NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2020

1. Organization

RNR Securities, LLC (the "Company") was organized in New York on March 27, 1997. The Company is registered as a broker-dealer with the Securities and Exchange Commission ("SEC") and is a member of the Financial Regulatory Authority ("FINRA"). The Company is scheduled to dissolve on March 1, 2026. The Company operates pursuant to SEC Rule 15c3-3(k)(2)(i), limiting business to the distribution of mutual funds and/or variable life insurance and annuities, and effective January 2011, the Company began distribution of REITS. The Company operates as a limited liability company and the liability of the member of the Company is limited to the members' total capital contribution. The ownership of the Company is comprised of two members. One member has a 99% interest in the Company and the second minority member has a 1% interest in the Company.

The Company operates primarily as an introducing broker and engages in the business of providing brokerage services for customers limited to the distribution of mutual funds and variable life insurance and annuities. As a matter of normal business practice, the Company does not assume positions in securities.

2. Summary of Significant Accounting Policies

Basis of Accounting

The Company has prepared its financial statements on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates. Estimates are used when accounting for amortization, depreciation and contingencies.

Cash and Cash Equivalents

Cash and cash equivalents consist of highly liquid debt investments with maturity of three months or less when purchased. The Company places its temporary cash investments with investment quality financial institutions. At times, such investments may be in excess of federal insurance limits. The Company has not experienced any losses in these accounts.

Revenue Recognition

Commissions

The Company accounts for revenue under the provisions of ASU 2014-09, "Revenue from Contracts with Customers".

RNR SECURITIES, LLC
NOTES TO FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies - (Continued)

Commissions. The Company receives commissions for the sale of mutual funds, insurance policies, and other financial products to customers. The Company records commission revenue for sales of insurance policies on the effective date of the policy and after all contingencies have been resolved during the lookback period. Revenue from the sale of other financial products is recorded on the trade date. The Company believes the performance obligation is satisfied on the trade date, because that is the date that the underlying purchaser is identified, the pricing has been agreed upon, and the risks and rewards of ownership have been transferred.

Distribution fees. The Company enters into arrangements with managed accounts or other pooled investments vehicles (funds) to distribute shares to investors. Distribution fees consists of trail commissions and 12b-1 fees on certain mutual funds sold to customers for a specified period of time that the customer remains in the fund. The Company records trail commission revenue as trail commissions are remitted to the Company from the mutual funds. The Company may receive distribution fees paid by the fund up front, over time, upon the investor's exit from the fund (that is, a contingent deferred sales charge), or as a combination thereof. The Company believes that its performance obligation is the sale of securities to investors and as such this is fulfilled on the trade date. Any fixed amounts are recognized on the trade date and variable amounts are recognized on the extent it is probable that a significant revenue reversal will not occur once the uncertainty is resolved. For variable amounts, as the uncertainty is dependent on the value of the shares at future points in time as well as the length of time the investor remains in the fund, both of which are highly susceptible to factors outside the Company's influence, the Company does not believe that it can overcome this constraint until the market value of the fund and the investor activities are known, which are usually monthly or quarterly. Distribution fees recognized in the current period are primarily related to performance obligations that have been satisfied in prior periods.

Commissions Receivable

The Company carries its commissions receivable at cost, less an allowance for doubtful accounts. On a periodic basis, the Company evaluates its commissions receivable and establishes an allowance for doubtful accounts, based on a history of past write-offs and collections and current credit conditions. At December 31, 2020, no allowance for doubtful accounts was deemed necessary.

Investment Valuation

The Company's investments in securities are stated at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 for discussion of Fair Value Measurements.

Property and Equipment

Property and equipment is stated at cost. The costs of additions and betterments are capitalized and expenditures for repairs and maintenance are expensed in the period incurred.

RNR SECURITIES, LLC
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2020

2. Summary of Significant Accounting Policies - (Continued)

When items of property and equipment are sold or retired, the related costs and accumulated depreciation are removed from the accounts and any gain or loss is included in income.

Depreciation and amortization of property and equipment is provided utilizing both the straight-line and accelerated methods over the estimated useful lives of the respective assets as follows:

Automobiles	5 years
Computer equipment	5 years
Furniture and fixtures	7 years
Leasehold improvements	20 years or the life of the lease

Leases under ASC 842

In February 2016, the Financial Accounting Standards Board (FASB) established Topic 842, Leases, by issuing Accounting Standards Update (ASU) No. 2016-02, which requires lessees to recognize leases on the statement of financial condition and disclose key information about leasing arrangements. Topic 842 was subsequently amended by ASU No. 2018-01, Land Easement Practical Expedient for Transition to Topic 842; ASU No. 2018-10, Codification Improvements to Topic 842, Leases; and ASU No. 2018-11, Targeted Improvements. The new standard establishes a right-of-use model (ROU) that requires a lessee to recognize a ROU asset and lease liability on the statement of financial condition for all leases with a term longer than 12 months.

The new standard was effective on January 1, 2019 and the Company adopted the new standard on its effective date. A modified retrospective transition approach is required, applying the new standard to all leases existing at the date of initial application. Refer to Note 3 for additional information.

Income Tax

Provisions for federal and state income taxes have not been provided for because the Limited Liability Company ("LLC") is classified as a partnership for income tax purposes and will not be subject to income tax. As such the LLC's income or loss and credits are passed through to the member and are reported on the member's income tax returns.

At December 31, 2020, management has determined that the Company had no uncertain tax positions that would require financial statement recognition. The determination will always be subject to ongoing reevaluation as facts and circumstances may require. The Company's tax preparers reviewed the Company's tax position and the results from the operations and as a result of this review, the Company has determined there were no uncertain tax positions.

The Company files income tax returns in the U.S. federal jurisdiction and New York State. The Company is no longer subject to U.S. federal, state and local examinations by tax authorities for the years before 2017.

RNR SECURITIES, LLC
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2020

2. Summary of Significant Accounting Policies - (Continued)

Subsequent Events

In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through March 29, 2021, the date the financial statements were available to be issued. There were no significant subsequent events or transactions which required recognition or disclosure in the financial statements.

3. Leases

The Company is a lessee in several noncancelable operating leases for office space and one finance lease for an automobile. The Company determines if an arrangement is a lease, or contains a lease, at inception of a contract and when the terms of an existing contract are changed. The Company recognizes a lease liability and a right of use (ROU) asset at the commencement date of the lease. The lease liability is initially and subsequently recognized based on the present value of its future lease payments. The discount rate is an implicit rate that is stated in the terms of the lease agreements or otherwise the Company uses the 12-month LIBOR rate in effect at the commencement of the lease. The ROU asset is subsequently measured throughout the lease term at the amount of the remeasured lease liability (i.e., present value of the remaining lease payments), plus (minus) any prepaid (accrued) lease payments, less the unamortized balance of lease incentives received. Lease cost for lease payment is recognized on a straight-line basis over the lease term.

The Company has elected, for all underlying classes of assets, to not recognize ROU assets and lease liabilities for short-term leases that have a lease term of 12 months or less at lease commencement, and do not include an option to purchase the underlying asset that the Company is reasonably certain to exercise. We recognize lease cost associated with our short-term leases on a straight-line basis over the lease term.

The Company has obligations as a lessee for office space with initial noncancelable terms in excess of one year.

The Company classified these leases as operating leases. The Company's leases do not include termination options for either party to the lease or restrictive financial or other covenants. Payment due under the lease contracts include fixed payments.

The operating lease cost for the year ended December 31, 2020 was \$70,826.

5. Fair value measurements

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC 820") establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under FASB ASC 820 are described below:

RNR SECURITIES, LLC
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2020

5. Fair value measurements – (Continued)

Level 1 Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3 Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Following is a description of the valuation methodologies used for assets measured at fair value. There have been no changes in the methodologies used at December 31, 2020.

Mutual funds: Valued at the daily closing price as reported by the fund. Mutual funds held by the Company are open-end mutual funds that are registered with the Securities and Exchange Commission. These funds are required to publish their daily NAV and to transact at that price. The mutual funds held by the Company are deemed to be actively traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflect future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

RNR SECURITIES, LLC
NOTES TO FINANCIAL STATEMENTS
DECEMBER 31, 2020

5. Fair value measurements – (Continued)

The following table sets forth by level, within the fair value hierarchy, the Company's assets at fair value as of December 31, 2020:

<u>Assets at Fair Value as of December 31, 2020</u>				
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Mutual funds	\$ 136,914	\$ -	\$ -	\$ 136,914
Total assets at fair value	\$ 136,914	\$ -	\$ -	\$ 136,914

6. Property and Equipment

10. Concentration of Credit Risk

In the normal course of business, the Company enters into financial transactions where the risk of potential loss due to changes in market or failures of the other party to the transaction to perform exceeds the amounts recorded for the transactions.

The Company's policy is to continuously monitor its exposure to market and counter-party risk through the use of a variety of financial position and credit exposure reporting and control procedures. In addition, the Company has a policy of reviewing the customer and/or other counter-party with which it conducts its business. As of December 31, 2020, there were no significant customer accounts having unsecured debit balances that presented any risk.

11. Current Vulnerability – Impact of COVID-19

In response to the COVID-19 pandemic, governments and organizations have taken preventative or protective actions, such as temporary closures of non-essential businesses and "shelter-at-home" guidelines for individuals. As a result, the global economy has been negatively affected. Based on our ratio analysis that we performed and current trends of the company, we have considered whether there was substantial doubt about our ability to continue as a going concern for a reasonable period of time. We noted that consistent with prior years we have continued to be very profitable. Our total revenue decreased minimally from \$3,122,689 as of December 31, 2019 to \$3,007,342 as of December 31, 2020.
