GS FINANCIAL CORP.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 – BASIS OF PRESENTATION

The consolidated financial statements include the accounts of GS Financial Corp. (the “Company”) and its subsidiary, Guaranty Savings and Homestead Association (the “Association”). All significant intercompany balances and transactions have been eliminated. Certain financial information for prior periods has been reclassified to conform with the current presentation.

In preparing the consolidated financial statements, the Company is required to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. The consolidated financial statements reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the financial condition, results of operations, changes in stockholders’ equity and cash flows for the interim periods presented. These adjustments are of a normal recurring nature and include appropriate estimated provisions.

Pursuant to rules and regulations of the Securities and Exchange Commission, certain financial information and disclosures have been condensed or omitted in preparing the consolidated financial statements presented in this quarterly report on Form 10-Q. The results of operations for the three and six month periods ended June 30, 2005 are not necessarily indicative of the results to be expected for the year ending December 31, 2005. These unaudited financial statements should be read in conjunction with the Company’s 2004 annual report on Form 10-K.

NOTE 2 – EARNINGS PER SHARE

Earnings per share are computed using the weighted average number of shares outstanding as prescribed in Statement of Financial Accounting Standard (“SFAS”) 128. The components used in this computation were as follows:

	<i>Three Months Ended June 30</i>		<i>Six Months Ended June 30</i>	
<i>(\$ in thousands, except per share data)</i>	2005	2004	2005	2004
Numerator:				
Net Income	\$ 271	\$ 94	\$ 172	\$ 205
Effect of Dilutive Securities	-	-	-	-
Numerator for Diluted Earnings Per Share	\$ 271	\$ 94	\$ 172	\$ 205
Denominator				
Weighted-Average Shares Outstanding	1,181,065	1,156,784	1,181,834	1,158,428
Effect of Potentially Dilutive Securities and Contingently Issuable Shares	12,353	27,736	15,802	28,790
Denominator for Diluted Earnings Per Share	1,193,417	1,184,520	1,197,636	1,187,219
Earnings Per Share				
Basic	\$ 0.23	\$ 0.08	\$ 0.14	\$ 0.18
Diluted	0.23	0.08	0.14	0.17
Cash Dividends Per Share	\$ 0.10	\$ 0.10	\$ 0.20	\$ 0.20

NOTE 3 – EMPLOYEE STOCK OWNERSHIP PLAN

The GS Financial Employee Stock Ownership Plan (“ESOP”) purchased 275,080 shares of the Company’s common stock on April 1, 1997 financed by a loan from the Company. The loan is secured by those shares not yet allocated to plan participants. At June 30, 2005, there were 52,054 unallocated shares and the balance of the loan was \$519,000. The Association bears the cost of the ESOP as compensation expense, which is based on the principal and interest payments on the corresponding debt as well as the market value of the stock. Compensation expense related to the ESOP was \$112,000 and \$225,000 for the three and six month periods ended June 30, 2005, respectively, compared to \$125,000 and \$250,000 for the same time periods ended June 30, 2004.

NOTE 4 – STOCK OPTION PLAN

On October 15, 1997, the stockholders approved the adoption of the GS Financial Corp. 1997 Stock Option Plan for the benefit of directors, officers and other key employees. Under this plan, 343,850 shares of common stock have been reserved for issuance pursuant to the exercise of stock options, of which 275,076 shares have become fully vested and exercisable. To date no options have been exercised.

The Company accounts for the plan under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. Under this Opinion, the Company recognizes no compensation expense with respect to fixed awards of stock options. All options granted under the plan have an exercise price equal to the market value of the underlying common stock on the date of the grant. As such, the options have no intrinsic value on the award date, which is also the measurement date for compensation expense.

SFAS No. 123, *Accounting for Stock-Based Compensation*, as amended by SFAS No. 148, established a fair value-based method of accounting for stock-based compensation. As provided for in SFAS No. 123, the Company has elected to continue to follow APB Opinion No. 25 and related interpretations to measure and recognize stock-based compensation expense. Because all of the options that have been granted have vested prior to 2004, net income and earnings per share for the three and six month periods ended June 30, 2005 and 2004 would not have been affected if the Company had applied the fair value recognition provisions of SFAS No. 123, to measure and recognize stock based compensation expense.

NOTE 5 – RECOGNITION AND RETENTION PLAN

On October 15, 1997 the Company established the Recognition and Retention Plan and Trust (“RRP”) as an incentive to retain personnel of experience and ability in key positions. Stockholders approved a total of 137,540 shares of stock to be granted pursuant to the RRP. The Company acquired a total of 137,500 shares of common stock for issuance under the RRP. The Company is accruing this expense over the ten-year vesting period based on the price of the stock (\$12.50/share) when the plan was modified in September, 1998. As of June 30, 2005 of the 125,028 shares awarded, 6,627 shares have been forfeited due to termination of employment or service as a director and 89,697 had been earned and issued. Compensation expense related to the RRP was \$24,000 and \$33,000 for the three and six month periods ended June 30, 2005, respectively, compared to \$10,000 and \$48,000 for the same time periods ended June 30, 2004.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of this discussion and analysis is to provide information necessary to gain an understanding of the financial condition, changes in financial condition and results of operations of GS Financial Corp. ("GS Financial" or the "Company"), and its subsidiary during the first and second quarters of 2005 and 2004. Virtually all of the Company's operations are dependent on the operations of its subsidiary, Guaranty Savings and Homestead Association ("Guaranty" or the "Association"). This discussion is presented to highlight and supplement information presented elsewhere in this quarterly report on Form 10-Q, particularly the consolidated financial statements and related notes in Item 1. This discussion and analysis should be read in conjunction with accompanying tables and the Company's 2004 annual report on Form 10-K.

FORWARD-LOOKING STATEMENTS

In addition to the historical information, this discussion includes certain forward-looking statements as that term is defined by the Private Securities Litigation Reform Act of 1995. Such statements include, but may not be limited to comments regarding (a) the potential for earnings volatility from changes in the estimated allowance for loan losses over time, (b) the expected growth rate of the loan portfolio, (c) future changes in the mix of deposits, (d) the results of net interest income simulations run by the Company to measure interest rate sensitivity, (e) the performance of Guaranty's net interest income and net interest margin assuming certain future conditions, and (f) changes or trends in certain expense levels.

Forward-looking statements are based on numerous assumptions, certain of which may be referred to specifically in connection with a particular statement. Some of the more important assumptions include:

- expectations about overall economic strength and the performance of the economies in Guaranty's market area,
- expectations about the movement of interest rates, including actions that may be taken by the Federal Reserve Board in response to changing economic conditions,
- reliance on existing or anticipated changes in laws or regulations affecting the activities of the banking industry and other financial service providers, and
- expectations regarding the nature and level of competition, changes in customer behavior and preferences, and Guaranty's ability to execute its plans to respond effectively.

Because it is uncertain whether future conditions and events will confirm these assumptions, there is a risk that the Company's future results will differ materially from what is stated or implied by such forward-looking statements. The Company cautions the reader to consider this risk.

The Company undertakes no obligation to update any forward-looking statement included in this quarterly report, whether as a result of new information, future events or developments, or for any other reason.

FINANCIAL CONDITION

LOANS AND ALLOWANCE FOR LOAN LOSSES

Total loans decreased \$4.3 million, or 4.9%, from year-end 2004 to the end of the second quarter of 2005. Average loans for the second quarter of 2005 were \$89.6 million, up \$2.7 million (3.1%) compared to the second quarter of 2004. Year-to-date average loans at June 30, 2005 totaled \$90.6 million, up \$6.4 million (7.5%) from the same time period in 2004. Table 1, which is based on regulatory reporting codes, shows loan balances at June 30, 2005 and at the end of the four prior quarters and average loans outstanding during each quarter.

Over the past several years the Company has been able to develop significant new business in the growing commercial lending market including loans secured by commercial real estate and multi-family residential property. At December 31, 2004, these loans made up approximately 39% of the entire loan portfolio. During the last quarter of 2004 and extending into 2005, management performed a review of the Company's underwriting practices in this area. This review was initiated as a result of concerns over the portion of the portfolio that was delinquent more than 90 days and the number of relatively large loan account balances outstanding with certain individual borrowers. As a result of its review, the Company updated and strengthened its commercial loan policies and procedures. While this review was being performed, the number of commercial loan originations decreased, resulting in a reduction of \$3.2 million, or 8.9%, in outstanding balances at June 30, 2005, compared to year-end 2004 and a reduction of \$1.4 million, or 4.0%, from the end of the June 30, 2004 quarter. The Company plans to continue to originate commercial real estate loans in accordance with its updated policies and underwriting standards.

All loans carry a degree of credit risk. Management's evaluation of this risk ultimately is reflected in the estimate of probable loan losses that is reported in the Company's financial statements as the allowance for loan losses. Changes in this ongoing evaluation over time are reflected in the provision for loan losses charged to operating expense. At June 30, 2005 the allowance for loan losses was \$920,000, or 1.04%, of total loans. Table 2 presents an analysis of the activity in the allowance for loan losses for the past five quarters.

Tables 3 and 4 set forth the Company's delinquent loans and nonperforming assets at June 30, 2005 and at the end of the preceding four quarters. The balances presented in Table 3 are total principal balances outstanding on the loans rather than the actual principal past due. Nonperforming assets consist of loans on non-accrual status and foreclosed assets. There were no loans 90 days delinquent and still accruing interest at the end of any of the five quarters presented.

INVESTMENT IN SECURITIES

At June 30, 2005, the Company's total securities available-for-sale were \$84.4 million, compared to \$94.6 million at December 31, 2004 and \$110.2 million at June 30, 2004. Mutual fund investments made up 58.7% of the portfolio at June 30, 2005, compared to 52.5% at year-end 2004 and 47.6% at June 30, 2004. At June 30, 2005, collateralized mortgage obligations made up 34.6% of the portfolio, compared to 25.9% at December 31, 2004 and 34.2% at June 30, 2004. During the six month period ended June 30, 2005, the Company sold its entire \$19.3 million portfolio of FHLMC stock at a loss of approximately \$18,000. Such sale was undertaken as part of the Company's plans to restructure its portfolio by investing in securities that provide monthly cash flow and regular opportunities for reinvestment. Table 5 shows the composition of the Company's investment portfolio at June 30, 2005, December 31, 2004, and June 30, 2004.

Management expects the investment portfolio mix to shift further toward securities that are backed by mortgage assets and that produce monthly cash flow in the form of interest and principal repayments. Proceeds from interest, dividends and principal repayments that are not needed to fund new loan commitments will likely be reinvested in collateralized mortgage obligations and pass-through mortgage backed obligations. The timing of this reallocation will depend on a number of factors, including the change in market price of the Company's mutual fund investments and the prevailing yields available on other securities.

At June 30, 2005, the net unrealized losses on the Company's entire securities portfolio was \$801,000 or .94% of amortized cost, compared to net unrealized losses of \$447,000, or .47% of amortized cost at December 31, 2004. These losses consist primarily on the Company's mutual fund investments. Management believes that these losses are temporary in nature and will reverse themselves when interest rates become more favorable for those types of investments.

DEPOSITS

Deposit pricing strategies implemented during the second quarter of 2004 because of excess liquidity levels caused a decline of customer deposit accounts. At June 30, 2005, deposits were 5.3%, or \$6.9 million, below the level at December 31, 2004 and \$17.9 million, or 12.6% below the level at the end of the second quarter of the previous year. Average deposits totaled \$123.2 million in the second quarter of 2005, a \$3.4 million (2.7%) decrease from the first quarter of 2005 and a \$20.2 million (14.1%) decrease from the second quarter of 2004.

Table 6 presents the composition of average deposits for the quarters ended June 30, 2005, March 31, 2005 and June 30, 2004.

TABLE 6. DEPOSIT COMPOSITION

BORROWINGS

At June 30, 2005, the Company's borrowings from the Federal Home Loan Bank decreased \$3.9 million, or 9.8%, from December 31, 2004 and \$2.6 million, or 6.9%, from June 30, 2004. Average advances for the second quarter of 2005 were \$36.5 million, a decrease of \$1.9 million, or 5.0%, from the first quarter of 2005 and a decrease of \$2.6 million, or 6.7%, from the prior year's second quarter. The decreases were due to regularly scheduled principal payments that were not fully offset by new borrowings because of the Company's current liquidity position. These balances should reduce further throughout the remainder of the year as there are \$7.6 million in scheduled principal payments for the last six months of 2005.

STOCKHOLDERS' EQUITY AND CAPITAL ADEQUACY

At June 30, 2005, stockholders' equity totaled \$28.8 million, a decrease of \$119,000 from December 31, 2004. This decrease was due to dividends of \$242,000, \$233,000 in unrealized losses on investment securities available-for-sale, net of related deferred income taxes and treasury stock purchases of \$74,000. The decreases were partially offset by net income of \$172,000 and capitalized stock based compensation costs of \$258,000.

Since 1998, the Company has been regularly repurchasing shares of its common stock when shares have been available at prices and amounts deemed prudent by management. Due to the highly capitalized condition of the Company, management believed in the past that these purchases, most of which were at a discount to book value, were an effective way to reduce capital while still enhancing shareholder value. These shares have not been retired and could potentially serve as a source of capital funding should the need arise in the future. Table 7 summarizes the repurchase of the shares of its common stock by year.

TABLE 7. SUMMARY OF STOCK REPURCHASES

<i>Year Ended December 31,</i>	Shares	Cost (\$000)	Average Price Per Share
1998	491,054	\$ 8,325	\$ 16.95

2004	16,842	315	18.70
Quarter Ended June 30, 2005	3,907	74	18.94
Total Stock Repurchases	2,154,469	\$ 32,193	\$ 14.94

The ratios in Table 8 indicate that the Association remained well capitalized at June 30, 2005. Reductions in the Association's loans and investment portfolios caused a decrease in risk-weighted assets of \$20.4 million since year-end 2004. The regulatory capital ratios of Guaranty Savings and Homestead Association exceed the minimum required ratios, and the Association has been categorized as "well-capitalized" in the most recent notice received from its primary regulatory agency.

LIQUIDITY AND CAPITAL RESOURCES

The objective of liquidity management is to ensure that funds are available to meet cash flow requirements of depositors and borrowers, while at the same time meeting the operating, capital and strategic cash flow needs of the Company and the Association, all in the most cost-effective manner. The Company develops its liquidity management strategies and measures and monitors liquidity risk as part of its overall asset/liability management process, making use of the quantitative modeling tools to project cash flows under a variety of possible scenarios.

On the liability side, liquidity management focuses on growing the base of more stable core deposits at competitive rates, while at the same time ensuring access to economical wholesale funding sources. The sections above on Deposits and Borrowings discuss changes in these liability-funding sources in the first three and six months of 2005.

Liquidity management on the asset side primarily addresses the composition and maturity structure of the loan and investment securities portfolios and their impact on the Company's ability to generate cash flows from scheduled payments, contractual maturities and prepayments, their use as collateral for borrowings and possible sales on the secondary market.

Cash generated from operations is another important source of funds to meet liquidity needs. The consolidated statements of cash flows present operating cash flows and summarize all significant sources and uses of funds for the first six months of 2005 and 2004. While the Company reported net income of only \$172,000 for the six months ended June 30, 2005, there was a net cash increase of \$468,000 from operations. Certain adjustments are made to net income to reach the level of cash provided by operating activities. Some of these adjustments include non-cash expenses (depreciation, employee compensation made in the form of stock, and deferred tax provisions) and revenues (mutual fund dividends reinvested in principal, accretion of discounts, and dividends received in the form of stock).

In addition, management monitors its liquidity position by tracking certain financial data. Table 9 illustrates some of the factors that the Company uses to measure liquidity. After a period of increasing levels, the Company's liquidity position has declined during the first six months of 2005, primarily reflecting increases in lending activity and lower levels of customer deposits as discussed earlier.

TABLE 9. KEY LIQUIDITY INDICATORS

Deposits \$100,000 and over to total deposits	15.70%	16.88%	17.91%

RESULTS OF OPERATIONS

NET INTEREST INCOME

Net interest income for the second quarter of 2005 decreased \$13,000, or .9%, from the first quarter of 2005, on a decrease of average earning assets of 2.65% between these periods. Second quarter net interest income for 2005 was up \$88,000, or 6.6%, on average earning assets that were down 12.0% compared with the second quarter of 2004.

The Company has maintained a significantly asset sensitive balance sheet in the short term (3 month) horizon. As discussed in “Financial Condition – Investment Securities” an earlier section, a large portion of the investment portfolio is concentrated in mutual fund investments that reprice frequently and tend to follow trends in short term interest rates. These interest rates have risen throughout the first half and second quarters of 2005 and the Company has benefited with increased yields on these investments from the same time periods in 2004. While market interest rates have also increased on the funding side, the Company’s excess liquidity position has allowed management to control interest costs and delay the occurrence of any significant margin compression.

During the second quarter of 2005, interest income from earning assets was down \$16,000, or .6%, from the first quarter of 2005. This decrease was due primarily to the Company’s reduced investment in loans as well as a reduction in the average yield on loans from the first quarter of 2005. The Company’s average investment in loans was down \$2.1 million in the second quarter of 2005 compared to the first quarter of 2005 and average yield decreased 50 basis points, accounting for a \$153,000 decrease in interest income. This decrease, combined with a \$30,000 reduction in interest earned on FHLB stock and federal funds sold investments, was only partially offset by an increase in income from securities of \$167,000.

Second quarter interest income for 2005 was also down \$70,000, or 2.6%, from the second quarter of 2004. This decrease was primarily due to the reduction in the Company’s investment in FHLMC stock. During the second quarter of 2004, the Company earned \$279,000 on an average investment in FHLMC stock of \$21.2 million. This investment was sold in the first quarter of 2005. The income that the Company earned on all other interest-earning assets increased \$209,000 in the second quarter of 2005 over the second quarter of 2004.

During the second quarter of 2005, interest expense was down \$3,000, or .3%, from the first quarter of 2005 and \$158,000, or 11.5%, from the second quarter of 2004. Lower average balances of all funding sources more than offset rate increases in time deposits in the second quarter of 2005 when compared to both the first quarter of 2005 and the second quarter of 2004.

The average cost on interest bearing deposits increased to 2.41% for the second quarter of 2005, from 2.28% in the first quarter of 2005 and 2.31% in the second quarter of 2004. These changes in rates contributed \$36,000 and \$33,000 of increases in interest expense from the first quarter of 2005 and the second quarter of 2004, respectively. While the changes in deposits, as discussed earlier, contributed decreases of \$13,000 and \$119,000 of interest expense from the first quarter of 2005 and the second quarter of 2004, respectively which combined with the changes in rates resulted in decreases in total expenses for the period.

Average borrowings were down \$1.9 million for the second quarter of 2005 compared to the first quarter of 2005, and \$2.6 million compared to the second quarter of 2004. These decreases in the average balances accounted for \$26,000 and \$37,000 in reduced interest expenses for each respective period.

Net interest income for the first six months of 2005 increased \$273,000, or 10.5%, from the first six months of 2004 on earning assets that were \$22.5 million (10.7%) lower. Table 12 shows the components of the Company’s net interest margin for the first six months of 2005 and 2004. Net interest margin was 3.06% for the six months ended June 30, 2005 and 2.47% for the prior year’s period. The yield on average earning assets increased 52 basis points and the total interest cost of funding earning assets decreased 5 basis points compared to the first six months of 2004.

The same factors that affected the mix and rates for earning assets and funding sources in the second quarter of 2005 were also evident for the year-to-date period. The Company’s liquidation of its investment in FHLMC stock and reduced average balances in collateralized mortgage obligations and mutual fund investments contributed \$837,000 to the reduction in interest income in the first six months of 2005 from the same period of 2004. These reductions were not fully offset by an increase in average loan balances and increases in yields received on loans and investments, leaving an overall reduction in interest income of \$90,000 in the first six months of 2005 compared to the same period in 2004.

Interest expenses were \$363,000 lower for the first six months of 2005 from the first six months of 2004. The average cost of interest bearing deposits was nearly unchanged at 2.34% for the year to date in 2005 compared to 2.35% for the same period in 2004. The average cost of borrowings during the first six months was 5.28% in 2005 compared to 5.66% in 2004.

PROVISION FOR LOAN LOSSES

The Company made no provision for losses in the first or second quarter of 2005, compared to \$19,000 in the second quarter of 2004. There were no charge-offs in the first or second quarter of 2005. Net charge-offs totaled \$3,000 in the second quarter of 2004.

For a more detailed discussion of changes in the allowance for loan losses, nonperforming assets and general credit quality, see the earlier section on Loans and Allowance for Loan Losses. The future level of the allowance for loan losses will reflect management's ongoing evaluation of credit risk, based on established internal policies and practices.

NON-INTEREST INCOME

Non-interest income increased \$141,000 for the second quarter of 2005 compared to the same time period in 2004 and increased \$128,000 for the first six months of 2005 compared to the first six months of 2004. Non-interest income before securities transactions was down \$2,000, or 8%, for the second quarter of 2005 compared to the same time period of 2004 and up \$3,000, or 6%, for the first six months of 2005 compared to the first six months of 2004. Losses from the sale of securities totaled \$18,000 in the first six months of 2005 compared to losses of \$143,000 for the first six months of 2004. The major categories of non-interest income for the three and six months ended June 30, 2005 and 2004 are presented in Table 14.

TABLE 14. NON-INTEREST INCOME

NON-INTEREST EXPENSE

Non-interest expense for the second quarter of 2005 totaled \$1.1 million, a \$49,000 (4%) decrease from the second quarter of 2004. For the first six months of 2005, non-interest expenses were \$2.6 million, a \$325,000 (14%) increase from 2004. Included in these expenses for the first half of 2005 is a charge of \$428,000 related to retirement benefits to be paid to the Company's former President and Chief Executive Officer. Without this charge, non-interest expenses would have been approximately \$103,000 below that of the year earlier quarter. Non-interest expense for the three and six months ended June 30, 2005 and 2004 are presented in Table 15 below.

TABLE 15. NON-INTEREST EXPENSE

	<i>Three Months Ended</i>			<i>Six Months Ended</i>		
			Percentage			Percentage
<i>(\$ in thousands)</i>	June 30, 2005	June 30, 2004	Increase (Decrease)	June 30, 2005	June 30, 2004	Increase (Decrease)
Employee compensation	\$ 490	\$ 450	9%	\$ 1,381	\$ 937	47%
Employee benefits	173	193	(11)	352	387	(9)
Total personnel expense	663	643	3	1,732	1,324	31
Net occupancy expense	109	97	12	216	198	9
Ad Valorem taxes	109	140	(22)	218	268	(19)
Data processing costs	31	50	(38)	78	108	(28)
Advertising	19	30	(37)	44	62	(29)
ATM server expenses	7	12	(42)	13	23	(43)
Professional fees	48	35	37	114	57	100
Deposit insurance and supervisory fees	30	28	8	57	56	2
Printing and office supplies	17	27	(37)	28	45	(38)
Telephone	9	23	(61)	28	42	(33)
Dues and subscriptions	9	14	(36)	19	31	(39)
Other operating expenses	20	21	(1)	41	49	(17)
Total non-interest expense	1,071	\$ 1,120	(4)%	\$ 2,588	\$ 2,263	14%
Efficiency Ratio	73.81%	91.65%		89.27%	90.59%	
Efficiency Ratio - Excluding Securities Transactions	73.81%	82.05%		88.72%	85.69%	

Personnel costs, which represent the largest component of non-interest expense, increased \$20,000, or 3% to \$663,000 in the second quarter of 2005 compared to \$643,000 in the second quarter of 2004. Personnel costs increased \$408,000, or 31%, to \$1.7 million in the first half of 2005 compared to \$1.3 million the half of 2004. This increase was the result of the charge for retirement benefits discussed above. Without this charge, personnel expense would have been \$1.3 million in 2005, a \$20,000 (1.5%) decrease from the comparable period in the previous year.

Professional fees increased \$13,000, or 37% in the second quarter of 2005 compared to the second quarter of 2004 and \$57,000, or 100% during the first half of 2005 compared to the first half of 2004. This increase was primarily due to consulting fees paid to assist management in evaluating its policies and procedures concerning the Association's loan portfolio and fees associated with the departure of the Company's former Chief Executive Officer.

Data processing costs decreased \$19,000, or 38%, in the second quarter of 2005 compared to the same period for 2004 and \$30,000, or 28% for the first half of 2005 compared to the first half of 2004. During the first quarter of 2004, the Association introduced an internet banking product. In connection with the set up of this new service, the Company incurred a one-time charge of \$18,000. In addition, the Company converted to a new core processing system in the first quarter of 2005 that has reduced recurring monthly service fees.

The following table presents GS Financial's results of operations under generally accepted accounting principles (GAAP) and the results of operations excluding the charge for retirement benefits discussed earlier (referred to as Non-GAAP). Management views the \$428,000 in costs recorded in the first quarter of 2005 upon the retirement of the Company's former President to be non-recurring in nature. Currently, there are no employment or severance agreements in place at either the Company or the Association. Management believes the non-GAAP presentation is useful to investors because it provides information of the Company's underlying operations and performance trends. Specifically, these measures permit evaluation and comparison of the results of ongoing business operations that management uses to assess the performance of the Association's operations. While management considers the non-GAAP presentation to be useful, it should not be considered an alternative to GAAP.

TABLE 16. GAAP TO NON-GAAP RECONCILIATION

		Post-Retirement Benefits and Related Interest	
(\$ in thousands, except per share data)	GAAP		Non-GAAP

Item 3 – Quantitative and Qualitative Disclosures about Market Risk

Quantitative and qualitative disclosures about market risk are presented at December 31, 2004 in the Company's Annual Report on Form 10-K, filed with the SEC on March 30, 2005. Management believes there have been no material changes in the Company's market risk since December 31, 2004.

Item 4 - Controls and Procedures

Our management evaluated, with the participation of our interim Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on such evaluation, our interim Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations and are operating in an effective manner.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) or 15(d)-15(f) under the Securities Exchange Act of 1934) occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to affect, our internal control over financial reporting.
