ODDO BHF NEW YORK CORPORATION

Notes to the Financial Statements As of December 31, 2020

1. Organization and Business Description

Oddo BHF New York Corporation (the "Company") is a broker-dealer in securities registered with the Securities and Exchange Commission and is a member of the Financial Industry Regulatory Authority, Inc. The Company engages primarily in brokerage and investment advisory services with respect to European securities. The Company is a wholly owned subsidiary of Oddo BHF S.C.A (the "Parent").

The Company acts as an agent for customers in the purchase and sale primarily of foreign securities. The Company executes and clears all of these trades through the Parent. These trades are settled on a delivery versus payment basis.

2. Accounting Policies

Basis of Presentation

The financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

Use of Estimates in the Preparation of Financial Statements

The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures of assets and liabilities, the disclosure of contingencies at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from the estimates included in the financial statements.

Income Taxes

The Company uses the asset and liability method in providing income taxes. The asset and liability method requires the recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in financial statements or tax returns. Under this method, deferred tax assets and liabilities are determined on the basis of the differences between the financial statements and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date.

Net deferred tax assets are recognized to the extent the Company believes these assets are more likely than not to be realized. In making such a determination, all available positive and negative evidence are considered, including future reversals of existing taxable temporary differences, projected future taxable income, tax planning strategies, and results of recent operations. If it is determined the Company would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment would be made to the deferred tax asset valuation allowance, which would reduce the provision for income taxes.

Uncertain tax positions are recorded in accordance with Accounting Standards Codification (ASC) 740, *Accounting for Income Taxes*, on the basis of a two-step process, whereby (1) the Company determines whether it is more likely than not the tax positions would be sustained on the basis of the technical merits of the position taken and (2) for those tax positions that meet the more-likely-than-not recognition threshold, the Company would recognize the largest amount of tax benefit that is more than 50% likely to be realized upon the ultimate settlement with the related tax authority.

The accompanying notes are an integral part of these financial statements.
