**DATAMIRROR QUARTERLY REPORT
FIRST QUARTER ENDED APRIL 30, 2003**

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(For the three months ended April 30, 2003)

FORWARD-LOOKING STATEMENTS

Forward-looking statements in this management discussion and analysis, including statements regarding the Company's business which are not historical facts, are made pursuant to the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements of estimates, expectations, objectives and plans (financial and otherwise). The words "anticipate", "believe", "estimate", "expect" and similar expressions are intended to identify forward-looking statements. Numerous factors affect DataMirror's operating results and could cause DataMirror's actual results to differ materially from the results indicated by this management's discussion and analysis of financial condition and results of operations or by any forward-looking statements made by, or on behalf of, DataMirror, and there can be no assurance that future results will meet expectations, estimates or projections. These factors include, but are not limited to, the following: variability of quarterly operating results; dependence upon the continued growth and success of DataMirror's software products; competition; the ability to develop, market, support and acquire new products in an environment of rapidly changing technology; dependence upon continued growth in the database and enterprise data integration markets; dependence upon relationships with complementary vendors and distribution channels; the ability to recruit and retain key personnel; risks of international operations, currency exchange rate fluctuations and global economic conditions; possible software errors or defects; possible infringement claims by third parties; and other factors discussed in the Company's Annual Information Form and other periodic filings with the United States Securities and Exchange Commission and other regulatory authorities.

The following information should be read in conjunction with the unaudited Consolidated Financial Statements of DataMirror Corporation (together with its subsidiaries referred to as "DataMirror" or the "Company") for the three months ended April 30, 2003, as well as the Company's audited Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations for the fiscal year ended January 31, 2003, contained in the Company's 2003 Annual Report to Shareholders. All amounts are stated in Canadian dollars unless otherwise noted.

OVERVIEW

DataMirror designs, develops and markets software solutions that enable over 1,700 companies in 61 countries to integrate, protect, capture and audit their data.

The Company's comprehensive LiveBusiness solution family *unlocks the experience of now* by providing the instant data access, integration and resiliency companies demand today across all the computers in their business. Companies across all sectors, from manufacturing, retail, financial services and health care to government and military have invested in DataMirror solutions to help them work faster and smarter. The Company's LiveBusiness solutions enable customers to capture and integrate their data in real-time, make that data available and resilient 24 hours a day and keep the data secure by allowing them to identify and audit the changes to their databases.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The Company's Consolidated Financial Statements are prepared in accordance with Canadian generally accepted accounting principles which are in all material respects in accordance with accounting principles generally accepted in the United States, except as disclosed in note 20 of the audited Consolidated Financial Statements for the year ended January 31, 2003. The preparation of the Company's financial statements is based on the selection and application of significant accounting policies, some of which require management to make significant estimates and judgements that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to revenue, bad debts, investments, intangible assets, goodwill and income taxes. The Company bases its estimates on historical experience and on various other assumptions that are believed at the time to be reasonable under the circumstances. Under different assumptions or conditions, the actual results will differ, potentially materially, from those previously estimated. Many of the conditions impacting these assumptions and estimates are outside of the Company's control.

The Company believes that the following are the critical judgement areas in the application of its accounting policies that currently affect the Company's financial condition and results of operations.

Revenue Recognition. The Company's revenues are generated from the sale of software licences, software maintenance and support fees and services.

Revenue is recognized in accordance with Statement of Position ["SOP"] 97-2, "Software Revenue Recognition" issued by the American Institute of Certified Public Accountants ["AICPA"] in October 1997 and amended by SOP 98-4, "Deferral of the Effective Date of a Provision of SOP 97-2", issued in March 1998. Software licence revenue is recognized when persuasive evidence of an arrangement exists, the related products are shipped, there are no significant uncertainties surrounding product acceptance, the fees are fixed and determinable and collection is considered probable. Revenue from software maintenance and support agreements is recognized on a straight-line basis over the term of the related agreements. Revenue from services is comprised of consulting, training and installation fees and is recognized at the time the services are performed.

Allowance for Doubtful Accounts. The Company maintains an allowance for doubtful accounts for the estimated losses resulting from the inability of its customers to make required payments. The Company performs ongoing credit evaluations of its customers' financial condition and if the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances would likely be required. Actual collections could materially differ from our estimates.

Investments. From time to time the Company may hold minority interests in companies having operations or technology in areas within its strategic focus, some of which are publicly traded and have highly volatile share prices. The Company records an investment impairment charge when a decline in the value of an investment occurs which is considered to be other than a temporary impairment. Future adverse changes in market conditions or poor operating results of the companies in which the Company has invested could result in losses or an inability to recover the carrying value of the investments and may possibly require an impairment charge in the future.

Intangible Assets. The Company has intangible assets related to acquired technology. The determination of the related estimated useful lives and whether or not these assets are impaired involves significant judgements. In assessing the recoverability of these intangible assets, the Company must make assumptions regarding estimated future cash flows, market conditions and other factors to determine the fair value of the asset. If these estimates or their related assumptions change in the future, the Company may be required to record impairment charges for these assets not previously recorded. In Q1 fiscal 2004, the Company did not record an impairment charge related to intangible assets.

Goodwill. The Company has goodwill assets arising from business acquisitions which are comprised of the excess of amounts paid over the fair value of net identifiable assets acquired. The Company performs an annual assessment of the fair value of the businesses to which this goodwill relates. In assessing the fair value of these businesses, the Company must make assumptions regarding estimated future cash flows, market conditions and other factors to determine the fair value of the business. If these estimates or their related assumptions change in the future, the Company may be required to record impairment charges for these assets not previously recorded. In Q1 fiscal 2004, the Company did not record an impairment charge related to goodwill.

Future Income Taxes. The Company has future tax assets, which are subject to periodic recoverability assessments. Realization of the Company's future tax assets is principally dependant upon its achievement of projected future taxable income. The Company's judgements regarding future profitability may change due to future market and other factors. These changes, if any, may require possible material adjustments to these future tax asset balances by recording a valuation allowance to reduce the future tax asset to the amount that is more likely to be realized. While the Company has considered future taxable income and ongoing tax planning strategies in assessing the need for valuation allowances, in the event the Company were to determine that it would be able to realize future tax assets in excess of the recorded amount, an adjustment to the future tax assets would increase income in the period such a determination were made. Likewise, in the event the Company were to determine that it would not be able to realize all or part of its net future tax assets, an adjustment to the future tax assets would be charged to income in the period such a determination were made.

RESULTS OF OPERATIONS

Revenue for the quarter ended April 30, 2003 ("Q1 fiscal 2004") was \$13,320,000, as compared to \$14,142,000 for the quarter ended April 30, 2002 ("Q1 fiscal 2003"), a decrease of 5.8%. The GAAP net income for Q1 fiscal 2004 was \$663,000 or \$0.06 per basic and fully-diluted share compared to a net loss of \$947,000 or (\$0.08) per share for Q1 fiscal 2003. Cash flow from operations for Q1 fiscal 2004 was \$4,244,000 or \$0.37 per share compared to \$3,832,000 or \$0.34 per share in Q1 fiscal 2003. Cash, cash equivalents and short-term investments stood at \$42,272,000 or \$3.70 per common share outstanding at the end of the quarter, up from \$38,827,000 or \$3.39 per common share outstanding at January 31, 2003.

Revenue from licence sales accounted for 41.1% of total revenue in Q1 fiscal 2004 with a gross margin of 99.1%, as compared to 50.2% of total revenue and gross margin of 99.2% in Q1 fiscal 2003. Gross margin on maintenance and services was 65.4% in Q1 fiscal 2004, as compared to 55.7% in Q1 fiscal 2003. Overall gross margin for Q1 fiscal 2004 increased to 79.3% from 77.5% for Q1 fiscal 2003. Operating expenses for Q1 fiscal 2004 were \$9,768,000 compared to \$11,020,000 for Q1 fiscal 2003, a decrease of 11.4%. Total costs, including costs of revenue, were \$12,531,000 for Q1 fiscal 2004, down significantly from \$14,196,000 in Q1 fiscal 2003 and \$13,170,000 in the previous quarter. Total headcount was 262 at April 30, 2003 as compared to 311 at April 30, 2002 and down from 276 at the end of the fourth quarter of fiscal 2003.

REVENUE

Licence. Licence revenue in Q1 fiscal 2004 was \$5,478,000 compared to \$7,104,000 in Q1 fiscal 2003, a decrease of 22.9%. The decrease in licence revenue was largely attributable to several factors including the strengthening of the Canadian currency, the impact of Severe Acute Respiratory Syndrome ("SARS") on the Canadian and Asia Pacific operations and the effects of global political events on the North American, European and Middle East markets.

Maintenance. Maintenance revenue in Q1 fiscal 2004 was \$6,575,000 compared to \$5,562,000 in Q1 fiscal 2003, an increase of 18.2%. This increase was a result of maintenance revenue generated by additional licence sales since the end of Q1 fiscal 2003 and the renewal of maintenance and support contracts for licence sales completed in prior periods. Due to its recurring nature, maintenance revenue was not impacted by the factors which affected licence revenue.

Services. Services revenue in Q1 fiscal 2004 was \$1,267,000 compared to \$1,476,000 in Q1 fiscal 2003, a decrease of 14.2%. This decrease was due largely to the same factors which affected licence revenue.

COST OF REVENUE

Licence. Cost of licence revenue consists primarily of duplication, media, packaging and shipping expenses. For Q1 fiscal 2004, costs of licence revenue were \$51,000 (0.9% of licence revenue) relatively unchanged from \$57,000 (0.8% of licence revenue) for Q1 fiscal 2003.

Maintenance and Services. Costs of maintenance and service revenue consist primarily of the salary and related costs of providing those services. For Q1 fiscal 2004, costs of maintenance and service revenue were \$2,712,000 (34.6% of maintenance and service revenue) compared to \$3,119,000 (44.3% of maintenance and service revenue) for Q1 fiscal 2003. The gross margin on maintenance and service revenue improved dramatically, as the Company realized economies of scale in the cost of providing support to its growing customer base.

OPERATING EXPENSES

Selling and Marketing. Selling and marketing expenses include expenses for sales commissions, salaries, advertising, tradeshow, promotional materials and other selling and marketing related expenses. For Q1 fiscal 2004, these expenses totalled \$4,706,000 (35.3% of revenue) down significantly from \$5,447,000 (38.5% of revenue) for Q1 fiscal 2003. The decrease is due primarily to reduced travel and trade show related expenditures and a reduction of headcount in this area, as well as a decrease caused by the impact of the stronger Canadian currency on the Company's US and European expenses. Management expects selling and marketing expenses to increase as the Company expands its sales and marketing activities.

Research and Development. Research and development expenses include only salaries and other direct costs associated with the development of new products and are net of related investment tax credits. Research and development expenses were \$2,488,000 (18.7% of revenue) for Q1 fiscal 2004 down slightly from \$2,619,000 (18.5% of revenue) for Q1 fiscal 2003 due mainly to a reduction in headcount in research and development.

General and Administration. General and administration expenses consist primarily of administrative salaries, rent, recruiting costs and professional fees. For Q1 fiscal 2004, general and administration expenses were \$1,806,000 (13.6% of revenue) compared to \$2,269,000 (16.0% of revenue) for Q1 fiscal 2003, a decrease of 20.4%. The Company initiated a series of cost saving measures during fiscal 2003 with the goal of increasing operating profitability which, combined with a reduction in overhead expenses as a result of the headcount reductions and the impact of the stronger Canadian currency on the Company's US and European expenses, resulted in this reduction.

Amortization of Intangibles. For Q1 fiscal 2004, amortization of intangibles was \$768,000 compared to \$685,000 for Q1 fiscal 2003. The increase of \$83,000 is due to additional amortization of technology acquired subsequent to Q1 fiscal 2003.

INVESTMENT INCOME, NET

Investment income, net includes interest on short-term investments and other investment income net of interest expense on long-term liabilities and lease obligations. In Q1 fiscal 2004, net investment income was \$257,000 compared to \$141,000 in Q1 fiscal 2003. This increase is primarily due to an increase in invested cash balances resulting from positive cash flow from operations of over \$16.3 million since the end of Q1 fiscal 2003.

The Company invests its cash in a variety of short-term Canadian dollar denominated financial instruments, including government bonds, commercial paper and bankers acceptances. The portfolio is diversified and consists primarily of investment grade securities to minimize credit risk. Cash balances in foreign operations are generally invested in term deposits in the local operating banks. The investment in short-term financial instruments carries a degree of interest rate risk, and consequently our future investment income may fall short of expectations due to changes in short-term interest rates

LOSSES FROM INVESTMENT IN POINTBASE

The equity loss from the Company's investment in PointBase was nil in Q1 fiscal 2004 compared to \$899,000 in Q1 fiscal 2003. The decrease was due to the investment in PointBase having been written off at October 31, 2002. No further equity losses will be recorded. Should the Company be successful in selling its ownership position in PointBase, a one-time gain on sale will be recognized at that time.

INCOME TAX EXPENSE

During Q1 fiscal 2004, the Company recorded an income tax provision of \$383,000 as compared to a provision of \$135,000 in Q1 fiscal 2003.

The combined basic Canadian federal and provincial tax rate used in determining the income tax provision for Q1 fiscal 2004 was 36.6% [Q1 fiscal 2003 – 38.6%]. The decrease in the combined rate is due to the announced reduction in the federal and provincial tax rates coming into effect during the year.

The income tax provision is different than expected due to a combination of factors including: the equity loss and write-off of PointBase being non-deductible for tax purposes, other non-deductible expenses, the inability to benefit from certain foreign tax losses incurred during the quarter, the effect of foreign tax rates, the effect of the rate changes on future taxes and the manufacturing and processing tax deduction.

ACQUISITIONS AND INVESTMENTS

On March 18, 2002, the Company announced its intention to make a take-over bid for all of the shares of Idion Technology Holdings Limited ("Idion"), a South African company listed on the JSE Securities Exchange ("JSE") under the symbol IDI, in a cash bid valued at \$9.8 million. On April 18, 2002, the bid was increased to \$18.9 million, and subsequently, on May 8, 2002, the bid was further increased to \$30.4 million. On July 4, 2002 the Company closed its bid to acquire Idion, having not been successful in completing the take-over. At April 30, 2003, the Company owned approximately 44,687,000 or 39.5% of Idion's outstanding common shares acquired at a cost of \$9,861,000. The ownership of 1,119,000 shares of Idion (the "Disputed Shares") was subject to a dispute between the Company and a broker acting on behalf of persons related to the CEO of Idion. The broker alleges that it did not accept the Company's offer in respect of the Disputed Shares and has instituted legal proceedings against the Company and certain other parties to prevent the settlement of the sale of the Disputed Shares to the Company. Subsequent to April 30, 2003 this dispute was settled in favour of the plaintiff and as a result the Company will return the Disputed Shares to the broker for the original consideration of approximately \$360,000.

Should the Company decide to liquidate its investment in Idion, the sale of these shares could result in a gain or loss depending on the circumstances in which they are sold and subject to foreign exchange and other risks associated with investments in JSE listed companies. Under South African securities regulations, the Company may acquire an additional 5% of Idion's common shares over the one-year period starting July 5, 2002, and subsequent to that one-year period, may launch a new take-over bid. If the Company is ultimately successful in completing the transaction, there are factors which may impact the acquisition. These factors include, but are not limited to, the following: risks involved in the completion and integration of the acquisition, expected cost savings from the acquisition may not be fully realized or realized within the expected timeframe, revenue of the combined company may be lower than expected, the possibility of technical, logistical or planning issues in connection with deployments, costs or difficulties related to obtaining regulatory approvals for completing the acquisition, costs or difficulties related to integration of the companies following the acquisition may be greater than expected and legislative or regulatory changes may adversely affect the businesses in which the companies are engaged.

The investment in Idion is accounted for using the cost method, as the Company does not have significant influence over the affairs of Idion and cannot obtain adequate financial information from Idion to enable the Company to account for its investment in Idion using the equity method. On April 30, 2003, shares of Idion were trading at approximately Cdn. \$0.45 per share, which would indicate a market value of \$20,238,000 for the Company's investment at that date. If a decline in market value is determined to be other than a temporary decline in value, the Company will be required to write-down its investment in Idion. During its latest fiscal year ended December 31, 2002, Idion incurred a net loss of approximately U.S. \$5.4 million of which a loss of approximately U.S. \$2.2 million was from continuing operations.

On January 7, 2003, the Company acquired the technology and certain related assets of SmartSales Inc., a developer of CRM solutions, in a cash transaction. The Company acquired current assets valued at \$15,000, capital assets valued at \$22,000 and technology valued at \$332,000 for cash consideration of \$369,000. The technology acquired will be amortized over a term of one year.

Effective September 1, 2000, the Company acquired certain assets and liabilities of Constellar, a company engaged in the business of developing and marketing enterprise application integration products with offices in Redwood Shores, California and London, England. The acquisition has been accounted for under the purchase method, and the results of the continuing operations of the Constellar business acquired by DataMirror are included from the date of acquisition. A total of U.S. \$5 million in payments relating to the Constellar acquisition were deferred over 3 years, with U.S. \$3 million of these payments being contingent on revenues realized by DataMirror from the acquired business over the three years beginning September 1, 2000. Payments of U.S. \$1 million each were made in October 2001 and October 2002 in consideration of the fixed portion of this obligation. In November 2001, a payment of \$724,000 was made in payment of \$856,000 of contingent consideration for the year ended August 31, 2001 less a holdback of \$132,000 related to assets which were not realized. No payment of contingent consideration is due in respect of the year ended August 31, 2002.

The Company expects to continue to explore and pursue acquisitions as a strategy to build its distribution channels, enhance its product offerings, increase its market share in its existing markets, and achieve revenue growth. The consideration and completion of possible acquisitions may divert significant management time and other resources, including financial resources, of the Company. It is not certain that future acquisitions will achieve their business objectives.

LIQUIDITY AND CAPITAL RESOURCES

Since its inception, the Company has financed its cash requirements from the sale of equity securities, funds provided by shareholders, bank lines of credit, long-term debt and capital lease financing. In December 1996 the Company completed an initial public offering of 2,000,000 common shares for net proceeds of \$9,377,000, and in September 1997 raised net proceeds of \$15,721,000 through the issue of 1,600,000 special warrants (subsequently converted into 1,600,000 common shares). In April 2000, the Company raised net proceeds of \$34,151,000 through the issuance of 1,305,000 common shares.

As at April 30, 2003 the Company had cash, cash equivalents and short-term investments of \$42,272,000, compared to \$39,357,000 at the end of Q1 fiscal 2003 and \$38,827,000 at January 31, 2003. The increase in cash, cash equivalents and short-term investments was primarily due to increased cash flow from operations. For Q1 fiscal 2004, cash flow from operations was \$4,244,000, an increase of \$412,000 over Q1 fiscal 2003 due to a significant increase in operating profits and an increase in the rate of collections of accounts receivable, which resulted in a decrease in days sales outstanding to 51 at April 30, 2003 from 64 at the end of fiscal 2003. The Company's investing activities consisted primarily of purchases of capital assets and the purchase of shares of Idion. During Q1 fiscal 2004, capital expenditures of \$134,000 (\$502,000 in Q1 fiscal 2003) were financed internally and none (none in Q1 fiscal 2003) were financed under capital lease facilities. Capital assets acquired were primarily computer hardware and software utilized in research and development activities and leasehold improvements to the Company's head office facilities. The Company expects that its capital expenditures will increase in support of higher levels of research and development activities and as its sales and administration employee base grows. Financing activities during the quarter included capital lease payments and share capital transactions. During the Q1 fiscal 2004 the Company used \$661,000 (\$287,000 in Q1 fiscal 2003) in cash to repurchase its common shares under a normal course issuer bid and raised an additional \$159,000 (\$206,000 in Q1 fiscal 2003) through the issuance of common shares pursuant to the Company's stock option plans.

The Company has available short-term bank credit facilities amounting to approximately \$3,344,000. At April 30, 2003 there was no outstanding indebtedness under these credit facilities. Management believes that its current cash, cash equivalents and short-term investments together with continued positive cash flow from operations will be adequate to fund the Company's short-term financial requirements with the exception of acquisition related cash requirements. The Company's short-term financial requirements may increase substantially if the Company is successful in its take-over bid for Idion or in the event the Company makes other significant acquisitions. Short-term financial requirements related to acquisitions may include direct and indirect costs including restructuring and other expenses related to integrating and refinancing the acquired business. In the short-term, the Company does not plan on making any acquisitions that would result in short-term financial requirements exceeding the sources of cash described above. In the long-term, the Company may finance its long-term requirements from the sale of equity securities, by borrowing under bank lines of credit, by issuing long-term debt or by entering into capital lease financing arrangements.

NEW ACCOUNTING RECOMMENDATIONS

During 2002, the Financial Accounting Standards Board ("FASB") adopted two new accounting recommendations which may have an impact on the Company's future financial statements. The Company will adopt each of these recommendations as of February 1, 2003 and does not anticipate any material adverse effect to result from such adoption.

In June 2002, FASB introduced Statement of Financial Accounting Standard ("SFAS") 146, which addresses financial accounting and reporting for costs associated with exit or disposal activities. Prior to SFAS 146, a liability for an exit cost was recognized at the date of an entity's commitment to an exit plan. Under SFAS 146, a liability for a cost associated with an exit or disposal activity is recognized when the liability is incurred. SFAS 146 applies to exit or disposal activities initiated after December 31, 2002.

In December 2002, FASB introduced SFAS 148, amending SFAS 123, to provide alternate methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. The Company has adopted this standard and determined it has no impact on its U.S. GAAP financial information.

In November 2001, the Accounting Standards Board ("AcSB") approved AcG-13, an accounting guideline establishing conditions which must be satisfied in order to apply hedge accounting. These guidelines will not affect the Company until the fiscal year starting February 1, 2004. The Company has not yet determined the impact, if any, of these new guidelines.

RISKS AND UNCERTAINTIES

The primary risks and uncertainties that affect or may affect the Company and its business, financial condition and results of operations are substantially unchanged from those discussed in the Company's latest Annual Information Form and its Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended January 31, 2003 contained in the Company's 2003 Annual Report to Shareholders, and all of such risks and uncertainties are incorporated herein by reference.
