Press release

New significant copper-gold drill results at Harmony's Kili Teke prospect

Johannesburg: Wednesday, 13 April 2016. Harmony Gold Mining Company Limited ('Harmony' or 'the Company') is pleased to advise continuing exploration success at its 100% held Kili Teke prospect in the Hela province in Papua New Guinea (PNG).

A maiden Mineral Resource estimate for Kili Teke was declared and announced in November 2015, comprising 128 million tonnes at 0.4 % copper and 0.3 g/t Au (506,000 tonnes copper, 1.2 million ounces Au)¹. The deposit contains two main areas of higher-grade quartz stockwork related mineralisation. Drilling completed since the release (10 holes / 6,820m) has focussed on potential to expand these zones along strike and down dip, with very encouraging results:

- New zones of near surface, stockwork related copper-gold mineralisation developing within the current footprint:
KTDD027: 584.4m @ 0.52% Cu, 0.35 g/t Au from 4.6m
Including 287.4m @ 0.56% Cu, 0.44 g/t Au from 4.6m (on section below)
- Depth extensions of porphyry related quartz vein stockwork mineralisation confirmed in latest drilling:
KTDD022: 206m @ 0.59% Cu, 0.42 g/t Au from 482m
KTDD025: 376m @ 0.47% Cu, 0.29 g/t Au from 495m
- Results also include high-grade massive sulphide chalcopyrite-bornite skarn mineralisation intersected at depth:
KTDD025: 7.8m @ 12.98% Cu, 11.45 g/t Au from 920.2m

Harmony's chief executive officer, Peter Steenkamp, commented: "It is a rare phenomenon, in this day and age, to drill a 584 meter borehole and achieve grades averaging over 0.5 percent copper and 0.35 grams per tonne gold from surface. Massive sulphide lodes averaging 13% copper and 11.4 grams per tonne gold are even rarer - which is what we are seeing from our Kili Teke drill results."

Drilling at the prospect continues with 2 drill rigs. A revised mineral resource estimate incorporating the latest drill results is planned for the September 2016 quarter.

"The latest drilling results support our belief that Kili Teke has the potential to develop into a major new porphyry copper-gold system. Developing a portfolio of world class copper-gold assets in PNG - replacing ounces at a discovery cost of less than US\$10 per gold equivalent ounce - creates excellent long term value for our shareholders," Peter added.

Harmony Gold Mining Company Limited (Harmony), a world-class gold mining and exploration company, has operations and assets in South Africa and Papua New Guinea. Harmony, which has more than 60 years' experience in the industry, is the third largest gold producer in South Africa. Our assets include 9 underground mines and 1 open pit operation and several surface sources in South Africa. Our assets in PNG – an open pit mine (Hidden Valley), as well as the significant Golpu project – are held in a joint venture. We also own several exploration tenements, in Papua New Guinea.

The company's primary stock exchange listing is on the JSE with a secondary listing on the New York Stock Exchange. The bulk of our shareholders are in South Africa and the United States. Additional information on the company is available on the corporate website, www.harmony.co.za.

Figure 1: Transverse section through the northern stockwork zone showing recent drilling intercepts from KTDD025 and KTDD027. Results support the current model, highlight an extension of the mineralisation developing at depth below the current resource limit, and extend the mineralised porphyry hosted quartz vein stockwork zone to surface. High-grade massive sulphide copper-gold mineralisation was intersected by KTDD025 off section near the footwall contact of the intrusive with the marbleised limestone host sequence.

¹ For more details refer to the press release "Maiden copper-gold resource of 4 million gold equivalent ounces defined for Harmony's Kili Teke prospect" 24 November 2015 – available on <https://www.harmony.co.za/our-business/exploration/kili-teke-prospect>.

For full results on the Kili Teke drilling information referred to in this release, including JORC / SAMREC disclosure requirements, please refer to the Annexure at <https://www.harmony.co.za/downloads/finish/91-files/1962-annexure-13-april-2016>

Competent Persons statement

The information in this report that relates to Exploration Results and other scientific and technical information, is based on information compiled by Mr Mike Humphries. Mr Humphries is a full time employee of Harmony and a member of the Australia Institute of Geoscientists. Mr Humphries has sufficient experience which is relevant to the styles of mineralisation and types of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in The JORC Code 2012 and SAMREC. Mr Humphries consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
