Enclosure: Press release – ANGLOGOLD ASHANTI REPORT FOR THE QUARTER 31 MARCH 2007
PREPARED IN ACCORDANCE WITH INTERNATIONAL
ACCOUNTING STANDARDS

Report

for the quarter ended 31 March 2007

Group results for the quarter

- Adjusted headline earnings were \$97m compared with \$46m in the previous quarter, which was affected by once-off accounting adjustments.
- Gold production was 1.33Moz and total cash costs were \$332/oz, due to fewer production shifts following the year-end break and lower by-product credits.
- Price received increased 4% to \$602/oz. Hedge delta reduced by 570,000 ounces despite a 4% increase in the closing spot price for the quarter.

NOTE: As highlighted in the last quarterly report, in order to simplify the reporting effect of the gold hedges on the received price, AngloGold Ashanti group financials now show an average received gold price, which is similar across all of its mines. The price received column from this table has therefore been removed.

Financial and operating review

OVERVIEW FOR THE QUARTER

Adjusted headline earnings were \$97m compared with \$46m in the previous quarter, which was affected by once-off accounting adjustments.

During the quarter the company continued to deliver into hedge commitments. Notwithstanding a spot gold price that at quarter-end was \$27/oz higher than the previous quarter's close, the hedge delta decreased by 570,000 ounces, to 9.59Moz. The received gold price, at \$602/oz, while 4% up on that of the prior quarter was 7.4% less than the ruling spot price for the period and well within the guidance provided to the market.

Operationally, production was lower by 10% although in line with company forecasts at 1.3Moz, while total cash costs, at \$332/oz, were 7% higher quarter-on-quarter, primarily as a result of the lower gold production that is customary due to holiday closures in the first quarter and a reduction in by-product revenue from uranium in South Africa and sulphuric acid in Brazil.

With the exception of an improved performance from Moab Khotsong, which posted a 7% production increase due to better yields, production across the South African assets was down this quarter, due in large part to the scheduled year-end break and associated fewer production shifts, as well as seismicity concerns at TauTona and reduced face advance at Great Noligwa. Total cash costs, at R72,979/kg, were consequently 16% higher, with Great Noligwa and Moab Khotsong posting respective increases of 55% and 15%, after corrosion in the South Vaal uranium treatment plant, which is being upgraded, led to reduced uranium production and therefore a by-product loss at these operations.

Of the other African operations, Obuasi in Ghana and Yatela in Mali both posted production improvements of 3%, with total cash costs declining 9% at Obuasi and remaining steady at Yatela. The other Malian operations had more difficult quarters, with production 15% lower at Morila due to a grade decline and 38% lower at Sadiola due to both recovery problems and fewer milling shifts. Geita, in Tanzania, also posted a marginal production decrease to 78,000oz, although total cash costs improved 26% after expenditure on equipment rebuilds and contractor services was reduced. Production at Siguiri in Guinea returned to more normal levels of 73,000oz after an exceptional fourth quarter 2006, while Navachab in Namibia reported steady production but lower grades, resulting in a 21% increase in total cash costs.

Regarding the international operations, Cerro Vanguardia in Argentina posted a particularly strong operational improvement, where production was 21% higher in line with the mining plan and total cash costs consequently declined 45%. Production was steady at Serra Grande and marginally lower at AngloGold Ashanti Brasil Mineração in Brazil, while total cash costs at Sunrise Dam in Australia were unchanged quarter-on-quarter in spite of a 3% production decline as a consequence of a planned mill shut-down. Cripple Creek & Victor, in the US, also reported excellent cost management, with total cash costs 7% lower despite a 26% reduction in production, after ore was loaded at greater distance from the leach pad liner.

This quarter unfortunately saw another poor safety performance. Fourteen employees lost their lives at work, while the lost time injury frequency rate deteriorated by 7.5% to 7.86 per million hours worked. In response to this unacceptable outcome, a full safety review has yielded a range of new outcome-based initiatives focused on key areas, which include a focus on fatigue management, production flexibility, skills retention, culture surveys and a renewed focus on fall of ground management. The example set by the CC&V mine in Colorado, which has operated for over three years without a lost-time injury, and with three other operations completing this quarter without a lost-time injury, remains the benchmark to which all operations aspire.

Looking ahead, production for the second quarter is estimated to be 1.39Moz at an average total cash cost of \$325/oz, assuming the following exchange rates: R7.30/\$, A\$/0.80, BRL2.12/\$ and Argentinean peso 3.13/\$. Capital expenditure is estimated at \$319m and will be managed in line with profitability and cash flow.

Following the partial slope failure at Geita's Nyankanga pit in late January 2007, work continues on optimising the new mine plan, with the operation on track to produce some 400,000 ounces of gold this year. The 2008 outlook for Geita, along with all other operations, will be completed during the latter part of the year.

For the full year, AngloGold Ashanti is targeting gold production of around 5.7Moz at a total cash cost of approximately \$320/oz based on the following exchange rates: R7.32/\$, A\$/0.79, BRL2.12/\$ and Argentinean peso 3.12/\$. This represents an increase of \$11/oz from previous market guidance and is mainly due to stronger local currency assumptions (\$5/oz) and higher royalty assumptions (\$5/oz), both arising from an improved gold price outlook for remainder of the year.

OPERATING RESULTS FOR THE QUARTER

SOUTH AFRICA

At **Great Noligwa**, lower face advance this quarter led to volume declining by 18%. Gold production consequently decreased to 3,863kg (124,000oz), despite a 6% higher yield, and total cash costs rose by 55% to R84,059/kg (\$362/oz), also as a result of a uranium by-product loss. Adjusted gross profit was 45% lower to R140m (\$19m), due to the significant cash cost increase.

The Lost-Time Injury Frequency Rate (LTIFR) was 16.13 lost-time injuries per million hours worked (11.49 for the previous quarter). Regrettably, two people were fatally injured in separate fall of ground incidents during the quarter.

At **Kopanang**, fewer shifts as a consequence of the year-end break led to a 12% decline in volumes and a related 18% decrease in production. Total cash costs accordingly increased 12% to R69,223/kg (\$298/oz) and adjusted gross profit, at R157m (\$22m), declined by 22%.

The LTIFR was 16.21 (13.75). Regrettably, three people died during the quarter in accidents involving machinery, explosives and a rock inundation.

Production at **Moab Khotsoeng** rose 7% quarter-on-quarter to 439kg (14,000oz) following better yields. Nevertheless, total cash costs were 15% higher at R134,175/kg (\$577/oz) primarily due to a uranium by-product loss. Adjusted gross loss improved 26% to R32m (\$4m) as a result of the yield-related production increase.

The LTIFR was 12.27 (9.53). Regrettably, two people died during the quarter, one in an explosives accident and the other as a result of mud rush during backfill operations.

At **Tau Lekoa**, gold production declined 4% to 1,325kg (43,000oz) following a 15% yield decline after inventory depleted during the year-end break in the previous quarter was replaced in the first quarter. Total cash costs consequently increased 14% to R100,102/kg (\$431/oz). Adjusted gross profit was R10m (\$1m) versus a loss of R25m (\$3m) in the previous quarter, due to a significantly improved price received.

The LTIFR was 11.14 (24.22).

At **Mponeng**, a combination of lower volumes and marginally lower yield resulted in a production decrease of 3% to 4,435kg (143,000oz). Total cash costs, at R59,318/kg (\$256/oz), were 2% higher after cost savings initiatives partially mitigated the effect of the lower production. Adjusted gross profit increased 25% to R280m (\$39m), primarily due to an improved price received.

The LTIFR was 11.96 (12.17). Regrettably, one fatal accident occurred during scraper winch operations.

Production at **Savuka** was 13% lower to 571kg (18,000oz) as a result of fewer shifts associated with the year-end break. Total cash costs accordingly increased 4% to R82,550/kg (\$355/oz) and adjusted gross profit decreased 34% to R25m (\$3m).

The LTIFR was 10.08 (13.97). Regrettably, one person died in a seismic-related fall of ground.

At **TauTona**, production declined 17% to 2,981kg (96,000oz) after seismicity in the previous quarter stopped the mining of several high-grade panels. Despite this, total cash costs decreased marginally to R64,782/kg (\$279/oz) following the implementation of cost savings initiatives. Adjusted gross profit decreased 3% to R143m (\$20m).

The LTIFR was 23.71 (17.27).

ARGENTINA

At **Cerro Vanguardia** (92.5% attributable), gold production improved 21% to 52,000oz, primarily due to higher feed grade. This improvement was in line with the mining plan sequence, and grades at or near this level are expected for the remainder of the year. Total cash costs, at \$188/oz, decreased 45% as a result of increases in both gold production and the silver by-product credit, in addition to lower maintenance costs. Adjusted gross profit rose to \$14m, versus a loss of \$1m in the previous quarter, as a consequence of increases in the quantity of gold sold and the price received, as well as significantly lower total cash costs.

The LTIFR was 2.27 (1.97).

AUSTRALIA

At **Sunrise Dam**, mining continued in the higher grade areas as planned, although tonnes treated were slightly lower as a consequence of a planned mill shut-down, and production accordingly decreased to 148,000oz, or by 3% quarter-on-quarter. Total cash costs, however, remained steady at A\$381/oz (\$299oz) as a result of higher grades. Adjusted gross profit declined 25% to A\$41m (\$32m), due in part to a lower price received.

The underground project, where mining continues to access the high-grade Western Shear zone ore, continued to supplement Sunrise Dam production. Development is also accessing further ore in the Dolly, Mako and Watu lodes. During the quarter, 506m of underground capital development and 1,485m of operational development were completed.

The LTIFR was 2.63 (0.00).

BRAZIL

At **AngloGold Ashanti Brasil Mineração**, the rainy season negatively affected heap leaching activities, which combined with lower feed grade from the Cuiabá mine, resulted in a production decrease of 4% to 66,000oz. Total cash costs rose 8% to \$207/oz, primarily due to a lower acid by-product credit, while adjusted gross profit declined 34% to \$21m, mainly as a consequence of a 19% decline in the price received, combined with higher total cash costs.

The LTIFR was 3.15 (2.15).

At **Serra Grande** (50% attributable), gold production remained steady at 24,000oz although total cash costs increased 13% to \$233oz due to rising power costs and an increase in the treatment of lower-grade material. Adjusted gross profit remained constant at \$8m, as the higher quantity of gold sold offset the effects of both a lower price received and higher total cash costs.

The LTIFR was 2.12 (2.32).

GHANA

At **Iduapriem** (85% attributable), production decreased 31% to 27,000oz after a gearbox problem in the mill reduced tonnage throughput by 37% quarter-on-quarter. Although this problem was resolved near the end of the quarter, total cash costs rose 23% to \$449/oz. Adjusted gross profit was 50% higher at \$3m, primarily due to an improved price received.

LTIFR was 1.09 (1.12)

At **Obuasi**, despite lower tonnage, improved grades resulted in a 3% production increase to 101,000oz. Consequently, total cash costs decreased 9% to \$397/oz, also aided by payroll savings associated with retrenchments undertaken in the previous quarter, as well as savings derived from procurement initiatives. Due in part to an improved price received, adjusted gross profit increased to \$5m, compared with a \$22m loss in the previous quarter, when a retrenchment cost of \$15m negatively impacted profit.

The LTIFR was 1.54 (2.63). Regrettably, three fatal accidents were recorded during the quarter. One employee died in a machinery-related accident, another employee was killed in a fall of ground and the third accident occurred when an employee fell into an excavation.

REPUBLIC OF GUINEA

After an exceptional fourth quarter 2006, production at **Siguiri** (85% attributable) returned to more normal levels in the first quarter of 2007, declining 5% to 73,000oz. This, combined with higher royalty payments, resulted in a total cash cost increase of 11% to \$424/oz. Adjusted gross profit was \$5m, versus a loss of \$3m in the previous quarter, mainly as a result of a higher price received.

The LTIFR was 0.00 (1.23)

MALI

At **Morila** (40% attributable), production decreased 15% to 41,000oz due to a 12% decline in recovered grade, and total cash costs consequently increased 13% to \$358/oz. Adjusted gross profit, at \$8m, was 38% lower due to declines in both production and the price received.

The LTIFR was 0.00 (1.18). Regrettably, two employees were fatally injured in February when an hydrochloric acid container exploded.

At **Sadiola** (38% attributable), production decreased 38% to 31,000oz due to declines in both tonnage throughput and recovered grades. The 13% decrease in tonnage throughput was the result of a deliberate slowing of the sulphide circuit to improve recoveries, as well as 13% fewer milling shifts than in the previous quarter. Recovery problems on the higher-grade sulphides, combined with a subsequent switch to lower-grade oxides pending resolution of the sulphide recovery problem, resulted in a 27% decline in recovered grade for the quarter. The combined effect on production of lower throughput and grades resulted in a 54% increase in total cash costs to \$427/oz, while adjusted gross profit declined 50% to \$6m, also due in part to a lower price received.

The LTIFR was 1.79 (0.98).

Production increased 3% at **Yatela** (40% attributable), to 35,000oz after the effect of a planned decline in tonnage stacked, related to 13% fewer production shifts, was offset by the release of higher-grade ounces stacked in the previous quarter. Total cash costs were marginally up at \$223/oz. Adjusted gross profit decreased 14% to \$12m, primarily due to a lower price received.

The LTIFR was 0.00 (1.66).

NAMIBIA

Gold production at **Navachab** was unchanged quarter-on-quarter at 20,000oz, with an increase in tonnage throughput offsetting the effect of a decline in recovered grade, which nonetheless led to a 21% increase in total cash costs to \$368/oz. Higher labour and explosives costs also contributed to the rise in total cash costs. Adjusted gross profit was equal to last quarter's level of \$4m.

The LTIFR was 12.83 (0.00).

TANZANIA

Production at **Geita** declined 3% to 78,000oz as a consequence of a 7% decline in tonnage throughput, which was partially offset by an improvement in recovered grade. Tonnage throughput was adversely affected during the quarter by wet ore, mill lubrication system problems and a major shut-down of the primary crusher for planned maintenance. Despite the production decline, total cash costs were 26% lower at \$434/oz due to reduced expenditure on equipment rebuilds and contractor services. Adjusted gross loss was \$1m, versus a break-even position in the previous quarter, as a result of declines in both production and the price received.

In early February, a slope failure occurred in the Nyankanga pit, which has delayed access to the exposed ore in this area. The mining plan for the Nyankanga pit is currently being revised.

The LTIFR was 0.74 (0.34).

NORTH AMERICA

At **Cripple Creek & Victor** (67% ownership with 100% interest in production until initial loans are repaid), gold production decreased 26% to 64,000oz after ore was loaded at greater distance to the leach pad liner. Total cash costs decreased 7% to \$242/oz, due in part to reduced contractor costs. Adjusted gross profit was 35% lower to \$15m, as a consequence of the production decline.

The LTIFR was 0.00 (0.00). In December, CC&V achieved 40 months without a lost-time accident.

Notes:

- All references to price received includes realised non-hedge derivatives.
- In the case of joint venture and operations with minority holdings, all production and financial results are attributable to AngloGold Ashanti.
- Adjusted gross profit (loss) is gross profit (loss) adjusted to exclude unrealised non-hedge derivatives and other commodity contracts.
- Adjusted headline earnings is headline earnings before unrealised non-hedge derivatives and other commodity contracts, fair value adjustments on the option component of the convertible bond and interest rate swaps and deferred tax thereon.
- Rounding of figures may result in computational discrepancies.

Exploration

Total exploration expenditure amounted to \$33m (\$24m expensed, \$9m capitalised) during the first quarter of 2007, compared to \$32m (\$16m expensed, \$16m capitalised) in the previous quarter.

BROWNFIELDS EXPLORATION

In **South Africa**, at Moab Khotsoeng, drilling of three surface boreholes intended to further define the geological model of the mine continued, with boreholes MZA9 and MGR7 each obtaining two further intersections of the Vaal Reef.

At Obuasi, in **Ghana**, surface borehole USDD3 was abandoned and USDD2 continued drilling, reaching a depth of 1,837m. The first of four planned long inclined boreholes, which will ultimately replace the surface boreholes and will explore the depths of the Obuasi orebody, has reached a depth of 145m.

In **Australia**, at the Boddington mine, seven diamond drill rigs have been employed in advancing resource conversion and near-mine extension exploration, including the testing of a near-mine geophysical target. Approximately 28,418m of new drilling in 34 holes has been completed.

At Siguiri, in **Guinea**, drilling continued at the Sintroko prospect, which is situated some 8km south of the existing operation and where results to date are encouraging. At the Kintinian prospect, situated 4km north of the mining operation, extension drilling continued. Drilling of the spent heap leach pads was completed during the quarter with a view to upgrading at least a portion of these into an Ore Reserve.

At Block 2, located 20km northwest of the plant, exploration activities were concentrated on drill testing four geochemical targets while diamond drilling continued at the Foulata and Saraya targets to further define mineralisation and structural controls. An airborne electromagnetic survey over all four blocks is scheduled for the second quarter.

At Geita, in **Tanzania**, significant results have been obtained from holes drilled in the Ridge 8 – Star & Comet Gap area, where the mineralisation continues to be open ended down-dip, while extension drilling at Area 3 Central and Area 3 West also returned encouraging results and suggests strike extensions between these two orebodies are likely. Positive results were received from down-dip extension drilling at the Matandani and Kululuma

orebodies, where verification of last year's electromagnetic survey has commenced and rotary air blast drilling of some anomalous areas is scheduled to commence in the second quarter.

At Morila in **Mali**, the last three holes of the grant-wide exploration programme were completed during the quarter, bringing the total to 92 holes. The programme, which defined a low-grade, uneconomic north-west trending zone associated with the main pit, has now entered an interpretive desktop phase.

At Sadiola, drilling has focused on upgrading selected portions of the hard sulphides to an Indicated Mineral Resource. This Phase 8 drilling targeted the high-grade portions of the main ore shoot as well as high-grade portions of the footwall bands, which are currently classified as Inferred Mineral Resources. This drilling is expected to be completed in the second quarter. Drilling of lower-priority mineralisation associated with this project will then commence.

At Yatela, 15 holes were drilled to the north-west of the current pit limits to investigate an area shown to be prospective for a minor pit extension. Results proved to be encouraging and further follow-up drilling is currently being planned for this area.

At Navachab, in **Namibia**, positive drilling results have been received from the North Pit area (mineralisation in the vicinity of the main orebody) as well as at the Gecko Central prospect. Stream sediment sampling will commence during the second quarter to cover new target areas and complement previous sampling completed both on and off the exploration lease area.

At Córrego do Itiúba, in Brazil, new targets (Paraiso and Paiol) are being defined by drilling.

At Cripple Creek & Victor in the **United States**, drilling in the Mine Life Extension Project area continues at a spacing of 30m to 60m, as results have thus far been encouraging. Drilling focused on the west side of the Altman deposit as well as the Globe Hill deposit where metallurgical core was collected. Development drilling continues in the South Cresson and Southwest Cresson areas to define the final pit depths and refine the high wall designs.

GREENFIELDS EXPLORATION

Greenfields exploration activities continued in seven countries (Australia, Colombia, the DRC, China, Laos, the Philippines, and Russia) during the first quarter of 2007. A total of 43,255m of diamond and reverse circulation (RC) drilling was completed, drill testing priority targets in Australia, the DRC, and Colombia.

In **Australia**, encouraging drill results continue to be obtained at the Tropicana JV Project (AngloGold Ashanti 70%, Independence Group 30%) from both the Tropicana and Havana zones. Encouraging results (at more than 1g/t cut-off) received during the quarter from the Tropicana zone included: 12m at 4.03g/t, 20m at 3.28g/t, 13m at 2.71g/t, 14m at 2.92g/t, and 13m at 2.91g/t.

Some exceptional drill results were also received from the southern high grade zone at Havana. At more than 1g/t cut-off, better results included: 17m at 4.56g/t, 26m at 9.35g/t, 8m at 5.4g/t, 15m at 5.34g/t, 15m at 6.86g/t, 15m at 19.8g/t, 23m at 4.26g/t, 8m at 6.01g/t, 22m at 4.9g/t, 17m at 6.73g/t, 13m at 11.8g/t, 11m at 10.5g/t, and 10m at 16.7g/t. Mineralisation at Havana is still open down-dip. Drilling to the south of Havana on broad-spaced sections of 200m x 100 metres has indicated that only weak mineralisation extends to the south.

RC drilling was also completed at the recently-identified Hat Trick anomaly, located 3km north of Tropicana, where assays are pending. Initial aircore drilling was also completed on several prospects located within a 10km radius of Tropicana and Havana. Some encouraging anomalies have been returned along strike to Tropicana-Havana, with priority anomalies scheduled to be drill-tested in the second quarter.

Regional exploration and target generation activities continued in **Colombia** during the first quarter. Drilling also continued on the bulk-tonnage gold target at Gramalote, and first-pass drilling of the new La Colosa gold-copper porphyry prospect was initiated. Significant drill results received during the first quarter from Gramalote included 204m at 1.06g/t (DDH 13), 124m at 0.57g/t (DDH 14), 120m at 0.88g/t (DDH 16), 380m at 1.06g/t (DDH 19), 246m at 0.75g/t (DDH 25) and 142m at 2.62g/t (DDH 27). Drill testing of the joint venture prospects El Carmen and Nechi (with local partner Mineros) and San Martin de Loba (with Bema Gold) are underway, with results pending.

Drilling continued in the Mongbwalu region of the north-eastern **DRC** with one diamond rig and two newly-arrived RC rigs. Diamond drilling focused on defining the resource potential of the mineralised mylonite zone immediately to the south-east of the Nzebi mine, which is no longer in production. The two RC rigs were dedicated to evaluating the shallow, open-pit resource potential of three sectors – Adidi North, Sokomutu and Pluto. Best drill results obtained during the quarter included: 5m at 9.10g/t (RA009) and 5m at 16.53g/t (RA005) from Adidi North, 5.55m at 16.60g/t (DD217) and 2.75m at 18.28g/t (DD 209) at Nzebi, and 5.53m at 8.59g/t (DD 134) in the Adidi mylonite at Pluto.

Regional target generation activities were also initiated in Concession 40. A 15,450 line kilometre airborne magnetic and radiometric survey was completed over the central Mongbwalu area and data processing and interpretation are in progress. Approximately 3,000 line kilometres of airborne time-domain electromagnetic data was also collected during the quarter.

In **Russia**, Trans-Siberian Gold shareholders approved the sale of the Veduga and Bogunay projects to AngloGold Ashanti. Both of these assets will now be incorporated in the Polymetal strategic alliance.

In **China**, activities were focused on obtaining final approvals for the co-operative joint ventures (CJVs) in Xinjiang and Gansu. Negotiations on a third CJV, located in Sichuan province, were also advanced during the quarter. Additionally, AngloGold Ashanti's option to earn-in to Dynasty Gold's interest in the Red Valley CJV was exercised.

In the **Philippines**, work continued on finalising the Mapawa and Outer Siana joint venture agreements with Red 5 Limited. Field mapping and rock chip sampling was carried out in the southern portion of the Outer Siana area.

In **Laos**, regional reconnaissance sampling and mapping programmes were undertaken in ten areas, which were defined from previous targeting exercises in the Truongson and Luang Prabang Fold Belts under the joint venture with Oxiana Limited. Anomalous stream sediment results were returned from three of these areas, with a maximum value of 1.77g/t. A further area returned anomalous rock chip values, with up to 15.6g/t. Follow up field work has commenced in the anomalous areas.

Review of the gold market

As in the previous quarter, spot gold traded in a range of \$87/oz during the first quarter of 2007, although at the significantly higher price levels of \$602/oz to \$689/oz versus \$561/oz to \$649/oz in the fourth quarter of 2006. The spot price remained above the \$640/oz level from the end of January through most of the quarter, with only a slight dip in early March.

The average spot price for the quarter of \$650/oz represents an increase of 6% over that of the previous quarter and a 17% increase over the average price in the same quarter in 2006.

The rand gold price maintained its strength from 2006, with a first quarter average of R150,686/kg. This marks a 5% increase on that of the previous quarter and is some 15% higher than the 2006 average of R131,373/kg.

PHYSICAL MARKET

During the period under review, gold showed little sign of sustained recovery in volume terms on the consumption side. Italian exports are expected to be weak; with US consumption figures accordingly lower. Middle Eastern and Asian consumers also appear to have been scared off by the gold price increase towards the end of the first quarter, which has continued into the second. European consumption, however, seemed to buck the general trend and remained solid throughout the quarter. Despite the suppressive effect of a fairly consistent rise in the gold price this quarter on consumption, the price increase has, on a positive note, also meant a ratcheting up of the floor at which gold consumers enter the market to sell scrap.

Looking at the remainder of 2007, gold demand is expected to strengthen as consumers grow accustomed to higher price levels. Fabrication demand continues to provide a firm base to the market and there have already been signs of a recovery in jewellery demand when prices stabilise even in the mid-\$600/oz range. This seems due to the re-filling of a depleted supply pipeline, especially after a somewhat stronger-than-expected fourth quarter, combined with the continued benefits associated with robust economic growth in major markets such as India and China. Net official selling is also anticipated to

stay subdued as sales in 2006 were well below the official quotas of the Central Bank Gold Agreement (CBGA) rules, while scrap supply is forecast to fall year-on-year as a major stock clear-out seems unlikely to be repeated.

In North America, Valentine's Day showed strong growth with some retailers reporting sales increases of over 20% compared to prior years. In the USA, the largest department store retailer in gold reported sales doubling on those of 2005, publicly stating that their unprecedented group marketing initiative had significant consumer impact and was instrumental in the growth of gold jewellery sales.

CENTRAL BANK SALES

Speculation that the CBGA signatories are unlikely to fulfil their sales quotas for the remaining three years of the Agreement was further enhanced this quarter by a report to the IMF proposing the sale of 400t in order to meet an expected shortfall in IMF annual revenue. The report recommends that potential sales not add to the announced volume of sales from official sources as stipulated by the original CBGA, of which the IMF is a signatory, indicating that the advisory group believes that the other signatories will continue to sell under their limit, making the IMF sale a reasonable way to address its expected revenue shortfall.

In the current CBGA year (September 2006 to September 2007), signatories have sold approximately 6Moz, or 38% of the allowable annual total.

INVESTMENT MARKET

Exchange traded gold holdings grew by nearly 6% in the first quarter of 2007, representing an increase of 36t. World-wide investment in ETFs reached \$14bn by the end of March, with two new ETF-like funds launched in India since the beginning of the year. Investor interest in physical gold also remained strong, exemplified by sales of the US Eagle and Buffalo coins by the US Mint equivalent to 129,500oz, up 4% on the same period in 2006.

PRODUCER HEDGING

The 2006 trend of producer de-hedging continued in the first quarter of 2007, with Gold Fields Limited buying back the 1.2Moz Western Areas gold hedge and Lihir Gold Limited announcing both the closure of its 934,500oz hedge book and the early repayment of an outstanding 480,000oz gold loan. While some new gold hedging is being undertaken by producers in association with debt financing obligations, it seems likely that producers will remain net de-hedgers in 2007, which should at least be supportive of the gold price.

CURRENCIES AND GOLD

The rand depreciated nearly 4% over the quarter, opening at R7.00/\$ and finishing at R7.30/\$, while trading for most of the quarter in a relatively tight band of between R7.30/\$ and R7.10/\$. In early March, renewed fears of slower global growth saw a high-yield and emerging market currencies sell-off, causing the rand to trade to an intra-quarter high of R7.54/\$. These fears proved short-lived, however, and the rand returned to trading below the R7.20/\$ level.

Against the Euro, the US dollar has begun to display sustained weakness, trading below the Euro/\$1.36 level. This dollar weakness seems likely to persist as interest rate expectations between the two currencies narrow, offering further support to the gold price.

Hedge position

As at 31 March 2007, the group had the following outstanding forward-pricing commitments against future production. The total net delta tonnage of the hedge on this date was 9.59Moz or 298t (at 31 December 2006: 10.16Moz or 316t).

The marked-to-market value of all hedge transactions making up the hedge positions was a negative \$3.027bn (negative R21.92bn) as at 31 March 2007 (at 31 December 2006: negative \$2.903bn or R20.324bn). The value was based on a gold price of \$663.20/oz, (some \$26.90/oz higher than that of the previous quarter), exchange rates of R7.24/\$ and A\$/0.8088 and the prevailing market interest rates and volatilities at that date.

This net delta position reflects a decrease of 0.57Moz or 17.6t during the quarter, as a result of delivering into maturing hedge positions and entering into new long positions as a continuation of the hedge reduction strategy.

The company continues to actively manage its hedge position in a value-accretive manner, whilst actively reducing the overall hedge delta. To this end, further long positions were entered into during the quarter.

These positions as at 31 March were 24,078kg at \$657/oz for 2007 and a further 6,758kg at \$658/oz for 2008.

For the quarter, the company received a price of \$602/oz, which is \$48/oz less than the average spot price of \$650/oz. The deficit between the received price and the spot price is likely to remain at 8% to 10% for the remainder of the year, provided the gold price continues to trade between \$600/oz and \$700/oz.

As at 2 May 2007, the marked-to-market value of the hedge book was a negative \$3.063bn (negative R21.56bn), based on a gold price of \$673.50/oz and exchange rates of R7.038/\$ and A\$/0.823 and the prevailing market interest rates and volatilities at the time.

These marked-to-market valuations are in no way predictive of the future value of the hedge position, nor of future impact on the revenue of the company. The valuation represents the cost of buying all hedge contracts at the time of valuation, at market prices and rates available at the time.

* Indicates a long position resulting from forward purchase contracts. The group enters into forward purchase contracts as part of its strategy to actively manage and reduce the size of the hedge book.

** The Delta of the hedge position indicated above is the equivalent gold position that would have the same marked-to-market sensitivity for a small change in the gold price. This is calculated using the Black-Scholes option formula with the ruling market prices, interest rates and volatilities as at 31 March 2007.

The following table indicates the group's currency hedge position at 31 March 2007

Segmental reporting

for the quarter ended 31 March 2007

Based on risks and returns the directors consider that the primary reporting format is by business segment. The directors consider that there is only one business segment being mining, extraction and production of gold. Therefore the disclosures for the primary segment have already been given in the abbreviated financial statements. The secondary reporting format is by geographical analysis by origin.

Notes

for the quarter ended 31 March 2007

1. Basis of preparation

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for certain financial instruments which are stated at fair value. The group's accounting policies used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2006 and revised International Financial Reporting Standards (IFRS) which are effective 1 January 2007, where applicable.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS34, JSE Listings Requirements and in the manner required by the South African Companies Act, 1973 for the preparation of financial information of the group for the quarter ended 31 March 2007.

2. Revenue

	Quarter ended		Year ended		Quarter ended		Year ended	
	March	Dec	March	Dec	March	Dec	March	Dec
	2007	2006	2006	2006	2007	2006	2006	2006
	Unaudited	Unaudited	Unaudited	Audited	Unaudited	Unaudited	Unaudited	Audited
	SA Rand million				US Dollar million			
Revenue consists of the following principal categories:								
Gold income	5,450	5,634	4,246	20,137	754	770	690	2,964
By-products (note 3)	145	272	181	749	20	38	29	110
Interest received	73	69	30	218	10	10	5	32
	5,668	5,975	4,456	21,104	784	818	724	3,106

3. Cost of sales

	Quarter ended		Year ended		Quarter ended		Year ended

Rounding of figures may result in computational discrepancies.

6. Taxation

	Quarter ended		Year ended		Quarter ended		Year ended	
	March	Dec	March	Dec	March	Dec	March	Dec
	2007	2006	2006	2006	2007	2006	2006	2006
	Unaudited	Unaudited	Unaudited	Audited	Unaudited	Unaudited	Unaudited	Audited
	SA Rand million				US Dollar million			
Current tax								
Normal taxation	(445)	(261)	(222)	(1,370)	(60)	(37)	(36)	(201)
Disposal of tangible assets (note 8)	(4)	(2)	(4)	(13)	(1)	–	(1)	(2)
Under provision prior year ⁽¹⁾	(75)	(49)	–	(49)	(11)	(7)	–	(7)
	(524)	(312)	(226)	(1,432)	(72)	(44)	(37)	(210)
Deferred taxation								
Temporary differences	(5)	(73)	(15)	(215)	–	(7)	(3)	(30)
Unrealised non-hedge derivatives and other commodity contracts	82	37	202	742	11	15	33	106
Impairment and disposal of tangible assets (note 8)	(4)	(57)	–	(56)	(1)	(8)	–	(8)
Change in estimated deferred taxation	–	(271)	–	(271)	–	(38)	–	(38)
	73	(364)	187	200	10	(38)	30	30
Total taxation	(451)	(676)	(40)	(1,232)	(62)	(82)	(7)	(180)

(1) The prior year under provision of \$11m (R75m) mainly relates to an adjustment in respect of World Gold Council levies relating to our non-South African operations.

7. Discontinued operations

The Ergo surface dump reclamation, which forms part of the South African operations, has been discontinued as the operation has reached the end of its useful life. The results of Ergo are presented below:

	Quarter ended		Year ended		Quarter ended		Year ended	
	March	Dec	March	Dec	March	Dec	March	Dec
	2007	2006	2006	2006	2007	2006	2006	2006
	Unaudited	Unaudited	Unaudited	Audited	Unaudited	Unaudited	Unaudited	Audited
	SA Rand million				US Dollar million			
Gold income	2	6	6	26	–	1	1	4
Cost of Sales	(5)	(19)	(5)	(39)	(1)	(3)	(1)	(6)
Gross (loss) profit	(3)	(13)	1	(13)	(1)	(2)	–	(2)
Taxation	(3)	12	(8)	1	–	2	(1)	–
Loss from discontinued operations	(6)	(1)	(7)	(12)	(1)	–	(1)	(2)

Rounding of figures may result in computational discrepancies.

8. Headline (loss) earnings

	Quarter ended		Year ended		Quarter ended		Year ended	
	March	Dec	March	Dec	March	Dec	March	Dec
	2007	2006	2006	2006	2007	2006	2006	2006
	Unaudited	Unaudited	Unaudited	Audited	Unaudited	Unaudited	Unaudited	Audited
	SA Rand million				US Dollar million			
The (loss) profit attributable to equity shareholders has been adjusted by the following to arrive at headline (loss) earnings:								
(Loss) profit attributable to equity shareholders	(133)	69	(1,079)	(587)	21	(72)	(186)	(44)
Impairment of tangible assets (note 5)	1	41	2	44	–	6	–	6
(Profit) loss on disposal of assets	6	(321)	(6)	(376)	1	(46)	(1)	(54)
Taxation on items above – current portion (note 6)	4	2	4	13	1	–	1	2
Taxation on items above – deferred portion (note 6)	4	57	–	56	1	8	–	8
Net loss from discontinued operations (note 7)	6	1	7	12	1	–	1	2
Headline (loss) earnings	(112)	(150)	(1,072)	(838)	24	(103)	(185)	(80)
Cents per share ⁽¹⁾								
Headline (loss) earnings	(40)	(54)	(404)	(307)	9	(37)	(70)	(29)

(1) Calculated on the basic weighted average number of ordinary shares.

9. Shares

	March	Quarter ended	March	Year ended
	2007	Dec	2006	Dec
		2006		2006
Authorised:				
Ordinary shares of 25 SA cents each	400,000,000	400,000,000	400,000,000	400,000,000
E ordinary shares of 25 SA cents each	4,280,000	4,280,000	–	4,280,000
A redeemable preference shares of 50 SA cents each	2,000,000	2,000,000	2,000,000	2,000,000
B redeemable preference shares of 1 SA cent each	5,000,000	5,000,000	5,000,000	5,000,000
Issued and fully-paid:				
Ordinary shares in issue	276,688,382	276,236,153	265,117,213	276,236,153
E ordinary shares in issue	4,149,230	4,185,770	–	4,185,770
Total ordinary shares:	280,837,612	280,421,923	265,117,213	280,421,923
A redeemable preference shares	2,000,000	2,000,000	2,000,000	2,000,000
B redeemable preference shares	778,896	778,896	778,896	778,896
In calculating the diluted number of ordinary shares outstanding for the year, the following were taken into consideration:				
Ordinary shares	276,426,639	275,598,456	264,581,077	272,214,937
E Ordinary shares	4,167,212	773,762	–	194,954
Fully vested options	600,219	304,280	483,291	398,326
Weighted average number of shares	281,194,070	276,676,498	265,064,368	272,808,217
Dilutive potential of share options	641,741	–	509,716	–
Diluted number of ordinary shares ⁽¹⁾	281,835,811	276,676,498	265,574,084	272,808,217

(1) The Basic and diluted number of ordinary shares are the same for December 2006 quarter and the year ended 2006 as the effects of shares for performance related options are anti-dilutive.

Rounding of figures may result in computational discrepancies.

10. Ordinary share capital and premium

Orders placed and outstanding on capital contracts at the prevailing rate of exchange	2,966	2,475	2,101	407	354	341

Liquidity and capital resources:

To service the above capital commitments and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to foreign investment and exchange control laws and regulations and the quantity of foreign exchange available in offshore countries. In addition distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other financing arrangements contain financial covenants and other similar undertakings. To the extent that external borrowings are required, the groups covenant performance indicates that existing financing facilities will be available to meet the above commitments. To the extent that any of financing facilities mature in the near future, the group believes that these facilities can be refinanced on similar terms to those currently in place.

15. Contingent liabilities

AngloGold Ashanti's contingent liabilities at 31 March 2007 are detailed below:

Water pumping cost – South Africa – The group is involved in a legal dispute regarding the responsibility for water pumping of the Margaret shaft, which belongs to Stilfontein. Following an attempt by DRDGold to liquidate its North West operations and avoid incurring pumping cost, AngloGold Ashanti Limited launched an urgent application against DRDGold and government departments requesting the court to order the continued pumping of water at the Stilfontein Mines. The cessation of water pumping is likely to cause flooding in various Vaal River operations. The Department of Water Affairs and Forestry responded by issuing directives to the mining companies directing that they share the costs of pumping at the Margaret Shaft.

The three mining companies, Simmer and Jack Mines, Harmony Gold Mining Company and AngloGold Ashanti, are finalising an arrangement in which responsibility for the water pumping will be transferred to an independent newly formed company. The group responsibility will be limited to providing one-third of the start-up capital on loan account and the three mining companies will be members of the newly formed company.

Should the proposed arrangement not be acceptable to the courts and/or the regulatory authorities the proposal may have to be amended. Due to this uncertainty, no estimate is made of any potential liabilities.

Groundwater pollution – South Africa – AngloGold Ashanti has identified a number of groundwater pollution sites at its current operations in South Africa, and has investigated a number of different technologies and methodologies that could possibly be used to remediate the pollution plumes. The viability of the suggested remediation techniques in the local geological formation in South Africa is however unknown. No sites have been remediated and present research and development work is focused on several pilot projects to find a solution that will in fact yield satisfactory results in South African conditions. Subject to the technology being developed as a remediation technique, no reliable estimate can be made for the obligation.

Provision of surety – South Africa – AngloGold Ashanti has provided sureties in favour of a lender on a Gold loan facility with its affiliate Oro Africa (Pty) Ltd and one of its subsidiaries to a maximum value of R100m (\$14m). The suretyship agreements have a termination notice period of 90 days.

Sales tax on gold deliveries – Brazil – Mineração Serra Grande S.A.(MSG), the operator of the Crixas mine in Brazil, has received two tax assessments from the State of Goiás related to payments of sales taxes on gold deliveries for export: one for the period between February 2004 and June 2005 and the other for the period between July 2005 and May 2006. The tax authorities maintain that whenever a taxpayer export gold mined in the state of Goiás, through a branch located in a different Brazilian State, it must obtain an authorisation from the Goiás State Treasury by means of a Special Regime Agreement (*Termo de Acordo re Regime Especial – TARE*). The Serra Grande operation is co-owned with Kinross Gold Corporation. The company manages the operation and its attributable share of the first assessment is approximately \$29m. In May 2006 MSG signed the TARE, which authorised the remittance of gold to the company's branch in Minas Gerais specifically for export purposes.

In November 2006 the administrative council's second chamber ruled in favour of Serra Grande and fully cancelled the tax liability related to the first period. The State of Goiás may still appeal to the full board of the State of Goiás tax administrative council. The second assessment was issued by the State of Goiás in October 2006 on the same grounds as the first one, and the attributable share of the assessment is approximately \$18m. The company believes both assessments are in violation of Federal legislation on sales taxes.

VAT Disputes – Brazil – MSG received a tax assessment in October 2003 from the State of Minas Gerais related to sales taxes on gold allegedly returned from the branch in Minas Gerais to the company head office in the State of Goiás. The tax administrators rejected the company's appeal against the assessment. The company is now dismissing the case at the judicial sphere. The company's attributable share of the assessment is approximately \$6m.

VAT Dispute – Brazil – Morro Velho is involved in a dispute with tax authorities. As a result of an erroneous duplication of a shipping invoice between two states in Brazil, tax authorities are claiming that VAT is payable on the second invoice. The amount involved is approximately \$5m.

Social security payments – Brazil – AngloGold Ashanti Brasil Mineração is being accused of failing to pay certain required payments towards the social security system in Brazil during the period 1997 to 2004. There is doubt if amounts are actually due and payable under applicable law. The amount involved is approximately \$2m.

Capital cost of water pipelines – Namibia – A potential liability of approximately \$1m exists at Navachab in Namibia to pay the outstanding capital cost of the water pipeline in the event of mine closure prior to 2019.

16. Concentration of risk

There is a concentration of risk in respect of reimbursable value added tax and fuel duties from the Malian government:

- Reimbursable value added tax due from the Malian government amounts to an attributable \$37m at 31 March 2007 (31 December 2006: attributable \$34m). The last audited value added tax return was for the period ended 31 December 2006 and at the balance sheet date an attributable \$27m was still outstanding and \$10m is still subject to audit. The accounting processes for the unaudited amount are in accordance with the processes advised by the Malian government in terms of the previous audits.
- Reimbursable fuel duties from the Malian government amounts to an attributable \$10m at 31 March 2007 (31 December 2006: attributable \$11m). Fuel duty refund claims are required to be submitted before 31 January of the following year and are subject to authorisation by firstly the Department of Mining and secondly the Custom and Excise authorities. The Customs and Excise authorities have approved an attributable \$3m, which is still outstanding, whilst an attributable \$7m is still subject to authorisation. The accounting processes for the unauthorised amount are in accordance with the processes advised by the Malian government in terms of the previous authorisations. As from February 2006 all fuel duties have been exonerated.

The government of Mali is a shareholder in all the Malian entities and protocol agreements governing repayments of certain of these amounts have been signed. All payments as scheduled in terms of the protocol agreements have been recovered up to March 2007. The amounts outstanding have been discounted to their present value at a rate of 5%.

There is a concentration of risk in respect of reimbursable value added tax and fuel duties from the Tanzanian government:

- Reimbursable value added tax due from the Tanzanian government amounts to \$15m at 31 March 2007 (31 December 2006: \$14m). The last audited value added tax return was for the period ended 30 November 2006 and at the balance sheet date \$14m was still outstanding and \$1m is still subject to audit. The accounting processes for the unaudited amount are in accordance with the processes advised by the Tanzanian government in terms of the previous audits. The outstanding amounts have been discounted to their present value at a rate of 5%.

- Reimbursable fuel duties from the Tanzanian government amounts to \$22m at 31 March 2007 (31 December 2006: \$18m). Fuel duty claims are required to be submitted after consumption of the related fuel and are subject to authorisation by the Customs and Excise authorities. Claims for refund of fuel duties amounting to \$13m have been lodged with the Customs and Excise authorities, which are still outstanding, whilst claims for refund of \$9m have not yet been submitted. The accounting processes for the unauthorised amount are in accordance with the processes advised by the Tanzanian government in terms of the previous authorisations. The outstanding amounts have been discounted to their present value at a rate of 5%.

17. Attributable interest

Although AngloGold Ashanti holds a 66.7% interest in Cripple Creek & Victor Gold Mining Company Limited, it is currently entitled to receive 100% of the cash flows from the operation until the loan, extended to the joint venture by AngloGold Ashanti USA Inc., is repaid.

18. Borrowings

AngloGold Ashanti's borrowings are interest bearing.

19. Announcements

On 13 February 2007, the AngloGold Ashanti board approved a project to develop the Mponeng mine below the 120 level, adding some 2.5Moz of gold and 8 years to the mine's life, at a capital cost of \$252m. Production is due to commence in 2013.

On 5 February 2007, AngloGold Ashanti informed the market that a partial slope failure occurred in an intermediate footwall of the Nyankanga pit at Geita Gold Mine on Saturday, 3 February 2007. The pit had been monitored by slope stability radar and was safely evacuated in advance of the failure. No injury to employees or contractors occurred and there was no damage to equipment.

20. Dividend

Final dividend No. 101 of 240 South African cents or 16.859 UK pence or 3,041.21 cedis per share was paid to registered shareholders on 16 March 2007, while a dividend of 8.4144 Australian cents per CHESS Depositary Interest (CDI) was paid on the same day. On 19 March 2007, a dividend of 30.41 cedis per Ghanaian Depositary Share (GhDS) was paid to holders thereof. Each CDI represents one-fifth of an ordinary share, and 100 GhDSs represents one ordinary share. A dividend was paid to holders of American Depositary Receipts (ADRs) on 26 March 2007 at a rate of 32.384 US cents per American Depositary Share (ADS). Each ADS represents one ordinary share.

By order of the Board

Non-GAAP disclosure

From time to time AngloGold Ashanti may publicly disclose certain "non-GAAP" financial measures in the course of its financial presentations, earnings releases, earnings conference calls and otherwise.

The group utilises certain non-GAAP performance measures and ratios in managing its business and may provide users of this financial information with additional meaningful comparisons between current results and results in prior operating periods. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measure of performance prepared in accordance with GAAP. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies use.

A Headline earnings adjusted for the loss on unrealised non-hedge derivatives and other commodity contracts and fair value adjustments on convertible bond

	Quarter ended		Year ended		Quarter ended		Year ended	
	Mar 2007	Dec 2006	Mar 2006	Dec 2006	Mar 2007	Dec 2006	Mar 2006	Dec 2006
	Unaudited	Unaudited	Unaudited	Unaudited	Unaudited	Unaudited	Unaudited	Unaudited
	SA Rand million				US Dollar million			
Headline (loss) earnings (note 8)	(112)	(150)	(1,072)	(838)	24	(103)	(185)	(80)
Loss on unrealised non-hedge derivatives and other commodity contracts (note C)	1,028	320	1,566	4,507	103	137	264	615
Deferred tax on unrealised non-hedge derivatives (note 6)	(82)	(37)	(202)	(742)	(11)	(15)	(33)	(106)

Headline earnings adjusted for the loss on unrealised non-hedge derivatives and other commodity contracts and fair value adjustments on convertible bond ⁽²⁾	699	343	525	2,790	97	46	85	413
Cents per share ⁽¹⁾								
Headline earnings adjusted for the loss on unrealised non-hedge derivatives and fair value adjustments on convertible bond ⁽²⁾	249	124	198	1,023	34	17	32	151

⁽¹⁾ Calculated on the basic weighted average number of ordinary shares.

⁽²⁾ Loss on non-hedge derivatives and other commodity contracts in the income statement comprise the change in fair value of all non-hedge derivatives and other commodity contracts as follows:

- Open positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the current reporting date; and
- Settled positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the date of settlement.

Headline earnings adjusted for the effect of unrealised non-hedge derivatives and other commodity contracts and fair value adjustments on convertible bond, is intended to illustrate earnings after adjusting for:

- The unrealised fair value change in contracts that are still open at the reporting date, as well as, the unwinding of the historic marked-to-market value of the position settled in the period;
- Investment in hedge restructure transaction: During the hedge restructure in December 2004 and March 2005 quarters, \$83m and \$69m in cash was injected respectively into the hedge book in these quarters to increase the value of long-dated contracts. The entire investment is short-dated derivatives (certain of which have now matured), for the purposes of the adjustment to earnings, will only be taken into account when the realised portion of long-dated non-hedge derivatives are settled, and not when the short-term contracts are settled;
- The unrealised fair value change on the option component of the convertible bond; and
- The unrealised fair value change on the onerous uranium contracts

					41,239	45,697	41,667	175,253

¹ The yield is calculated on gold placed into leach pad inventory / tonnes placed on to leach pad.

² The yield of TauTona, AngloGold Ashanti Brasil Mineração and Obuasi represents underground operations.

³ The yield of Sunrise Dam and Siguirí represents open-pit operations.

⁴ Yatela and Cripple Creek & Victor Joint Venture operations yield reflects gold placed/tonnes placed.

⁵ The yield of Bibiani represents surface and dump reclamation.

Rounding of figures may result in computational discrepancies.

¹ The yield is calculated on gold placed into leach pad inventory / tonnes placed on to leach pad.

² The yield of TauTona, AngloGold Ashanti Brasil Mineração and Obuasi represents underground operations.

³ The yield of Sunrise Dam and Siguirí represents open-pit operations.

⁴ Yatela and Cripple Creek & Victor Joint Venture operations yield reflects gold placed/tonnes placed.

⁵ The yield of Bibiani represents surface and dump reclamation.

Rounding of figures may result in computational discrepancies.

PRINTED BY INCE (PTY) LIMITED

Certain statements contained in this document, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices and production, the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects, and its liquidity and capital resources and expenditure, contain certain forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions, fluctuations in gold prices and exchange rates, and business and operational risk management. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of the annual report on Form 20-F or to reflect the occurrence of unanticipated events. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein. For a discussion on such risk factors, refer to AngloGold Ashanti's annual report on Form 20-F for the year ended 31 December 2005 dated 17 March 2006, which was filed with the Securities and Exchange Commission (SEC) on 20 March 2006.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
