Enclosure: Press release – **AngloGold Ashanti Report for the quarter and year ended 31 December 2006 prepared in accordance with IFRS.**

# Report

## for the quarter and year ended 31 December 2006

### Group results for the quarter ....

- ❖ Gold production 4% higher to 1.469Moz
- ❖ Total cash costs slightly lower at \$309/oz, primarily as a result of higher grades
- ❖ Price received 6% below spot price at \$578/oz
- ❖ Adjusted headline earnings of \$46m after taking into account year-end adjustments amounting to \$100m

### .... and for the year

- ❖ Gold production 9% lower to 5.6Moz
- ❖ Total cash costs up 10% to \$308/oz, primarily as a result of lower grades and inflation
- ❖ Adjusted headline earnings doubled year-on-year to \$413m, the company's highest level of annual earnings ever recorded
- ❖ Company delivers strong earnings leverage to gold price, with earnings up 105% as against a gold price increase of 36%
- ❖ Ore Reserves increased 6% to 66.9Moz, with Mineral Resources up 3% to 181.6Moz, both net of depletion
- ❖ Final dividend declared at 240 South African cents per share or 33 US cents per share, resulting in a total dividend of 450 South African cents or 62 US cents per share, a near doubling of total dividends as compared to 2005

# Financial and operating review

## OVERVIEW FOR THE QUARTER AND YEAR

### FOURTH QUARTER

The December quarter was marked by an improved operational performance, with production 4% higher to 1.469Moz and total cash costs slightly lower at \$309/oz, both in line with company forecasts. The price received for the quarter was also well within the estimated range, at \$578/oz, or 6% below the average spot price, as the company continued its strategy of delivering into the hedge book as fully as possible.

Adjusted headline earnings for the quarter, at \$46m, were reduced by year-end accounting adjustments that amounted to \$100m. Of this, non-cash charges of \$42m related to the vesting of certain share-based awards, as well as the company's employee share ownership plan and black economic empowerment scheme. The remaining \$56m was related to redundancy costs at Obuasi in Ghana and changes to both current, deferred and indirect tax provisions, as well as rehabilitation and amortisation charges.

During the fourth quarter, the company experienced 12 fatal accidents, of which the seismic event at TauTona claimed the lives of five employees in late October. The group's fatal injury frequency rate (FIFR) for the quarter regressed 29%, from 0.21 to 0.27 per million man hours worked. The lost-time injury frequency rate (LTIFR) improved by 14%. For the year, the FIFR, at 0.22, represented a 57% increase, and a significant deterioration in what had been an improving safety trend. The LTIFR also regressed for the year by 14%, notwithstanding solid safety performances from several operations, including Cripple Creek & Victor, which has operated without a lost-time injury since November 2003. The AngloGold Ashanti management team is determined to improve the company's safety performance, with the objective of achieving injury and fatality-free workplaces.

While there were improvements at Tau Lekoa and Moab Khotsong and a particularly strong performance from Kopanang due to a 12% yield increase, production from the South African assets was marginally lower this quarter. In particular, lower tonnes treated at Great Noligwa and lower yields at Savuka resulted in production declines, while at TauTona, production was reduced by seismicity concerns that halted mining on several panels. Total cash costs for the South African assets were well-contained quarter-on-quarter at R62,888/kg.

Of the other African assets, Sadiola in Mali and Geita in Tanzania reported production increases of 9% and 10%, respectively, after recovered grade improved 21% at Sadiola and 17% at Geita over the quarter. Siguiri in Guinea also posted strong results, with production 24% better to 77,000oz as a result of higher tonnage throughput and total cash costs 12% lower. The Ghanaian operations had a mixed quarter, with production 4% higher at Obuasi and 11% lower at Iduapriem, in both

cases the result of grade changes. The sale of Bibiani, also in Ghana, to Central African Gold plc, was completed in December for a consideration of \$40m which resulted in a profit on disposal of assets of \$25m.

The international assets reported generally strong results, particularly at Sunrise Dam in Australia, where production was 42% higher and total cash costs 17% lower as mining progressed in the open-pit to higher grade areas as planned. Cripple Creek & Victor in Colorado also saw a significant production increase to 86,000oz, while in South America, production was generally steady at the Brazilian operations but 22% lower at Cerro Vanguardia in Argentina due to lower grades.

### YEAR

For the year ended 31 December 2006, gold production was 9% lower at 5.635Moz. This year-on-year decline was largely attributable to a significantly reduced contribution from Geita due to the delayed cut-back of the operation's main pit. Production decreases at Bibiani as it phased into closure mode, as well as at Great Noligwa due to lower yields also contributed to the group's overall production decline, as did the restructurings of Savuka and Tau Lekoa to achieve higher profitability at lower production rates.

Although total cash costs for the year increased 10% to \$308/oz, the company's stringent approach to cost management, particularly in the face of rising commodity input prices, yielded \$73m in cost-savings during 2006. The majority of this, or \$50m, was again derived from the South African operations, from which \$144m in savings was also obtained in 2005. Adjusted headline earnings doubled year-on-year to \$413m, representing strong leverage to the gold price despite these cost pressures.

In 2006, AngloGold Ashanti recorded an increase in total ore reserves before depletion of 10.1Moz. After depletion, this represents a 6% increase year-on-year, from 63.3Moz in 2005 to 66.9Moz in 2006. Significant additions included 2.9Moz at Mponeng due to the inclusion of the VCR Below 120 Level project, and 1.1Moz at Cripple Creek & Victor as a result of a planned extension of that operation's life.

The company's total Mineral Resource before depletion increased by 14.1Moz for the year. After depletion, this represents an increase of 5.8Moz, from 175.8Moz in 2005 to 181.6Moz in 2006.

Significant additions included 5.2Moz at Obuasi as a result of exploration and changes in the estimation methodology of the below-50 level area and 2.1Moz each at Boddington, Geita and Navachab, primarily due to successful brownfields exploration.

A dividend of 240 South African cents (33 US cents)/ share has been declared for the six months ended 31 December 2006.

The company is pleased to welcome Mr Sipho Pityana to its Board of Directors, effective 13 February 2007. Sir Sam Jonah simultaneously announced his resignation from the Board, effective immediately. AngloGold Ashanti wishes to thank Sir Sam his years of dedicated service to the company.

Looking ahead, and taking into account the impact of the recent slope failure at Geita together with a revised mining strategy at TauTona due to seismicity, production for the first quarter is estimated to be 1.34Moz at an average total cash cost of \$327/oz

assuming the following exchange rates: R7.50/\$, A\$/0.76, BRL2.20/\$ and Argentinean peso 3.15/\$. Capital expenditure is estimated at \$272m and will be managed in line with profitability and cash flow.

The table below provides guidance for the year in respect of forecast ounces, total cash costs and capital expenditure. In 2007, AngloGold Ashanti expects production to increase to approximately 5.8Moz.

Total cash costs are anticipated to be \$309/oz, based on the following exchange rate assumptions: R7.50/\$, A\$/0.76, BRL2.20/\$ and Argentinean peso 3.15/\$. Capital expenditure for the year is estimated to be \$1,070m.

\*\* Capital expenditure is managed in line with earnings and cash flow, and may fluctuate accordingly.

## OPERATING RESULTS FOR THE QUARTER

### SOUTH AFRICA

At **Great Noligwa**, lower off-reef mining resulted in a 3% grade increase. Despite this, gold production declined marginally to 4,640kg (149,000oz). Total cash costs improved by 12% to R54,393/kg (\$232/oz), mainly as a result of an improved by-product contribution. Gross profit adjusted for the effect of unrealised non-hedge derivatives decreased 9% to R256m (\$35m) due to declines in both volume and the price received.

The Lost-Time Injury Frequency Rate (LTIFR) was 11.49 lost-time injuries per million hours worked (14.74 for the previous quarter). Regrettably, two people were fatally injured in separate fall of ground incidents during the quarter.

At **Kopanang**, yield improved 12% following increased mining of the operation's higher-grade sections and production consequently improved 6% to 3,657kg (118,000oz). Total cash costs, which were positively affected by the higher production and lower power charges, decreased 5% to R61,570/kg (\$262/oz). Gross profit adjusted for the effect of unrealised non-hedge derivatives, at R201m (\$27m), was marginally lower than that of the previous quarter.

The LTIFR was 13.75 (14.36). Regrettably, one person died in a fall of ground incident.

Production at **Moab Khotsoeng** rose 25% quarter-on-quarter to 411kg (13,000oz) and total cash costs consequently improved 24% to R116,485/kg (\$498/oz). Gross loss adjusted for the effect of unrealised non-hedge derivatives increased 19% to R43m (\$6m) following lower cost efficiencies as the operation builds up to full production, combined with a reduced price received.

The LTIFR was 9.53 (18.64). Regrettably, one person was fatally injured by a fall of ground incident.

At **Tau Lekoa**, gold production increased by 2% to 1,387kg (45,000oz) following adjustments made to the stoping width, which resulted in a 21% yield improvement. Total cash costs also benefited from the lower stoping width, as well as from seasonally lower power charges, declining 8% to R87,829/kg (\$373/oz). Gross loss adjusted for the effect of unrealised non-hedge derivatives was R25m (\$3m) versus a profit of R19m (\$3m) in the previous quarter due to declines in both volume and the price received.

The LTIFR was 24.22 (30.67).

At **Mponeng**, a combination of increased off-reef mining and backfill availability problems resulted in a production decrease of 5% to 4,595kg (148,000oz), notwithstanding a significant production and cost outperformance for the year. Total cash costs, at

R57,887/kg (\$247/oz), were 16% higher primarily due to the lower production and the payment of back-dated labour performance bonuses during the quarter. As a consequence, gross profit adjusted for the effect of unrealised non-hedge derivatives declined 30% to R224m (\$30m).

The LTIFR was 12.17 (13.40).

Production at **Savuka** was 19% lower to 654kg (21,000oz), after decreases in both face advance and reef-area mining resulted in a 13% yield decline.

Total cash costs accordingly increased 17% to R79,339/kg (\$339/oz) and gross profit adjusted for the effect of unrealised non-hedge derivatives decreased 22% to R38m (\$5m).

The LTIFR was 13.97 (20.51).

At **TauTona**, production declined 10% to 3,604kg (116,000oz) after concerns about seismicity halted mining on several panels and resulted in lower volume mined for the quarter. As a result, total cash costs increased 17% to R65,013/kg (\$277/oz) and gross profit adjusted for the effect of unrealised non-hedge derivatives declined 34% to R147m (\$20m).

The LTIFR was 17.27 (16.40). Regrettably, five people were killed in a seismically-induced fall of ground incident in October.

### ARGENTINA

At **Cerro Vanguardia** (92.5% attributable), gold production decreased 22% to 43,000oz, primarily due to lower feed grade as planned. Total cash costs rose 60% to \$340/oz as a result of reductions in both gold production and the silver by-product credit. Gross loss adjusted for the effect of unrealised non-hedge derivatives was \$1m, versus a profit of \$10m in the previous quarter. This significant decline was the result of the lower production and higher total cash costs, combined with a lower price received.

The LTIFR was 1.97 (8.51).

### AUSTRALIA

At **Sunrise Dam**, mining progressed in the open-pit to the higher grade areas as planned, with recovered grade 35% better to 4.2g/t and tonnes treated 18% higher. Production consequently increased to a record 153,000oz, a 42% improvement quarter-on-quarter. Total cash costs accordingly decreased by 17% to A\$380/oz (\$293/oz), which also resulted in a 20% increase in gross profit adjusted for the effect of unrealised non-hedge derivatives to A\$55m (\$43m), despite a decrease of 23% in the price received.

The underground project, where mining continues to access the high-grade Western Shear zone ore, continued to supplement Sunrise Dam production.

Development is also accessing further ore in the Dolly, Mako and Watu lodes. During the quarter, 235m of underground capital development and 2,062m of operational development were completed.

The LTIFR was 0 (4.71).

## BRAZIL

At **AngloGold Ashanti Brasil Mineração**, production increased 3% to 69,000oz, reflecting better results from heap leaching activities, in addition to higher production from the Cuiabá mine as the expansion project was completed. Total cash costs improved 7% to \$192/oz due to better grades at Cuiabá and a higher sulphuric acid by-product credit. Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 39% to \$32m, primarily as a consequence of improvements in production and in the price received.

The LTIFR was 2.15 (2.70).

At **Serra Grande** (50% attributable), gold production remained steady at 24,000oz. Total cash costs rose 7% to \$207/oz, however, due to higher expenditures on equipment maintenance and replacement mill liners. Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 14% to \$8m as an improved price received offset the effect of higher total cash costs.

The LTIFR was 2.32 (0.00).

## GHANA

On 1 December, the sale of **Bibiani** to Central African Gold plc was completed for a consideration of \$40m. As a consequence, reported production was derived from only two of the quarter's three months and was composed entirely of the reclamation of the lower phases of the slimes dams, which resulted in a decrease of 38% to 5,000oz. In spite of the lower production, total cash costs improved 28% to \$508/oz as a result of savings obtained from the general downscale of the operation combined with the fact that a third quarter contractor settlement was not repeated in the fourth quarter. These factors also contributed to a significant improvement in gross profit adjusted for the effect of unrealised non-hedge derivatives to \$4m, versus a loss of \$2m in the previous quarter.

The LTIFR was 0.00 (4.45).

At **Iduapriem** (85% attributable), production declined 11% to 39,000oz as a result of the combined effect of mill stoppages and lower grades. Total cash costs consequently rose 8% to \$366/oz and gross profit adjusted for the effect of unrealised non-hedge derivatives declined 33% to \$2m.

The LTIFR was 1.12 (0.00).

At **Obuasi**, improved grade resulted in a 4% production increase to 98,000oz. Total cash costs, however, increased by 13% to \$437/oz due to higher royalty costs associated with the rising gold price, as well as inflation-related increases of the fuel price and contractor rates. The ongoing power rationing exercise currently underway in Ghana also impacted negatively on costs. Gross loss adjusted for the effect of unrealised non-hedge derivatives increased to \$22m, compared with \$12m in the previous quarter, mainly due to once-off retrenchment costs of \$15m following a right-sizing exercise carried out at the operation in December.

The LTIFR was 2.63 (2.05). The mine achieved 2 million fatality free shifts in the last month of the quarter.

## REPUBLIC OF GUINEA

At **Siguiri** (85% attributable), production increased 24% to 77,000oz, mainly due to higher tonnage throughput. Total cash costs consequently fell 12% to \$383/oz and gross loss adjusted for the effect of unrealised non-hedge derivatives, at \$3m was the same as the third quarter.

The LTIFR was 1.23 (0.00). Regrettably, two of the mining contractor's employees died in an accident between a haul truck and a light vehicle in December.

## MALI

At **Morila** (40% attributable), production decreased 4% to 48,000oz due to a 10% decline in recovered grade that was partially offset by increased tonnage throughput. Total cash costs increased 14% to \$317/oz as a result of the lower production. Gross profit adjusted for the effect of unrealised non-hedge derivatives, at \$13m, was 7% lower due to declines in both production and the price received.

The LTIFR was 1.18 (2.22).

At **Sadiola** (38% attributable), production increased 8% to 50,000oz due to a 21% increase in recovered grade, a function of the treatment of both sulphide and oxide ore during the quarter as opposed to the exclusive treatment of the lower-grade oxide ore during the previous quarter. An 11% decrease in tonnage throughput partially offset the effect of the grade increase. Total cash costs were marginally lower at \$277/oz, with the higher operating costs associated with the treatment of sulphide ore somewhat mitigating the impact of higher grades. Gross profit adjusted for the effect of unrealised non-hedge derivatives declined 14% to \$12m due to a lower price received.

The LTIFR was 0.98 (0.00).

At **Yatela** (40% attributable), production remained constant at 34,000oz. Tonnage stacked was 36% higher than during the previous quarter but was not matched by increased gold production due to the delay in the release of high-grade ounces stacked in December. Total cash costs were 5% lower, at \$222/oz, due to economy of scale benefits associated with the increase in tonnage stacked. Gross profit adjusted for the effect of unrealised non-hedge derivatives increased 75% to \$14m due to a credit adjustment on restoration and decommissioning charges during the quarter.

The LTIFR was 1.66 (0.00). Regrettably, a conveyor belt accident led to a fatality at Yatela in the last month of the quarter.

#### NAMIBIA

Gold production at **Navachab**, at 20,000oz, was 13% lower than that of the previous quarter due to declines in both recovered grade and tonnage throughput, which was adversely affected during the quarter by a major mill relining. Total cash costs increased 18% to \$303/oz due to the lower production. Gross profit adjusted for the effect of unrealised non-hedge derivatives decreased 33% to \$4m as a result of declines in both production and price received.

The LTIFR was 0.00 (8.46).

#### TANZANIA

Production at **Geita** improved 10% to 80,000oz, primarily as a consequence of a 17% increase in recovered grade. Total cash costs, however, were 9% higher to \$586/oz due to increased expenditure on equipment maintenance and an unfavourable adjustment for excess waste stripping. Gross profit adjusted for the effect of unrealised non-hedge derivatives rose from a loss of \$7m in the previous quarter to a break-even point in the fourth quarter as a result of the improved production.

The LTIFR was 0.34 (0.68).

#### USA

At **Cripple Creek & Victor** (67% ownership with 100% interest in production until initial loans are repaid), production increased 25% to 86,000oz as solution flows on the leach pad returned to normal levels. Because leach pad accounting assigns the historic average cost per recoverable ounce placed on the pad to each ounce produced, the significantly higher fuel prices and inflation-related wage increases that have affected CC&V over the course of the last two years resulted in a 7% increase in total cash costs to \$259/oz for the fourth quarter of 2006. Gross profit adjusted for the effect of unrealised non-hedge derivatives, at \$23m, was \$20m higher than that of the previous quarter due to the improved production and a better price received.

The LTIFR was 0.00 (0.00). In December, CC&V achieved 37 months without a lost-time accident.

#### Notes:

- All references to price received includes realised non-hedge derivatives.
- In the case of joint venture and operations with minority holdings, all production and financial results are attributable to AngloGold Ashanti.
- Adjusted headline earnings is headline earnings before unrealised non-hedge derivatives, fair value adjustments on convertible bond and interest rate swaps and deferred tax thereon.
- Rounding of figures may result in computational discrepancies.

## Exploration

Total exploration expenditure amounted to \$32m (\$16m expensed, \$16m capitalised) during the fourth quarter of 2006, compared to \$26m (\$16m expensed, \$10m capitalised) in the previous quarter.

### BROWNFIELDS EXPLORATION

In **Australia**, at Sunrise Dam, exploration focused on completing infill drilling for the underground project targets at Cosmo, Hammerhead and West of Western Shea and drilling of the Tiger target commenced in December. Significant results were received in all targeted lodes. At the Boddington mine, six diamond drilling rigs were employed to advance Resource conversion and near-mine pit extension exploration.

At Siguiri, in **Guinea**, infill and extension drilling continued at the Kintinian and Sintoko prospects, as did a drill programme to upgrade the spent heap leach pad from an Inferred to Indicated Resource. The potential re-treatment of the pad through the new CIP plant is under investigation. Diamond drilling to establish the structural controls of the mineralisation at Foulata, located 35km west of the current Siguiri operation, also recommenced.

At Geita, in **Tanzania**, three diamond drill holes were completed at the Star & Comment gap area, with results pending. Limited drilling at the Area 3 West – Central prospect and reconnaissance drilling at the Mabe and Star & Comet North prospects both returned encouraging results.

At Morila in **Mali**, the grant-wide exploration programme encountered some broad, low-grade zones but most holes have shown insignificant intersections. At Sadiola, infill drilling commenced on upgrading Inferred Resources to Indicated for the Deep Sulphide Project.

At Navachab, in **Namibia**, drilling of the Gecko Central and Anomaly 16 prospects has been completed and geostatistical modelling is underway. Scout drilling of the Pub Grid anomalies has commenced, with some encouraging results. Thirty-three Reverse Circulation (RC) holes totalling 4,130m have been completed around the area of the main pit as part of the western pushback evaluation.

In **Argentina**, at Cerro Vanguardia, resource reconnaissance drilling has been largely completed.

At Córrego do Sítio, in **Brazil**, infill drilling conversion of open-pit Resources to Reserves continued and new orebodies are being probed.

At Cripple Creek & Victor in the **United States**, drill results within the Life of Mine Extension Project area have been encouraging and additional modelling has been completed. Development drilling continues in the South Cresson Deposit to define final pit depths and high wall designs.

### GREENFIELDS EXPLORATION

Greenfields exploration activities continued during the fourth quarter in Australia, Colombia, DRC, China, Laos, Philippines, and Russia.

In **Australia**, encouraging drill results were again obtained at the Tropicana joint venture project from both the Tropicana and Havana zones. At Tropicana, RC and diamond drilling was focused on 50m by 100m spaced infill holes designed to test mineralisation down-dip on selected sections and to better define the orientation of high-grade shoots. Better results received from Tropicana during the quarter include: 12.0m @ 7.0g/t (includes 9.0m @ 9.14g/t), 19.0m @ 3.78g/t (includes 11.0m @ 6.14g/t), 26.0m @ 3.04g/t (includes 13.0m @ 3.87g/t), 19.0m @ 2.86g/t (includes 17.0m @ 3.11g/t), 15.0m @ 3.09g/t (includes 4.0m @ 8.78g/t).

At Havana, RC and diamond drilling returned results including 33.0m @ 2.57g/t (includes 22.0m @ 3.59g/t), 10.0m @ 4.18g/t (includes 8.0m @ 5.13g/t), 10m @ 5.3g/t, 11m @ 3.4g/t, 21.0m @ 4.03g/t (includes 14.0m @ 5.75g/t), 30.0m @ 4.45g/t (includes 17.0m @ 6.95g/t), 63.0m @ 2.98g/t (includes 40.0m @ 3.79g/t), and 18.0m @ 3.93g/t (includes 14.0m @ 4.84g/t).

Regional exploration programmes continued at an accelerated pace in **Colombia** during the fourth quarter. Follow-up drilling was undertaken on AngloGold Ashanti's bulk-tonnage targets at Gramalote and Quinchia, located in the Antioquia and Middle Cauca regions, respectively, together with the initial drill testing of the joint venture prospects El Carmen (with local partner Mineros) and San Martin (with Bema Gold). Results for this latest drilling are pending.

Drill target definition on AngloGold Ashanti's new La Colosa gold-copper porphyry prospect also advanced, with drill testing expected to commence during the first quarter of 2007.

During the fourth quarter, drilling in the Mongbwalu region of the **DRC**, focused on evaluating the resource potential of the Pluto sector, located to the north-east of the historical Adidi-Kanga mines. Additional open-pit resource potential has also been identified to the north in the Issuru sector, and drilling of this target is expected to commence during the first quarter. Follow-up drilling was also completed in the "DD051" sector (located south-east of Adidi-Kanga, and with a previously reported intercept of 13.74m @ 6.40g/t from 57m) and around the known mineralisation in the Nzebi mine. Results are pending. The best results obtained from the Mongbwalu area included: 6.05m @ 20.29g/t (DDH084: 127.3 – 133.25m, Nzebi area), 3.39m @ 7.87g/t (DDH116: 102.94 – 106.33m, Adidi area), 5.53m @ 8.14g/t (DDH134: 260.7 – 266.23m; Pluto area).

In the first quarter of 2007, an additional two RC rigs will arrive on-site to assist with infill drilling and an airborne geophysical survey will be flown over the Mongbwalu District to cover the central Mongbwalu area, together with the Galaya-Lodjo prospects (located 20km to the north of Mongbwalu) and the Kilo-Camp III gold camp to the south-east.

In **Russia**, drafting of the Polymetal Strategic Alliance agreements continued. On the completion of the Sale and Purchase Agreement with Trans-Siberian Gold, which is close to finalisation, the Veduga and Bogunay projects will be incorporated into the Polymetal Strategic Alliance. A targeting and budget preparation meeting was held in Krasnoyarsk for the Veduga project, which resulted in the definition of 19 targets for evaluation in 2007.

In **China**, a second cooperative joint venture (CJV) was signed with local partners at the Jinchanggou Project in Gansu Province. The process of registering the CJV and applying for the business licence has now commenced. This follows AngloGold Ashanti's first CJV at Yili-Yunlong in Xinjiang Province.

In the **Philippines**, work continued on finalising the Mapawa joint venture agreement with Red 5. Final tenement grant for Mapawa is now awaited from the Manila Central Mines and Geosciences Bureau, the granting of which will allow more detailed exploration of the area to commence.

In **Laos**, regional reconnaissance stream sediment / rock chip sampling and mapping programmes were conducted in two areas of north-western Laos under the joint venture with Oxiana Limited. A technical review of the Truongson fold belt, which hosts the Sepon and Phu Bia copper-gold mines, identified a number of areas analogous to these deposits. Field visits to the highest priority target areas are in progress to determine the existence of favourable geology, structures and mineralisation.

## Review of the gold market

Over the fourth quarter of 2006, spot gold traded in a range of \$88, from a low of nearly \$561/oz to a high of \$649/oz. The fourth quarter range, similar to that of the previous quarter, highlighted the increasing stability of the gold market, which was also evidenced in that the spot price remained above \$600/oz throughout the last two months of the quarter.

The average spot price for the quarter of \$614/oz represents a decline of approximately \$7/oz or 1.3% from that of the third quarter, resulting in an average spot price for the year of \$604/oz. While this marks a retreat from the 26-year high of \$725/oz that was reached in May 2006, it also represents a 36% increase on the average annual gold price in 2005, and the greatest annual gain since 1980.

The average rand gold price for the fourth quarter was R143,725/kg, generally in line with that of the previous quarter. The average annual rand gold price was R131,320/kg, a 44% increase over that of 2005.

### PHYSICAL MARKET

While the gold price volatility that characterised the first half of 2006 contributed heavily to the 16% decline in global jewellery offtake for the year, lower prices and, in particular, renewed price stability in the third and fourth quarters saw some pent-up demand surges from key markets such as India, which posted record gold imports even as the price steadied above \$600/oz.

This was less evident in the Middle East, where the combination of high and volatile gold prices early in the year resulted in a 22% decline in fabrication, despite a late-year recovery. Chinese jewellery fabrication, however, increased approximately 5% for the year, supported primarily by higher local consumption, while the North American retail market shifted to lighter carat and mixed material jewellery in the face of volatile gold prices. This shift negatively affected local gold fabrication and resulted in a 19% decline in jewellery imports, impacting the key jewellery-producing markets of Italy and Turkey, where fabrication fell 40% in the first ten months of the year.

### INVESTMENT MARKET

The confirmation in November that sales in the second year of the second Central Bank Gold Agreement (CBGA) were 104t lower than the permissible ceiling of 500t provided a bullish signal for both the gold market and investors in the fourth quarter. Most market analysts continue to speculate that the CBGA signatories are indeed unlikely to fulfil their full quota for the remaining three years of the second agreement.

On 31 January, the IMF announced that its independent advisory group had recommended the sale of 400t of its total 3,217t gold holding in order to meet an expected shortfall in annual revenue. While this remains a recommendation and an official IMF decision is yet to be taken, it should be noted that the terms of the recommendation state that the potential sale would not add to the announced volume of sales from official sources and should be handled in such a way so as to avoid causing disturbances to the broader gold market.

Exchange traded gold holdings grew by over 14%, or 77.5t, in the fourth quarter, resulting in a worldwide investment in gold ETFs valued at \$12.8bn by the close of 2006. Also notable was new investor interest in physical gold towards the end of the year, with both gold bullion coins and small bars seeing steady demand, possibly related to the emergence over the course of the year of increased "safe haven" buying driven by a sense of rising geopolitical and economic insecurity.

Trading in the gold futures market was restrained over the quarter and, on average, the net long positions reported by the Commodities Future Trading Commission, fell 15% quarter-on-quarter.

### PRODUCER HEDGING

Preliminary figures for 2006 indicate that gold producers reduced hedges by more than 400t of gold during the year, through delivering into contracts and unwinding gold hedge contracts.

This is the highest annual figure recorded and is approximately five times the reduction seen in 2005.

## CURRENCIES

Recovering somewhat from the economic and political uncertainty that featured strongly in the third quarter, the rand gained ground against the US dollar during the fourth quarter, opening at R7.75/\$ and closing at R6.97/\$. However, quarter-on-quarter, the average rand dollar exchange rate weakened by 2% to R7.31. For the full year, the average rand dollar exchange rate was R6.77/\$, some 6.3% weaker than the previous year's average of R6.37/\$.

Against the euro, the US dollar weakened slightly during the quarter, averaging \$/€1.29 versus the third quarter average of \$/€1.27. Looking forward, the market consensus for 2007 is for a weaker US dollar due to an expected slowing of the US economy and the continuation of the "twin deficit" problem, thus giving further support to the gold price.

## HEDGING

As at 31 December, the net delta hedge position of AngloGold Ashanti was 10.16Moz or 316t, valued at the spot gold price at the quarter-end of \$636.30/oz, \$35.20/oz higher than that of the previous quarter. This net delta position reflects an increase of some 0.66Moz or 20t quarter-on-quarter, due to the higher fourth quarter-end gold price, offset by decreases related to maturing hedge contracts, buybacks and other delta-reducing strategies as part of a broader hedge reduction strategy.

The marked-to-market value of the hedge position as at 31 December 2006 was a negative \$2.9bn (at 30 September 2006: negative \$2.78bn). The increase in the marked-to-market position was primarily due to the higher gold price of \$636.30/oz offset by the lower prevailing exchange rates, interest rates and volatilities prevailing at quarter-end, combined with the impacts of the changed hedge position quarter-on-quarter.

The price received by the company for the quarter was \$578/oz, \$36/oz or some 6% below the average spot price for the period of \$614/oz.

The company continues to actively manage its hedge position in a value accretive manner and during the quarter a number of hedge contracts maturing in the near-term were restructured into longer dated options contracts. A number of the short dated long positions from the fourth quarter 2006 were rolled out into 2007 resulting in a net long dollar gold position of 12,957kg at an average of \$639/oz for 2007. These long positions will be integrated into the hedge book and used to reduce hedging commitments in future periods, in line with past practice.

Looking to 2007, and assuming a gold price range similar to that seen last year, the received gold price for the group is likely to be some 8% to 10% below the spot gold price.

In order to simplify the reporting effect of the gold hedges on the received price, from 1 January 2007, AngloGold Ashanti will in its group financials show an average received gold price, which will be similar across all of its mines.

## Hedge position

As at 31 December 2006, the group had outstanding the following forward-pricing commitments against future production. The total net delta tonnage of the hedge of the company on this date was 10.16Moz or 316t (at 30 September 2006: 9.50Moz or 296t).

The marked-to-market value of all hedge transactions making up the hedge positions was a negative \$2.903bn (negative R20.324bn) as at 31 December 2006 (at 30 September 2006: negative \$2.777bn or R21.56bn). This value at 31 December 2006 was based on a gold price of \$636.30/oz, exchange rates of R7.001/\$ and A\$/0.7886 and the prevailing market interest rates and volatilities at that date.

As at 12 February 2007, the marked-to-market value of the hedge book was a negative \$3.147bn (negative R22.73bn), based on a gold price of \$664.50/oz and exchange rates of R7.225/\$ and A\$/0.7736 and the prevailing market interest rates and volatilities at the time.

These marked-to-market valuations are not predictive of the future value of the hedge position, nor of future impact on the revenue of the company. The valuation represents the cost of buying all hedge contracts at the time of valuation, at market prices and rates available at the time.

# Ore Reserves Statement

## Mineral Resources

The 2006 Mineral Resource increased by 14.1Moz to 181.6Moz before depletion. After a depletion of 8.3Moz the increase is 5.8Moz. Mineral Resources were estimated at a gold price of \$650/oz in contrast to the \$475/oz used in 2005. This change in economic assumptions from 2005 to 2006 resulted in the Mineral Resources increasing by 5.8Moz, while successful exploration and revised modelling resulted in a further increase of 7.6Moz, and other minor changes accounted for additional 0.7Moz.

	<b>Moz</b>
<b>December 2005 Mineral Resources</b>	<b>175.8</b>

## Reductions

<b>2006 Total Depletion</b>	-8.3
<b>TauTona</b> , areas on both the Ventersdorp Contact Reef and Carbon Leader Reef Shaft Pillars were determined not to have economic potential	-1.9
<b>Moab Khotso</b> , due to new exploration drilling	-1.4
<b>Sadiola</b> , due to a change in methodology when compared to the 2005 Mineral Resource	-0.9
<b>Bibiani Mine</b> , due to sale of asset	-0.9
<b>Other</b> , total of non-significant changes	-0.5

## Additions

<b>Obuasi</b> , due to exploration and changes in estimation methodology below 50 level area	5.2
<b>Boddington</b> , due to successful exploration	2.1
<b>Navachab</b> , due to successful exploration, increased gold price and improved mining efficiencies	2.1
<b>Geita</b> , due to revised Mineral Resource Models, successful exploration and increased gold price	2.1
<b>Siguiri</b> , due to successful exploration and increased gold price	1.5
<b>Savuka</b> , due to increased gold price	1.2
<b>Cripple Creek &amp; Victor</b> , due to successful exploration and gold price	1.1
<b>Iduapriem</b> , due to increased gold price	0.7
<b>Cerro Vanguardia</b> , due to successful exploration	0.6
<b>West Wits Surface</b> , due to inclusion of tailing dams as a result of the increased gold price	0.5

<b>Yatela</b> , due increased gold price	0.2
<b>Other</b> , total of non-significant changes	2.0

<b>December 2006 Mineral Resources</b>	<b>181.6</b>
--	--------------

*Rounding of figures may result in computational discrepancies.*

## Ore Reserves

The 2006 AngloGold Ashanti Ore Reserves increased by 16% or 10.1Moz before depletion. After depletion, this increase amounted to 3.6Moz, or 6%. A gold price of \$550/oz was used for Ore Reserve estimation in contrast to the \$400/oz used in 2005. This change in the economic assumptions from 2005 to 2006 resulted in the Ore Reserves increasing 3.7Moz, while exploration and modelling changes resulted in a further addition of 6.6Moz. A reduction of 0.1Moz was due to the sale of Bibiani.

The primary reasons for the changes are as follows:

	<b>Moz</b>
<b>December 2005 Ore Reserves</b>	<b>63.3</b>
<b>Reductions</b>	
<b>2006 Total Depletion</b>	-6.5
<b>Moab Khotsong</b> , due to drop in values as a result of exploration drilling	-0.4
<b>Bibiani Mine</b> , due to sale of asset	-0.1
<b>Other</b> , total of non significant changes	-0.4
<b>Additions</b>	
<b>Mponeng</b> , due to the inclusion of the VCR below 120 level project and higher gold price	2.9
<b>Cripple Creek &amp; Victor</b> , due to planned extension of life	1.1
<b>Sadiola</b> , due to the inclusion of the Deep Sulphide Project	1.0
<b>Boddington</b> , due to upgrade of Inferred Mineral Resources in the Pit and increased gold and copper prices	0.7
<b>Sunrise Dam</b> , due to inclusion of North-Wall Cutback and Cosmo Orebodies because of an increased gold price	0.7
<b>Iduapriem</b> , due to increased gold price	0.5
<b>Tau Lekoa</b> , due to increased gold price	0.5
<b>AngloGold Ashanti Brasil Mineração</b> , due to Córrego do Sítio Sulphide exploration drilling and Cuiabá Development	0.5
<b>Cerro Vanguardia</b> , due to successful exploration programme and increased gold price	0.4
<b>Siguiri</b> , additional pit included due to increased gold price	0.4
<b>Navachab</b> , due to the increased gold price marginal ore is now economic and the pit is larger	0.3
<b>Savuka</b> , due to the increased gold price	0.3
<b>Yatela</b> , due to the inclusion of an additional cutback	0.2
<b>Serra Grande</b> , due to incorporation of an open-pit and the development of levels with higher tons than expected	0.2
<b>Morila</b> , due to the increased gold price marginal ore is now economic	0.1
<b>Other</b> , total of non-significant changes	1.4
<b>December 2006 Ore Reserves</b>	<b>66.9</b>

*Rounding of figures may result in computational discrepancies.*

## By-products

A number of by-products will be recovered as a result of processing the Gold Ore Reserves. These include 11,800t of uranium from the South African operations, 0.19Mt of Copper from Australia, 0.50Mt of Sulphur from Brazil and 24.5Moz of silver from Argentina.

## Competent persons

The information in this report that relates to exploration results, Mineral Resources or Ore Reserves is based on information compiled by the competent persons listed below. They are either members of the Australian Institute of Mining and Metallurgy (AusIMM) or recognised overseas professional organisations. They are all full-time employees of the company.

The competent person for AngloGold Ashanti Exploration is:

- E Roth, PhD (Economic Geology), BSc (Hons) (Geology), MAusIMM, 16 years experience.

Competent persons for AngloGold Ashanti's Mineral Resources are:

- VA Chamberlain, MSc (Mining Engineering), BSc (Hons) (Geology), MAusIMM, 21 years experience.
- MF O'Brien, MSc (Mining Economics), BSc (Hons) (Geology), Dip Data, Pr.Sci.Nat., MAusIMM, 27 years' experience.

Competent persons for AngloGold Ashanti's Ore Reserves are:

- CE Brechtel, MSc (Mining Engineering), MAusIMM, 31 years' experience.
- D L Worrall, ACSM, MAusIMM, 26 years' experience.
- J van Zyl Visser, MSc (Mining Engineering), BSc (Mineral Resource Management), PLATO, 20 years' experience.

The competent persons consent to the inclusion of the exploration, Mineral Resources and Ore Reserves information in this report, in the form and context in which it appears.

Mineral Resources and Ore Reserves are reported in accordance with the minimum standard described by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code, 2004 Edition), and also conform to the standards set out in the South African Code for the Reporting of Mineral Resources and Mineral Reserves (the SAMREC 2000 Code). Mineral Resources are inclusive of the Ore Reserve component unless otherwise stated.

*Rounding of figures may result in computational discrepancies.*

<b>Operating profit (loss)</b>		<b>71</b>	300	(153)	246	(34)
Interest receivable		10	8	4	32	25
Exchange (loss) gain		(2)	1	(5)	(2)	(5)
Fair value adjustment on option component of convertible bond		(28)	58	(42)	16	(32)
Finance costs		(34)	(22)	(33)	(123)	(108)
Fair value loss on interest rate swaps		-	-	-	-	(1)
Share of associates' loss		-	-	(2)	(1)	(3)
<b>Profit (loss) before taxation</b>		<b>17</b>	344	(231)	168	(158)
Taxation	6	(82)	(69)	18	(180)	35
<b>(Loss) profit after taxation from continuing operations</b>		<b>(65)</b>	276	(213)	(12)	(123)
Loss for the period from discontinued operations	7	-	-	(9)	(2)	(36)
<b>(Loss) profit for the period</b>		<b>(65)</b>	276	(222)	(14)	(159)
Allocated as follows:						
Equity shareholders of parent		(72)	268	(226)	(44)	(182)
Minority interest		7	8	5	30	23
		<b>(65)</b>	276	(222)	(14)	(159)
<b>Basic (loss) earnings per ordinary share (cents)</b>						
(Loss) profit from continuing operations <sup>a</sup>		(26)	97	(82)	(14)	(55)
Loss from discontinued operations <sup>a</sup>		-	-	(3)	(1)	(14)
(Loss) profit		<b>(26)</b>	97	(85)	(16)	(69)
<b>Diluted (loss) earnings per ordinary share (cents)</b>						
(Loss) profit from continuing operations <sup>b</sup>		(26)	97	(82)	(14)	(55)
Loss from discontinued operations <sup>b</sup>		-	-	(3)	(1)	(14)
(Loss) profit <sup>c</sup>		<b>(26)</b>	97	(85)	(16)	(69)
<b>Dividends <sup>d</sup></b>						
- \$m					173	106
- cents per Ordinary share					62	36

<sup>a</sup> Calculated on the basic weighted average number of ordinary shares.

<sup>b</sup> Calculated on the diluted weighted average number of ordinary shares.

<sup>c</sup> The impact of the diluted earnings per share is anti-dilutive and therefore equal to the basic earnings per share.

<sup>d</sup> Dividends are translated at actual rates on date of payment. The current period is an indicative amount only.

Rounding of figures may result in computational discrepancies.

# Notes

for the quarter and year ended 31 December 2006

## 1. Basis of preparation

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for certain financial instruments which are stated at fair value. The group's accounting policies used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2005 and revised International Financial Reporting Standards (IFRS) which are effective 1 January 2006, where applicable.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS34, JSE Listings Requirements and in the manner required by the South African Companies Act, 1973 for the preparation of financial information of the group for the quarter and year ended 31 December 2006.

As part of the year-end process and in compliance with disclosures for the year ended 31 December 2006, certain amounts have been reclassified to agree with current disclosures. Full details of all changes will be presented in the 2006 annual report which is expected to be distributed to shareholders during March 2007.

## 2. Revenue

<b>Cents per share <sup>(1)</sup></b>										
Headline (loss) earnings	(54)	534	(412)	(307)	(271)	(37)	97	(64)	(29)	(37)

(1) Calculated on the basic weighted average number of ordinary shares.

## 9. Shares

	Quarter ended			Year ended	
	Dec 2006	Sept 2006	Dec 2005	Dec 2006	Dec 2005
Authorised:					
Ordinary shares of 25 SA cents each	400,000,000	400,000,000	400,000,000	400,000,000	400,000,000
E ordinary shares of 25 SA cents each	4,280,000	–	–	4,280,000	–
A redeemable preference shares of 50 SA cents each	2,000,000	2,000,000	2,000,000	2,000,000	2,000,000
B redeemable preference shares of 1 SA cent each	5,000,000	5,000,000	5,000,000	5,000,000	5,000,000
Issued and fully-paid:					
Ordinary shares in issue	276,236,153	275,258,118	264,938,432	276,236,153	264,938,432
E ordinary shares in issue	4,185,770	–	–	4,185,770	–
Total ordinary shares:	280,421,923	275,258,118	264,938,432	280,421,923	264,938,432
A redeemable preference shares	2,000,000	2,000,000	2,000,000	2,000,000	2,000,000
B redeemable preference shares	778,896	778,896	778,896	778,896	778,896
In calculating the diluted number of ordinary shares outstanding for the year, the following were taken into consideration:					
Ordinary shares	275,394,961	275,225,150	264,293,098	272,214,937	264,052,904
E Ordinary shares	773,762	–	–	194,954	–
Time related options	304,280	281,656	537,379	398,326	522,298
Bonus Share Plan	203,495	164,406	21,039	199,390	60,432
Basic ordinary shares	276,676,498	275,671,212	264,851,516	273,007,607	264,635,634
Dilutive potential of share options	–	124,674	565,436	–	–
Diluted number of ordinary shares <sup>(1)</sup>	276,676,498	275,795,886	265,416,952	273,007,607	265,236,949

(1) The Basic and diluted number of ordinary shares are the same for December 2006 quarter and the year 2006 as the effects of shares for performance related options are anti-dilutive.

Rounding of figures may result in computational discrepancies.

On 11 December 2006, shareholders approved the creation of E ordinary shares and the implementation of an Employee Share Ownership Plan and Black Economic Empowerment transaction ("BEE transaction").

During the quarter 49,445 ordinary shares were allotted in terms of the AngloGold Share Incentive Scheme and 928,590 ordinary shares were allotted to The Bokamoso ESOP Trust in terms of the BEE transaction. In addition, 2,785,770 E ordinary shares were issued to The Bokamoso ESOP and 1,400,000 E ordinary shares were issued to Izingwe Holdings (Proprietary) Limited in terms of the BEE transaction.

#### 14. Capital commitments

	Dec 2006	Sept 2006	Dec 2005	Dec 2006	Sept 2006	Dec 2005
		Unaudited	Restated Unaudited		Unaudited	Restated Unaudited
	SA Rand million			US Dollar million		
Orders placed and outstanding on capital contracts at the prevailing rate of exchange	2,475	2,910	1,182	354	375	186

##### **Liquidity and capital resources:**

To service the above capital commitments and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to foreign investment and exchange control laws and regulations and the quantity of foreign exchange available in offshore countries. In addition distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other financing arrangements contain financial covenants and other similar undertakings. To the extent that external borrowings are required, the groups covenant performance indicates that existing financing facilities will be available to meet the above commitments. To the extent that any of financing facilities mature in the near future, the group believes that these facilities can be refinanced on similar terms to those currently in place.

#### 15. Contingent liabilities

AngloGold Ashanti's contingent liabilities at 31 December 2006 are detailed below:

**Water pumping cost – South Africa** – The group is involved in a legal dispute regarding the responsibility for water pumping of the Margaret shaft at the Stilfontein mine. Following an attempt by DRDGold Limited to liquidate its North West operations and avoid incurring pumping costs, AngloGold Ashanti launched an urgent application against DRDGold Limited and government departments requesting the court to order the continued pumping of water at the Stilfontein Mines. The cessation of water pumping is likely to cause flooding in various of the Group's Vaal River operations. The Department of Water Affairs and Forestry responded by issuing directives to the mining companies directing that they share the costs of pumping at the Stilfontein Margaret Shaft.

The three mining companies, Simmer and Jack Mines Limited, Harmony Gold Mining Company Limited and AngloGold Ashanti Limited, are finalising an arrangement in which responsibility for the water pumping will be transferred to an independent newly formed company. AngloGold Ashanti's responsibility will be limited to providing one-third of the start-up capital on loan account and the three mining companies will be members of the newly formed company.

Should the proposed arrangement not be acceptable to the courts and/or the regulatory authorities, the proposal may have to be amended. Due to this uncertainty, no estimate is made of any potential liabilities as management believe that the proposed arrangement is a pragmatic and reasonable basis to resolve the issue.

**Groundwater pollution – South Africa** – AngloGold Ashanti has identified a number of groundwater pollution sites at its current operations in South Africa, and has investigated a number of different technologies and methodologies that could possibly be used to remediate the pollution plumes. The viability of the suggested remediation techniques in the local geological formation in South Africa is however unknown. No sites have been remediated and present research and development work is focused on several pilot projects to find a solution that will in fact yield satisfactory results in South African conditions. Subject to the technology being developed as a remediation technique, no reliable estimate can be made for the obligation.

**Provision of surety – South Africa** – AngloGold Ashanti has provided sureties in favour of a lender on a Gold loan facility with its affiliate Oro Africa (Pty) Ltd and one of its subsidiaries to a maximum value of R100m (\$14m). The suretyship agreements have a termination notice period of 90 days. The Group receives a fee from the associate for providing the surety, and has provided for non-performance.

*Sales tax on gold deliveries – Brazil* – Mineração Serra Grande S.A.(MSG), the operator of the Crixas mine in Brazil, has received two tax assessments from the State of Goiás related to payments of sales taxes on gold deliveries for export: one for the period between February 2004 and June 2005 and the other for the period between July 2005 and May 2006. The tax authorities maintain that whenever a taxpayer exports gold through a branch located in a different Brazilian State, it must obtain an authorisation from the Goiás State Treasury by means of a Special Regime Agreement (*Termo de Acordo re Regime Especial – TARE*). The Serra Grande operation is co-owned with Kinross Gold Corporation. The company manages the operation and its attributable share of the first assessment is approximately \$29m. In May 2006 MSG signed the TARE, which authorised the remittance of gold to the company's branch in Minas Gerais specifically for export purposes. In November 2006 the administrative council's second chamber ruled in favour of Serra Grande and fully canceled the tax liability related to the first period. The State of Goiás may still appeal to the full board of the State of Goiás tax administrative council. The second assessment was issued by the State of Goiás in October 2006 on the same grounds of the first one, and the attributable share of the assessment is approximately \$18m. The company believes both assessments are in violation of Federal legislation on sales taxes.

*VAT Disputes – Brazil* – MSG received a tax assessment in October 2003 from the State of Minas Gerais related to sales taxes on gold allegedly returned from the branch in Minas Gerais to the company head office in the State of Goiás. The company lost the case at the administrative level but is now discussing at the judicial sphere. The company believes there is a remote chance of success for the State of Minas Gerais. The company's attributable share of the assessment is approximately \$6m.

*VAT Dispute – Brazil* – Morro Velho is involved in a dispute with tax authorities. As a result of an erroneous duplication of a shipping invoice between two states in Brazil, tax authorities are claiming that VAT is payable on the second invoice. The amount involved is approximately \$5m.

*Social security payments – Brazil* – AngloGold Ashanti Brazil is being accused of failing to pay certain required payments towards the social security system in Brazil during the period 1997 to 2004. Legislation is unclear on whether the contributions are actually due and payable. The amount involved is approximately \$2m.

*Litigation with mining contractor – Ghana* – A group of employees of Mining and Building Contractors (MBC), the Obuasi underground developer, are claiming to be employees of the group. If successful, there is a risk of some employees claiming rights to share options.

*Capital cost of water pipelines – Namibia* – A potential liability of approximately \$1m exists at Navachab in Namibia to pay the outstanding capital cost of the water pipeline in the event of mine closure prior to 2019.

## 16. Concentration of risk

There is a concentration of risk in respect of reimbursable value added tax and fuel duties from the Malian government:

- Reimbursable value added tax due from the Malian government for the company, amounts to an attributable \$34m at 31 December 2006 (30 September 2006: attributable \$35m). The last audited value added tax return was for the period ended 31 December 2005 and at that date an attributable \$19m was still outstanding and an attributable \$15m is still subject to audit. The accounting processes for the unaudited amount are in accordance with the processes advised by the Malian government in terms of the previous audits.
- Reimbursable fuel duties from the Malian government for the company, amount to an attributable \$11m at 31 December 2006 (30 September 2006: attributable \$12m). Fuel duty refund claims are required to be submitted before 31 January of the following year and are subject to authorisation by firstly the Department of Mining and secondly the Custom and Excise authorities. The Customs and Excise authorities have approved an attributable \$5m, which is still outstanding, whilst an attributable \$6m is still subject to authorisation. The accounting processes for the unauthorised amount are in accordance with the processes advised by the Malian government in terms of the previous authorisations. As from February 2006 all fuel duties have been exonerated.

The government of Mali is a shareholder in all the Malian entities and has provided a repayment plan for the amounts due.

There is a concentration of risk in respect of reimbursable value added tax and fuel duties from the Tanzanian government:

- Reimbursable value added tax due from the Tanzanian government, for the company amounts to \$14m at 31 December 2006 (30 September 2006: \$14m). The last audited value added tax return was for the period ended 31 May 2006 and at the balance sheet date \$9m was still outstanding and \$5m is still subject to audit. The accounting processes for the unaudited amount are in accordance with the processes advised by the Tanzanian government in terms of the previous audits.
- Reimbursable fuel duties from the Tanzanian government, for the company amount to \$18m at 31 December 2006 (30 September 2006: \$11m). Fuel duty claims are required to be submitted after consumption of the related fuel and are subject to authorisation by the Customs and Excise authorities. Claims for refund of fuel duties amounting to \$12m have been lodged with the Customs and Excise authorities, which are still outstanding, whilst claims for refund of \$6m have not yet been submitted. The accounting processes for the unauthorised amount are in accordance with the processes advised by the Tanzanian government in terms of the previous authorisations.

#### 17. Attributable interest

Although AngloGold Ashanti holds a 66.7% interest in Cripple Creek & Victor Gold Mining Company Limited, it is currently entitled to receive 100% of the cash flows from the operation until the loan, extended to the joint venture by AngloGold Ashanti USA Inc., is repaid.

#### 18. Borrowings

AngloGold Ashanti's borrowings are interest bearing.

#### 19. Change in comparative data

AngloGold Ashanti has, as a result of further guidance on materiality assessment published in the United States of America, decided to assess materiality on a combination of two methods, because it will result in a more accurate assessment of materiality on both the balance sheet and the income statement.

In previous periods, AngloGold Ashanti used the "roll over" method to assess materiality for potential adjustments. The roll over method quantifies a misstatement based on the amount of the error originating in the current year income statement but it ignores the "carryover effects" of prior year misstatements. This can result in accumulation of significant misstatements on the balance sheet. The alternative to the roll over method, the iron curtain method, quantifies a misstatement based on the effects of correcting the misstatement existing on the balance sheet, irrespective of the year of occurrence.

As a result of the revised assessment criteria, AngloGold Ashanti identified an adjustment necessary to the balance sheet, principally to trade and other payables and deferred income. The adjustment, due to an accumulation over several years of immaterial amounts in the income statement, has been accounted for retrospectively, and the comparative statements for 2005 have been restated.

The effect of the change on 2005 is as tabulated below. Opening retained earnings for 2005 have been reduced by \$11m, R76m which is the amount of the adjustment relating to periods prior to 2005. The net effect on the income statement was \$1m, R7m.

Figures in million	SA Rands	US Dollars
<b>Income statement</b>		
Reduction in cost of sales	11	2
Reduction in taxation	(4)	(1)
Effect on profit attributable to equity shareholders	7	1

## 20. Announcements

On 11 December 2006, shareholders in general meeting approved the creation of E ordinary shares and the implementation of an Employee Share Ownership Plan (ESOP) to be introduced at its operations in South Africa. In addition, shareholders approved a Black Economic Empowerment transaction as well as the introduction of an ESOP in countries outside of South Africa. This follows the announcement made on the 2 October 2006, in which AngloGold Ashanti advised the imminent finalisation of an employee share ownership plan with the National Union of Mineworkers, Solidarity, United Association and Izingwe Holdings (Proprietary) Limited.

## 21. Dividend

The directors have today declared Final Dividend No. 101 of 240 (Final Dividend No. 99: 62) South African cents per ordinary share for the year ended 31 December 2006. In compliance with the requirements of STRATE, given the company's primary listing on the JSE Limited, the salient dates for payment of the dividend are as follows:

### To holders of ordinary shares and to holders of CHESS Depositary Interests (CDIs)

Each CDI represents one-fifth of an ordinary share.

	2007
Currency conversion date for UK pounds, Australian dollars and Ghanaian cedis	Thursday, 1 March
Last date to trade ordinary shares cum dividend	Friday, 2 March
Last date to register transfers of certificated securities cum dividend	Friday, 2 March
Ordinary shares trade ex dividend	Monday, 5 March
Record date	Friday, 9 March
Payment date	Friday, 16 March

On the payment date, dividends due to holders of certificated securities on the South African share register will either be electronically transferred to shareholders' bank accounts or, in the absence of suitable mandates, dividend cheques will be posted to such shareholders.

Dividends in respect of dematerialised shareholdings will be credited to shareholders' accounts with the relevant CSDP or broker.

To comply with the further requirements of STRATE, between Monday, 5 March 2007 and Friday, 9 March 2007, both days inclusive, no transfers between the South African, United Kingdom, Australian and Ghana share registers will be permitted and no ordinary shares pertaining to the South African share register may be dematerialised or rematerialised.

**To holders of American Depositary Shares**

Each American Depositary Share (ADS) represents one ordinary share.

	2007
Ex dividend on New York Stock Exchange	Wednesday, 7 March
Record date	Friday, 9 March
Approximate date for currency conversion	Friday, 16 March
Approximate payment date of dividend	Monday, 26 March

Assuming an exchange rate of R7.19/\$1, the dividend payable on an ADS is equivalent to 33.37 US cents. This compares with the final dividend of 9.865 US cents per ADS paid on 20 March 2006. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion.

**To holders of Ghanaian Depositary Shares (GhDSs)**

100 GhDSs represent one ordinary share.

	2007
Last date to trade and to register GhDSs cum dividend	Friday, 2 March
GhDSs trade ex dividend	Monday, 5 March
Record date	Friday, 9 March
Approximate payment date of dividend	Monday, 19 March

Assuming an exchange rate of R1/¢1,289.291 the dividend payable per GhDS is equivalent to 30.94 cedis. This compares with the final dividend of 9.20018cedis per GhDS paid on 13 March 2006. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion. In Ghana, the authorities have determined that dividends payable to residents on the Ghana share register be subject to a final withholding tax at a rate of 10%, similar to the rate applicable to dividend payments made by resident companies which is currently at 10%.

In addition, directors have today declared Dividend No. E1 of 120 South African cents per E ordinary share, payable to employees participating in the Bokamoso ESOP and Izingwe Holdings (Proprietary) Limited. These dividends are payable on Friday, 16 March 2007.

By order of the Board

**R P EDEY**  
Chairman

12 February 2007

**R M GODSELL**  
Chief Executive Officer

## Segmental reporting

for the quarter and year ended 31 December 2006

Based on risks and returns the directors consider that the primary reporting format is by business segment. The directors consider that there is only one business segment being mining, extraction and production of gold. Therefore the disclosures for the primary segment have already been given in the abbreviated financial statements. The secondary reporting format is by geographical analysis by origin.

## Non-GAAP disclosure

From time to time AngloGold Ashanti may publicly disclose certain "non-GAAP" financial measures in the course of our financial presentations, earnings releases, earnings conference calls and otherwise.

The group utilises certain non-GAAP performance measures and ratios in managing our business and may provide users of this financial information with additional meaningful comparisons between current results and results in prior operating periods. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measure of performance prepared in accordance with GAAP. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies use.

### A Headline earnings adjusted for the effect of unrealised non-hedge derivatives, fair value adjustments on convertible bond and interest rate swaps

Fair value adjustment on option component of convertible bond	210	(421)	271	(137)	211	28	(58)	42	(16)	32
Fair value loss on interest rate swap	-	-	-	-	5	-	-	-	-	1
Headline earnings before unrealised non-hedge derivatives, fair value adjustments on convertible bond and interest rate swaps <sup>(2)</sup>	343	1,011	257	2,790	1,272	46	141	42	413	201
<b>Cents per share <sup>(1)</sup></b>										
Headline earnings adjusted for the effect of unrealised non-hedge derivatives, fair value adjustments on convertible bond and interest rate swaps <sup>(2)</sup>	124	367	97	1,022	481	17	51	16	151	76

<sup>(1)</sup> Calculated on the basic weighted average number of ordinary shares.

<sup>(2)</sup> Non-hedge derivatives in the income statement comprise the change in fair value of all non-hedge derivatives as follows:

- Open positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the current reporting date; and
- Settled positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the date of settlement.

Headline earnings adjusted for the effect of unrealised non-hedge derivatives, fair value adjustments on convertible bond and interest rate swaps, is intended to illustrate earnings after adjusting for:

- The unrealised fair value change in contracts that are still open at the reporting date, as well as, the unwinding of the historic marked-to-market value of the position settled in the period; and
- Investment in hedge restructure transaction: During the hedge restructure in the quarters ended 31 December 2004 and 31 March, 2005, \$83m and \$69m in cash was injected into the hedge book to increase the value of long-dated contracts. This investment in long-dated derivatives (all of which have not yet matured), for the purposes of the adjustment to earnings, will only be taken into account when the long-dated contracts are settled; and
- The unrealised fair value change on the option component of the convertible bond; and
- The unrealised fair value change on the onerous uranium contracts

### B Gross profit adjusted for the effect of unrealised non-hedge derivatives

<sup>1</sup> The yield is calculated on gold placed into leach pad inventory / tonnes placed on to

<sup>2</sup> The yield of TauTona, AngloGold Ashanti Brasil Mineração and Obuasi represents underground

<sup>3</sup> The yield of Sunrise Dam, Iduapriem and Siguiiri represents open-pit operations.

<sup>4</sup> Yatela and Cripple Creek & Victor Joint Venture operations yield reflects gold placed/tonnes placed.

<sup>5</sup> The yield of Bibiani represents surface and dump reclamation.

Rounding of figures may results in computational discrepancies.

<sup>1</sup> The yield is calculated on gold placed into leach pad inventory / tonnes placed on to leach pad.

<sup>2</sup> The yield of TauTona, AngloGold Ashanti Brasil Mineração and Obuasi represents underground

<sup>3</sup> The yield of Sunrise Dam, Iduapriem and Siguiiri represents open-pit operations.

<sup>4</sup> Yatela and Cripple Creek & Victor Joint Venture operations yield reflects gold placed/tonnes placed.

<sup>5</sup> The yield of Bibiani represents surface and dump reclamation.

# Shareholders' notice board

## Diary:

Financial year-end		31 December 2006
Annual financial statements	posting on or about	19 March 2007
Annual general meeting	11:00 SA time	4 May 2007
Quarterly reports released:		
Quarter ended 31 March 2007		5 May 2007
Quarter ended 30 June 2007		31 July 2007
Quarter ended 30 September 2007		1 November 2007
Quarter ended 31 December 2007		*1 February 2008

Dividends / Dividend Number	Declared	Last date to trade ordinary shares cum dividend	Payment date to shareholders	Payment date to ADS holders
Final – No. 101	12 February 2007	2 March 2007	16 March 2007	26 March 2007
Interim – No. 102	30 July 2007*	17 August 2007*	31 August 2007*	10 September 2007*
Final – No. 103	31 January 2008*	15 February 2008*	29 February 2008*	10 March 2008*

\* Approximate dates.

**Dividend policy:** Dividends are proposed by, and approved by the board of directors of AngloGold Ashanti, based on the interim and year-end financial statements. Dividends are recognised when declared by the board of directors of AngloGold Ashanti. AngloGold Ashanti expects to continue to pay dividends, although there can be no assurance that dividends will be paid in the future or as to the particular amounts that will be paid from year to year. The payments of future dividends will depend upon the Board's ongoing assessment of AngloGold Ashanti's earnings, after providing for long term growth are cash/debt resources, the amount of reserves available for dividend using going concern assessment and restrictions placed by the conditions of the convertible bond and other factors.

**Annual general meeting:** Shareholders on the South African register who have dematerialised their shares in the company (other than those shareholders whose shareholding is recorded in their own name in the sub-register maintained by their CSDP) and who wish to attend the annual general meeting in person, will need to request their CSDP or broker to provide them with the necessary authority in terms of the custody agreement entered into between them and the CSDP or broker.

In line with AngloGold Ashanti's commitment to improve its communications to shareholders, AngloGold Ashanti is in the process of implementing a procedure to enable shareholders to cast their votes electronically. This service will be available to South African resident shareholders only.

Such shareholders may also use the electronic online proxy voting facility for purposes of instructing their CSDP or broker as to how they wish to vote. In order for shareholders to use their online proxy voting facility, it is necessary to register for the service via the following website: <http://www.investorportal.co.za> (click on the AngloGold Ashanti icon). A demonstration of the electronic online proxy voting process may be viewed on <http://www.investorportal.co.za>. Registration is free of charge. The website will be available on or about 1 March 2007.

Further information will be included in the notice of the general meeting to be sent to shareholders on or about 19 March 2007.

**Change of details:** Shareholders are reminded that the onus is on them to keep the company, through its nominated share registrars, apprised of any change in their postal address and personal particulars. Similarly, where shareholders receive dividend payments electronically (EFT), they should ensure that the banking details which the share registrars and/or CSDPs have on file are correct.

Certain statements contained in this document, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices and production, the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects, and its liquidity and capital resources and expenditure, contain certain forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions, fluctuations in gold prices and exchange rates, and business and operational risk management. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of the annual report on Form 20-F or to reflect the occurrence of unanticipated events. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein. For a discussion on such risk factors, refer to AngloGold Ashanti's annual report on Form 20-F for the year ended 31 December 2005 dated 17 March 2006, which was filed with the Securities and Exchange Commission (SEC) on 20 March 2006.

## **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
