Net debt is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
Cash and cash equivalents	88	172
Borrowings	(280)	(270)
<b>Net debt</b>	<b>(192)</b>	<b>(98)</b>

There were no changes to the group's approach to capital management during the year.

### FAIR VALUE DETERMINATION OF FINANCIAL ASSETS AND LIABILITIES

The carrying values (less any impairment allowance) of short-term financial instruments are assumed to approximate their fair values.

The fair values of the available-for-sale financial assets are determined by reference to quoted market prices. The fair value of other non-current financial instruments is determined using a discounted cash flow model with market observable inputs, such as market interest rates.

The fair value levels of hierarchy are as follows:

- (1) Quoted prices (unadjusted) in active markets for identical assets (level 1);
- (2) Inputs other than quoted prices included within level 1 that are observable for the asset, either directly (that is, as prices) or indirectly (that is, derived from other prices) (level 2);
- (3) Inputs for the asset that are not based on observable market data (that is, unobservable inputs) (level 3).

The following table presents the group's assets and liabilities that are measured at fair value by level at 30 June 2015.

Assets	Level 1	Level 2	Level 3
<i>Figures in million (US dollar)</i>			
Available-for-sale financial assets <sup>1</sup>	-	-	-
Fair value through profit or loss financial assets <sup>2</sup>	-	44	-

The following table presents the group's assets and liabilities that are measured at fair value by level at 30 June 2014.

Assets	Level 1	Level 2	Level 3
<i>Figures in million (US dollar)</i>			
Available-for-sale financial assets <sup>1</sup>	-	-	-
Fair value through profit or loss financial assets <sup>2</sup>	-	75	-

<sup>1</sup> Refer to note 18. Level 3 fair values have been valued by the directors by performing independent valuations on an annual basis.

<sup>2</sup> Level 2 fair values are directly derived from the Shareholders Weighted Top 40 (SWIX 40) or the Top 40 index on the JSE, and are discounted at market interest rate. The fair value of US\$3.8 million (2014: US\$4.5 million) of the balance in 2015 and 2014 is derived by reference to quoted prices of the shares held within the unit trust portfolio.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 5 COST OF SALES

<i>Figures in million</i>	US dollar		
	2015	2014	2013
Production costs (a)	1 103	1 148	1 283
Amortisation and depreciation of mining assets	211	202	222
Amortisation and depreciation of assets other than mining assets (b)	5	5	5
Rehabilitation (credit)/expenditure (c)	(1)	1	(2)
Care and maintenance costs of restructured shafts (d)	9	6	8
Employment termination and restructuring costs (e)	22	26	5
Share-based payments (f)	18	26	30
Impairment of assets (g)	285	135	274
Other (h)	(7)	-	4
<b>Total cost of sales</b>	<b>1 645</b>	<b>1 549</b>	<b>1 829</b>

(a) Production costs include mine production and transport and refinery costs, applicable general administrative costs, movement in inventories and ore stockpiles, ongoing environmental rehabilitation costs and transfers for stripping activities. Employee termination costs are included, except for employee termination costs associated with major restructuring and shaft closures, which are separately disclosed. Production costs, analysed by nature, consist of the following:

<i>Figures in million</i>	US dollar		
	2015	2014	2013
Labour costs, including contractors	678	711	829
Consumables	303	317	372
Water and electricity	175	182	194
Insurance	9	11	13
Transportation	15	16	23
Change in inventory	17	(10)	(25)
Capitalisation of mine development costs	(133)	(139)	(153)
Stripping activities	(21)	(13)	(35)
By-product sales	(18)	(22)	(29)
Royalty expense	8	12	25
Other	70	83	69
<b>Total production costs</b>	<b>1 103</b>	<b>1 148</b>	<b>1 283</b>

(b) Amortisation and depreciation of assets other than mining assets includes the amortisation of intangible assets.

(c) For the assumptions used to calculate the rehabilitation costs, refer to note 25. This expense includes the change in estimate for the rehabilitation provision where a rehabilitation asset no longer exists as well as rehabilitation costs. For 2015, US\$5.8 million (2014: US\$5.1 million) (2013: US\$7.3 million) was spent on rehabilitation.

(d) Included in the total for the 2015 financial year is an amount of US\$1.7 million in reparation costs relating to the explosion that occurred in March 2015 at the Brand 1A ventilation shaft, which was in the process of being rehabilitated.

(e) During the 2015 financial year, the group embarked on a restructuring process at Kusasaletu, Masimong and Hidden Valley. Target 3 was placed on care and maintenance and Ernest Oppenheimer Hospital was closed in December 2014. Voluntary severance packages were offered to management in September 2014.

For the 2014 financial year, the programme embarked on by the group's South African operations whereby voluntary severance packages were offered to all employees and significant restructuring process at Hidden Valley, both having started during 2013, was completed in June 2014.

(f) Refer to note 32 for details on the share-based payment schemes implemented by the group.

(g) The impairment of assets consists of the following:

<i>Figures in million</i>	US dollar		
	2015	2014	2013
Hidden Valley	174	-	268
Doornkop	85	-	-
Phakisa	23	130	-
Freddies 9 (Other - underground)	3	-	-
Steyn 2 (Bambanani)	-	3	3
St Helena (Other - underground)	-	2	3
<b>Total impairment of assets</b>	<b>285</b>	<b>135</b>	<b>274</b>

During the 2015 year, an impairment of US\$173.8 million was recognised on Hidden Valley following a change in the life-of-mine plan during the annual planning process. Low US\$ commodity prices and high operating costs resulted in the shortening of the life of mine of the operation. Stripping activities in the new plan have been significantly reduced, resulting in a decrease in the reserves to be mined and the lower recoverable amount at 30 June 2015. The recoverable amount of Hidden Valley is US\$53.7 million.

Following the decision to restructure Doornkop in May 2015, a revised life-of-mine plan was completed. In addition, the resource value reduced owing to the decrease in resources declared for Doornkop. The revised life-of-mine plan includes lower production levels and focuses on higher grade areas. Resources below the existing shaft infrastructure which were previously included in the additional resource value were removed. The new plan and lower resource value resulted in a lower recoverable amount and an impairment of US\$85.2 million was recognised. The recoverable amount of Doornkop is US\$151.8 million.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 5 COST OF SALES continued

(g) Impairment of assets continued

Other impairments include US\$22.9 million on Phakisa following the annual life-of-mine plan assessments, and US\$3.5 million for Freddie's 9 as plans to develop the project further at this stage have been stopped. The recoverable amounts are US\$328 million and US\$nil for Phakisa and Freddie's 9 respectively.

During the 2014 financial year, an impairment of US\$130.3 million was recognised on Phakisa. The impairment followed a change in the life-of-mine plan during the annual planning process. The previously planned decline shaft that required significant additional capital expenditure, was removed from the life-of-mine plan. The impairment comprised of US\$123.1 million goodwill and US\$7.1 million mining assets. In 2014, the recoverable amount of Phakisa was US\$401.7 million. Impairments on Steyn 2 of US\$3.4 million and St Helena of US\$2.0 million were recognised following the decision not to mine these operations in future. These operations were impaired to the recoverable amount of US\$nil.

During the 2013 financial year, an impairment to the value of US\$268.0 million was recognised for Hidden Valley. This was due to the operation's poor performance at that stage and the reductions in the US dollar gold and silver prices.

For assumptions used to calculate the recoverable amounts, refer to note 14.

The recoverable amounts for the impaired operations have been determined on a fair value less costs to sell basis using the assumptions per note 14 in discounted cash flow models and attributable resource values. This is a fair value measurement classified as level 3.

(h) Included in Other for the 2015 financial year is a credit of US\$7.6 million relating to the reduction in employees qualifying for post-retirement benefits. Refer to note 26. In addition, amounts relating to inventory adjustments are included in Other for the 2015, 2014 and 2013 financial years.

## 6 PROFIT ON SALE OF PROPERTY, PLANT AND EQUIPMENT

### ACCOUNTING POLICY

Gains and losses on disposals of property, plant and equipment are determined by comparing the proceeds of the sale with the carrying amount and are recognised in the income statement.

<i>Figures in million</i>	US dollar		
	2015	2014	2013
<b>Profit on sale of property, plant and equipment</b>	<b>1</b>	<b>3</b>	<b>16</b>

During the 2014 financial year, a ground swap between Joel mine and Sibanye Gold Limited's (Sibanye) Beatrix mine was completed which resulted in a non-cash profit being recognised for the difference between carrying value of the Joel portion and the fair value of the Beatrix portion. Refer to note 27 for further detail.

For the 2013 financial year, US\$6.8 million profit relates to the sale of the Merriespruit South mining right to Witwatersrand Consolidated Gold Resources Limited (Wits Gold). Also included is a profit of US\$1.7 million for the sale of the Sir Albert Medical Centre and its pharmacy. The remaining profit is the sale of scrap material (including steel) from sites that are closed and being rehabilitated in the Free State.

## 7 OTHER EXPENSES (NET)

<i>Figures in million</i>	US dollar		
	2015	2014	2013
Foreign exchange losses - net (a)	32	18	38
Bad debts provision expense (b)	1	2	-
Bad debts written off	-	-	-
Other (income)/expense - net	-	-	2
<b>Total other expenses (net)</b>	<b>33</b>	<b>20</b>	<b>40</b>

(a) Included in the total for 2015 is a loss of US\$33.4 million (2014: US\$15.0 million) (2013: US\$39.8 million) related to the translation of the US dollar denominated loans into SA rand (refer to note 28). In 2014, a loss of US\$3.4 million was recorded, related to the Australasian intercompany loans not designated as forming part of the net investment in the group's international operations.

(b) The total for 2015 includes a provision of US\$1.3 million for the loan to Rand Refinery (Proprietary) Limited (Rand Refinery). Refer to notes 19 and 20 for further details.

## 8 OPERATING LOSS

The following have been included in operating loss:

<i>Figures in million</i>	US dollar		
	2015	2014	2013
<b>Auditor's remuneration</b>			
<b>Made up as follows:</b>			
<b>External</b>			
Fees - current year	2	2	2
Fees - other services	-	-	-
<b>Total auditor's remuneration</b>	<b>2</b>	<b>2</b>	<b>2</b>

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 9 INVESTMENT INCOME

### ACCOUNTING POLICY

Interest income is recognised on a time proportion basis, taking into account the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to the group.

Dividend income is recognised when the shareholder's right to receive payment is established. This is recognised at the last date of registration.

Cash flows from dividends and interest received are classified under operating activities in the cash flow statement.

Figures in million	US dollar		
	2015	2014	2013
Interest received	20	21	21
Loans and receivables (a)	1	2	2
Held-to-maturity investments	9	6	4
Cash and cash equivalents	9	12	14
South African Revenue Services (SARS)	1	1	1
<b>Total investment income</b>	<b>20</b>	<b>21</b>	<b>21</b>

(a) For the 2015 financial year, interest received on the loan to Rand Refinery amounted to US\$0.5 million. Refer to note 20 for further details.

## 10 FINANCE COST

Figures in million	US dollar		
	2015	2014	2013
<b>Financial liabilities</b>			
Borrowings	10	12	15
Other creditors and liabilities	-	-	-
<b>Total finance cost from financial liabilities</b>	<b>10</b>	<b>12</b>	<b>15</b>
<b>Non-financial liabilities</b>			
Post-retirement benefits	1	2	2
Time value of money and inflation component of rehabilitation costs	13	13	14
South African Revenue Services (SARS)	-	1	1
<b>Total cost from non-financial liabilities</b>	<b>14</b>	<b>16</b>	<b>17</b>
<b>Total finance cost before interest capitalised</b>	<b>24</b>	<b>28</b>	<b>32</b>
Interest capitalised (a)	(2)	(1)	(3)
<b>Total finance cost</b>	<b>22</b>	<b>27</b>	<b>29</b>

(a) The capitalisation rate used to determine the amount of borrowing costs eligible for capitalisation in 2015 was 3.4% (2014: 3.4%) (2013: 4.4%).

## 11 TAXATION

### ACCOUNTING POLICY

Taxation is made up of current and deferred taxation. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the group operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred taxation is recognised on temporary differences existing at each reporting date between the tax base of all assets and liabilities and their carrying amounts. Substantively enacted tax rates are used to determine future anticipated effective tax rates which in turn are used in the determination of deferred taxation, except to the extent that deferred tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and does not affect the accounting or taxable profit or loss at the time of the transaction. Deferred tax is charged to profit or loss, except where the tax relates to items recognised in other comprehensive income or directly in equity in which case the tax is also recognised in other comprehensive income or directly in equity. The effect on deferred tax of any changes in tax rates is recognised in the income statement, except to the extent that it relates to items previously charged or credited directly to equity.

The principal temporary differences arise from amortisation and depreciation on property, plant and equipment, provisions, unutilised tax losses and unutilised capital allowances carried forward. Deferred tax assets relating to the carry forward of unutilised tax losses and unutilised capital allowances are recognised to the extent that it is probable that future taxable profit will be available against which the unutilised tax losses and unutilised capital allowances can be utilised. The recoverability of these assets is reviewed at each reporting date and adjusted if recovery is no longer probable.

Deferred income tax is provided on temporary differences arising from investments in subsidiaries, joint ventures and associates, except where the timing of the reversal of the temporary difference is controlled by the group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Interest received from and paid to the tax authorities is classified as investment income and finance cost on the income statement.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 11 TAXATION continued

### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The group is subject to income tax in several jurisdictions. Significant judgement is required in determining the worldwide provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Management has to exercise judgement with regard to deferred tax assets. Where the possibility exists that no future taxable income may flow against which these assets can be offset, the deferred tax assets are not recognised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled. When different tax rates apply to different levels of taxable income, deferred tax assets and liabilities are measured using the average tax rates that are expected to apply to the taxable profit (tax loss) of the periods in which the temporary differences are expected to reverse. At the group's South African operations, such average tax rates are directly impacted by the profitability of the relevant mine. The deferred tax rate is therefore based on the current estimate of future profitability of an operation when temporary differences will reverse, based on tax rates and tax laws that have been enacted at the balance sheet date. The future profitability of each mine, in turn, is determined by reference to the life-of-mine (LoM) plan for that operation. The LoM plan is influenced by factors as disclosed in note 14, which may differ from one year to the next and normally result in the deferred tax rate changing from one year to the next.

The taxation credit/(expense) for the year is as follows:

<i>Figures in million</i>	US dollar		
	2015	2014	2013
<b>SA taxation</b>			
Mining tax (a)	1	(3)	(37)
- current year	(1)	(5)	(37)
- prior year	2	2	-
Non-mining tax (b)	-	1	6
- current year	-	(1)	-
- prior year	-	2	6
Deferred tax (c)	67	32	9
- current year	67	32	9
	68	30	(22)
<b>Foreign taxation</b>			
Deferred tax	(6)	(3)	(47)
- current year (d)	(1)	(3)	9
- derecognition of deferred tax asset (e)	(5)	-	(56)
<b>Total taxation credit/(expense)</b>	<b>62</b>	<b>27</b>	<b>(69)</b>

<i>Figures in million</i>	US dollar		
	2015	2014	2013
<b>Taxation by type</b>			
Mining tax	1	(3)	(37)
Non-mining tax	-	1	6
Deferred tax	61	29	(38)
	62	27	(69)

(a) Mining tax on gold mining income in South Africa is determined according to a formula, based on the taxable income from mining operations. 5% of total revenue is exempt from taxation while the remainder is taxable at a higher rate than non-mining income as a result of applying the gold mining formula.

All qualifying mining capital expenditure is deducted from taxable mining income to the extent that it does not result in an assessed loss. Accounting depreciation is eliminated when calculating the South African mining tax income. Excess capital expenditure is carried forward as unredeemed capital to be claimed from future mining taxable income. The group has several tax paying entities in South Africa. In terms of the mining ring-fencing application, each ring-fenced mine is treated separately and deductions can normally only be utilised against mining income generated from the relevant ring-fenced mine.

(b) Non-mining income of mining companies and the income for non-mining companies are taxed at the statutory corporate rate of 28% (2014: 28%) (2013: 28%).

(c) The deferred tax rate used to calculate deferred tax is based on the current estimate of future profitability when temporary differences will reverse based on tax rates and tax laws that have been enacted at the balance sheet date. Depending on the profitability of the operations, the deferred tax rate can consequently be significantly different from year to year.

(d) Mining and non-mining income of Australian entities and PNG operation are taxed at a standard rate of 30% (2014: 30%) (2013: 30%).

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 11 TAXATION continued

(e) The recoverability of the deferred tax asset for Australia is no longer considered probable, following the revised LoM plan and impairment recognised on Hidden Valley and as a result it was derecognised on 30 June 2015. For the 2013 financial year, the recovery of the deferred tax asset previously recognised for the Hidden Valley operation was deemed unlikely as there are insufficient estimated future taxable profits against which it could be utilised. As a result, it was derecognised on 30 June 2013.

### INCOME AND MINING TAX RATES

The tax rate remained unchanged for the 2013, 2014 and 2015 years.

Major items causing the group's income tax provision to differ from the South African mining statutory tax rate of 34% (2014: 34%) (2013: 34%) were:

<i>Figures in million</i>	US dollar		
	2015	2014	2013
Tax on net loss at the mining statutory tax rate	148	49	65
Non-allowable deductions	(24)	(25)	(32)
Impairment of assets	(63)	(43)	-
Difference between effective mining tax rate and statutory mining rate on mining income	3	5	8
Difference between non-mining tax rate and statutory mining rate on non-mining income	-	-	-
Effect on temporary differences due to changes in effective tax rates <sup>1</sup>	(21)	11	4
Prior year adjustment	2	5	6
Capital allowance, sale of business and other rate differences <sup>2</sup>	45	50	52
Derecognition of deferred tax asset <sup>3</sup>	(5)	-	(56)
Deferred tax asset not recognised <sup>4</sup>	(23)	(25)	(116)
<b>Income and mining taxation</b>	<b>62</b>	<b>27</b>	<b>(69)</b>
<b>Effective income and mining tax rate (%)</b>	<b>(14)</b>	<b>(19)</b>	<b>36</b>

<sup>1</sup> This relates to the decrease in the deferred tax rates related to Freegold (Harmony) Pty Ltd (Freegold) (20.3% to 16.7%) and Randfontein Estates Limited (Randfontein) (18.9% to 14.3%) mainly due to the lower estimated profitability. In 2014, the significant decreases in the deferred tax rates related to Harmony Gold Mining Company Limited (Harmony) (26.4% to 13.4%) and Freegold (22.9% to 20.3%) mainly due to the lower estimated profitability. In 2013, the significant decreases related to Freegold (24.3% to 22.9%) and Randfontein (18.6% to 17.4%).

<sup>2</sup> This relates to the additional capital allowance that may be deducted from taxable income from mining operations in South Africa. A significant portion relates to Avgold Limited (Avgold), which has a 0% effective tax rate.

<sup>3</sup> In 2015, the Australian deferred tax asset was derecognised as the recoverability is deemed unlikely following the revised LoM for Hidden Valley. For the 2013 financial year, represents the derecognition of the previously recognised deferred tax asset in respect of tax losses for the Hidden Valley operation for which future taxable profits are no longer considered probable.

<sup>4</sup> This relates primarily to the Hidden Valley operation and represents tax losses and deductible temporary difference arising in the year for which future taxable profits are not considered probable.

### DEFERRED TAX

The analysis of deferred tax assets and liabilities is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
Deferred tax assets	(70)	(94)
Deferred tax asset to be recovered after more than 12 months	(52)	(79)
Deferred tax asset to be recovered within 12 months	(18)	(15)
Deferred tax liabilities	227	339
Deferred tax liability to be recovered after more than 12 months	212	318
Deferred tax liability to be recovered within 12 months	15	21
<b>Net deferred tax liability</b>	<b>157</b>	<b>245</b>

Deferred tax liabilities and assets on the balance sheet as of 30 June 2015 and 30 June 2014 relate to the following:

<i>Figures in million</i>	US dollar	
	2015	2014
Gross deferred tax liabilities	227	339
Amortisation and depreciation	227	337
Other	-	2
Gross deferred tax assets	(70)	(94)
Unredeemed capital expenditure	(41)	(59)
Provisions, including non-current provisions	(10)	(15)
Tax losses	(19)	(20)
<b>Net deferred tax liability</b>	<b>157</b>	<b>245</b>
Comprises:		
Net deferred tax liability	157	253
Net deferred tax asset	-	(8)

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 11 TAXATION continued

### DEFERRED TAX continued

Movement in the net deferred tax liability recognised in the balance sheet is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
Balance at beginning of year	245	293
Credit per income statement	(61)	(29)
Tax directly charged to other comprehensive income	-	(1)
Foreign currency translation	(27)	(18)
<b>Balance at end of year</b>	<b>157</b>	<b>245</b>

As at 30 June, the group had the following potential future tax deductions:

<i>Figures in million</i>	US dollar	
	2015	2014
Unredeemed capital expenditure utilisable against future mining taxable income <sup>1</sup>	1 891	2 028
Tax losses carried forward utilisable against mining taxable income <sup>2</sup>	339	280
Capital Gains Tax (CGT) losses available to be utilised against future CGT gains <sup>3,5</sup>	47	55
As at 30 June, the group has not recognised the following deferred tax asset amounts relating to the above	595	626
The unrecognised temporary differences are:		
Unredeemed capital expenditure <sup>4</sup>	1 617	1 726
Tax losses	202	189
CGT losses <sup>3</sup>	47	55

<sup>1</sup> Includes Avgold US\$1 004.2 million (2014: US\$1 046.2 million), Freegold US\$111.4 million (2014: US\$140.1 million), Randfontein US\$152.3 million (2014: US\$158.9 million) and Hidden Valley US\$613.5 million (2014: US\$680.2 million). These have an unlimited carry-forward period.

<sup>2</sup> These have an unlimited carry-forward period.

<sup>3</sup> The CGT losses relate to the gross CGT losses available to be utilised against future CGT gains.

<sup>4</sup> Relates to Avgold and Hidden Valley.

### DIVIDEND TAX (DT)

A withholding tax of 15% on dividends (excluding a return of capital) and other distributions to the beneficial owners of shares (shareholders) became effective on 1 April 2012. DT is withheld by the company declaring the dividend or the withholding agent, unless specifically exempt. Foreign residents could qualify for an exemption or a reduced DT rate in terms of their relevant tax treaty. The withholding tax is a tax on the shareholder and if applicable will be withheld by the company and will reduce the amount paid to the shareholder.

## 12 DISPOSAL GROUPS CLASSIFIED AS HELD FOR SALE AND DISCONTINUED OPERATIONS

### ACCOUNTING POLICY

A non-current asset or disposal group (a business grouping of assets and their related liabilities) is designated as held for sale and stated at lower of carrying value and fair value less cost to sell, when its carrying amount will be recovered principally through a sale transaction rather than through continuing use. The classification as held for sale of a non-current asset or disposal group occurs when it is available for immediate sale in its present condition and the sale is highly probable. A sale is considered highly probable if management is committed to a plan to sell the non-current asset or disposal group, an active divestiture programme has been initiated, the non-current assets or disposal group are marketed at a price reasonable to its fair value and the disposal will be completed within one year from classification.

Upon classification of a non-current asset or disposal group as held for sale it is reviewed for impairment. The impairment charged to the income statement is the excess of the carrying value of the non-current asset or disposal group over its expected net selling price (fair value less cost to sell). At each subsequent reporting date, the carrying values are remeasured for possible impairment. A reversal of impairment is recognised for any subsequent increase in net selling price but not in excess of the cumulative impairment loss already recognised.

No depreciation is provided on non-current assets from the date they are classified as held for sale. Where an investment in associate is classified as held for sale, the group will no longer equity account for the investment.

When a disposal group is classified as held for sale it is also necessary to assess whether or not the criteria for discontinued operations are met. If the criteria are met, the results of the disposal group are classified as discontinued operations in the income statement and the comparative amounts restated for all periods presented. No restatement of balance sheet comparative amounts is done.

The assets and liabilities of Evander Gold Mines Limited (Evander), a wholly owned subsidiary of Harmony Gold Mining Company Limited (Harmony), were classified as held for sale following the signing of a sale of shares and claims agreement on 30 January 2012. On 30 May 2012, Harmony announced the signing of a new sale of shares and claims agreement with Pan African Resources plc (Pan African).

All conditions precedent to the sale were fulfilled and the transaction was completed on 28 February 2013. The purchase consideration of US\$170.0 million was adjusted for distributions received prior to the effective date of US\$23.4 million. A group profit of US\$11.4 million was recorded.

There were no assets or liabilities of the operations classified as held for sale at 30 June 2014 and 30 June 2015.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 12 DISPOSAL GROUPS CLASSIFIED AS HELD FOR SALE AND DISCONTINUED OPERATIONS continued

The analysis of the results and cash flows of discontinued operations are disclosed in the tables below:

<i>Figures in million</i>	US dollar		
	2015	2014	2013
<b>Income statement</b>			
Revenue	-	-	102
Cost of sales	-	-	(68)
Expenses - net	-	-	(1)
Profit on sale of investment in subsidiary	-	-	11
Profit from discontinued operations before tax	-	-	44
Taxation	-	-	(8)
<b>Profit for the year from discontinued operations</b>	-	-	36
<b>Cash flows</b>			
Operating cash flows	-	-	32
Investing cash flows	-	-	123
<b>Total cash flow from discontinued operations</b>	-	-	155

## 13 EARNINGS/(LOSS) PER SHARE

### BASIC LOSS PER SHARE

Basic earnings/(loss) per share is calculated by dividing the net income attributable to shareholders by the weighted number of ordinary shares in issue during the year.

	2015	2014	2013
Ordinary shares in issue ('000)	436 187	435 825	435 290
Adjustment for weighted number of ordinary shares in issue ('000)	(185)	(287)	(733)
Weighted number of ordinary shares in issue ('000)	436 002	435 538	434 557
Treasury shares ('000)	(1 578)	(2 326)	(2 676)
<b>Basic weighted average number of shares in issue ('000)</b>	<b>434 424</b>	<b>433 212</b>	<b>431 881</b>

	US dollar		
	2015	2014	2013
Net loss from continuing operations	(374)	(118)	(260)
Net profit from discontinued operations	-	-	36
<b>Total net loss attributable to shareholders (millions)</b>	<b>(374)</b>	<b>(118)</b>	<b>(224)</b>
Basic loss per share from continuing operations (cents)	(86)	(27)	(60)
Basic earnings per share from discontinued operations (cents)	-	-	8
<b>Total basic loss per share (cents)</b>	<b>(86)</b>	<b>(27)</b>	<b>(52)</b>

### DILUTED LOSS PER SHARE

For diluted earnings/(loss) per share, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all potential dilutive ordinary shares as a result of share options granted to employees under the share option schemes in issue. A calculation is performed to determine the number of shares that could have been acquired at fair value, determined as the average annual market share price of the company's shares, based on the monetary value of the subscription rights attached to the outstanding share options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options.

	2015	2014	2013
Weighted average number of ordinary shares in issue ('000)	434 424	433 212	431 881
Potential ordinary shares ('000)	3 667	1 503	836
<b>Weighted average number of ordinary shares for diluted earnings per share ('000)</b>	<b>438 091</b>	<b>434 715</b>	<b>432 717</b>

	US dollar		
	2015	2014	2013
Diluted loss per share from continuing operations (cents)	(86)	(27)	(60)
Diluted earnings per share from discontinued operations (cents)	-	-	8
<b>Total diluted loss per share (cents)</b>	<b>(86)</b>	<b>(27)</b>	<b>(52)</b>

The inclusion of share options issued to employees, as potential ordinary shares, has a dilutive effect on the earnings/(loss) per share. The issue price and the exercise price include the fair value of any service to be supplied to the entity in the future under the share option or other share-based payment arrangement.

### DIVIDENDS

#### ACCOUNTING POLICY

Dividends declared are recognised in the period in which they are approved by the board of directors. Dividends are payable in South African rand.

Cash flows from dividends paid are classified under financing activities in the cash flow statement.

No dividends were declared for the years ended 30 June 2015 and 30 June 2014.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 13 EARNINGS/(LOSS) PER SHARE continued

### DIVIDENDS continued

On 13 August 2012, the board declared a dividend of 50 SA cents (US\$6.2 cents) per share related to the year ended 30 June 2012. An interim dividend for the year ended 30 June 2013 of 50 SA cents (US\$5.7 cents) per share was declared on 1 February 2013.

<i>Figures in million</i>	US dollar

## 14 PROPERTY, PLANT AND EQUIPMENT

<i>Figures in million</i>	US dollar	
	2015	2014
Mining assets (a)	1 862	2 495
Mining assets under construction (b)	104	97
Undeveloped properties (c)	445	511
Other non-mining assets (d)	19	13
<b>Total property, plant and equipment</b>	<b>2 430</b>	<b>3 116</b>

### (a) Mining assets

#### ACCOUNTING POLICY

Mining assets including mine development costs and mine plant facilities are initially recorded at cost, whereafter they are measured at cost less accumulated depreciation and impairment. Costs include expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably.

The net assets of operations placed on care and maintenance are impaired to their recoverable amount. Expenditure on the care and maintenance of these operations is charged against income, as incurred. Mineral and surface use rights represent mineral and surface use rights for parcels of land both owned and not owned by the group. Mineral and surface rights include acquired mineral use rights in production, development and exploration phase properties. The amount capitalised related to a mineral and surface right represents its fair value at the time it was acquired, either as an individual asset purchase or as part of a business combination, and is recorded at cost of acquisition.

The group's mineral use rights are enforceable regardless of whether proved or probable reserves have been established. In certain limited situations, the nature of use changes from an exploration right to a mining right upon the establishment of proved and probable reserves. The group has the ability and intent to renew mineral use rights where the existing term is not sufficient to recover all identified and valued proved and probable reserves and/or undeveloped mineral interests.

#### Depreciation

Depreciation of mining assets is computed principally by the units-of-production method over life-of-mine based on estimated quantities of economically recoverable proved and probable reserves, which can be recovered in future from known mineral deposits.

In most instances, proved and probable reserves provide the best indication of the useful life of the group's mines (and related assets). However, in some instances, proved and probable reserves may not provide a realistic indication of the useful life of the mine (and related assets). This may be the case, for example, where management is confident that further inferred resources will be converted into measured and indicated resources and if they are economically recoverable, they can also be classified as proved and probable reserves. Management is approaching economic decisions affecting the mine on this basis, but has chosen to delay the work required to designate them formally as reserves.

In assessing which resources to include so as to best reflect the useful life of the mine, management considers resources that have been included in the life-of-mine plan. To be included in the life-of-mine plan, resources need to be above the cut-off grade set by management, which means that the resource can be economically mined and is therefore commercially viable. This consistent systematic method for inclusion in the life-of-mine plan takes management's view of the gold price, exchange rates as well as cost inflation into account. In declaring the resource, management would have had to obtain a specified level of confidence of the existence of the resource through drilling as required by the South African Code for Reporting Exploration Results, Mineral Resources and Mineral Reserves (SAMREC).

Additional confidence in the existence, commercial viability and economical recovery of such resources may be based on historical experience and available geological information, such as geological information obtained from other operations that are contiguous to the group's as well as where the group mines continuations of these other operations' orebodies and reefs. This is in addition to the drilling results obtained by the group and management's knowledge of the geological setting of the surrounding areas, which would enable simulations and extrapolations to be done with a reasonable degree of accuracy.

In instances where management is able to demonstrate the economic recovery of such resources with a high level of confidence, such additional resources, which may also include certain, but not all, of the inferred resources, as well as the associated future development costs of accessing those resources, are included in the calculation of depreciation. The future development costs are those costs that need to be incurred to access these inferred resources, for example the costs to complete a decline or level, which may include infrastructure and equipping costs. These amounts have been extracted from the cash flow projections for the life-of-mine plans.

Mineral rights associated with production phase mineral interests are amortised over the life of mine using the units-of-production method in order to match the amortisation with the expected underlying future cash flows.

#### Impairment

Testing for impairment is done in terms of the group policy as discussed in note 2.5.

#### Stripping activities

The removal of overburden and other mine waste materials is often necessary during the initial development of a mine site, in order to access the mineral ore deposit. The directly attributable cost of this activity is capitalised in full within mining assets under construction, until the point at which the mine is considered to be capable of commercial production.

The removal of waste material after the point at which a mine is capable of commercial production is referred to as production stripping.

When the waste removal activity improves access to ore extracted in the current period, the costs of production stripping are charged to the income statement as operating costs in accordance with the principles of IAS 2 *Inventories*.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 14 PROPERTY, PLANT AND EQUIPMENT continued

### (a) Mining assets continued

#### ACCOUNTING POLICY continued

##### Stripping activities continued

Where production stripping activity both produces inventory and improves access to ore in future periods the associated costs of waste removal are allocated between the two elements. The portion which benefits future ore extraction is capitalised within stripping and development capital expenditure. If the amount to be capitalised cannot be specifically identified it is determined based on the volume of waste extracted compared with expected volume for the identified component of the orebody. Components are specific volumes of a mine's orebody that are determined by reference to the life-of-mine plan.

In certain instances significant levels of waste removal may occur during the production phase with little or no associated production. The cost of this waste removal is capitalised in full.

All amounts capitalised in respect of waste removal are depreciated using the units-of-production method based on proved and probable ore reserves of the component of the orebody to which they relate.

The effects of changes to the life-of-mine plan on the expected cost of waste removal or remaining reserves for a component are accounted for prospectively as a change in estimate.

##### Scrapping of assets

Where significant adverse changes have taken place relating to the useful life of an asset, that asset is tested for impairment in terms of the group policy as discussed in note 2.5. Whether or not an impairment is recognised, it is then necessary to review the useful lives and residual values of the assets within the CGU – this is reviewed at least annually. Where necessary, the useful lives and residual values of the individual assets are revised.

Where the useful life of an asset is nil as a result of no future economic benefit expected from the use or disposal of that asset, it is necessary to derecognise the asset. The loss arising from the derecognition is included in profit or loss in the period in which the asset was derecognised.

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS – GOLD MINERAL RESERVES AND RESOURCES

Gold mineral reserves and resources are estimates of the amount of ounces that can be economically and legally extracted from the group's properties. In order to calculate the gold mineral reserves and resources, estimates and assumptions are required about a range of geological, technical and economic factors, including quantities, grades, production techniques, recovery rates, production costs, commodity prices and exchange rates.

Estimating the quantities and/or grade of the reserves and resources requires the size, shape and depth of the orebodies to be determined by analysing geological data such as the logging and assaying of drill samples. This process may require complex and difficult geological judgements and calculations to interpret the data.

Because the economic assumptions used to estimate the gold mineral reserves and resources change from year to year, and because additional geological data is generated during the course of operations, estimates of the mineral reserves and resources may change from year to year. Changes in the reserves and resources may affect the group's financial results and financial position in a number of ways, including:

- Asset carrying values may be affected due to changes in estimated cash flows;
- Scrapping of assets to be recorded in the income statement, following the derecognition of assets as no future economic benefit expected;
- Depreciation and amortisation charged in the income statement may change as they are calculated on the units-of-production method;
- Environmental provisions may change as the timing and/or cost of these activities may be affected by the change in mineral reserves; and
- Useful life and residual values may be affected by the change in mineral reserves.

At the end of each financial year, the estimate of proved and probable gold mineral reserves and resources is updated. Depreciation of mining assets is prospectively adjusted, based on these changes.

#### SENSITIVITY ANALYSIS - GOLD MINERAL RESERVES AND RESOURCES EFFECT ON DEPRECIATION

The group includes certain inferred resources in the denominator and future development costs in the numerator when performing the depreciation calculation for certain of its operations, where proved and probable reserves alone do not provide a realistic indication of the useful life of mine (and related assets). During the periods presented, this related to the Doornkop South Reef and Masimong shafts. Had the group only used proved and probable reserves in its calculations, depreciation for 2015 would have amounted to US\$226.4 million (2014: US\$217.6 million) (2013: US\$241.2 million), compared with the reported totals of US\$215.8 million (2014: US\$207.0 million) (2013: US\$226.9 million).

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS – PRODUCTION START DATE

Various relevant criteria are considered in order to assess when the mine is substantially complete and ready for its intended use and moves into the production phase. Some of the criteria would include but are not limited to the following:

- The level of capital expenditure compared to the total project cost estimates;
- The ability to produce gold in a saleable form (where more than an insignificant amount of gold has been produced); and
- The ability to sustain the ongoing production of gold.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 14 PROPERTY, PLANT AND EQUIPMENT continued

### (a) Mining assets continued

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS – IMPAIRMENT OF ASSETS

The recoverable amount of mining assets is generally determined utilising real discounted future cash flows.

Management also considers such factors as the quality of the individual orebody, market risk, asset specific risks and country risk in determining the fair value.

Key assumptions for the calculations of the mining assets' recoverable amounts are the commodity prices, resource values, marketable discount rates, costs to sell, exchange rates and the annual life-of-mine plans. In determining the commodity prices and resource values to be used, management assesses the long-term views of several reputable institutions on commodity prices and based on this, derives the commodity prices and resource values. The life-of-mine plans are based on the proved and probable reserves as included in the Reserve Declaration, which are determined in terms of SAMREC and The Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC), as well as resources where management has high confidence in the orebody and economical recovery of gold, based on historic and similar geological experience.

During the year under review, the group calculated the recoverable amounts (generally fair value less costs to sell) based on updated life-of-mine plans and the following gold price, silver price and exchange rates assumptions:

	2015			2014	2013		
	Short term Year 1	Medium term Year 2	Long term Year 3+		Short term Year 1	Medium term Year 2	Long term Year 3+
US\$ gold price per ounce	1 150	1 180	1 200	1 300	1 250	1 300	1 400
US\$ silver price per ounce	14.00	14.50	17.00	21.00	20.00	21.00	23.00
Exchange rate (R/US\$)	12.17	11.86	11.66	10.17	9.95	9.57	8.89
Exchange rate (PGK/US\$)	2.75	2.75	2.75	2.27	2.22	2.28	2.32
Rand gold price (R/kg)	450 000	450 000	450 000	425 000	400 000	400 000	400 000

The post-tax real discount rate for Hidden Valley was 12.03% (2014: 9.33%) (2013: 8.52%) and the post-tax real discount rates for the South African operations ranged between 7.99% and 11.38% (2014: 7.03% and 11.56%) (2013: 6.21% and 10.20%), depending on the asset, were used to determine the recoverable amounts (generally fair value less costs to sell). Cash flows used in the impairment calculations are based on life-of-mine plans which exceed five years for the majority of the mines. Refer to note 5 for details of impairments recorded. The attributable gold resource value assumptions:

US dollar per ounce	South Africa			Hidden Valley		
	2015	2014	2013	2015	2014	2013
Measured	40.86	45.40	n/a	n/a	n/a	n/a
Indicated	23.35	25.94	n/a	15.00	76.79	87.95
Inferred	5.84	6.49	20.00	6.00	25.00	27.00

Should management's estimate of the future not reflect actual events, further impairments may be identified.

Factors affecting the estimates include:

- Changes to proved and probable ore reserves;
- Economical recovery of resources;
- The grade of the ore reserves may vary significantly from time to time;
- Review of strategy;
- Unforeseen operational issues at the mines;
- Differences between actual commodity prices and commodity price assumptions;
- Changes in the discount rate and foreign exchange rates; and
- Changes in capital, operating mining, processing and reclamation costs.

#### SENSITIVITY ANALYSIS - IMPAIRMENT OF ASSETS

The sensitivity scenario of a 10% decrease in the commodity prices in the discounted cash flow models and the resource values used would have resulted in an additional impairment at 30 June 2015 for Phakisa of US\$103.1 million, Doornkop of US\$75.9 million and Hidden Valley of US\$37.9 million. The decreases noted would have resulted in impairments at Target 1 of US\$77.1 million, Target 3 of US\$2.7 million, Tshepong of US\$57.0 million (of which US\$47.8 million is goodwill), Unisel of US\$0.5 million and other Harmony assets of US\$32.3 million.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

Elimination of fully depreciated and impaired assets no longer in use	(55)	(7)
Impairment of assets	285	13
Disposals	(3)	-
Scrapping of assets	(41)	-
Depreciation	215	206
Transfers and other movements	(1)	-
Translation	(217)	(95)
<b>Balance at end of year</b>	<b>1 869</b>	<b>1 686</b>
<b>Net carrying value</b>	<b>1 862</b>	<b>2 495</b>

#### Scrapping of assets

During the 2015 financial year, Harmony management embarked on a life-of-mine optimisation process in respect of the South African operations. The optimisation ensured greater focus on mining profitable and higher grade areas at our operations and therefore resulted in the abandonment of lower grade and unprofitable areas from the life-of-mine plan for certain of the operations. A loss on scrapping of US\$42.2 million (2014: US\$nil) (2013: US\$nil) was recorded.

The abandonment of unprofitable areas in the plans resulted in the derecognition of property, plant and equipment as no future economic benefits are expected from their use or disposal and a loss on scrapping of property, plant and equipment amounting to US\$20.2 million and US\$19.8 million was recorded for Kusasaletu and Masimong respectively. Losses of US\$1.9 million and US\$0.3 million were also recorded for Tshepong and Phakisa.

#### Stripping activities

Included in the balance for mining assets is an amount of US\$2.5 million (2014: US\$43.2 million) for stripping activities. Depreciation of US\$24.8 million (2014: US\$19.4 million) and impairment of US\$32.3 million (2014: US\$nil) related to Hidden Valley were recorded for these activities.

### (b) Mining assets under construction

#### ACCOUNTING POLICY

At the group's surface mines, when it has been determined that a mineral property can be economically developed as a result of establishing proved and probable reserves, costs incurred to develop the property are capitalised as incurred until the mine is considered to have moved into the production phase. These costs include costs to further delineate the orebody and remove overburden to initially expose the orebody. At the group's underground mines, all costs incurred to develop the property, including costs to access specific ore blocks or other areas of the underground mine, are capitalised to the extent that such costs will provide future economic benefits. These costs include the cost of shaft sinking and access, the costs of building access ways, lateral development, drift development, ramps, box cuts and other infrastructure development.

Borrowing costs are capitalised to the extent that they are directly attributable to the acquisition and construction of qualifying assets. Qualifying assets are assets that take a substantial time to get ready for their intended use. These costs are capitalised until the asset moves into the production phase. Other borrowing costs are expensed.

Where a depreciable asset is used in the construction or extension of a mine, the depreciation is capitalised against the mine's cost.

Exploration properties acquired are recognised in the balance sheet within development cost and are shown at cost less provisions for impairment determined in accordance with the group's accounting policy on impairment of non-financial assets.

Mineral interests associated with development and exploration phase mineral interests are not amortised until such time as the underlying property is converted to the production stage.

Capitalisation of pre-production costs ceases when commercial levels of production are reached. Commercial levels of production are discussed under "production start date" above.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

## 14 PROPERTY, PLANT AND EQUIPMENT continued

### (b) Mining assets under construction continued

The movement in the mining assets under construction balance is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Cost</b>		
Balance at beginning of year	97	203
Additions	30	23
Finance costs capitalised <sup>1</sup>	2	1
Disposals	-	-
Transfers and other movements	(11)	(112)
Translation	(14)	(18)
<b>Balance at end of year</b>	<b>104</b>	<b>97</b>

<sup>1</sup> The average capitalisation rate applied was 3.4% (2014: 3.4%).

### (c) Undeveloped properties

#### ACCOUNTING POLICY

Undeveloped properties are initially valued at the fair value of resources obtained through acquisitions. The carrying values of these properties are annually tested for impairment. Once development commences, these properties are transferred to mining properties and accounted for in accordance with the related accounting policy.

The movement in the undeveloped properties balance is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Cost</b>		
Balance at beginning of year	512	582
Transfers and other movements	-	(39)

<b>Net carrying value</b>	<b>445</b>	<b>511</b>

### (d) Other non-mining assets

#### ACCOUNTING POLICY

Land is shown at cost and not depreciated. Other non-mining fixed assets are shown at cost less accumulated depreciation and accumulated impairment losses.

Other non-mining fixed assets are depreciated on a straight-line basis over their estimated useful lives as follows:

- Vehicles at 20% per year.
- Computer equipment at 33.3% per year.
- Furniture and equipment at 16.67% per year.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

## 15 INTANGIBLE ASSETS

### ACCOUNTING POLICY

Intangible assets consist of all identifiable non-monetary assets without physical substance. They are stated at cost less accumulated amortisation and accumulated impairment losses, if any. The following are the main categories of intangible assets:

#### Goodwill

Goodwill is an intangible asset with an indefinite useful life which is not amortised but tested for impairment on an annual basis, or when there is an indication of impairment. The excess of consideration transferred over the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recorded as goodwill. Goodwill on acquisition of subsidiaries, joint ventures and businesses is included in intangible assets. Goodwill on acquisition of associates is included in investments in associates and tested for impairment as part of the overall balance.

Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. If the composition of one or more cash-generating units to which goodwill has been allocated changes due to a re-organisation, the goodwill is re-allocated to the units affected.

The gain or loss on disposal of an entity includes the carrying amount of goodwill relating to the entity sold.

#### Technology-based assets

Acquired computer software licences that require further internal development are capitalised on the basis of costs incurred to acquire and bring to use the specific software. These technology-based assets are classified as intangible assets with a finite useful life. These assets are amortised on a straight-line basis over their estimated useful lives, which are reviewed annually, as follows:

- Computer software at 20% per year.

### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS - IMPAIRMENT OF GOODWILL

Due to the wasting nature of mining assets and the finite life of a mine's reserves, the allocation of goodwill to a shaft will eventually result in an impairment charge for the goodwill. The group tests annually whether separately identifiable goodwill has suffered any impairment in accordance with the accounting policy stated in note 2.5. These calculations use estimates as per note 14.

<i>Figures in million</i>	US dollar	
	2015	2014
Goodwill (a)	70	80
Technology-based assets (b)	3	4
<b>Total</b>	<b>73</b>	<b>84</b>

<b>Net carrying value</b>	<b>3</b>	<b>4</b>

Technology-based assets includes computer software and intellectual property which has been acquired and developed for the group. These assets are amortised over five years.

### ACCOUNTING POLICY - FINANCIAL ASSETS (APPLICABLE TO NOTES 16, 17, 18 AND 19)

Financial assets are initially measured at fair value when the group becomes a party to their contractual arrangements, with the exception of loans and receivables which are recognised on origination date. Transaction costs are included in the initial measurement of financial instruments, with the exception of financial instruments classified as at fair value through profit or loss. The subsequent measurement of financial assets is discussed below.

A financial asset is derecognised when the right to receive cash flows from the asset has expired or the group has transferred its rights to receive cash and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the assets.

On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received and any cumulative gain or loss recognised in equity is recognised in profit or loss.

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## ACCOUNTING POLICY - FINANCIAL ASSETS (APPLICABLE TO NOTES 16, 17, 18 AND 19) continued

The group classifies financials assets as follows:

- **Loans and receivables** are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the group provides money, goods or services directly to a debtor with no intention of trading the receivable. Loans and receivables are subsequently measured at amortised cost using the effective interest method. Loans and receivables include trade and other receivables (excluding VAT and prepayments), restricted cash and cash and cash equivalents.

- **Cash and cash equivalents** are defined as cash on hand, deposits held at call with banks and short-term highly liquid investments with original maturities of three months or less. Cash and cash equivalents exclude restricted cash.

- **Trade and other receivables** are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of receivables is established when there is objective evidence that the group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate. The carrying amount of the asset is reduced through the use of a provision for impairment (allowance account) and the amount of the loss is recognised in the income statement. When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited in the income statement.

- **Available-for-sale financial assets** are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless the investment matures or management intends to dispose of the investment within 12 months of the balance sheet date.

Available-for-sale financial assets are subsequently carried at fair value. The fair values of quoted investments are based on current bid prices. If the fair value for a financial instrument cannot be obtained from an active market, the group establishes fair value by using valuation techniques.

The group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the securities are impaired. If considered impaired, the cumulative loss is removed from other reserves and recognised in the income statement. Subsequent increases in the fair value are recognised in equity as impairment losses recognised in the income statement are not reversed through the income statement.

- **Held-to-maturity** investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the group's management has the positive intention and ability to hold to maturity. The group's held-to-maturity investments are subsequently measured at amortised cost using the effective interest method. The group assesses at the end of each reporting period whether there is objective evidence that a held-to-maturity investment is impaired as a result of an event.

A portion of restricted investments held by the environmental trust funds (refer to note 17) are classified as held-to-maturity investments.

- **Financial assets at fair value through profit or loss** have two sub-categories: financial assets held-for-trading, and those designated at fair value through profit or loss at inception. These assets are subsequently measured at fair value with gains or losses arising from changes in fair value recognised in the income statement in the period in which they arise.

## 16 RESTRICTED CASH

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Non-current</b>	4	4
Environmental guarantees (a)	4	3
Lease security deposits	-	1
<b>Current</b>	1	1
Environmental rehabilitation (b)	1	1
<b>Total restricted cash</b>	<b>5</b>	<b>5</b>

(a) The amount relates to funds set aside to serve as collateral against guarantees made to the Department of Mineral Resources (DMR) in South Africa for environmental and rehabilitation obligations. Refer to note 25. A portion of the funds are held on call account and the balance is invested in money market funds.

(b) The amount relates to monies released from the environmental trust funds as approved by the DMR. These funds may only be used for further rehabilitation.

## 17 RESTRICTED INVESTMENTS

## 17 RESTRICTED INVESTMENTS continued

### (a) Environmental trust funds

The environmental trust funds consist of:

<i>Figures in million</i>	US dollar	
	2015	2014
Held-to-maturity financial assets	113	103
Cash and cash equivalents (loans and receivables)	39	39
Fair value through profit or loss financial assets	40	71
<b>Total environmental trust funds</b>	<b>192</b>	<b>213</b>

### ACCOUNTING POLICY

Contributions are made to the group's environmental trust funds, created in accordance with statutory requirements, to fund the estimated cost of pollution control, rehabilitation and mine closure at the end of the life of the group's mines. The trusts are consolidated into the group as the group exercises control of the trusts. The measurement of the investments held by the trust funds is dependent on their classification under financial assets. Income received and gains are treated in accordance with these classifications.

The environmental trust funds are irrevocable trusts under the group's control. Contributions to the trusts are invested in interest-bearing short-term and medium-term cash investments and medium term equity-linked notes issued by commercial banks that provide guaranteed interest and additional interest or growth linked to the growth of the Shareholder Weighted Top 40 (SWIX 40) or the Top 40 index of the JSE. The equity-linked notes are designated fair value through profit or loss investments and recorded at fair value whilst the interest-bearing short-term investments are classified either as held-to-maturity and recorded at amortised cost or as cash and cash equivalents and recorded at fair value. These investments provide for the estimated cost of rehabilitation at the end of the life of the group's mines. Income earned on the investments is retained in the funds and reinvested.

Reconciliation of the movement in the investments held by environmental trust funds:

<b>Balance at end of year</b>	<b>192</b>	<b>213</b>

### (b) The social trust fund

The social trust fund is an irrevocable trust under the group's control. The group undertook to donate over a period of 10 years to The Harmony Gold Mining Group Social Plan Trust in terms of an agreement signed on 3 November 2003. An initial donation of US\$2.7 million was made during the 2004 year. Thereafter instalments of R3.5 million per annum were made with the final instalment in 2013. The purpose of the trust is to fund the social plan to reduce the negative effects of restructuring on the group's workforce, to put measures in place to ensure that the technical and life skills of the group's workforce are developed and to develop the group's workforce in such a manner as to avoid or minimise the effect of job losses and a decline in employment through turnaround or redeployment strategies.

The social trust fund investment comprises a unit trust portfolio that is exposed to the fair value changes in the equity market and is classified as a fair value through profit or loss investment.

Reconciliation of the movement in the investments held by the social trust fund:

<b>Balance at end of year</b>	<b>-</b>	<b>-</b>

At the end of 2015 and 2014, all investments are unlisted shares and have been valued by the directors by performing independent valuations on an annual basis to ensure that no permanent impairment in the value of the investments has occurred.

(a) Included in the amount for 2014 is a net increase in fair value of US\$0.7 million for the investment in Wits Gold. During 2014, a cash offer for Wits Gold's entire share capital was made to all Wits Gold shareholders by Sibanye. Harmony accepted the offer and on 14 April 2014 a total consideration of US\$4.9 million was received. The accumulated gain of US\$1.3 million recognised in equity was reclassified to the income statement, resulting in a profit on disposal.

## 19 TRADE AND OTHER RECEIVABLES

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Current assets</b>		
Financial assets		
Trade receivables (gold)	35	14

<b>Total non-current trade and other receivables</b>	<b>7</b>	<b>-</b>

(a) Included in the balance for the 2014 financial year is the self-insurance fund of US\$16.3 million. The self-insurance fund was terminated during the 2015 financial year.

No impairment allowance is necessary in respect of any balances included in interest and other receivables as all amounts are classified as fully performing.

(b) (i) During 2015, Rand Refinery drew down on the facility provided by its shareholders. Harmony's portion of the shareholders' loan was US\$10 million. As the loan is considered to be part of the net investment in the associate, Harmony's share of Rand Refinery's losses of US\$2.1 million was recorded against the loan. At year end, the loan was tested for impairment and an amount of US\$1.2 million was provided for. Refer to note 20 for more details.

(ii) Included in the 2015 balance is a loan of US\$9.5 million (2014: US\$10.9 million) owed by Pamodzi Gold Limited (Pamodzi). Pamodzi was placed into liquidation during 2009 and the loan was provided in full. Harmony is a concurrent creditor in the Pamodzi Orkney liquidation.

The movement in the provision for impairment of current trade and other receivables during the year was as follows:

	<b>11</b>	<b>11</b>

Based on past experience, the group believes that no impairment allowance is necessary in respect of fully performing receivables as the amount relates to customers that have a good track record with the group. The majority of fully performing trade receivables are indirectly associated with financial institutions of good credit quality. Similarly, the other loans and receivables noted above, other than those provided for, are fully performing and considered to be a low credit risk.

During the 2015 and 2014 years there was no renegotiation of the terms of any receivable.

As at 30 June 2015 and 30 June 2014, there was no collateral pledged or held for any of the receivables.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

## 20 INVESTMENTS IN ASSOCIATES

### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The investments in associates are evaluated annually for impairment by comparing the entire carrying value of the investment (including loans to associates) to the recoverable amount, which is the higher of value in use or fair value less costs to sell. Discounted cash flow models are used to calculate the net present value of the investments. The cash flows in the models include expected interest and capital payments on loans, dividends and proceeds on disposal.

- (a) Harmony acquired a 32.4% interest in Pamodzi on 27 February 2008, initially valued at US\$46.5 million. Pamodzi was listed on the JSE and had interests in operating gold mines in South Africa. Pamodzi was placed in liquidation in March 2009 and the trading of its shares on the JSE was suspended. As at 30 June 2015, the liquidation process has not been concluded. No financial information subsequent to 31 March 2009 is available and therefore no information has been disclosed.
- (b) Rand Refinery provides precious metal smelting and refining services in South Africa. Harmony holds a 10.38% share in Rand Refinery. Although the group holds less than 20% of the equity shares of Rand Refinery, the group is able to exercise significant influence by virtue of having a right to appoint a director on the board. Through the 10% shareholding and the right to appoint a director on the board, the investment has been accounted for as an associate.
- (i) The movement in the investment in associate during the year is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
Balance at beginning of year	-	11
Share of losses	-	(10)
Translation	-	(1)
<b>Balance at end of year</b>	<b>-</b>	<b>-</b>

Harmony has equity accounted for its share of the profits and losses based on Rand Refinery's most recent available management accounts.

Due to issues experienced at Rand Refinery following the implementation of a new Enterprise Resource Planning (ERP) system on 1 April 2013, a discrepancy between the actual inventory and the accounting records was noted. Harmony provided for its estimated share of loss for the inventory discrepancy and recognised a US\$12.0 million loss in the 2014 financial year. This resulted in the investment being written down to US\$nil during the 2014 financial year.

- (ii) As a precautionary measure following the challenges experienced by the implementation of the software system, Rand Refinery's shareholders have extended Rand Refinery an irrevocable, subordinated loan facility of up to US\$114.2 million. The facility is convertible to equity after a period of two years. Harmony's maximum commitment in terms of this facility is US\$13.3 million. The agreements relating to the facility were signed on 23 July 2014. In December 2014, Rand Refinery drew down US\$88.1 million on the shareholders' loan. Harmony's portion of the shareholders' loan drawn down was US\$10.4 million. Interest on the facility is JIBAR plus a margin of 3.5%. During the 2015 financial year, interest received on the drawn loan amounted to US\$0.5 million.

Following the finalisation of Rand Refinery's 2013 and 2014 audited financial statements, which accounted for the known inventory discrepancy at that date, Harmony has recorded a further US\$2.1 million loss against the loan to Rand Refinery (loan to associate) for its share of Rand Refinery's losses. The loan, in substance, forms part of Harmony's net investment in Rand Refinery.

At 30 June 2015, the loan to associate was tested for impairment and a provision for impairment of US\$1.2 million was required. This impairment is included in "Other expenses (net)" in the income statement.

The movement in the loan to associate during the year is as follows:

Rand Refinery's year end is 30 September.

## 21 INVESTMENT IN JOINT OPERATIONS

### MOROBE MINING JOINT VENTURES (MMJV) PARTNERSHIP AGREEMENT

The group has a 50% interest in mining and exploration assets located in the Morobe province, PNG. Newcrest Mining Limited (Newcrest) owns the remaining 50% interest in these assets. The assets include the Hidden Valley mine and the Wafi-Golpu projects. This partnership was formed during the 2009 financial year through a range of transactions, which included Newcrest's purchase of a 30.01% participating interest and a further farm-in of an additional 19.99% participating interest in the assets. The total value of the transaction was estimated at US\$530 million and was completed by 30 June 2009. The joint arrangement is accounted for as a joint operation.

## 22 INVENTORIES

### ACCOUNTING POLICY

Inventories, which include bullion on hand, gold-in-process, gold in lock-up, ore stockpiles and consumables, are measured at the lower of cost and net realisable value. Net realisable value is assessed at each reporting date and is determined with reference to relevant market prices.

The cost of bullion, gold-in process and gold in lock-up is determined by reference to production cost, including amortisation and depreciation at the relevant stage of production. Ore stockpiles are valued at average production cost. Stockpiles and gold in lock-up are classified as non-current assets where the stockpile exceeds current processing capacity and where a portion of static gold in lock-up is expected to be recovered more than 12 months after balance sheet date.

Gold in-process inventories represent materials that are currently in the process of being converted to a saleable product. In-process material is measured based on assays of the material fed to process and the projected recoveries at the respective plants. In-process inventories are valued at the average cost of the material fed to process attributable to the source material coming from the mine or stockpile plus the in-process conversion costs, including the applicable depreciation relating to the process facility, incurred to that point in the process. Gold in-process includes gold in lock-up which is generally measured from the plants onwards. Gold in lock-up is expected to be extracted when plants are demolished at the end of their useful lives, which is largely dependent on the estimated useful life of the operations feeding the plants. Where mechanised mining is used in underground operations, in-progress material is accounted for at the earliest stage of production when reliable estimates of quantities and costs are capable of being made. At the group's open pit operations, gold in-process represents production in broken ore form.

Consumables are valued at weighted average cost value after appropriate allowances for slow moving and redundant items.

<i>Figures in million</i>	US dollar	
	2015	2014
Gold in lock-up	3	5
Gold in-process, ore stockpiles and bullion on hand	50	75
Consumables at weighted average cost	56	70
Total inventories	109	150
Non-current portion of gold in lock-up and gold in-process	(3)	(5)
<b>Total current portion of inventories</b>	<b>106</b>	<b>145</b>
Included in the balance above is:		
Inventory valued at net realisable value	44	21

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 22 INVENTORIES continued

During the 2015 financial year, a write-down of US\$1.2 million (2014: US\$0.7 million) was made for the net realisable value adjustment for gold in lock-up.

During the year, an increase of US\$4.7 million (2014: US\$1.4 million) to the provision for slow moving and redundant stock was made. The increase in 2015 and 2014 in the provision was primarily the result of additional redundant stock items being identified in PNG and taken into account. The total provision at 30 June 2015 was US\$10.0 million (2014: US\$6.4 million).

## 23 SHARE CAPITAL

### ACCOUNTING POLICY

Ordinary shares are classified as equity, incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

The cost of treasury shares is eliminated against the share capital balance.

#### Authorised

1 200 000 000 (2014: 1 200 000 000) ordinary shares of 50 SA cents each.

#### Issued

436 187 133 (2014: 435 825 447) ordinary shares of 50 SA cents each. All issued shares are fully paid.

Note 32 set out details in respect of the share option scheme and shares held in trust for the employees of the group.

#### Share issues

Shares issued in the 2015 and 2014 financial years relate to the exercise of share incentives by employees.

#### Treasury shares

Included in the total of issued shares is an amount of 335 shares held by Lydenburg Exploration Limited, a wholly owned subsidiary of the company.

During August 2012, 3.5 million shares were issued to the Tlhakanelo Employee Share Trust. As the trust is controlled by the group, the shares are treated as treasury shares. During 2015, 670 859 (2014: 828 921) shares were exercised by employees and the remaining 1 062 672 shares are still held as treasury shares.

## 24 OTHER RESERVES

<i>Figures in million</i>	US dollar

<b>Balance at end of year</b>	<b>(1 378)</b>	<b>(1 010)</b>

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 24 OTHER RESERVES continued

- (b) The balance of the fair value movement reserve represents the movement in the fair value of the available-for-sale financial assets. For details on the movement, refer to note 18.

<i>Figures in million</i>	US dollar	
	2015	2014
Balance at beginning of year	-	-
Fair value movement - unrealised	-	1
Fair value movement - realised portion reclassified to profit or loss	-	(1)
<b>Balance at end of year</b>	<b>-</b>	<b>-</b>

- (c) On 24 May 2004, the group issued a convertible bond. The amount representing the value of the equity conversion component is included in other reserves, net of deferred income taxes. The equity conversion component is determined on the issue of the bonds and is not changed in subsequent periods. The convertible bonds were repaid in 2009.
- (d) On 15 March 2004, Harmony announced that it had made an off-market cash offer to acquire all the ordinary shares, listed and unlisted options of Abelle Limited, held by non-controlling interests. The excess of the purchase price of US\$86.5 million (A\$123 million) over the carrying amount of non-controlling interest acquired, amounting to US\$57 million, has been accounted for under other reserves.
- (e) Share-based payments

<i>Figures in million</i>	US dollar	
	2015	2014
Balance at beginning of year	159	136
Share-based payments expensed	16	23
<b>Balance at end of year</b>	<b>175</b>	<b>159</b>

The group issues equity-settled instruments to certain qualifying employees under an employee share option scheme and employee share ownership plan (ESOP) to purchase shares in the company's authorised but unissued ordinary shares. Equity share-based payments are measured at the fair value of the equity instruments at the date of the grant. Share-based payments are expensed over the vesting period, based on the group's estimate of the shares that are expected to eventually vest. During the 2015 financial year, the equity-settled share-based payment expense of US\$16.4 million (2014: US\$22.9 million) was charged to the income statement (refer to note 32 for more details).

- (f) On 19 March 2010, Harmony Gold Mining Company Limited concluded an agreement with African Vanguard Resources (Proprietary) Limited (AVRD), for the purchase of its 26% share of the mining titles of the Doornkop South Reef. The original sale of the 26% share in the mining titles was accounted for as an in-substance call option by AVRD over the 26% mineral right. The agreement to purchase AVRD's 26% interest during the 2010 financial year is therefore considered to be a repurchase of the option (equity interest). The 26% interest was transferred from AVRD to Harmony in exchange for Harmony repaying the AVRD Nedbank loan and the issue of 2 162 359 Harmony shares. The difference between the value of the shares issued of US\$20.5 million, the liability to the AVRD and transaction costs, have been taken directly to equity.
- (g) Included in the 2015 financial year is an actuarial gain of US\$0.4 million (2014: actuarial loss of US\$2.9 million), net of tax of US\$0.2 million (2014: US\$0.7 million), on post-retirement benefits recognised in other comprehensive income (refer to note 26 for more details).

### ACCOUNTING POLICY - PROVISIONS (APPLICABLE TO NOTES 25, 26 AND 27)

Provisions are recognised when the group has a present legal or constructive obligation as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognised as a provision is the net present value of the best estimate of the expenditure required to settle the present obligation at balance sheet date using a pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the obligation. The estimate takes into account the associated risks and uncertainties. The increase in the provision due to the passage of time is recognised as interest expense.

Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic benefits will be required, the provision is reversed.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 25 PROVISION FOR ENVIRONMENTAL REHABILITATION

### ACCOUNTING POLICY

Estimated long-term environmental obligations, comprising pollution control, rehabilitation and mine closure, are based on the group's environmental management plans in compliance with current technological, environmental and regulatory requirements.

Based on disturbances to date, the net present value of expected rehabilitation cost estimates is recognised and provided for in full in the financial statements. The estimates are reviewed annually and are discounted using a pre-tax risk-free rate that is adjusted to reflect the current market assessments of the time value of money and the risks specific to the obligation.

Annual changes in the provision consist of finance costs relating to the change in the present value of the provision and inflationary increases in the provision estimate, as well as changes in estimates. The present value of environmental disturbances created are capitalised to mining assets against an increase in the rehabilitation provision. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in the income statement. If the asset value is increased and there is an indication that the revised carrying value is not recoverable, impairment is performed in accordance with the accounting policy dealing with impairments of non-financial assets. Rehabilitation projects undertaken, included in the estimates are charged to the provision as incurred. The cost of ongoing current programmes to prevent and control pollution is charged against income as incurred. Over time, the liability is increased to reflect an interest element, and the capitalised cost is depreciated over the life of the related asset.

### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Significant judgement is applied in estimating ultimate rehabilitation cost that will be required in future to rehabilitate the group's mines. Ultimate cost may significantly differ from current estimates.

For the South African operations, management used an inflation rate of 6.50% (2014: 6.50%) (2013: 6.00%) and the expected life of the mines according to the life-of-mine plans in the calculation of the estimated net present value of the rehabilitation liability. The discount rates used for the calculation are dependent on the shaft's life of mine and are as follows: for 12 months – 6.50% (2014: 6.75%) (2013: 5.30%); for one to five years – 7.30% (2014: 7.75%) (2013: 6.20%); for six to nine years – 7.80% (2014: 8.00%) (2013: 6.40%) and for ten years or more – 8.00% (2014: 8.25%) (2013: 7.25%). These estimates were based on recent yields determined on government bonds.

In calculating the rehabilitation liability in PNG for 2015, an inflation rate of 5.0% (2014: 2.9%) (2013: 2.5%) was used, together with a discount rate of 6.25% (2014: 6.25%) (2013: 6.80%).

The group's mining and exploration activities are subject to extensive environmental laws and regulations. The group has made, and expects to make in the future, expenditures to comply with such laws and regulations, but cannot predict the full amount of such future expenditures. Estimated future reclamation costs are based principally on legal and regulatory requirements.

The following is a reconciliation of the total liability for environmental rehabilitation:

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Provision raised for future rehabilitation</b>		
Balance at beginning of year	198	200
Change in estimate - Balance sheet	3	1
Change in estimate - Income statement	(6)	(4)
Time value of money and inflation component of rehabilitation costs	13	13
Translation	(26)	(12)
<b>Total provision for environmental rehabilitation</b>	<b>182</b>	<b>198</b>

The provision for environmental rehabilitation for PNG amounts to US\$36.4 million (2014: US\$32.2 million) and is unfunded.

While the ultimate amount of rehabilitation costs to be incurred in the future is uncertain, the group has estimated that, based on current environmental and regulatory requirements, the total undiscounted cost for the mines, in the current monetary terms, is approximately US\$237.3 million (2014: US\$283.1 million).

<i>Figures in million</i>	US dollar	
	2015	2014
<b>Future net undiscounted obligation</b>		
Ultimate estimated rehabilitation cost	237	283
Amounts invested in environmental trust funds (refer to note 17)	(192)	(213)
<b>Total future net undiscounted obligation</b>	<b>45</b>	<b>70</b>

The group intends to finance the ultimate rehabilitation costs from the money invested in environmental trust funds as well as the proceeds on sale of assets and gold from plant clean-up at the time of mine closure. The group has guarantees in place, some cash-backed, relating to some of the environmental liabilities. Refer to notes 16 and 34.

During 2014 and 2015, the group rehabilitated certain decommissioned operations in the Free State as part of its overall strategy of eliminating safety and health exposures and reducing environmental liability. Following several years of working closely with the DMR to determine the best solution for rehabilitating certain pits, Kalgold received a decision from the DMR during 2015 to use tailings to backfill pits that have been mined out and as a result the deposition into these pits is in progress.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 26 RETIREMENT BENEFIT OBLIGATION

### ACCOUNTING POLICY

The group provides medical cover to current employees and certain retirees through certain funds. The medical accounting costs for the defined benefit plan are assessed using the projected unit credit method. The health care obligation is measured at the present value of the estimated future cash outflows using government bond interest rates consistent with the terms and risks of the obligation. Actuarial gains and losses as a result of these valuations are recognised in other comprehensive income (OCI) at revaluation date. Actuarial gains and losses recognised in OCI will not be recycled to profit or loss. The future liability for current and retired employees and their dependants is accrued in full based on actuarial valuations obtained annually.

### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

An updated actuarial valuation is carried out at the end of each financial year. Assumptions used to determine the liability include a discount rate of 9%, no increases in employer subsidies (in terms of the agreement) and mortality rates according to the SA 1956/62 mortality table (SA "a m" tables) (retirement age of 60 years) and a medical inflation rate of 7% (2014: discount rate of 10.5%, retirement age of 60 years and 8.6% inflation rate) (2013: discount rate of 9.3%, retirement age of 60 years and 7.45% inflation rate).

Management determined the discount rate by assessing government bonds with similar terms to the liability. The changes to the discount rate and medical inflation rate are similar to changes in interest and inflation rates in South Africa.

#### (a) Pension and provident funds

The group contributes to several pension and provident funds governed by the Pension Funds Act, 1956 for the employees of its South African subsidiaries. The pension funds are multi-employer defined contribution industry plans. The group's liability is therefore limited to its monthly determined contributions.

The provident funds are funded on a "monetary accumulative basis" with the member's and employer's contributions having been fixed in the constitution of the funds.

The Australian group companies make contributions to each employee's superannuation (pension) funds in accordance with the Superannuation Guarantee Scheme (SGS). The SGS is a Federal Government initiative enforced by law which compels employers to make regular payments to regulated funds providing for each employee on their retirement. The SGS were set at a minimum of 9.50% of gross salary and wages for the 2015 year (2014: 9.25%). The fund is a defined contribution plan.

The PNG Superannuation Act 2002 requires a compulsory employer contribution of 8.4% (2014: 8.4%) into an approved superannuation (pension) fund if an employee is appointed for a period of three months or more. The approved superannuation funds are defined contribution plans.

Substantially all the group's employees are covered by the above mentioned retirement benefit plans. Funds contributed by the group for the 2015 financial year amounted to US\$43.0 million (2014: US\$47.7 million).

#### (b) Post-retirement benefits other than pensions

Harmony inherited a post-retirement medical benefit obligation, which existed at the time of the Freegold acquisition in 2002. The group's obligation in this regard is to pay a subsidy of 2% for every completed year of employment up to a maximum of 50% of total medical aid contributions, commencing on date of retirement. Should the employee die, either in service or after retirement, this benefit will transfer to his/her dependants. The medical aid tariffs are based on the Bestmed medical scheme (Bestmed) options. Except for the pre-mentioned employees, Harmony has no other post-retirement obligation for the other group employees.

The liability is unfunded and will be settled out of cash and cash equivalents when it becomes due. The liability is based on an actuarial valuation conducted during the year ended 30 June 2015, using the projected unit credit method. The next actuarial valuation will be performed on 30 June 2016.

The principal actuarial assumptions used to determine the present value of unfunded obligations are discussed above. In addition the following was also considered:

- It is assumed that all Continuation and Widow Members (CAWMs) will remain on the current benefit option and income band. For employed members, post-employment contributions were assumed to be equal to the average payable for the current CAWMs membership;
- It is assumed that not all employed members will remain employed until retirement therefore estimated resignation and ill-health retirement rates are also taken into account;
- It is assumed that 90% of employed members will be married at retirement or earlier death and that wives are four years younger than their husbands. It is assumed that the only dependants will be spouses.

Through the post-employment medical plan, the group is exposed to a number of risks, the most significant of which are discussed below:

- **Change in bond yields:** A decrease in the bond yields will increase the plan liability.
- **Inflation risk:** The obligation is linked to inflation and higher inflation will lead to a higher liability.
- **Life expectancy:** The obligation is to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities.

The net actuarial gain for 2015 was mainly a result of exits of current employees being higher than expected (2014: net actuarial loss due to change in medical scheme from Minemed to Bestmed).

## 26 RETIREMENT BENEFIT OBLIGATION continued

### (b) Post-retirement benefits other than pensions continued

<i>Figures in million</i>	US dollar	
	2015	2014
Present value of unfunded obligations	13	23
Current employees	5	14
Retired employees	8	9
Movement in the liability recognised in the balance sheet		
Balance at beginning of year	23	19
Contributions paid	(1)	(1)
Other expenses included in staff costs/current service cost	-	-
Curtailements <sup>1</sup>	(8)	-
Finance cost	1	2
Net actuarial (gain)/loss recognised during the year <sup>2</sup>	(1)	4
Translation	(1)	(1)
<b>Balance at end of year</b>	<b>13</b>	<b>23</b>

<sup>1</sup> The curtailment relates to the significant reduction in members qualifying for the post-retirement benefit, mainly arising from the change in the terms of employment of members, resulting in a reduction of the liability of US\$8.2 million.

<sup>2</sup> The net actuarial (gain)/loss has been recorded in other comprehensive income.

<i>Figures in million</i>	US dollar	
	2015	2014
The net liability of the defined benefit plan is as follows:		
Present value of defined benefit obligation	13	23
Fair value of plan assets	-	-
<b>Balance at end of year</b>	<b>13</b>	<b>23</b>

The effect of a percentage point increase and decrease in the assumed medical cost trend rate is as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
Effect of a 1% increase on:		
Aggregate of service cost and finance cost	-	-
Defined benefit obligation	2	3
Effect of a 1% decrease on:		
Aggregate of service cost and finance cost	-	-
Defined benefit obligation	2	3

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. The analysis is performed on the same basis for 2014.

The group expects to contribute approximately US\$0.7 million to the benefit plan in 2016.

The weighted average duration of the defined benefit obligation is 16.1 years.

### ACCOUNTING POLICY - FINANCIAL LIABILITIES (APPLICABLE TO NOTES 27, 28 AND 29)

Financial liabilities are initially measured at fair value when the group becomes a party to their contractual arrangements. Transaction costs are included in the initial measurement of financial liabilities, with the exception of financial liabilities classified at fair value through profit or loss. The subsequent measurement of financial liabilities is discussed below.

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

The group classifies financial liabilities as follows:

- **Borrowings** are initially recognised at fair value net of transaction costs incurred and subsequently measured at amortised cost, comprising original debt less principal payments and amortisation, using the effective yield method. Any difference between proceeds (net of transaction cost) and the redemption value is recognised in the income statement over the period of the borrowing using the effective interest rate method.

Fees paid on the establishment of the loan facilities are capitalised as a pre-payment and amortised over the period of the facility to which it relates, to the extent it is probable that some or all of the facility will be drawn down. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is expensed.

Borrowings are classified as current liabilities unless the group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

- **Trade and other payables** are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method. Payables are classified as current liabilities if payment is due within a year or less. If not, they are presented as non-current liabilities.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 27 OTHER NON-CURRENT LIABILITIES

### ACCOUNTING POLICY

Refer to the accounting policy on provisions above, accounting policies on financial liabilities below and note 32 for the accounting policy on share-based payments.

Figures in million	US dollar	
	2015	2014
<b>Financial liabilities</b>		
Sibanye Beatrix ground swap royalty provision (a)	2	2
<b>Non-financial liabilities</b>		
ESOP share-based payment liability (b)	1	1
Other (c)	-	6
<b>Total</b>	<b>3</b>	<b>9</b>

- (a) During 2014, Harmony and Sibanye entered into an agreement whereby the Joel mine exchanged two portions of its mining right for two portions of Sibanye's Beatrix mine's mining right, as well as acquiring two additional portions from Beatrix (sale portions). The transaction was completed in May 2014. The purchase consideration of the sale portions acquired by Joel is payable as a royalty of 3% on gold revenue generated from these two portions. The royalty liability recorded is the net present value of 3% of future gold revenue of the sale portions. During 2015, an amount of US\$0.2 million was recorded relating to time value of money and US\$0.3 million relating to changes in estimates. Refer to note 14(a) for further details on the key assumptions for the calculation of the provision, which is based on the life-of-mine plan of Joel. Refer to note 6 for details on the profit recognised.
- (b) The liability relates to the cash-settled share-based payment transaction following the award of ESOP share appreciation rights (SARs) to qualifying employees through the Tlhakanelo Employee Share Trust. Refer to note 32 for more details.
- (c) Included in Other in the 2014 financial year is a provision of US\$5.4 million relating to the pumping and treatment costs of fissure water in the Klerksdorp, Orkney, Stilfontein and Hartbeesfontein (KOSH) Basin. This provision was raised following the High Court's dismissal of Harmony's application to have a directive issued by the Department of Water Affairs (DWAF) in November 2005 set aside, as it relates to the Orkney operations, which were sold in 2008. The appeal application heard in November 2013 was unsuccessful and Harmony has consequently entered into separate negotiations with the claimants. During 2015, Harmony made a payment to Simmer and Jack Investments (Proprietary) Limited amounting to US\$2.3 million and a payment of US\$2.8 million to AngloGold Ashanti Limited, the two claimants in the matter, as full and final settlement.

## 28 BORROWINGS

### Westpac Bank

In July 2007, Morobe Consolidated Goldfields entered into US dollar finance lease agreements with Westpac Bank for the purchase of mining fleet to be used on the Hidden Valley project. There is no debt covenant clause in the agreements. The repayments on the finance lease from Westpac Bank were completed in December 2013.

### Nedbank Limited

On 11 December 2009, the company entered into a loan facility with Nedbank Limited, comprising a term facility of R900 million (US\$119.4 million) and a revolving credit facility of R600 million (US\$79.6 million). The facility was utilised to fund the acquisition of the Pamodzi Free State assets as well as the group's major capital projects and working capital requirements. Interest accrued on a day-to-day basis over the term of the loan at a variable interest rate. The outstanding amount on the term loan was settled in December 2013 by drawing against the new facility (discussed below).

On 30 November 2010, the company entered into an additional loan facility with Nedbank Limited, comprising a term facility of R500 million (US\$70.1 million) and a revolving credit facility of R250 million (US\$35.0 million). Interest terms are identical to the original facility. The repayment terms of the original revolving credit facility were amended to coincide with the repayment on the new facility. The outstanding amount on the term loan was settled in December 2013 by drawing against the new facility (discussed below).

On 20 December 2013, the company entered into a loan facility with Nedbank Limited, comprising a revolving credit facility of R1 300 million (US\$125.6 million). Interest accrues on a day-to-day basis over the term of the loan at a variable interest rate. R467 million (US\$45.4 million) was drawn down during December 2013 to repay the outstanding amounts on the Nedbank term loans. The facility was repaid in March 2014. In January 2015, R400 million was drawn down.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 28 BORROWINGS continued

### US dollar revolving credit facilities

On 11 August 2011, the company entered into a loan facility which was jointly arranged by Nedbank Limited and FirstRand Bank Limited (acting through its Rand Merchant Bank division) (syndicate), comprising a US\$300 million syndicated revolving credit facility, of which only US\$270 million was drawn down. The facility was utilised to fund exploration projects in PNG. Interest at LIBOR plus 260 basis points was paid quarterly. The syndicated revolving facility was settled in February 2015 by drawing against the new facility (discussed below).

On 22 December 2014, the company entered into a loan facility agreement which was jointly arranged by Nedbank Limited and Barclays Bank Plc, comprising a revolving credit facility of up to US\$250 million. All conditions precedent were met during February 2015 and US\$205 million was drawn down to repay the syndicated revolving credit facility, resulting in a net cash outflow of US\$65 million. The remaining US\$45 million was drawn down during May 2015. Interest accrues on a day-to-day basis over the term of the loan at a variable interest rate.

### Terms and debt repayment schedule at 30 June 2015

	Interest charge	Repayment terms	Repayment date	Security
Nedbank Limited (secured loan - rand revolving credit facility)	1, 3 or 6 month JIBAR plus 3.5%, payable at the elected interest interval	Repayable on maturity	23 December 2016	Cession and pledge of operating subsidiaries' shares
US dollar revolving credit facility (secured loan)	3 or 6 month LIBOR plus 3%, payable at the elected interest interval	Repayable on maturity	6 February 2018	Cession and pledge of operating subsidiaries' shares

### Debt covenants

The debt covenant tests for both the rand and US dollar revolving credit facilities were renegotiated during December 2014 and are as follows:

- The group's interest cover ratio shall not be less than five (EBITDA<sup>1</sup>/Total interest paid);
- Tangible Net Worth<sup>2</sup> to total net debt ratio shall not be less than six times or eight times when dividends are paid;
- Leverage<sup>3</sup> shall not be more than 2.5 times.

<sup>1</sup> Earnings before interest, taxes, depreciation and amortisation (EBITDA) as defined in the agreement excludes unusual items such as impairment and restructuring cost.

<sup>2</sup> Tangible Net Worth is defined as total equity less intangible assets.

<sup>3</sup> Leverage is defined as total net debt to EBITDA.

The debt covenant tests are performed on a quarterly basis. No breaches of the covenants were identified during the tests in the 2015 financial year.

## 31 EMPLOYEE BENEFITS

### ACCOUNTING POLICY

- **Pension, provident and medical benefit plans** are funded through annual contributions. The group pays fixed contributions into a separate entity in terms of the defined contribution pension, provident and medical plans which are charged to the income statement in the year to which they relate. The group's liability is limited to its monthly determined contributions and it has no further liability, legal or constructive, if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. Refer to note 26 for details of the post-retirement medical benefit plan.
- **Termination benefits** are payable when employment is terminated before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The group recognises termination benefits at the earlier of the following dates: (a) when the group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after balance sheet date are discounted to present value.

	2015	2014

<b>Aggregate earnings</b>		
The aggregate earnings of employees including directors were:		
Salaries and wages and other benefits	592	633
Retirement benefit costs	43	48
Medical aid contributions	16	17
<b>Total aggregated earnings<sup>2</sup></b>	<b>651</b>	<b>698</b>

<sup>1</sup> The total number of employees in Australia, including the Brisbane office, at 30 June 2015 was 75 (2014: 59). The total for the international operations includes the MMJV employees.

<sup>2</sup> These amounts have been included in cost of sales, corporate expenditure and capital expenditure.

During the 2015 financial year US\$25.2 million (2014: US\$26.1 million) was included in the payroll costs for termination costs. Termination costs include the cost relating to the voluntary retrenchment and restructuring process as well as retrenchments due to shaft closures (refer to note 5).

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 32 SHARE-BASED PAYMENTS

### ACCOUNTING POLICY

The group operates the following employee share incentive plans:

- Equity-settled share-based payments plan where the group grants share options to certain employees in exchange for services received;
- Equity-settled and cash-settled employee share ownership plan.

Equity-settled share-based payments are measured at fair value that includes market performance conditions but excludes the impact of any service and non-market performance conditions of the equity instruments at the date of the grant. The share-based payments are expensed over the vesting period, based on the group's estimate of the shares that are expected to eventually vest. The group used an appropriate option pricing model in determining the fair value of the options granted. Non-market vesting conditions are included in assumptions about the number of options that are expected to vest. At each balance sheet date, the estimates of the number of options that are expected to become exercisable are revised. The impact of the revision of original estimates, if any, is recognised in the income statement, with a corresponding adjustment to equity. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

Cash-settled share-based payments are measured at fair value. The liability is remeasured at each balance sheet date until the date of settlement.

### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The fair value of options granted is being determined using either a binomial, Black-Scholes or a Monte Carlo valuation model. The significant inputs into the model are: vesting period, risk free interest rate, volatility, price on date of grant and dividend yield.

### EMPLOYEE SHARE-BASED PAYMENTS

The group has the 2012 employee share ownership plan (ESOP) and the 2006 share plan that are active. The objective of these schemes is to recognise the contributions of employees to the group's financial position and performance and to retain key employees.

The total cost relating to employee share-based payments is made up as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
2012 employee share ownership plan (a)	5	11
2006 share plan (b)	13	15
<b>Total employee share-based payments included in cost of sales</b>	<b>18</b>	<b>26</b>

The 2003 scheme expired during 2015. There was no cost for the 2014 and 2015 years. Refer to (c) below for detail on the scheme.

The directors are authorised to issue up to 60 011 669 ordinary shares to participants who have received awards in accordance with Harmony's employee share incentive schemes.

Subsequent to the annual general meeting held on 1 December 2010, 1 039 794 ordinary shares have been issued in terms of the 2003 scheme and 35 902 437 share option awards have been granted in terms of the 2006 share plan. The Thakanelo Employee Share Trust is authorised to allocate 12 864 000 ordinary shares to the employee share ownership plan.

#### (a) 2012 employee share ownership plan

During August 2012, Harmony issued the first awards under its ESOP. The ESOP is overseen by the Thakanelo Employee Share Trust. In terms of the ESOP rules, qualifying employees are offered one scheme share for every two share appreciation rights (SARs).

On the fifth anniversary of the first allocation date, any unallocated scheme shares and SARs will be distributed to all employees who participated in the ESOP and who are still employed with the company pro rata in accordance with the number of scheme shares previously allocated to the employees.

The scheme shares are accounted for as equity-settled.

The SARs incorporate a cash bonus with a minimum pay-out guarantee of R18 and a maximum pay-out ceiling of R32 per SAR over the vesting period. The SARs include an equity-settled portion as well as a cash-settled portion related to the cash bonus. The cash-settled portion has been recognised as a liability in the balance sheet (refer to note 27 and 29), the fair value of which will be remeasured at each reporting date.

The total cost relating to the 2012 ESOP is made up as follows:

<i>Figures in million</i>	US dollar	
	2015	2014
2012 employee share ownership plan		
Equity-settled	3	8
Cash-settled	2	3
	<b>5</b>	<b>11</b>

## 32 SHARE-BASED PAYMENTS continued

### EMPLOYEE SHARE-BASED PAYMENTS continued

#### (a) 2012 employee share ownership plan continued

##### Measurement

The fair value of equity instruments granted during the year was valued using the Cox-Ross-Rubinstein binomial tree on the equity-settled portion of the SARs. The minimum payout guarantee is valued at net present value and the spot share price on grant date was used for the scheme shares.

##### (i) Assumptions applied at grant date for awards granted during the year

	Scheme shares	SARs
<b>Price at date of grant (SA rand per share):</b>		
15 March 2014 allocation	40.32	40.32
15 March 2015 allocation	20.47	20.47
<b>Risk-free interest rate:</b>		
15 March 2014 allocation	n/a	6.90%
15 March 2015 allocation	n/a	6.53%
<b>Expected volatility: *</b>		
15 March 2014 allocation	n/a	34.94%
15 March 2015 allocation	n/a	52.62%
<b>Expected dividend yield:</b>		
for all allocations	n/a	1.00%
<b>Minimum payout guarantee (SA rand per SAR):</b>		
for all allocations	n/a	18.00 to 32.00
<b>Vesting period (from grant date):</b>		
15 March 2014 allocation	3 years	3 years
15 March 2015 allocation	2 years	2 years

\* The volatility is measured as an annualised standard deviation of historical share price returns, using an exponentially weighted moving average (EWMA) model, with a lambda of 0.99. The volatility is calculated on the grant date, and takes into account the previous three years of historical data.

##### (ii) Fair values used as a basis to recognise share-based cost

	SA rand per award		
	Scheme shares	SARs	Minimum payout guarantee
15 March 2014 allocation	39.82	2.09	17.11
15 March 2015 allocation	19.97	0.50	16.61

## 32 SHARE-BASED PAYMENTS continued

### EMPLOYEE SHARE-BASED PAYMENTS continued

#### (b) Options granted under the 2006 share plan

The 2006 share plan consists of share appreciation rights (SARs), performance shares (PS) and restricted shares (RS). The share plan is equity-settled.

Award	Vesting	Performance criteria
SARs	SARs will vest in equal thirds in year three, four and five, subject to the performance conditions having been satisfied.  The SARs will have an expiry date of six years from the grant date and the offer price equals the closing market prices of the underlying shares on the trading date immediately preceding the grant.	The group's headline earnings per share must have grown since the allocation date by more than the South African Consumer Price Index (CPI).
PS	The PS will vest after three years from the grant date, if and to the extent that the performance conditions have been satisfied.	2014 allocation: <ul style="list-style-type: none"> <li>the number of the rights awarded are linked to the group's performance in comparison to the South African Gold Index.</li> </ul> 2011 to 2013 allocation: <ul style="list-style-type: none"> <li>50% (senior management) or 70% (management) of the number of the rights awarded are linked to the annual gold production of the group in relation to the targets set annually.</li> <li>50% (senior management) or 30% (management) of the number of the rights awarded are linked to the group's performance in comparison to the South African Gold Index.</li> </ul>
RS	The RS will vest after three years from grant date.	The participant is still employed within the group.

Termination of employees' participation in the share plan is based on "no fault" and "fault" definitions.

- Fault All unvested and unexercised SARs and all PS and RS not yet vested are lapsed and cancelled.
- No fault Accelerated vesting occurs and all unvested and unexercised share options are settled in accordance with the rules of the plan.

<b>Total options and rights granted but not yet exercised</b>	<b>31 415 577</b>		

<sup>1</sup> The 2010 and 2011 restricted shares vested in November 2013 and November 2014 respectively. Restricted shares that were not exercised, partially or fully, at that time remain restricted for a further three years, but were supplemented by a matching grant of restricted shares. All restricted shares are then only settled after the end of a further three year period.

Figures in million	US dollar	
	2015	2014
Gain realised by participants on options and rights traded during the year	1	2
Fair value of options and rights exercised during the year	1	2

#### Measurement

The fair value of equity instruments granted during the year was valued using the Monte Carlo simulation on the market-linked PS, Cox-Ross-Rubinstein binomial tree on the SARs and spot share price on grant date for the RS.

#### (i) Assumptions applied at grant date for awards granted during the year

	SARs	Performance shares	Restricted shares
<b>Price at date of grant (SA rand per share):</b>			
15 November 2013 allocation	32.90	n/a	32.90
17 November 2014 allocation	17.95	n/a	17.95
<b>Risk-free interest rate:</b>			
15 November 2013 allocation	7.34%	6.80%	n/a
17 November 2014 allocation	7.21%	7.44%	n/a
<b>Expected volatility: *</b>			
15 November 2013 allocation	36.49%	51.25%	n/a
17 November 2014 allocation	44.39%	53.81%	n/a
<b>Expected dividend yield:</b>			
15 November 2013 allocation	1.50%	0.00%	0.00%
17 November 2014 allocation	1.00%	0.00%	0.00%
<b>Vesting period (from grant date)</b>			
for all allocations	5 years	3 years	3 years

\* The volatility is measured as an annualised standard deviation of historical share price returns, using an exponentially weighted moving average (EWMA) model, with a lambda of 0.99. The volatility is calculated on the grant date, and takes into account the previous three years of historical data.

In all cases, valuation date is the same as the allocation date, except for the 17 November 2014 allocation of performance shares with a valuation date of 2 June 2015.

##### Measurement continued

##### (ii) Fair values used as a basis to recognise share-based cost

	SA rand per award		
	SARs	Performance shares	Restricted shares
17 November 2014 allocation	7.86	11.19	17.95
15 November 2013 allocation	12.44	31.50	32.90

#### (c) Options granted under the 2003 scheme

A fifth of the options granted under the 2003 scheme are exercisable annually from the grant date with an expiry date of 10 years from the grant date. The offer price of these options equalled the closing market price of the underlying shares on the trading date immediately preceding the granting of options. The options are equity-settled.

On resignation and retirement, share options which have vested may be taken up at the employee's election before the last day of service. On death, the deceased estate has a period of twelve months to exercise these options.

Following the introduction of the 2006 share plan, no further options were granted for the 2003 options scheme and all options are vested.

Options forfeited and lapsed	(614 476)	44.76	(130 870)	51.65
<b>Balance at end of year</b>	-	-	614 476	44.76

### OTHER SHARE-BASED PAYMENTS

On 20 March 2013, Harmony signed transaction and funding agreements to give effect to an empowerment transaction to dispose of 30% of its Free State based Phoenix operation (Phoenix) to BEE shareholders, which includes a free-carry allocation of 5% to a community trust that has been created and is currently controlled by Harmony. The transaction closed on 25 June 2013, following the fulfilment of the last condition precedent. In terms of the agreements Phoenix was transferred to a newly incorporated subsidiary (PhoenixCo).

The awards to the BEE partners have been accounted for as in-substance options as the BEE partners will only share in the upside, and not the downside of their equity interest in PhoenixCo until the date the financing provided by Harmony is fully repaid. On this date the options will be exercised. The award of the options to the BEE partners is accounted for by the group as an equity-settled share-based payment arrangement. The in-substance options carry no vesting conditions and the fair value of the options of R23 million (US\$2.3 million) was expensed on the grant date, 25 June 2013.

A subscription price paid by the BEE shareholders of R2 million was received and was recorded in other reserves as an option premium.

#### Measurement

The share-based cost was calculated using the Monte Carlo simulation. The fair value of the option is the difference between the expected future enterprise value of PhoenixCo and the expected loan balances at redemption date, and the present value of the trickle dividend determined in accordance with the cash flow waterfall per the signed transaction and funding arrangements.

The following assumptions were applied at grant date:

	2013
Business value (R'million)	450
Exercise price (R'million)	2
Risk-free interest rate	6.08%
Expected volatility*	37.33%
Expected dividend yield	8.04%
Vesting period (from grant date)	0 years
Equity value attributable to the BEE partners	25.00%
Expected redemption date	31 December 2020

\* The volatility was measured in relation to a comparable listed company's share price volatility.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 33 RELATED PARTIES

None of the directors or major shareholders of Harmony or, to the knowledge of Harmony, their families, had an interest, directly or indirectly, in any transaction from 1 July 2012 or in any proposed transaction that has affected or will materially affect Harmony or its subsidiaries, other than as stated below.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the group, directly or indirectly, including any director (whether executive or otherwise) of the group.

During 2015, the executive directors received remuneration of US\$1.9 million, comprising of US\$1.5 million for salaries, US\$0.03 million for retirement contributions, US\$0.3 million for bonuses and US\$0.04 million from the exercising of share options. The non-executive directors received US\$0.7 million in directors' fees. The aggregate of remuneration received by executive management was US\$3.0 million (including share options exercised).

During 2014, the executive directors received remuneration of US\$2.1 million, comprising of US\$1.6 million for salaries, US\$0.03 million for retirement contributions, US\$0.4 million for bonuses and US\$0.1 million from the exercising of share options. The non-executive directors received US\$0.7 million in directors' fees. The aggregate of remuneration received by executive management was US\$5.0 million (including share options exercised).

The following directors and prescribed officers own shares in Harmony at year-end:

Name of director/prescribed officer	Number of shares	
	2015	2014*
André Wilkens	101 303	101 303
Frank Abbott <sup>1 2</sup>	203 243	139 500
Graham Briggs <sup>1</sup>	24 718	14 347

Ken Dicks	20 000	20 000
Alwyn Pretorius <sup>1</sup>	7 987	-
Johannes van Heerden <sup>1</sup>	28 184	6 500

<sup>1</sup> The movement during the year relates to performance shares vested and retained.

<sup>2</sup> Purchased 60 000 shares on 28 May 2015 in the open market.

\*2014 only includes shares purchased. Performance shares vested and retained are excluded.

African Rainbow Minerals Limited (ARM) currently holds 14.6% of Harmony's shares. Patrice Motsepe, André Wilkens, Joaquim Chissano and Frank Abbott, who are directors of Harmony, are also directors of ARM.

Refer to note 35 for transactions that took place after year end.

All the production of the group's South African operations is sent to Rand Refinery in which Harmony holds a 10.38% interest. Refer to note 20.

During the 2013 financial year, Harmony sold its 100% interest in Evander. Refer to note 12.

### CONTINGENT LIABILITIES

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Contingencies will only realise when one or more future events occur or fail to occur. The exercise of significant judgement and estimates of the outcome of future events are required during the assessment of the impact of such contingencies.

Litigation and other judicial proceedings as a rule raise difficult and complex legal issues and are subject to uncertainties and complexities including, but not limited to, the facts and circumstances of each particular case, issues regarding the jurisdiction in which the suit is brought and differences in applicable law. Upon resolution of any pending legal matter, the group may be forced to incur charges in excess of the presently established provisions and related insurance coverage. It is possible that the financial position, results of operations or cash flows of the group could be materially affected by the outcome of the litigation.

The following contingent liabilities have been identified:

- (a) On 18 April 2008, Harmony Gold Mining Company Limited was made aware that it had been named as a defendant in a lawsuit filed in the US District Court in the Southern District of New York on behalf of certain purchasers and sellers of Harmony's American Depositary Receipts (ADRs) and options with regards to certain of its business practices. Harmony retained legal counsel.

The company reached a mutually acceptable settlement with the plaintiff class and this settlement was found to be fair and reasonable and was approved by the United States District Court in November 2011. A single class member filed an appeal of the District Court's order approving the settlement. That appeal resulted in the United States Court of Appeals for the Second Circuit affirming the decision of the District Court on more than one occasion. The objecting plaintiff requested that the United States Supreme Court review the decision of the Second Circuit. Following the denial of the request for review of the case by the Supreme Court in May 2014, the case has been concluded. The distribution of the settlement amount, held in escrow, to the plaintiff class of the lawsuit filed in the United States of America was completed during the 2015 financial year. From both legal and accounting perspectives, the matter is now concluded.

- (b) On 3 March 2011, judgement was handed down in the Constitutional Court, in the case of Mr Thembekile Mankayi v AngloGold Ashanti Limited regarding litigation in terms of the Occupational Diseases in Mines and Works Act (ODIMWA). The judgement allows claimants, such as Mr Mankayi, to institute action against their current and former employers for damages suffered as a result of them contracting occupational diseases which result from their exposure to harmful quantities of dust whilst they were employed at a controlled mine as referred to in ODIMWA. In this regard, should anyone bring similar claims against Harmony in future, those claimants would need to prove that silicosis, as an example, was contracted whilst in the employ of the company and that it was contracted due to negligence on the company's part to provide a safe and healthy working environment. The link between the cause (negligence by the company in exposing the claimant to harmful quantities of dust whilst in its employ) and the effect (the silicosis) will be an essential part of any case.

On 23 August 2012, Harmony and certain of its subsidiaries (Harmony group) were served with court papers in terms of which three former employees made application to the South Gauteng High Court to certify a class for purposes of instituting a class action against the Harmony group. In essence, the applicants want the court to declare them as suitable members to represent a class of current and former mineworkers for purposes of instituting a class action for certain relief and to obtain directions from the court as to what procedure to follow in pursuing the relief required against the Harmony group.

Similar applications were also brought against various other gold mining companies for similar relief during August 2012.

On 8 January 2013, the Harmony group, alongside other gold mining companies operating in South Africa (collectively the respondents), was served with another application to certify two classes of persons representing a class of current and former mine workers who work or have worked on gold mines owned and/or controlled by the respondents and who allegedly contracted silicosis and/or other occupational lung diseases, and another class of dependents of mine workers who have died of silicosis and who worked on gold mines owned and/or controlled by the respondents. The Harmony group opposed both applications and instructed its attorneys to defend the application.

# NOTES TO THE GROUP FINANCIAL STATEMENTS continued

for the years ended 30 June 2015

## 34 COMMITMENTS AND CONTINGENCIES continued

### CONTINGENT LIABILITIES continued

Following receipt of the aforesaid application, the Harmony group was advised that there was a potential overlap between the application of 23 August 2012 and the application of 8 January 2013. After deliberation between the respondents' attorneys and the applicants' attorneys, it was resolved that the applicants' attorneys will consolidate the two applications, together with three other similar applications. The applicants' attorneys delivered an amended application for consideration by the respondents. On 17 October 2013, the five certification applications were consolidated by order of court. It was agreed between the parties that the respondents have until 30 May 2014 to answer the allegations made in the consolidated class certification application, and to state reasons why a class or classes should not be certified.

On 30 May 2014, the Harmony group served its answering affidavit to the consolidated class certification application. On 15 September 2014, the applicants' attorneys delivered their replying affidavit to the answering affidavit. The applicants' attorneys have also joined further applicants to the present proceedings and amended the relief sought against the gold mining companies on a number of occasions.

On 12 December 2014, the Treatment Action Campaign and Sonke Gender Justice (both non-profit organisations) (applicants) brought a formal application to the consolidated class certification application to be admitted as *amici curiae* (i.e. friends of the court). On 28 August 2015, the applicants were admitted as *amici curiae*. However, at the certification application enrolled for hearing between 12 October 2015 and 23 October 2015, they may only present legal submissions as to whether a certification of a class action should be granted or not.

On 3 May 2013, Harmony and one of its subsidiaries received a summons from Richard Spoor Attorneys on behalf of an employee. The plaintiff is claiming US\$2.1 million in damages plus interest from Harmony and one of its subsidiaries, and another gold mining group of companies. The plaintiff alleges to have contracted silicosis with progressive massive fibrosis during the course of his employment. At this stage, and in the absence of a court decision on this matter, it is not yet certain as to whether the company will incur any costs (except legal fees) related to the above claim.

Due to the limited information available on the above claim and potential other claims, and the uncertainty of the outcome of the consolidated class certification application, no costs estimation can as yet be made for the possible obligation.

- (c) On 1 December 2008, Harmony issued 3 364 675 Harmony shares to Rio Tinto Limited (Rio Tinto) for the purchase of Rio Tinto's rights to the royalty agreement entered into prior to our acquisition of the Wafi deposits in PNG. The shares were valued at US\$23 million on the transaction date. An additional US\$10 million in cash will be payable when the decision to mine is made. Of this amount, Harmony is responsible for paying the first US\$6 million, with the balance of US\$4 million being borne equally by the joint operators.
- (d) The group may have a potential exposure to rehabilitate groundwater and radiation that may exist where the group has and/or continues to operate. The group has initiated analytical assessments to identify, quantify and mitigate impacts if and when (or as and where) they arise. Numerous scientific, technical and legal studies are underway to assist in determining the magnitude of the contamination and to find sustainable remediation solutions. The group has instituted processes to reduce future potential seepage and it has been demonstrated that Monitored Natural Attenuation (MNA) by the existing environment will contribute to improvement in some instances. The ultimate outcome of the matter cannot presently be determined and no provision for any liability that may result has been made in the financial statements. Should the group determine that any part of these contingencies require them being recorded and accounted for as liabilities, that is where they become estimable and probable, it could have material impact on the financial statements of the group.

At 30 June 2015, the group was in the process of implementing water treatment facilities at Doornkop and at Kusasaletu. These treatment facilities will reduce our dependency on Rand Water and allow the mines to supply their own water.

In terms of Free State operations, Harmony has taken the initiative to develop a comprehensive regional closure plan which based on scientific studies will determine any further exposure.

- (e) Due to the interconnected nature of mining operations in South Africa, any proposed solution for potential flooding and potential decant risk posed by deep groundwater needs to be a combined one, supported by all the mines located in these goldfields. As a result, the Department of Mineral Resource and affected mining companies are involved in the development of a regional mine closure strategy. Harmony operations have conducted a number of specialist studies and the risk of surface decant due to rising groundwater levels has been obviated at the entire Free State region and Kalgold. Therefore there is no contingency arising from these operations. Additional studies have been commissioned at Doornkop and Kusasaletu. In view of the limitation of current information for accurate estimation of a liability, no reliable estimate can be made for these operations.
- (f) The individual Harmony mining operations have applied for the respective National Water Act, Section 21 Water Use Licenses (WUL) to the Department of Water and Sanitation (DWS). As part of the Water Use License Application (WULA) process for the respective operations, Harmony has requested certain exemptions (relevant to the respective mining operations) from GNR 704 of 4 June 1999, "Regulations on the use of water for mining and related activities aimed at the protection of water resources". The respective WULA's have subsequently not yet been approved by DWS. The WUL conditions for the respective operations are subsequently not yet known and the subsequent potential water resource impact liability as part of the mine rehabilitation and closure process (to which DWS is an important participant and decision maker) is uncertain.
- (g) In terms of the sale agreements entered into with Rand Uranium, Harmony retained financial exposure relating to environmental disturbances and degradation caused by it before the effective date, in excess of US\$6.2 million of potential claims. Rand Uranium is therefore liable for all claims up to US\$6.2 million and retains legal liability. The likelihood of potential claims cannot be determined presently and no provision for any liability has been made in the financial statements.
- (h) Legal proceedings commenced in December 2010 against the Hidden Valley mine in PNG over alleged damage to the Watut River (which runs adjacent to the Hidden Valley mine), alleged to have been caused by waste rock and overburden run-off from the mine. The damages sought by the plaintiffs were not specified. The defendants intend to defend the claims. No active steps have been taken by the plaintiffs in this proceeding for more than two years. It is not practicable to make any reasonable assessment of the prospects of the plaintiffs succeeding should they proceed with these claims, nor the potential liability of the defendants if the plaintiffs were to succeed. As a result, no provision has been recognised in the financial statements for this matter.

## 35 SUBSEQUENT EVENTS

- (a) Harmony has signed a US\$12.0 million guarantee for the ARM Broad Based Economic Empowerment (BBEE) Trust, a member of the African Rainbow Minerals (ARM) group. The guarantee is for additional security for the ARM BBEE Trust loan due to Nedbank Limited. The fair value of the guarantee is US\$1.1 million at 30 September 2015.
- (b) On 27 September 2015, 2 259 performance shares (ordinary shares) vested in the name of Graham Briggs. There were no further changes in the shares held by directors between 30 June 2015 and 23 October 2015.

## 36 SEGMENT REPORT

### ACCOUNTING POLICY

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker (CODM). The chief operating decision-maker has been identified as the executive committee.

The group has one main economic product, being gold. In order to determine operating and reportable segments, management reviewed various factors, including geographical location as well as managerial structure. It was determined that an operating segment consists of a shaft or a group of shafts or open pit mine managed by a single general manager and management team.

After applying the quantitative thresholds from IFRS 8, the reportable segments were determined as: Kusasaletu, Doornkop, Phakisa, Tshepong, Masimong, Target 1, Bambanani, Joel, Unisel, Target 3 and Hidden Valley. All other operating segments have been grouped together under all other surface operations.

When assessing profitability, the CODM considers the revenue and production costs of each segment. The net of these amounts is the production profit or loss. Therefore, production profit has been disclosed in the segment report as the measure of profit or loss. The CODM also considers capital expenditure when assessing the overall economic sustainability of each segment. The CODM, however, does not consider depreciation or impairment and therefore these amounts have not been disclosed in the segment report.

Segment assets consist of mining assets and mining assets under construction included under property, plant and equipment which can be attributed to the segment. Current and non-current group assets that are not allocated at a segment level form part of the reconciliation to total assets.

A reconciliation of the segment totals to the group financial statements has been included in note 37.
