## **CARDIOME ANNOUNCES COMMERCIAL LAUNCH OF BRINAVESS® (VERNAKALANT HYDROCHLORIDE) IN CANADA**

**Vancouver, Canada, June 12, 2017** – Cardiome Pharma Corp. (NASDAQ:CRME / TSX:COM) today announced that it received authorization from Health Canada to begin selling BRINAVESS® (vernakalant hydrochloride, IV) and has subsequently launched BRINAVESS® in Canada. BRINAVESS® is indicated for the rapid conversion of recent onset atrial fibrillation (“AF”) to sinus rhythm for: non-surgery patients with AF  $\leq$  7 days; and post-cardiac surgery patients with duration of AF  $\leq$  3 days. BRINAVESS® is not recommended for conversion of atrial flutter to sinus rhythm. The product is currently available on the Ontario formulary, with a broader launch anticipated in the third quarter of this year as more provinces are expected to include BRINAVESS® in the provincial formularies.

“The launch of BRINAVESS® in Canada marks the entry of this important treatment into one of the last remaining major markets in the world where BRINAVESS® was previously not available for patients,” said Hugues Sachot, Cardiome’s Chief Commercial Officer. “Our commercial team has worked diligently with our hospital customers in anticipation of first commercial sale, and we are ready for sales to commence ahead of our previously guided fourth quarter timeline.”

“This is exciting progress for Cardiome as we continue to build a pharmaceutical company focused on bringing acute care medicines to physicians and patients in hospitals around the world,” said William Hunter, M.D., CEO and President of Cardiome. “This milestone is particularly gratifying as BRINAVESS® was discovered by Canadian researchers and will now reach hospitals in Canada in order to help patients suffering from acute onset atrial fibrillation.”

AF affects approximately 350,000 patients in Canada.<sup>1</sup>

### **About BRINAVESS®**

BRINAVESS® (vernakalant HCl, IV) is an antiarrhythmic drug that acts preferentially in the atria by prolonging atrial refractoriness and slowing impulse conduction in a rate-dependent fashion. BRINAVESS® is approved for marketing in Europe, Canada and several other countries worldwide. In Europe, it is approved for the rapid conversion of recent onset atrial fibrillation to sinus rhythm in adults: 1) for non-surgery patients: atrial fibrillation  $\leq$  7 days duration; and 2) for post-cardiac surgery patients: atrial fibrillation  $\leq$  3 days duration. Vernakalant IV is not approved for use in the United States.

## About Atrial Fibrillation

Atrial Fibrillation (AF) is a supraventricular tachyarrhythmia with uncoordinated atrial activation resulting in ineffective atrial contraction and if left untreated, structural and/or electrophysiological atrial tissue abnormalities.<sup>2</sup> AF is a common cardiac rhythm disturbance that increases in prevalence with advancing age.<sup>2</sup> According to the American Heart Association, estimates of the prevalence of AF in the U.S. ranged from 2.7 million to 6.1 million in 2010, and is expected to rise to between 5.6 million to 12 million in 2030.<sup>3</sup> There are two strategies to manage AF, namely, rhythm- or rate-control. A rhythm-control strategy may be used in patients who are severely compromised, remain symptomatic despite adequate rate control, when adequate rate control is difficult to achieve, when long term rhythm control therapy is preferred, younger patient age, presence of tachycardia-mediated cardiomyopathy, and first episode of AF.<sup>2,4</sup> Early intervention with a rhythm-control strategy to prevent progression of AF may be beneficial to the AF patient.<sup>2</sup>

## About Cardiome Pharma Corp.

Cardiome Pharma Corp. is a specialty pharmaceutical company dedicated to the development and commercialization of innovative therapies that will improve the quality of life and health of patients suffering from disease. Cardiome has two marketed, in-hospital, cardiology products, BRINAVESS® (vernakalant IV), approved in Europe, Canada, and other territories for the rapid conversion of recent onset atrial fibrillation to sinus rhythm in adults, and AGGRASTAT® (tirofiban HCl) a reversible GP IIB/IIIa inhibitor indicated for use in patients with acute coronary syndrome. Cardiome also commercializes ESMOCARD® and ESMOCARD LYO® (esmolol hydrochloride), a short-acting beta-blocker used to control rapid heart rate in a number of cardiovascular indications, on behalf of their partner Amomed in select European markets. Cardiome has also licensed: XYDALBA™ (dalbavancin hydrochloride), a second generation, semi-synthetic lipoglycopeptide approved in the EU for the treatment of acute bacterial skin and skin structure infections (ABSSSI) in adults for select European and Middle Eastern nations and Canada from Allergan; and TREVYENT®, a development stage drug device combination that is under development for Pulmonary Arterial Hypertension for Europe, the Middle East and for Canadian markets from SteadyMed Therapeutics.

Cardiome is traded on the NASDAQ Capital Market (CRME) and the Toronto Stock Exchange (COM). For more information, please visit our web site at [www.cardiome.com](http://www.cardiome.com).

## **Forward-Looking Statement Disclaimer**

Certain statements in this news release contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 or forward-looking information under applicable Canadian securities legislation that may not be based on historical fact, including without limitation statements containing the words “believe”, “may”, “plan”, “will”, “estimate”, “continue”, “anticipate”, “intend”, “expect” and similar expressions. Forward-looking statements may involve, but are not limited to, comments with respect to our objectives and priorities for 2017 and beyond, our strategies or future actions, our targets, expectations for our financial condition and the results of, or outlook for, our operations, research and development and product and drug development. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results, events or developments to be materially different from any future results, events or developments expressed or implied by such forward-looking statements. Many such known risks, uncertainties and other factors are taken into account as part of our assumptions underlying these forward-looking statements and include, among others, the following: general economic and business conditions in the United States, Canada, Europe, and the other regions in which we operate; market demand; technological changes that could impact our existing or future products; competition; existing governmental legislation and regulations and changes in, or the failure to comply with, governmental legislation and regulations; availability of financial reimbursement coverage from governmental and third-party payers for products and related treatments; adverse results or unexpected delays in pre-clinical and clinical product development processes; adverse findings related to the safety and/or efficacy of our products or products; decisions, and the timing of decisions, made by health regulatory agencies regarding approval of our technology and products; the requirement for substantial funding to expand commercialization activities; and any other factors that may affect our performance. In addition, our business is subject to certain operating risks that may cause any results expressed or implied by the forward-looking statements in this presentation to differ materially from our actual results. These operating risks include: our ability to attract and retain qualified personnel; our ability to successfully complete pre-clinical and clinical development of our products; changes in our business strategy or development plans; intellectual property matters, including the unenforceability or loss of patent protection resulting from third-party challenges to our patents; market acceptance of our technology and products; our ability to successfully manufacture, market and sell our products; the availability of capital to finance our activities. These and other risks are described in the Form 40F and associated documents filed March 29, 2017 (see for example, “Risk Factors” in the Annual Information Form for the year ended December 31, 2016), in the Form 6-K filed May 15, 2017, and in our other filings with the Securities and Exchange Commission (“SEC”) available at [www.sec.gov](http://www.sec.gov) and the Canadian securities regulatory authorities at [www.sedar.com](http://www.sedar.com). Given these risks, uncertainties and factors, you are cautioned not to place undue reliance on such forward-looking statements and information, which are qualified in their entirety by this cautionary statement. All forward-looking statements and information made herein are based on our current expectations and we undertake no obligation to revise or update such forward-looking statements and information to reflect subsequent events or circumstances, except as required by law.
