02. APPLIED ACCOUNTING PRINCIPLES

a) Accounting Period

The financial statements of the Parent Company and its subsidiaries covers the nine months period comprise between January 1 and September 30, 2002 and 2001.

b) Bases of Preparation

These consolidated financial statements have been prepared according to the accounting principles generally accepted by the Association of Chilean Accountants. It also takes into account the regulations and directions instructed by the Superintendency of Stock and Securities. If any discrepancy appears, the regulations instructed by the Superintendency of Securities and Insurance will have supremacy over the former ones.

c) Bases of Presentation

For comparative purposes, the financial statements at September 30, 2001 are shown updated by 2.2 %. Additionally, for an appropriate comparison, some figures of such financial statements have been reclassified.

d) Bases of Consolidation

In these consolidated financial statements the assets, liabilities, profit or loss and cash flow of the Parent Company and its subsidiaries are included. Besides, the balances, the inter-company transactions and their effects over profits or loss have been eliminated and the participation of the minority shareholders has been acknowledged.

e) Price-level restatement

These financial statements are shown corrected of the inflationary effects, so the regulations about monetary correction were applied according to the generally accepted accounting principles in Chile. For this purpose, the non-monetary assets and liabilities, the equity and the profit and loss accounts are shown in corrected currency at September 30, 2002. Estimations were done using the consumer price index informed by the National Institute of Statistics, which figures were – 1,3 % and 1.5% for the years ended on September 30, 2002 and 2001, respectively. Besides, the monetary assets and liabilities that have been determined in U.F. (Indexed Unit) or foreign currency have been updated at the closing rate of exchange of each accounting period. The result of this process is included in the profits or loss of the accounting period and its breakdown is shown in note 21.

f) Foundations of Conversion

The assets and liabilities in foreign currency and readjustment units, existing at September 30, 2002 and 2001 are shown valued in national currency, according to the following rates of exchange in force at the end of each accounting period.

	2002	2001
	(Chilean pesos)	
Indexed Unit (U.F.)	16.455,03	16.094,96
US Dollar	748,73	695,02
Peso of Argentina	201,14	695,02

a) Negotiable Securities

The negotiable securities are shown at the lower value determined by the comparison between the cost corrected through price-level restatement and its stock value.

b) Inventories

Due to its high turnover, the inventories of products to be sold in the supermarkets are shown valued at their average cost of purchase. The amounts estimated in such a way do not exceed the corresponding net realizable value.

The inventories of frozen products coming from the Interagro Comercio y Ganado S.A. subsidiary are shown at their average cost of production, which do not exceed their market value at the end of each period.

c) Estimation of bad debts

With the purpose to cover potential bad debts accounts receivable, the companies have set a provision over all those balances assessed as unrecoverable. At September 30, 2002 and 2001, the provisions for the notes receivable item has been determined on the total amounts of M\$265.574 and M\$230.205, respectively.

d) Fixed Assets

The fixed asset is shown at its cost of purchase, corrected through price level restatement. The financial costs attributable to the construction of the fixed asset are part of the fixed asset value.

e) Fixed Assets Depreciation

Depreciation has been calculated by the straight-line method, considering the years of useful life estimated for the different groups of goods, according to the following:

Buildings	:	60 years
Machinery and equipment	:	from 3 to 20 years
Furniture, materials and facilities	:	10 years

f) Assets in leasing

The assets in leasing are shown under the other assets item, according to their current value, considering the specific conditions of each contract. The Company is not the legal owner of such goods therefore, whereas the purchase option is not performed, the Company cannot freely dispose of these assets.

g) Investments in Related Companies

At September 30, 2002 and 2001, the investments kept in foreign subsidiaries were valued according to the provisions indicated in the Technical Bulletin N° 64 of the Association of Chilean Accountants, regarding valuation of foreign investments, considering its valuation as a subsidiary controlled in the currency of origin. The translation difference when comparing the investment adjusted by the domestic inflation, with the participation of the investors over the equity of the subsidiary, translated to the closing rate of exchange, is shown in the equity under the Other Reserves item.

The investments done in local related companies are shown valued according to the method of the proportionate share in net worth of the investment, recognizing in the results the proportional profit or loss accrued by the issuing company.

As from year 1998, and according to the provisions indicated in the form letter N°1358 issued by the Superintendency of Stock and Securities, the lower and higher values generated by the acquisition of new investments are amortized in a term of 20 years.

h) Deferred and Income Taxes

The income tax is entered in the books based on the net income after tax and the amount taxable, determined according to the regulations set forth under the Income Tax Law.

Deferred taxes are acknowledged according to the provisions indicated in the Technical Bulletin N°60 of the Association of Chilean Accountants and to the form letter N° 1466 issued by the Superintendency of Stock and Securities.

The Parent company acknowledges assets and liabilities due to deferred taxes that consider the future appraisal of the tax effects attributable to differences between the book values of assets and liabilities and their tax values. Likewise, the Company acknowledges an asset due to deferred taxes of the future tax credit of tax losses.

The calculation of the assets and liabilities due to deferred taxes has been based on the tax rate, which according to the in force tax legislation, should be applied in the year when the assets and liabilities due to deferred taxes are going to be realized or settled. The future effects of the changes in the tax legislation or in the tax rates are acknowledged in the deferred taxes as from the date when the Law that approves such changes is published. The total amount of the assets due to deferred taxes is reduced, if it is necessary, by the total sum of any tax credit which based on the available evidence, the expectations indicate it will not be realized.

i) Trading income

The Company's income are formed by the sale of consumer goods and services, which are entered at their net value of the taxes that impose a tax on them.

j) Cash Flow Statement

The cash flow statement included herewith has been prepared according to the direct method. All those short-term investments done as part of the normal administration of the cash surplus have been considered as cash and cash equivalent.

All those transactions related to its line of business, namely, the purchase, sale, and handling of items to be dealt at supermarkets have been classified as activities of the operation.

12. HIGHER AND LOWER VALUE OF INVESTMENTS

The higher and lower values shown in this item are calculated according to the Technical Bulletin N° 42 of the Association of Chilean Accountants, essentially by applying an amortization at 20 years. At this term, the total investment is expected to be recovered.

The main accounting balances are generated as follows:

1) Lower value of Supermercados Hipermerc S.A.

On December 20, 1999, to Celimar Internacional S.A. (minority shareholder of Supermercados Hipermerc S.A.) was bought its participation in this company on the amount of US\$21.000.000.- This amount corresponds to 16,32675% of the company's equity. This operation generated a lower book value of M\$9.088.538 (historic figure)

2) Lower value of Inmobiliaria de Supermercados S.A.

On September 16th, 1996, Supermercados Unimarc S.A. subscribed and paid a capital increase in Inmobiliaria de Supermercados S.A., (ISSA) capitalizing credits against this company on the amount of M\$ 11.500.977. (historic figure), augmenting its participation at 99.999%. At the closing of ISSA's financial statement the fixed assets are included at its original value, without considering the expertise appraisal done when ISSA was set-up. Therefore, under the item lower value of the investment it had to be amortized the shares purchase of ISSA S.A. the value paid to third parties when the company was acquired. Considering in its equity the assets previously assessed, this operation generated a lower value of M\$ 7.634.664.- (historic figure).

3) Lower value of Unimarc Abastecimientos S.A.

This subsidiary was acquired in August, 1998. At that date, its firm name was Inversión Nacional S.A. that afterwards was modified to the present Unimarc Abastecimientos S.A. Currently, this company works as a warehouse of merchandise for the sale in supermarkets.

23. CONTINGENCIES AND RESTRICTIONS

(a) Direct Commitments

a.1 BBVA BHIF Bank

The balance of the obligation at September 30th, 2002 is M\$ 214.578, which creditor is BBVA Banco BHIF. The obligation claimed corresponds to the balance of the original credit amounting to 55.776. unidades de fomento (U.F.: Indexed Units) of capital at April 27th, 1991. According to the banking institution, from this amount, two shares are debited with maturity date December 29th, 2000 and 2001 on the amount of 5.577,60 unidades de fomento (Indexed Units) each one, of capital. These debts accrue a floating interest rate of TIP + reserve +2.5 points. The problem arises when Supermercados Unimarc S.A. considered this debt as finished offsetting it with the results of the Adjustment Account agreed on July 23th, 1989, originated by the sale of the ex Banco Nacional shares to the Said Group. The bank today named BBVA Banco Bhif was in charge of these obligations, which have not been fulfilled. Though the Bank is obliged to, it has not render accounts of the administration of the credits included in the Adjustment Accounts, originating the lawsuit.

The item of property mortgaged is Supermercado Manquehue Sur which is not the warranty of the collected debt. Up to date, the credit appears as unfulfilled because of the controversy between such Bank and the Inverraz Group regarding the differences between the parties about the balance of the price in the sale of the ex Banco Nacional, which steps are being followed at an arbitral court.

On the other hand, currently there are several lawsuits between BBVA Banco BHIF and the companies of the Errázuriz Group. The origin is the acquisition of the ex Banco Nacional and the rearrangement of the debts of several companies, among which is Supermercados Unimarc S.A.

The complaints regarding the financial claim by the selling companies of the ex Banco Nacional, including Supermercados Unimarc S.A. are following the proceedings before the arbitrators Messrs. Samuel Lira and Arnaldo Gorziglia Balbi. All these complaints are following their corresponding steps with the exception of six of them which award has favored the companies of the Errázuriz Group. The verdict stipulates the Bank has to additionally pay amounts higher than U.F. 50.000. On the other hand, the Bank appears claiming a summary proceeding on the amount of M\$183.336. This claim has been opposed with the payment exemptions and compensations agreed by a contract. Besides, during the month of November, 2000 such Bank did not accept the procedure of payment into court, though the proceeds of arbitral suits should be addressed to pay such obligations. In this summary proceeding was delivered an executive and attachment mandate that affected the property located in Manquehue street. This does not affect the normal operation of the supermarket. Such attachment corresponds to the direct effect of the presentation of an executive suit and this executive suit will have to be released.

10 Complaints that are following their proceedings at the Arbitral base:

Currently, there are 27 complaints - Arbitral Notebooks: each notebook carries the name of Notebook N° 1 to 27, plus a Book Notebook and other one named Main Notebook. The 27 arbitral notebooks and the main notebook have their origin in the non-payment of the Ex-Banco Nacional shares price, sale done according to the shares sale contract dated July 23rd, 1989, subscribed before the Notary Public Mr. Andrés Rubio Flores.

The Book Notebook has its origin in the publication, issue and distribution of the book “The Secrets of Fra Fra” done by the executives and Directors of the BBVA Banco Bhif Bank. The publication, issue and distribution of this book were forbidden by judicial resolution. This lawsuit pursues the indemnity for the damages of the publication.

a.5 BankBoston Bank

At the closing date of these financial statements, the credit on the amount of US\$22.506.346,09 is fully in force and the payment of its interests is updated.

On December 29th, 1998, related with this debt, the company gave as warrantee some forestry assets which owners are related companies, through common owners, Sociedad Ganadera y Forestal Nacional Ltda., Ganadera y Forestal Nacional S.A. and Forestal Regional S.A. Their partners, in each case, approved the terms of these warrantees as well as the corresponding Shareholders' Extraordinary Meetings of these companies.

Additionally, in the opinion of the top Management of the Company, the before mentioned debt should be negotiated to reasonable terms, pursuant to was originally agreed.

a.6. Kreditanstalt Fur Wiederaubau

On November 22, 2001, Supermercados Unimarc furnished a chattel mortgage in favor of KFW. The obligations guaranteed by this pledge are contracts subscribed by Supermercados Unimarc S.A. and they correspond to: 1) Credit contract named Basic Agreement number 2912, dated August 28, 1997, modified the 30/08/2000, remaining as a DM 35 million or its equivalent in US\$ line of credit and 2) Credit Contract named Loan Agreement number 2913, dated 28/08/1997. This contract was modified the 30/08/2000, remaining as a DM 10 million or its equivalent in US\$ credit line.

The detail of fixed assets items of property with pledge is:

The obligation assumed towards the Bank indicates that the Individual Loans will be used exclusively to finance the export contracts DM or US\$ denominated for the supply of equipment and services to be agreed between the borrowers and the exporters addressed in the Federal Republic of Germany. The obligation is for a maximum amount of DM 45.000.000. (fourty five million of German marks or its equivalent in dollars of the U.S.A.), which accrues a floating interest rate of LIBOR plus a spread.

As a warranty was given a part of the set of goods imported under these credits, namely cold storage and bakery equipment, illumination equipment, shelves, check-out, air-conditioning equipment and supermarket carriages.

On June 11, 2002, it was published through a written media the request of bankruptcy done by the German bank Kreditanstalt Fur Wiederaubau (KFW) for Supermercados Unimarc. Such request has been brought before the Seventh Civil Court of Santiago, under the serial number 2558-2002.

The KFW bank requested the bankruptcy for unpaid promissory notes on the amount of US\$2 million. According to the financial statements of Supermercados Unimarc at March 2002, the short and long-term debts with KFW amounts to US\$9.2 million.

The current stage of the lawsuit is the following: Supermercados Unimarc appeared in court for the hearing determined in the law 175, requesting the rejection of the bankruptcy by virtue of the fact that the Chilean court was incompetent to know about this lawsuit, considering that the parties were subjected to the German Laws, and in case of controversy should attend at the Arbitral Chamber of Paris. The rejection of the bankruptcy was also requested considering that the promissory note shown to request Supermercados Unimarc S.A. bankruptcy did not fulfill the basic requisites to be considered a document on which enforcement can be obtained. In case these motions were not accepted, the amount of a promissory note related with a contract entered into with KFW was paid into court. Though this act did not correspond, to avoid greater conflicts due to the defective and considering the emptiness of the Law of Bankruptcy in Chile, it was paid into court.

On June 14th, 2002, Supermercados Unimarc has made a cash payment for the total amount demanded, that is, Ch\$1.388.937.695. Likewise, that same date the company has filed a criminal complaint for fraud offense against all those who may be responsible for the illicit committed.

On July 15th, 2002, the court rejected the bankruptcy requested against Supermercados Unimarc taking into account that the amount of the promissory note shown by KFW had been paid into court, so according to law it was rejected. Nevertheless, the court did not pronounce regarding the incompetence and about the requisites of the promissory note shown by KFW

Following, on July 18th, 2002, such verdict was appealed in the part where it did not pronounce on the incompetence and the executory instrument, keeping the rejection to the requested bankruptcy. Finally, the court allowed the appeal on both issues. This means that the paid into court money and all the arguments appealed will be known by the Court of Appeals of Santiago, so no money nor any document accompanying the process can be withdraw.

(b) Guarantees received from third parties.
According to annex.

(c) Indirect Commitments

c.1. A warranty of personal type granted by the company in favor of Inversiones Errázuriz Ltda. to bail its obligations on an amount up to US\$ 13.688.889 with the State Street Bank and Trust Company.

REASONED ANALYSIS

1. Analysis of the Balance Sheet

1.1 Assets

At September 30th, 2002, the assets of Supermercados Unimarc S.A. amounted to M\$ 205.857.337.-, which represents a decrease of 4,51 %, and 3,8 % compared to September and December 2001 respectively.

The main assets that represent an increase during the period under analysis are:

- Machinery and Equipment: its increase by 29,83 % at September, 2002, with respect to the same period of the previous year is due to the purchase of machinery and equipment for the rehabilitation of several premises of our chain, the ones that were made in the last accounting period 2001.
- Other Fixed Assets: they increase by 8,24%, compared to September, 2002 is partly due to the purchase of machinery and equipment for the rehabilitation of several premises of our chain.
- Deferred Taxes item to short and long term to September 2002 compared to the same period of year 2001 increased because of the effect in the application of the income tax to the tax loss.
- Other Current Assets: At September, 2002, this item shows an increase compared to September, 2001, mainly because of the funds allocation on the amount of US\$2.000.000.- approx. at the name of the German Bank KFW.

The main decrease were:

- Notes receivable: this item shows a decrease of 33,81% and 35,87% when comparing September, 2002 with June and December, 2001 respectively. The reason is lower sales made with credit instruments as diner's and visa credit cards.
- The item Land shows a decrease of 21,45% and 7,13 % compared to September and December 2001 respectively. The explanation is the sale of part of the land named Cerro Colorado, and of the purchase and sale of other land which detail is in point 4.1 of these analyses.

- Term Deposits: The diminish of this item compared to September and December 2001, can be explained by the redemption due to maturity of the deposits invested at that date.
- Inventories: this item shows a diminish of 28,63% and 13,99% at September, 2002, compared to September and December 2001. The reason for this result is the betterment in the administration of the company's stocks.

1.2 Liabilities

At September 30th, 2002, the total liabilities of Supermercados Unimarc S.A. amounts to M\$ 205.857.337. This represents a decrease of 4,51% and 3.08 % compared with to September and December 2001.

The main reason is a decrease in the short and long term notes payable, due to settlements of these documents done in this period. The Accounts Payable show an augment of 14,87% compared to September, 2001, due to purchases done to rehabilitate the premises. Nevertheless, when comparing it with December, 2001, this account shows a 3,63% diminish due to a rationalized purchase of the goods due to an improved administration of stocks. The obligations with Banks and Financial Institutions show a decrease of 12,13% and 12,59% respectively, when comparing with September 2001 due to the payment of these debts.

1.3 Current Liquidity.

At September 30th, 2002, the liquidity index is 0.42 times showing a decrease of 19,23% compared to the same period of the previous year, and lower compared to December, 2001.

This can be explained by the higher decrease of the current assets than the current liabilities, when compared with these two periods.

1.4 Acid Ratio

At September 30th, 2002 this ratio was 0.26 times, whereas at the same period of 2001 was 0.29 times, and 0.33 times at December, 2001. With respect to June, this can be explained by the augment of some current assets compared to the lower diminution of the current liabilities. When comparing with December 2001, this index diminishes by the effect of the greater diminution of the current assets by 24,16% and the current liabilities by 13,81%

1.5 Indebtedness Ratio

At September 30th, 2002, this index is 0.79 times and at June, 2001 was 0.90 times. This index diminution by 12.22% was mainly due to the short and long-term notes payable diminish by 66.51% and 73.96%, respectively. Notwithstanding, the accounts payable had a slight increase due to the purchase of goods and services to rehabilitate the premises of our chain.

1.6 Short and Long Term Debt in relation with the Total Debt

In the year 2002, the short-term debt index over the total debt was 64.9 % and 59.4 % at year 2001. The increase of 9.26 % can be explained by the debts acquired in the purchase of goods and services for the premises rehabilitation.

1.7 Coverage of Financial Expenses

At September 30th, 2002, the index of consolidated coverage is less 0.02 times and 0.8 times at, June 30th, 2001. This variation corresponds to the lower operating results of the June, 2002 accounting period, notwithstanding the improvement in the non-trading income when comparing it with the same period of the previous year.

2. Analysis of the Result

During the fiscal year at September, 2002, the company had a profit of M\$ 2.213.620 showing an increase of M\$1.744.546.-, compared to the results at September , 2001 which amounted to M\$469.074.-

The reason is the best Non-Trading Income figure on the amount of M\$1.185.210.- and to the positive Income Tax by M\$3.626.154.- compared to the previous period, notwithstanding the diminution in the Operation Result of the current fiscal year.

2.1 Trading Income

At September, 2002, the trading income of Supermercados Unimarc S.A. and its subsidiaries amounted to M\$57.606.306.- which represents a drop of 17.83%, compared to the income at June, 2001, which was M\$70.107.185.- This decrease is partly due to the shutdown of the premises named Supermercados San Ignacio occurred by the end of March of the current year. It has also to be considered the strong competition inside the industry and the incorporation of new and more aggressive actors to the market.

2.2 Operating Costs

At September, 2002, the costs amounted to M\$45.367.699.- which represents an augment of 2.05% and of 2.39% as a percentage of the trading income at September and December, 2001, respectively. This shows the drop in the application of margins to face the strong competition inside the industry.

2.3 Trading Margin

At September, 2002, the trading margin was M\$18.293.376.- 25,52% lower compared to M\$24.561.365., obtained at September, 2001.

As a percentage of the income, the trading margin diminishes from 22.,91% from September, 2001 to a 20,90% at September of the current year. The reason is explained in the previous point.

2.4 Administration and Sales Expenses

At September, 2002, the administration and sales expenses amounted to M\$22.680.159.-, compared to M\$23.415.036, at September, 2001. These figures show a decrease by 3,14%. As a percentage of the trading income, the administration and sales expenses were 25.37%, at June, 2002, which is higher to the figure of June, 2001, namely, 21.85%. The increase compared to the same period of the previous year can be explained by a greater diminution of the trading income than to administration and sales expenses drop.

2.5 Operating Results

At September, 2002, the operating results reached less than M\$4.386.783.- showing a decrease compared to M\$1.641.831.-, at September ,2001. As a percentage of the income, the operational result passed from 1,07% in September, 2001 to -5,02% at September, 2002.

2.6 Non-trading Income

At September, 2002, the non-trading income was M\$2.268.939.-, while at September, 2001 showed a negative result of M\$431.109.- The improvement of this result at September, 2002 is a consequence of the positive effect of the price-level restatement.

2.7 Profit or Loss before Tax

At September, 2002, the result is negative on the amount of M\$1.374.542.-. This figure represents a diminution compared to the result of M\$507.279 appeared at the same period of the previous year. The explanation comes from negative operating results of the current period.

2.8 Profit after Tax

At September 30th 2002, this result is higher by M\$1.744.546.-, compared to September, 2001, due to the effect of the better non-trading income result and the effect of the deferred taxes in the current period.

3. Cash Flow Statement Analysis

At September 2002 and 2001, the cash closing balance was M\$1.041.586.- and M\$1.012.869.-, respectively.

	2002	2001
Flow due to activities of the operation	(5.658.070)	3.346.292
Flow due to financing activities	(3.302.224)	3.531.187
Flow due to investment activities	6.902.962	(147.876)
Inflation Effect	34.792	21.863
Opening Balance	3.064.126	997.713
 Cash and Cash Equivalent Closing Balance	 1.041.586	 1.012.869

The diminution in the activities of the operation at September, 2002, with respect to the previous year, can partly be explained by the lower collection from trade debtors.

When comparing both periods, the variation of the financing flow is mainly due to drop in the obtainment of loans.

The flow due to investment activities shows the sale of assets, as per the description in point 4.1 of these analyses.

4. Activity and Analysis of the differences between the book and economic value of the main assets.

74.43% of Fixed Assets, 2.92 % of Short-Term Related Companies Accounts Receivable and 5.32 % corresponds to Inventories form the company's total consolidated assets. For the assets collected to Related Companies, there are no doubts regarding the payment of 100% of these debts. For the goods of the Fixed Assets, there are insurance involved that cover completely the current value of these assets. Regarding the inventory, its current value does not surpass its net realization value.

4.1 Investments and Sales

During the period under analysis, investments and sales were done on some fixed assets according to the following:

Land investments done by the end of year 2001. They are:

Cisternas land, located in the La Cisterna district
Portugal land located in the district of Santiago

Santa Rosa land located in the district of La Granja

It can also be underlined the construction and infrastructure works investments for the purchase of buildings for the exploitation of supermarkets, occurred by the end of year 2001. These are:

Building named Cisterna located in the district of La Cisterna

Building named Portugal located in the district of Santiago

Building named Santa Rosa located in the district of La Granja

The Machinery and Equipment item was increased due to purchases done for the rehabilitation of premises. This investment considers cold storage equipment, air conditioning equipment, bakery machines and equipment.

In the item Other Assets are shown investments on furniture and fittings as supermarket forklift, checkout, furniture for sales room, self-service carriage.

Investments were also done on forklifts and piling machinery.

The main sales of the period are:

Land named Cerro Colorado located in the district of Las Condes.

The 6th floor of the building located in Amunátegui N°178, street, in the district of Santiago.

Land and building named Supermercados Villa Olímpica, located in the district of Ñuñoa.

Land and building named Supermercados José María Caro, located in the district of Lo Espejo.

Land and building named Supermercados Gran Avenida located in the district of San Miguel

Land and building named Supermercados Portugal, located in the district of Santiago.

Land and building named Supermercados Santa Rosa located in the district of La Granja

Real estate named San Ignacio in the district of Santiago.

4.2 Inventories turn-over

At September 30th, 2002 the inventories turnover is 5,26 times and 5,43 times at the same period of year 2001. The drop by 3,15% corresponds to a sales drop occurred during the period under analysis.

4.3 Turnover

At September 30th of the current year, the permanence of inventory is 51,37 days. At the same period of the previous year is 49,69 days, notwithstanding the better administration of the inventories, the permanence of this increased by 4.20% is partly due to a decrease of the inventory turnover.

5. Profitability Analysis

5.1 Profitability of the Equity

At September 30th, 2002, this profitability is 2.0%, whereas for the same period of the previous year is 0.5 %, which represents an increase due to the improved results of the current fiscal year.

5.2 Profitability of the Assets

In the current fiscal year, the profitability of the assets represents a 1.1 %, while for the same period of the previous year was 0.3 %. This augment is due to the improved result at September 30th, 2002 and the total assets diminution.

5.3 Performance of the Operating Assets

At September, 2002 the performance of these assets is less 20,7% that represents a decrease compared to the period at June, 2001 that was 4,2%. The reason for this decrease is the lower operational result that was affected by a drop in the income level, notwithstanding the average asset also decreased. The assets accounts considered in this analysis are: trade debtors, notes receivable, sundry debtors, inventories, recoverable taxes and prepaid expenses.

5.4 Earnings per share

At September, 2002, the profit or loss per share was \$1.78 per share, whereas for the same period of the year 2001 was 0.47 per share. The explanation comes from the best results of the current business year compared to the results of the previous year.

5.5 Dividends Return

At September 30th, 2002 this index is 7.766,8 times, which represents an increase of 33.1% with respect to 1.278,0 times figure at September, 2001. At the closing date of each period the value per share is \$14 and \$25, respectively,

6. Markets where the company participates and the competition it faces.

The most important variations during this business period is the slow recovery of the consumption demand during year 2001, which has continued during the first semester of this year, notwithstanding the measures taken by the central authorities, in order to give dynamism to the economy. It has also to be mentioned our competition which has strengthen thanks to the great financial support that back them.

When analyzing the sales statistics issued by the INE, and comparing the sales of September, 2002 with May, 2002, the sales of the supermarkets industry showed a positive nominal variation of 1,6% and actual of 0.5%. When comparing the periods January-September, 2002 and January-September, 2001, the sales index showed a real positive variation of 0,5%.

At September, 2002, sales consider 645 premises with three and more cash registers, along the country. This must be compared to 642 premises that operated during September, 2001. If we add the 33 supermarkets that closed during the period, it can be concluded that 36 new supermarkets have opened during the last 12 months.

The new premises that began to operate during the last year meant a 8.2% of the total sales, at September, 2002.

7. Risk analysis of the market for the company

From the Rate of Exchange perspective, the augment suffered by the US\$ in our country has generated a diminution of the acquisition power of the consumers. Likewise, the products we import are more expensive, which also negatively affects the demand of our products.

Due to the above reason, Supermercados Unimarc is strengthening its own brands, in order to give all its customers high quality products at a lower price. This backward integration allows the company to lower the risk in the profit or loss of the accounting period, by developing products of low costs, highly profitable, which are substitutes of high turnover that increase our sales volume.

The rates of interest have continued falling during the period. To this fact it can be added the new lowering determined by the Central Bank that set a 3% rate. The intention is to make further flexible and encourage more the reactivation of the economy, which benefits our development of the business and pursues to increase the consumption level.

The low inflation during year 2002, due to the contraction of the economy, has not affected the prices of the products.
