GOLDWEDGE PROJECT, NYE COUNTY, NEVADA PROGRESS WITH DECLINE CONSTRUCTION

FOR IMMEDIATE RELEASE

SPARKS, NEVADA, JULY 6, 2004, ROYAL STANDARD MINERALS INC. commenced the decline construction phase of the program in mid-June, 2004. At this point a total of 135' of ramp and approximately 35 feet of underground development from the portal entrance has been constructed. The portal and a portion of the ramp will include the installation of a 100-foot long steel liner plate that is expected to be completed in approximately 1-2 weeks. The underground development rate is expected to increase after the portal has been completed.

The decline construction plan has been modified to achieve access to the mineralized zone(s) in about 5-6 weeks. The current plan involves the development of a crosscut higher in the mineralized zone(s) than previously planned, within an interval that was recently drill tested by RSM in May, 2004. This approach should reduce the time to access and commence the bulk sampling program which could begin in late August, 2004.

RSM plans to start the underground drilling and bulk sampling of each of the several gold mineralized zones on the 6720 level, near the top of the deposit. Drilling and drifting within the primary mineralized zone(s) will be initiated and expanded along with continued decline development as warranted to access the gold mineralized structures along strike within the structural zone. Additionally, underground lateral drilling will be completed as a means to access thickness and quality of parallel gold mineralized intervals within the 100+ feet wide structural zone.

RSM is an exploration and pre-development company with advanced gold projects in Nevada.

The Canadian Venture Exchange does not accept responsibility for adequacy or accuracy of this release as per Exchange Policy 3.3 section 6.5.

Royal Standard Minerals cautions that the statements made in this press release and other forward looking statements made on behalf of the Company may be affected by such other factors including, but not limited to, volatility of mineral prices, product demand, market competition, imprecision of mineral estimates, and other risks detailed herein and from time to time in the Securities and Exchange Commission filings of the Company.
