Form 10-Q for the Quarterly Period Ended September 30, 2010

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, page 14

1. We note on page 21 that the decrease in your operating cash flows for the nine months ended September 30, 2010 was primarily the result of increased inventory levels due to customer order cancellations. Please expand your discussion to provide a quantified analysis of the impact on current periods and the expected impact on future operations from the order cancellations. In addition, please discuss other known material trends and uncertainties affecting future sales to these customers and your ability to recover your

inventory in light of changing fashion trends, consumer demand for products and other market factors. Your analysis should also address the impact the increased inventory amounts will have on your on gross margins so an investor can ascertain the likelihood that past performance is indicative of future performance. Please refer to Item 303(a)(3)(ii) of Regulation S-K.
