

## Vanguard Reports Second Quarter Results

NASHVILLE, Tenn. – February 9, 2005 -- Vanguard Health Systems, Inc. (the “Company” or “Vanguard”) today announced results for the second quarter ended December 31, 2004.

As previously announced, on December 31, 2004, certain subsidiaries of the Company acquired three acute care hospitals with a total of 768 beds and related healthcare businesses located in or around the cities of Worcester, Framingham and Natick in Massachusetts from subsidiaries of Tenet Healthcare Corporation. The Company’s subsidiaries paid approximately \$87.4 million at closing to purchase the property, plant and equipment and certain other assets and assumed certain liabilities of the hospitals and related healthcare businesses including transaction closing costs. The Company’s subsidiaries funded the purchase price by borrowing \$60.0 million of the \$150.0 million acquisition delayed draw term facility under the Company’s new senior secured credit facilities and by utilizing \$27.4 million of cash on hand. The new secured credit facilities were entered into during September 2004 in connection with the purchase of a majority of the equity interests in the Company by affiliates of the Blackstone Group. The Company expects to invest an additional \$39.5 million during its third fiscal quarter to build from operations net working capital for the purchased facilities. The Company anticipates borrowing the additional \$90.0 million available under the acquisition delayed draw term facility on or prior to February 20, 2005 in order to fund the working capital buildup and for capital expenditures and other corporate needs.

Total revenues for the quarter ended December 31, 2004 were \$499.8 million, an increase of \$57.8 million or 13.1% from the prior year quarter. Patient service revenues and health plan premium revenues increased \$52.1 million and \$5.7 million, respectively, from the prior year quarter.

For the quarter ended December 31, 2004, the Company reported income before income taxes of \$7.1 million compared to income before income taxes of \$16.1 million during the prior year quarter. The decrease was primarily attributable to the additional interest costs associated with the incremental debt incurred to finance the Blackstone transaction in September 2004. Net income was \$4.6 million for the quarter ended December 31, 2004 compared to \$9.8 million for the prior year quarter.

Adjusted EBITDA was \$54.2 million for the quarter ended December 31, 2004, an increase of \$14.1 million or 35.2% from the prior year quarter. A reconciliation of Adjusted EBITDA to net income as determined in accordance with generally accepted accounting principles for the quarters ended December 31, 2003 and 2004 is included in the attached supplemental financial information.

The consolidated operating results for the quarter ended December 31, 2004 reflect a 4.5% increase in discharges and a 6.7% increase in hospital adjusted discharges compared to the prior year quarter. These volume improvements are primarily a result of the Company’s service expansion strategies and physician initiatives.

Total revenues for the six months ended December 31, 2004 were \$993.5 million, an increase of \$141.6 million or 16.6% from the prior year period. Patient service revenues and health plan premium revenues increased \$115.4 million and \$26.2 million, respectively, from the prior year period.

For the six months ended December 31, 2004, the Company reported a loss before income taxes of \$153.9 million compared to income before income taxes of \$26.6 million during the prior year period. The current year loss before income taxes resulted from costs directly attributable to the Blackstone transaction including stock compensation of \$96.7 million, debt extinguishment costs of \$62.2 million and merger expenses of \$23.1 million. The net loss for the six months ended December 31, 2004 was \$105.5 million compared to net income of \$16.1 million during the prior year period. The Company's current year net loss resulted from the after tax effect of the Blackstone-related costs.

Adjusted EBITDA was \$106.2 million for the six months ended December 31, 2004, an increase of \$31.8 million or 42.7% from the prior year period. A reconciliation of Adjusted EBITDA to net income (loss) as determined in accordance with generally accepted accounting principles for the six-month periods ended December 31, 2003 and 2004 is included in the attached supplemental financial information.

The consolidated operating results for the six months ended December 31, 2004 reflect a 5.4% increase in discharges and an 8.1% increase in hospital adjusted discharges compared to the prior year period. These volume improvements are primarily a result of the Company's service expansion strategies and physician initiatives as well as continued volume growth at West Valley Hospital, which opened during September 2003, and at a Phoenix hospital that reopened its emergency department during July 2003.

Cash flows from operating activities were \$94.3 million for the six months ended December 31, 2004, an increase of \$43.9 million from the prior year period. The significant increase was primarily due to improved operational performance during the current year period. Cash used in investing activities increased to \$210.0 million during the six months ended December 31, 2004 from \$76.7 million during the prior year period as a result of \$50.8 million paid for Blackstone-related acquisition costs and \$87.4 million paid to acquire the Massachusetts hospitals. Cash flows from financing activities were significantly affected by the equity and debt transactions associated with the Blackstone transaction.

"We are extremely pleased with our second quarter operating and financial results and expect to build on this success during the remainder of our fiscal year," commented Charles N. Martin, Jr., Chairman and Chief Executive Officer. "We look forward to working with the employees, healthcare professionals and community leaders at our new Massachusetts hospitals to provide quality healthcare services to these communities. Significant expansion projects underway in San Antonio and Phoenix are progressing as planned, and we continue to focus on service expansion and quality of care initiatives in our markets."

At December 31, 2004, Vanguard Health Systems, Inc. owned and operated 19 acute care hospitals and complementary facilities and services in Chicago, Illinois; Phoenix, Arizona; Orange County, California; San Antonio, Texas and Massachusetts. The Company's strategy is to develop locally branded, comprehensive healthcare delivery networks in urban markets. Vanguard will pursue acquisitions where there are opportunities to partner with leading delivery systems in new urban markets. Upon acquiring a facility or network of facilities, Vanguard implements strategic and operational improvement initiatives including expanding services, strengthening relationships with physicians and managed care

organizations, recruiting new physicians and upgrading information systems and other capital equipment. These strategies improve quality and network coverage in a cost effective and accessible manner for the communities we serve.

- (a) Adjusted EBITDA is defined as income before interest expense (net of interest income), income taxes, depreciation and amortization, minority interests, gain or loss on the sale of assets, equity method income or loss, stock compensation, debt extinguishment costs, merger expenses and monitoring fees. Merger expenses include legal and advisory fees and management transaction bonuses incurred in connection with the purchase of a majority of the equity interests in the Company by affiliates of The Blackstone Group (“Blackstone”) on September 23, 2004. Monitoring fees represent fees paid to Blackstone and Metalmark Subadvisor LLC for advisory and oversight services. Adjusted EBITDA is not intended as a substitute for net income, operating cash flows or other cash flow statement data determined in accordance with accounting principles generally accepted in the United States. Due to varying methods of calculation, Adjusted EBITDA as presented may not be comparable to similarly titled measures of other companies.
