

OPERATIONAL UPDATE FOR THE NINE MONTHS ENDED 31 MARCH 2017

HARMONY'S ANNUAL PRODUCTION GUIDANCE WELL IN REACH

Johannesburg. Tuesday, 9 May 2017. Harmony Gold Mining Company Limited ("Harmony" or "the company") advises that the annual gold production guidance of 1.05 million ounces is well in reach, with year to date production at 812 000 ounces at a cash operating cost of R439 669/kg (US\$996/oz).

Harmony recorded an 8% operating free cash flow margin year to date, strengthened by the gold hedging agreements that are in place. The company's underground average recovered grade remains above 5g/t. The all-in sustaining costs (AISC) for the nine months ended 31 March 2017 is US\$1 170/oz or R516 630/kg.

Quarter on quarter gold production was 7% lower mainly due to the customary slow start up after the December holidays. AISC increased by 5% to R529 409/kg (or 10% to US\$1 246/oz) quarter on quarter.

Chief Executive Officer, Peter Steenkamp, commented that: "The fundamentals underpinning our mine plans enable us to achieve our annual production guidance. Safety, costs and grade continue to be a focus and higher production in the fourth quarter will drive down unit costs".

Below is a table setting out Harmony's operational results for the nine months ended 31 March 2017:

		Nine months ended March 2017

FORWARD-LOOKING STATEMENTS

This report contains forward-looking statements within the meaning of the safe harbour provided by Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended, with respect to our financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. These include all statements other than statements of historical fact, including, without limitation, any statements preceded by, followed by, or that include the words "targets", "believes", "expects", "aims", "intends", "will", "may", "anticipates", "would", "should", "could", "estimates", "forecast", "predict", "continue" or similar expressions or the negative thereof.

These forward-looking statements, including, among others, those relating to our future business prospects, revenues and income, wherever they may occur in this report and the exhibits to this report, are essentially estimates reflecting the best judgment of our senior management and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation: overall economic and business conditions in South Africa, Papua New Guinea, Australia and elsewhere, estimates of future earnings, and the sensitivity of earnings to the gold and other metals prices, estimates of future gold and other metals production

and sales, estimates of future cash costs, estimates of future cash flows, and the sensitivity of cash flows to the gold and other metals prices, statements regarding future debt repayments, estimates of future capital expenditures, the success of our business strategy, development activities and other initiatives, estimates of reserves statements regarding future exploration results and the replacement of reserves, the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions, fluctuations in the market price of gold, the occurrence of hazards associated with underground and surface gold mining, the occurrence of labour disruptions, power cost increases as well as power stoppages, fluctuations and usage constraints, supply chain shortages and increases in the prices of production imports, availability, terms and deployment of capital, changes in government regulation, particularly mining rights and environmental regulation, fluctuations in exchange rates, the adequacy of the group's insurance coverage and socio-economic or political instability in South Africa and Papua New Guinea and other countries in which we operate.

For a more detailed discussion of such risks and other factors (such as availability of credit or other sources of financing), see the company's latest Integrated Annual Report on Form 20-F which is on file with the Securities and Exchange Commission, as well as the Company's other Securities and Exchange Commission filings. The company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this annual report or to reflect the occurrence of unanticipated events, except as required by law.
