CARDIOME'S PARTNER STEADYMED ANNOUNCES SUCCESSFUL COMPLETION OF TREVYENT[®] CLINICAL VALIDATION STUDY

Vancouver, Canada, April 6, 2017 -- Cardiome Pharma Corp. (NASDAQ: CRME / TSX: COM) updated today that its partner, SteadyMed Therapeutics (NASDAQ: STDY), announced the successful completion of a clinical study of Trevyent[®] with a press release discussing the study on April 5, 2017. Cardiome licensed the commercial rights to Trevyent[®] from SteadyMed for many international markets in 2015.

SteadyMed's clinical validation study enrolled 60 healthy adult volunteers in an in-clinic setting designed to examine the performance of the PatchPump used by Trevyent[®]. Each trial subject was provided one PatchPump device containing a placebo formulation and each otherwise carried on with their normal daily and nighttime routines over a 48 hour period. The goals of the study were to evaluate the safety and performance functions of the PatchPump delivery system as well as the tolerability of the on-body application of the product. According to SteadyMed, the results "indicate that the PatchPump devices performed as intended in all categories of evaluation", including dose accuracy and precision.

Commenting on SteadyMed's update, Hugues Sachot, Cardiome's Senior VP Commercial, said "We continue to be pleased with the progress of our partnership with SteadyMed. We licensed Trevyent[®] because we believed that there was a better way to deliver treprostinil to patients suffering from Pulmonary Arterial Hypertension, and we remain convinced that Trevyent[®] will provide just that."

About Pulmonary Arterial Hypertension

Pulmonary arterial hypertension (PAH) is a type of high blood pressure that occurs in the right side of the heart and in the arteries that supply blood to the lungs. PAH worsens over time and is life-threatening because the pressure in a patient's pulmonary arteries rises to dangerously high levels, putting a strain on the heart. There is no cure for PAH, but several medications are available to treat symptoms, such as the market-leading prostacyclin PAH therapy, Remodulin[®] (treprostinil sodium), which is produced by United Therapeutics Corporation. The annual cost of Remodulin is reported to be between approximately \$125,000 and \$175,000 per patient and United Therapeutics reported Remodulin revenues of \$602 million in 2016.

About Cardiome Pharma Corp.

Cardiome Pharma Corp. is a specialty pharmaceutical company dedicated to the development and commercialization of innovative therapies that will improve the quality of life and health of patients suffering from disease. Cardiome has two marketed, in-hospital, cardiology products, BRINAVESS[®] (vernakalant IV), approved in Europe, Canada, and other territories for the rapid conversion of recent onset atrial fibrillation to sinus rhythm in adults, and AGGRASTAT[®] (tirofiban HCl) a reversible GP IIb/IIIa inhibitor indicated for use in patients with acute coronary syndrome. Cardiome also commercializes ESMOCARD[®] and ESMOCARD LYO[®] (esmolol hydrochloride), a short-acting beta-blocker used to control rapid heart rate in a number of cardiovascular indications, on behalf of their partner Amomed in select European markets. Cardiome has also licensed: XYDALBA[™] (dalbavancin hydrochloride), a second generation, semi-synthetic lipoglycopeptide approved in the EU for the treatment of acute bacterial skin and skin structure infections (ABSSSI) in adults for select European and Middle Eastern nations and Canada from Allergan; and TREVYENT[®], a development stage drug device combination that is under development for Pulmonary Arterial Hypertension for Europe, the Middle East and for Canadian markets from SteadyMed Therapeutics.

Cardiome is traded on the NASDAQ Capital Market (CRME) and the Toronto Stock Exchange (COM). For more information, please visit our web site at www.cardiome.com.

Forward-Looking Statement Disclaimer

Certain statements in this news release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 or forward-looking information under applicable Canadian securities legislation that may not be based on historical fact, including without limitation statements containing the words “believe”, “may”, “plan”, “will”, “estimate”, “continue”, “anticipate”, “intend”, “expect” and similar expressions. Forward-looking statements may involve, but are not limited to, comments with respect to our objectives and priorities for the remainder of 2017 and beyond, our strategies or future actions, our targets, expectations for our financial condition and the results of, or outlook for, our operations, research and development and product and drug development. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Many such known risks, uncertainties and other factors are taken into account as part of our assumptions underlying these forward-looking statements and include, among others, the following: general economic and business conditions in the United States, Canada, Europe, and the other regions in which we operate; market demand; technological changes that could impact our existing products or our ability to develop and commercialize future products; competition; existing governmental legislation and regulations and changes in, or the failure to comply with, governmental legislation and regulations; availability of financial reimbursement coverage from governmental and third-party payers for products and related treatments; adverse results or unexpected delays in pre-clinical and clinical product development processes; adverse findings related to the safety and/or efficacy of our products or products; decisions, and the timing of decisions, made by health regulatory agencies regarding approval of our technology and products; the requirement for substantial funding to expand commercialization activities; and any other factors that may affect our performance. In addition, our business is subject to certain operating risks that may cause any results expressed or implied by the forward-looking statements in this presentation to differ materially from our actual results. These operating risks include: our ability to attract and retain qualified personnel; our ability to successfully complete pre-clinical and clinical development of our products; changes in our business strategy or development plans; intellectual property matters, including the unenforceability or loss of patent protection resulting from third-party challenges to our patents; market acceptance of our technology and products; our ability to successfully manufacture, market and sell our products; the availability of capital to finance our activities; and any other factors described in detail in our filings with the Securities and Exchange Commission available at www.sec.gov and the Canadian securities regulatory authorities at www.sedar.com. Given these risks, uncertainties and factors, you are cautioned not to place undue reliance on such forward-looking statements and information, which are qualified in their entirety by this cautionary statement. All forward-looking statements and information made herein are based on our current expectations and we undertake no obligation to revise or update such forward-looking statements and information to reflect subsequent events or circumstances, except as required by law.
