SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER  
PURSUANT TO RULE 13a-16 OR 15d-16 OF  
THE SECURITIES EXCHANGE ACT OF 1934

Report on Form 6-K dated August 4, 2011

Commission File Number 1-14846

AngloGold Ashanti Limited

(Name of registrant)

76 Jeppe Street

Newtown, 2001

(P.O. Box 62117, Marshalltown, 2107)

South Africa

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F  Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Yes  No

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Yes  No

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes  No

Enclosure: Press release **ANGLOGOLD ASHANTI REPORT FOR THE QUARTER AND SIX MONTHS ENDED 30 JUNE 2011, PREPARED IN ACCORDANCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS (IFRS)**

# Report

## for the quarter and six months ended 30 June 2011

### Group results for the quarter....

- ❖ Adjusted headline earnings rise 68% to record \$342m, or 89 US cents per share.
- ❖ Interim dividend rises 38% to 90 South African cents per share, or 44% to 13 US cents per ADS.
- ❖ Total cash costs at \$705/oz, well within guidance; production up 5% to 1.086Moz.
- ❖ Operating improvements and gold price drive cash flow from operations 24% higher to \$635m.
- ❖ Free cash flow at \$207m after capex, finance costs and tax; net debt lowered to \$866m.
- ❖ Continental Africa posts output growth and 14% cost reduction; Obuasi and Geita improve.
- ❖ South African production up 7%, shows good cost control despite currency gain and increased power tariff.
- ❖ Uranium production of 338klbs and silver production of 642koz.
- ❖ Americas region grows production 6%, keeps costs flat in challenging inflationary environment.
- ❖ Cerro Vanguardia's output gains 7%; total cash costs drop 39%, the lowest in the group at \$264/oz.
- ❖ Brownfield exploration campaigns in Argentina, Brazil and Australia return high grade intersections.

# Financial and Operating Report

## OVERVIEW FOR THE QUARTER

### FINANCIAL AND CORPORATE REVIEW

Operating production and cost performances in South Africa, Continental Africa and the Americas, along with full exposure to the record gold price drove marked improvements in earnings and cash flow generation during the second quarter. Adjusted headline earnings surged by 68% to a record \$342m, or 89 US cents a share in the three months to 30 June, compared with \$203m, or 53 US cents the previous quarter.

Net profit attributable to equity shareholders rose from \$241m recorded in the first quarter to \$470m for the second quarter. This increase was on the back of improved earnings and fair value gains on the two convertible bonds.

Cash generated from operating activities improved by 24%, to \$635m during the period under review. Free cash flow, after all capital expenditure, finance costs and tax, was \$207m. These robust inflows helped further strengthen the group's balance sheet. Net debt (excluding the mandatory convertible bond) was further reduced to \$866m at the end of the quarter, from \$1.1bn at the end of March. About two-thirds of AngloGold Ashanti's targeted capital expenditure for the year of \$1.6bn will be spent over the remainder of the year, with a commensurate impact on net debt in the second half.

Given the improved cash flow, the board has declared a dividend of 90 South African cents per share, an increase of 38% over the corresponding period last year. The increase is largely in line with the improvement in the gold price over the period and reflects AngloGold Ashanti's desire to improve returns to shareholders while retaining the capacity to fund its growth projects.

### OPERATING RESULTS

Production and total cash costs for the three months to 30 June 2011, a period impacted by 5 public holidays and a local government election in South Africa, were broadly in line with guidance at 1.086Moz at \$705/oz, compared with 1.039Moz at \$706/oz the previous quarter. Guidance for the second quarter was 1.09Moz at a total cash cost of \$760/oz.

The cost performance was bolstered by improved production and efficiencies at key assets, greater by-product credits and stockpiling of ore during the shutdown and repair of the SAG mill at Geita during the quarter. Continental Africa delivered good production gains coupled with a 14% drop in total cash costs, while South Africa and the Americas showed rising production and good cost control at key assets. Australia continued to face challenges following the first quarter's flooding, as wet weather hampered recovery efforts. Group total cash costs were marginally better than the previous quarter despite increased power tariffs in South Africa.

### SAFETY

Tragically, three fatalities occurred during the quarter in separate incidents following a seismic event at Mponeng, surface accident at the Cuiabá mine in Brazil and at an exploration site in Eritrea. Continued focus on mitigating risks in the workplace, through visible leadership at each operation and implementation of the Safety Transformation component of Project ONE, remains a priority for each member of the company. AngloGold Ashanti's fatality frequency rate has improved by 73% since 2007 and is some 60% better than its local peer group. The company's all injury frequency rate of 10 injuries per million hours worked was the lowest in AngloGold Ashanti's history, indicating that efforts toward effecting a comprehensive change in attitude toward safety across every level in the group are gaining traction. South Africa and Continental Africa fared especially well in this regard during the quarter. There remains, as always, room for further improvement.

### OPERATING REVIEW

The **South African** operations produced 431,000oz at a total cash cost of \$688/oz in the second quarter of 2011, compared with 401,000oz at a total cash cost of \$637/oz in the previous quarter. The increase in production resulted from continued operational improvements following the seasonally slow first quarter. The increase in total cash costs was contained to 8%, despite a stronger rand, winter electricity tariffs and higher royalties triggered by the rising gold price. At the West Wits operations, production from Mponeng, the company's largest mine, increased by 8% to 127,000oz after temperature constraints and safety related production stoppages which hampered operations in the first quarter, were addressed. Neighbouring TauTona experienced yield improvements following a release of tons locked up in the VCR shaft area and achieved higher volumes mined. These factors together afforded a 11% increase in gold production to 60,000oz, at a total cash cost of \$848/oz. At the Vaal River operations, production at Moab Khotsong increased by 10% to 75,000oz, after operational constraints related to high temperatures and compressed air, which affected the previous quarter, were addressed. Kopanang managed a 4% increase in production to 83,000oz following fewer safety related

stoppages, which led to improved area mined and tons milled. Total cash costs, however, increased by 16% to \$684/oz due to winter electricity tariffs and royalties. Great Noligwa was another beneficiary of fewer safety-related interruptions as well as a resolution to ore pass blockages that impacted the previous quarter. The mine posted a 23% increase in production to 27,000oz. Surface Operations production remained at 48,000oz, however total cash costs increased 9% to \$588/oz.

The **Continental Africa** operations produced 377,000oz at a total cash cost of \$705/oz in the second quarter of 2011, compared with 363,000oz at a total cash cost of \$819/oz the previous quarter. In Ghana, Obuasi staged a strong operating performance with a 19% increase in production to 83,000oz and a 28% improvement in total cash costs to \$732/oz. The improvement stemmed principally from improved availability of underground equipment, a successful drive to improve consistency in plant operations and access to higher grade blocks. Iduapriem, where the plant underwent a scheduled maintenance shutdown, posted a planned 21% decline in output to 44,000oz and a resultant increase in total cash costs to \$891/oz. Notwithstanding a shutdown to repair and upgrade one of the ends on the SAG mill, Geita, in Tanzania, benefited from higher grades mined at the Nyankanga and Geita Hill pits. Production at the mine rose 14% to 107,000oz, while total cash costs dropped 46% to \$441/oz. In Mali, improved grades and throughput pushed production from Sadiola 10% higher to 33,000oz, while total cash costs improved marginally to \$687/oz. Morila's production rose 14% to 25,000oz as higher grades were processed from stockpiles. In Guinea, Siguiri's production increased marginally to 66,000oz, but increased royalties following the higher gold price, along with rising fuel prices and use of consumables drove total cash costs 19% higher to \$801/oz. Navachab, in Namibia, continued to face challenges related to its DMS plant, compounded by lower recovered grades and tonnages. Production fell 18% to 14,000oz and total cash costs rose 26% to \$1,202/oz.

The **Americas** operations produced 216,000oz at a total cash cost of \$487/oz in the second quarter of 2011, compared with 203,000oz at a total cash cost of \$480/oz in the previous quarter. In Argentina, Cerro Vanguardia delivered another strong performance with higher grades driving a 7% rise in production to 48,000oz. Higher silver prices helped push total cash costs 39% lower to \$264/oz, again the lowest for the group. In Brazil, Serra Grande faced dilution issues and lower recoveries due to challenges experienced with filtration. Both issues have been addressed. Production fell 18% to 14,000oz, while total cash costs rose 24% to \$881/oz. At AngloGold Ashanti Córrego do Sítio Mineração (AngloGold Ashanti Mineração), production was unchanged at 84,000oz, as higher tonnages offset lower grades. A better performance from the underground fleet at Cuiaba offset the effects of lower grade, a stronger real and general cost inflation in Brazil. Total cash costs rose 11% to \$493/oz. In the US, Cripple Creek & Victor's production increased by 23% to 70,000oz as ore was placed on newer sections of the pad, closer to the liner. Total cash costs rose 11% to \$546/oz, due mainly to higher diesel prices and mining costs.

**Australasia** produced 61,000oz at a total cash cost of \$1,595/oz in the second quarter of 2011, compared with 72,000oz at a total cash cost of \$1,153/oz the previous quarter. This quarter's figure includes a non-cash deferred stripping charge of \$93/oz. The pit-wall slippage at Sunrise Dam, together with the continued impact of the previous quarter's flood, severely affected all aspects of the operation. Mining in the open pit was suspended during the quarter while dewatering the underground mine remained a priority. Additional support work required for the switchback to the main access ramp was also undertaken during the quarter, extending the period needed to remediate the operation.

## PROJECTS

AngloGold Ashanti incurred capital expenditure of \$346m during the quarter, of which \$126m was spent on growth projects. Of the growth-related capital, \$61m was spent in the Americas, \$30m was spent in Continental Africa, \$16m in Australasia and \$19m in South Africa.

The team at the Córrego do Sítio project, in Brazil, continued to make swift progress, despite stiff competition for skilled engineering personnel in Brazil. Full production for the first phase of the project, estimated at 140,000oz a year, remained on schedule for 2013. Drainage for the stockpiles at the site was completed, water treatment piping installed and tested and civil engineering work for the crushing and milling circuit finished. Installation of the SAG, primary-ball and regrind mills was also finished and the lining of the autoclave and the conditioning tank completed. Commissioning of the milling and flotation areas will get underway during the third quarter. Work on the Sao Bento plant also continued during the quarter, with key equipment refurbished, including the existent flotation cells and warehouse and laboratory facilities. In the mining area, ore production reached 40,800 tons during the quarter.

At the Tropicana Gold Project (AngloGold Ashanti 70% and manager) and Independence Group NL (30%) construction works focused predominantly on the 220km long site access road during the quarter. Although heavy rain in June caused work to be suspended for 11 days, the road remains on schedule to be completed in the fourth quarter.

During the second quarter, the open pit mining contract was finalised and awarded to Macmahon Holdings Ltd. Procurement negotiations are underway on the long lead-time major equipment packages and detailed engineering design is on track for completion ahead of the start of processing plant construction in the second quarter of 2012. Recruitment of the Tropicana Gold Mine management team has been completed.

The Mineral Resource and Ore Reserve at Tropicana was updated as at 30 June 2011 to reflect recent increases in the gold price and changes to the resource model through increased drill density in the Havana South and Boston Shaker zones. The Ore Reserve increased by 540,000 ounces to 56.4 Mt grading 2.16g/t Au containing 3.91Moz of gold whilst the Measured, Indicated and Inferred Resource estimate increased slightly to 78.6Mt grading 2.12g/t Au for 5.36Moz of gold.

The increased Ore Reserve was primarily due to the inclusion of the Boston Shaker pit, which added 243,000oz, and conversion of Inferred Resources into Indicated status at Havana South, which added a further 257,000oz Au. Although drilling activities on the mining leases during the quarter were constrained by rain, three multi-purpose RC rigs are on site, with drilling predominantly focused on Havana Deeps.

Shallow drilling has been completed in the Swizzler area (between the Tropicana and Havana pits) where there is potential for the two pits to merge. Better RC drill results from Swizzler included: TFRC3531 15m at 3.6g/t Au from 98m; TFRC 3560 16m @ 3.8g/t Au from 127m TFRC3562 5.0m at 5.2g/t Au from 139m. Limited diamond drilling was completed down dip of Swizzler and one hole (TFD421) returned an encouraging 6m @ 19.2g/t Au from 255m. A follow up programme of RC/Diamond drilling has commenced to assess the Swizzler Deeps area.

A pre-feasibility study, including substantial drilling programmes, is being carried out to evaluate open pit and underground mining options of the Havana Deeps mineralisation. A total of 20,600m of RC and diamond drilling was completed in the quarter. Only limited assays have been returned to date with a best result of 14m @ 6.5g/t Au from 421m in HDD077.

At the Kibali joint venture, in the Democratic Republic of the Congo, work commenced in July on the relocation of the inhabitants of 14 villages affected by the development of the mine, which remains on track to yield first production in 2014. Kokiza, as the new settlement is called, will ultimately comprise more than 3,500 houses accommodating about 15,000 people, a Catholic Church complex and other places of worship, schools, seven medical centres, five public market places and a government office. Transport infrastructure built to serve the town will consist of 50km of primary roads in addition to the 20km of secondary roads already constructed. Randgold Resources, which also owns a 45% stake in the project, is Kibali's operator and project manager. The expected date to complete the Kibali project feasibility study is Quarter 4 2011.

The feasibility study for the Mongbwalu project, in which AngloGold Ashanti owns a 86.22% stake, and is also in the DRC, is currently undergoing an optimization by the Business and Technical Development team. The project is expected to be submitted to the board for approval later this year.

## EXPLORATION

Total exploration expenditure during the second quarter, inclusive of expenditure at equity accounted joint ventures, was \$82m (\$32m on brownfield, \$27m on greenfield and \$23m on pre-feasibility studies), compared with \$71m the previous quarter (\$26m on brownfield, \$25m on greenfield and \$20m on pre-feasibility studies). The following are highlights from the company's exploration activities during the quarter. More detail on AngloGold Ashanti's exploration programme can be found at [www.anglogoldashanti.com](http://www.anglogoldashanti.com).

Greenfield exploration activities were undertaken in six regions (Australia, Americas, Pacific, Sub-Saharan Africa and the Middle East & North Africa) during Q2 2011. A total of 60,453 metres of diamond, RC and AC drilling was completed at existing priority targets and used to delineate new targets in Australia, Colombia, Argentina, Guinea, Gabon, the DRC, Egypt, Ethiopia, Brazil and the Solomon Islands.

In Australia, at the Tropicana JV (AngloGold Ashanti 70%, Independence Group 30%), exploration continued during the second quarter following up significant results from previous work. Significant results were received from aircore drilling during the quarter for several prospects including Iceberg, 35km south of Tropicana, where 20m @ 0.99g/t Au was intersected from 32m, including 8.0m @ 2.19g/t Au from 40m. At Margarita, 10km SW of Tropicana, results included 1m at 1.76g/t Au from 45m. At Ninja, 15km WSW of Tropicana – Havana, results included 2m at 1.01g/t Au.

Brownfield drilling on the Vogue discovery, beneath the current workings at Sunrise Dam has continued, yielding positive results. Drilling confirms a broad zone of significant mineralisation beneath current workings at depths ranging from 600m to 800m. Bulk intercepts across the entire zone include: 166m @ 4.7g/t Au and 229m @ 5.1g/t Au.

Greenfields exploration in the Americas during the second quarter of 2011 continued focusing on early stage exploration in Colombia, Canada, USA, Brazil and Argentina. In Colombia exploration programmes were undertaken in four separate regions. A 3,000m diamond drilling programme and sampling and mapping was completed at the Nuevo Chaquiro prospect around Quebradona. Elsewhere, mapping and sampling programmes were undertaken at the La Llanada, La Vega and Anaima-Tocha Belt. Geophysical programmes included the commencement of regional airborne magnetic and radiometric surveys, utilising two helicopter borne systems.

In Brazil, drilling commenced at the Falcao Project, a joint venture with Horizonte Minerals. Regional geochemical sampling programmes were undertaken over the Santana JV area and Juruena project areas. In Argentina exploration drilling started at El Volcan on targets defined by earlier drill programmes.

In the Solomon Islands, exploration activities continued at the Kele and Mase Joint Ventures with XDM Resources, while tenement applications associated with two additional Joint Venture agreements covering the New Georgia and Vangunu project areas progressed. At Mase, diamond drilling was restarted during May with a total of 247m completed during the quarter. At Kele diamond drilling continued with 1,370m completed during the quarter. Here, mechanical cutting and sampling of 4.52km of trenches focussed in the Tango West, Konga and Kukumbokulu prospect areas.

In Sub-Saharan Africa, project generation work is ongoing and new conceptual targets to guide longer term strategies in Africa have been developed.

In the Democratic Republic of the Congo, regional exploration continued on Ashanti Goldfields Kilo (AGK) 5,487km<sup>2</sup> Kilo project. Greenfield exploration activities continued in six projects Lodjo, Issuru, Dala, Alosi Camp 3, Mont Tsi and Petsi. Five diamond holes were drilled at Mont Tsi and drilling has commenced at Issuru to the north of the Mongbwalu project area. Drilling will recommence at Mont Tsi after the completion of a ground geophysical survey.

In Gabon, drilling continued at La Mboumi West and Central on the Ndjolé licence, a joint venture with Dome Ventures, Renewal applications have been completed for the Ndjole & Mevang JV licences. Geochemical soil sampling and mapping continues over La Mboumi as well as AGA's Eteke North (Ogooue licence).

In Guinea, regional exploration work, including soil sampling and drilling programmes on Blocks 2, 3 and 4 in the Siguiri Mine region. A total of 7,360 geochemical soil samples were collected. Encouraging gold in soil geochemical anomalies were revealed by this work.

Additional resource delineation and definition drilling was completed at Saraya in late June. A total of 2,969m of diamond and 3,646m of RC drilling was completed. Assay results from infill drilling include apparent thickness intercepts of 18m @ 5.4g/t Au from 80m, 9m @ 4.91g/t Au from 146m and 14m @ 1.9g/t Au from 190 in SARC277 and: 14m @ 1.25g/t Au from 110m in SARCCDD007. Delineation and infill drilling commenced at Kounkoun, located in Block 3, where twelve holes totalling 2,346m were completed during the quarter, while assay results from this work are pending.

Greenfields exploration in the Middle East & North Africa region is being undertaken by Thani Ashanti; a 50:50 Strategic Alliance between AngloGold Ashanti and Thani Investments. Exploration during Q2 involved diamond drilling at the Hutite prospect, located on the Hodine licence in Egypt. Here 3,043m of diamond drilling was completed during the quarter and results include: 3m @ 4.83g/t Au from 55m, 5m @ 4.61g/t Au from 152m and 5m @ 1.42g/t Au from 163m in HUD004. Most significant results returned this quarter are from the 1,000m long Central Zone, where mineralisation has been intersected in all seven holes drilled to date.

In Eritrea, follow-up stream sediment geochemistry and mapping is in progress over the targets identified from the 10,000 line km airborne EM, magnetic and radiometric survey at the Kerkasha and Akordat North exploration licences.

The Afar JV with Stratex International has commenced diamond drilling at the Megenta project in Ethiopia. As part of this agreement, Thani Ashanti has a minimum exploration commitment of \$1m, and can earn 51% interest in the licences by spending \$3m. Results from the upper portion of the first hole contain several ~0.5g/t Au results and some >1g/t Au intercepts from narrow veins. The results are consistent with the envisaged mineralisation model. AngloGold Ashanti increased its stake in Stratex International to an interest of approximately 11.2% through a \$5m private placement, meeting the SARB investment requirements of a minimum of 10%

Twenty four exploration licence applications were submitted in Saudi Arabia. The applications form a contiguous block of 2,356km<sup>2</sup>.

## **OUTLOOK**

Operations were impacted during the first half of the year by a number of factors, which would in themselves have led annual production to the lower end of initial guidance of 4.55Moz to 4.75Moz. These include flooding at Sunrise Dam, the decision to stop mining the shaft pillar at TauTona for safety reasons, drought at Cripple Creek & Victor which impacted optimal functioning of the leach pad and lower-than-anticipated grades at Siguiri.

As a result of the operational impacts as outlined above and the strike in South Africa at the end of July, the year guidance is being revised to around 4.45Moz. The lower production, along with higher fuel prices and stronger local operating currencies in Brazil and South Africa result in total cash cost guidance of \$725/oz-\$740/oz, This assumes an oil price of \$114/barrel and average exchange rate of R6.83/\$ and equivalent Australian dollar and Brazilian real rates.

Third quarter production is expected to be around 1.11Moz at a total cash cost of \$775/oz. This assumes an oil price of \$115/barrel and average exchange rate of R6.75/\$ and equivalent Australian dollar and Brazilian real rates.

# Review of the Gold Market

## Gold price movement and investment markets

### Gold price data

During April, the gold price continued to benefit from ongoing economic uncertainty in Europe and the United States, receiving an additional boost from the threat to the triple A credit rating of the United States. Bullion traded to an intraday high of \$1,575/oz at the start of May. However this momentum was not sustained and after a brief correction, the price traded sideways for the balance of the quarter. Many of the factors that drove gold in the first month of the quarter persisted as the European debt crisis worsened. Domestic politics and brinkmanship in the United States saw the debt ceiling impasse adding yet more uncertainty to global financial markets, adding to the metal's tailwind. Although the latter is likely to be resolved, the ongoing sovereign solvency turmoil in Europe should underpin the gold price going forward. Despite the modest 4.5% increase in the average gold price in the quarter under review, the increase marks the 10<sup>th</sup> consecutive quarter of growth and represents gold's longest winning streak since the 1920s.

### Investment demand

ETF holdings for the quarter remained fairly stagnant with net investment for the quarter at around 1.2Moz, growth of less than 2% from its opening position. In contrast, during the second quarter of last year when similar concerns over sovereign risk were escalating, ETF holdings grew by around 9Moz. Not surprisingly, most of the growth can be attributed to European ETFs. The COMEX net long position posted a high of 30.5Mozs in the second quarter, which unsurprisingly coincided with the run in the gold price. Global estimated bar and coin demand from the December 2010 quarter to the June 2011 quarter stands at 1,396 tons, a 49% increased year-on-year; most of the growth is driven by European investors. While ETFs have received a lot of press in recent times it is worth noting that the bar and coin market is three times the size of the ETF market. In China, investment demand slowed from the extreme highs of the first quarter, but still recorded year-on-year estimated growth approaching double digits. Outlook for the rest of the year remains good as inflationary pressures continue to weigh on the Chinese economy. Fears over inflation similarly underpin the continuation of India's record gold demand. In the second quarter of 2010, 154 tons were imported, while in the first two months of this quarter, 192 tons flowed into India. Some 75% of this gold will be destined for the jewellery market.

### Official sector

While the ETF markets failed to register growth, the official sector has been relatively active. In the first half of the year central banks bought about 151 tons. Mexico added some 100 tons, significantly increasing its holding from previous levels of 6.9 tons. Russia and Thailand were other notable buyers, further consolidating the trend of developing economies diversifying their central bank holdings. Sales under the third Central Bank Agreement for the current year to date are virtually zero as central banks expand their gold reserves.

### Jewellery sales

As mentioned, India's storming 2011 continued in the second quarter and the jewellery market remained buoyant. Unlike in 2010, consumers now appear accustomed to higher gold prices and many expect it to continue to rise through the year as fuel, food and fast-moving consumer goods show no sign of ending their upward price trajectory. Indian consumers were not perturbed by gold price volatility in the quarter under review as relative Rupee gold price stability helped ameliorate the situation. Unlike their Indian counterparts, Chinese consumers did exhibit discomfort with the relatively volatile gold price. The second quarter is traditionally a slower quarter in China and the three months through June were no different, although year-on-year jewellery demand still registered an increase (which may have stretched to double digits). One factor that may have dampened gold purchases was a new drive by commercial banks to attract liquidity by increasing the one-month interest rate for deposits to 7%, while the annual deposit rate is in the region of 3.5%. In the United States, the strategically vital high-end gold market continued to show signs of strength with an estimated growth of 15%. High-end gold brands continue to outperform lower- and mid-end gold plays as the high price of gold continues to gnaw away at gold content in cheaper jewellery. At JCK, the major trade show held in June, most attendees were more upbeat than last year as the industry builds off a stronger, more sustainable base.

# Mineral Resource and Ore Reserve

Mineral Resources and Ore Reserves are reported in accordance with the minimum standards described by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code, 2004 Edition), and also conform to the standards set out in the South African Code for the Reporting of Exploration Results, Mineral Resources and Mineral Reserves (The SAMREC Code, 2007 edition). Mineral Resources are inclusive of the Ore Reserve component unless otherwise stated.

## Introduction

In January 2011, given the continued rally in the gold price, AngloGold Ashanti committed to publishing its updated Mineral Resource and Ore Reserves using a price higher than the \$850/oz that was used to determine the 2010 Ore Reserve.

## Mineral Resource

The total Mineral Resource increased from 220.0Moz in December 2010 to 232.6Moz in June 2011. A six month increase of 15.7Moz occurred before the subtraction of depletion and an increase of 12.6Moz after the subtraction of depletion. It should be noted that changes in economic assumptions from December 2010 to June 2011 resulted in the Mineral Resource increasing by 14.8Moz whilst exploration and modelling resulted in an increase of 4.8Moz. The remaining decrease of 3.9Moz resulted from various other factors. Depletions from the Mineral Resource for the six months totalled 3.1Moz.

<b>MINERAL RESOURCE</b>		<b>Moz</b>
<b>Mineral Resource as at 31 December 2010</b>		<b>220.0</b>
<b>Reductions</b>		
Siguiri	Due to revision of modelling procedures	(0.3)
Other	Total of non significant changes	(1.5)
<b>Additions</b>		
Iduapriem	Increase in Mineral Resource price	1.2
Geita	Combined effect of price and estimation	1.9
La Colosa	Due primarily to exploration success	3.8
Obuasi	Increase in Mineral Resource price	5.9
Other	Total of non significant changes	1.6
<b>Mineral Resource as at 30 June 2011</b>		<b>232.6</b>

*Rounding of numbers may results in computational discrepancies*

Mineral Resources have been estimated at a gold price of \$1,600/oz (2010: \$1,100/oz).

## ORE RESERVE

The AngloGold Ashanti Ore Reserve increased from 71.2Moz in December 2010 to 74.0Moz in June 2011. A six month increase of 5.4Moz occurred before the subtraction of 2.6Moz for depletion, resulting in an increase of 2.9Moz after the subtraction of depletion. It should be noted that changes in the economic assumptions from December 2010 to June 2011 resulted in the Ore Reserve increasing by 2.3Moz while exploration and modelling resulted in a further increase of 1.1Moz. The remaining increase of 2.0Moz resulted from various other factors.

<b>Ore Reserve</b>		<b>Moz</b>
<b>Ore Reserve as at 31 December 2010</b>		<b>71.2</b>
<b>Reductions</b>		
Other	Total non-significant changes	(0.9)
<b>Additions</b>		
Navachab	Improved Ore Reserve price	0.5
Obuasi	Improved Ore Reserve price	0.6
Cripple Creek and Victor	Additional area added to Mine Life Extension Two	0.9
Geita	Improved Ore Reserve price	1.0
Other	Total non-significant changes	0.7
<b>Ore Reserve as at 30 June 2011</b>		<b>74.0</b>

*Rounding of numbers may result in computational discrepancies*

Ore reserves have been calculated using a gold price of \$1,100/oz (2010: \$850/oz).

### By-products

Several by-products are recovered as a result of the processing of gold Ore Reserves. These include 21,233t of uranium oxide from the South African operations, 440,270t of sulphur from Brazil and 37.6Moz of silver from Argentina.

### Competent persons

The information in this report relating to exploration results, Mineral Resources and Ore Reserves is based on information compiled by the Competent Persons. The Competent Persons consent to the inclusion of Exploration Results, Mineral Resource and Ore Reserve information in this report, in the form and context in which it appears.

During the past decade, the company has developed and implemented a rigorous system of internal and external reviews of Exploration Results, Mineral Resources or Ore Reserves. A documented chain of responsibility exists from the Competent Persons at the operations to the company's Mineral Resource and Ore Reserve Steering Committee. Accordingly, the Chairman of the Mineral Resource and Ore Reserve Steering Committee, VA Chamberlain, MSc (Mining Engineering), BSc (Hons) (Geology), MGSSA, FAusIMM, assumes responsibility for the Mineral Resource and Ore Reserve processes for AngloGold Ashanti and is satisfied that the Competent Persons have fulfilled their responsibilities.

*\* A detailed breakdown of Mineral Resource and Ore Reserve and backup detail is provided on the AngloGold Ashanti website ([www.anglogoldashanti.com](http://www.anglogoldashanti.com)).*

<b>Profit (loss) for the period</b>		<b>3,284</b>	1,701	(1,286)	4,985	(48)
Allocated as follows:						
Equity shareholders		<b>3,195</b>	1,658	(1,360)	4,854	(210)
Non-controlling interests		<b>89</b>	43	74	131	162
		<b>3,284</b>	1,701	(1,286)	4,985	(48)
Basic earnings (loss) per ordinary share (cents) <sup>1</sup>		<b>829</b>	430	(371)	1,259	(57)
Diluted earnings (loss) per ordinary share (cents) <sup>2</sup>		<b>826</b>	429	(371)	1,255	(57)

<sup>1</sup> Calculated on the basic weighted average number of ordinary shares.

<sup>2</sup> Calculated on the diluted weighted average number of ordinary shares.

*Rounding of figures may result in computational discrepancies.*

The unaudited financial statements for the quarter ended on 30 June 2011 have been prepared by the corporate accounting staff of AngloGold Ashanti Limited headed by Mr John Edwin Staples, the Group's Chief Financial Accounting Officer. This process was supervised by Mr Srinivasan Venkatakrishnan, the Group's Chief Financial Officer. These financial statements were reviewed (but not audited) by Ernst & Young, the Group's statutory auditors and approved by the Board of AngloGold Ashanti Limited. Ernst & Young issued an unqualified review opinion which can be inspected at the registered offices of AngloGold Ashanti Limited.

# Notes

## for the quarter and six months ended 30 June 2011

### 1. Basis of preparation

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for certain financial instruments which are stated at fair value. The group's accounting policies used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2010.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS34, JSE Listings Requirements and in the manner required by the South African Companies Act, 2008 for the preparation of financial information of the group for the quarter and six months ended 30 June 2011.

	SA Rand million				US Dollar million			
Orders placed and outstanding on capital contracts at the prevailing rate of exchange <sup>(1)</sup>	2,719	1,852	1,156	1,809	403	274	176	237

<sup>(1)</sup> Includes capital commitments relating to equity accounted joint ventures.

### Liquidity and capital resources

To service the above capital commitments and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to foreign investment, exchange control laws and regulations and the quantity of foreign exchange available in offshore countries. In addition, distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other finance arrangements contain financial covenants and other similar undertakings. To the extent that external borrowings are required, the group's covenant performance indicates that existing financing facilities will be available to meet the above commitments. To the extent that any of the financing facilities mature in the near future, the group believes that sufficient measures are in place to ensure that these facilities can be refinanced.

## 14. Contingencies

AngloGold Ashanti's material contingent liabilities and assets at 30 June 2011 are detailed below:

Contingencies and guarantees	SA Rand million	US Dollar million
<b>Contingent liabilities</b>		
Groundwater pollution <sup>(1)</sup>	-	-
Deep groundwater pollution – South Africa <sup>(2)</sup>	-	-
Sales tax on gold deliveries – Brazil <sup>(3)</sup>	687	102
Other tax disputes – Brazil <sup>(4)</sup>	282	42
Indirect taxes – Ghana <sup>(5)</sup>	82	12
ODMWA litigation <sup>(6)</sup>	-	-
<b>Contingent assets</b>		
Royalty – Boddington Gold Mine <sup>(7)</sup>	-	-
Royalty – Tau Leko Gold Mine <sup>(8)</sup>	-	-
<b>Financial Guarantees</b>		
Oro Group (Pty) Limited <sup>(9)</sup>	100	15
	<b>1,151</b>	<b>171</b>

AngloGold Ashanti is subject to contingencies pursuant to environmental laws and regulations that may in future require the group to take corrective action as follows:

- (1) Groundwater pollution – AngloGold Ashanti has identified groundwater contamination plumes at certain of its operations, which have occurred primarily as a result of seepage from mine residue stockpiles. Numerous scientific, technical and legal studies have been undertaken to assist in determining the magnitude of the contamination and to find sustainable remediation solutions. The group has instituted processes to reduce future

potential seepage and it has been demonstrated that Monitored Natural Attenuation (MNA) by the existing environment will contribute to improvement in some instances. Furthermore, literature reviews, field trials and base line modelling techniques suggest, but are not yet proven, that the use of phyto-technologies can address the soil and groundwater contamination. Subject to the completion of trials and the technology being a proven remediation technique, no reliable estimate can be made for the obligation.

- (2) Deep groundwater pollution – The company has identified a flooding and future pollution risk posed by deep groundwater in the Klerksdorp and Far West Rand gold fields. Various studies have been undertaken by AngloGold Ashanti since 1999. Due to the interconnected nature of mining operations, any proposed solution needs to be a combined one supported by all the mines located in these gold fields. As a result the Department of Mineral Resources and affected mining companies are now involved in the development of a “Regional Mine Closure Strategy”. In view of the limitation of current information for the accurate estimation of a liability, no reliable estimate can be made for the obligation.
- (3) Sales tax on gold deliveries – Mineração Serra Grande S.A. (MSG), received two tax assessments from the State of Goiás related to payments of sales taxes on gold deliveries for export. AngloGold Ashanti Córrego do Sítio Mineração S.A. manages the operation and its attributable share of the first assessment is approximately \$63m, R425m. The company’s attributable share of the second assessment is approximately \$39m, R262m. In November 2006 the administrative council’s second chamber ruled in favour of MSG and fully cancelled the tax liability related to the first period. In July 2011, the administrative council’s second chamber ruled in favour of MSG and fully cancelled the tax liability related to the second period. The State of Goiás has appealed to the full board of the State of Goiás tax administrative council. The company believes both assessments are in violation of federal legislation on sales taxes.
- (4) Other tax disputes – MSG received a tax assessment in October 2003 from the State of Minas Gerais related to sales taxes on gold. The tax administrators rejected the company’s appeal against the assessment. The company is now appealing the dismissal of the case. The company’s attributable share of the assessment is approximately \$11m, R72m.

AngloGold Ashanti subsidiaries in Brazil are involved in various disputes with tax authorities. These disputes involve federal tax assessments including income tax, royalties, social contributions and annual property tax. The amount involved is approximately \$31m, R210m.

- (5) Indirect taxes – AngloGold Ashanti (Ghana) Limited received a tax assessment for \$12m, R82m during September 2009 in respect of 2006, 2007 and 2008 tax years, following an audit by the tax authorities related to indirect taxes on various items. Management is of the opinion that the indirect taxes are not payable and the company has lodged an objection.
- (6) Occupational Diseases in Mines and Works Act (ODMWA) litigation - The case of Mr Thembekile Mankayi was heard in the High Court of South Africa in June 2008, and an appeal heard in the Supreme Court of Appeals in 2010. In both instances judgement was awarded in favour of AngloGold Ashanti Limited. A further appeal that was lodged by Mr Mankayi was heard in the Constitutional Court in 2010. Judgement in the Constitutional Court was handed down on 3 March 2011.

Following the judgement, Mr Mankayi’s executor may proceed with his case in the High Court. This will comprise, amongst others, providing evidence showing that Mr Mankayi contracted silicosis as a result of negligent conduct on the part of AngloGold Ashanti.

The company will defend the case and any subsequent claims on their merits. Should other individuals or groups lodge similar claims, these too would be defended by the company and adjudicated by the Courts on their merits. In view of the limitation of current information for the accurate estimation of a possible liability, no reliable estimate can be made for this possible obligation.

- (7) Royalty – As a result of the sale of the interest in the Boddington Gold Mine joint venture during 2009, the group is entitled to receive a royalty on any gold recovered or produced by the Boddington Gold Mine, where the gold price is in excess of Boddington Gold Mine’s cash cost plus \$600/oz. The royalty commenced on 1 July 2010 and is capped at a total amount of \$100m, R674m. Royalties of \$7m, R45m were received during the quarter. Total royalties of \$17m, R124m have been received to date.
- (8) Royalty – As a result of the sale of the interest in the Tau Lekoa Gold Mine during 2010, the group is entitled to receive a royalty on the production of a total of 1.5Moz ounces by the Tau Lekoa Gold Mine and in the event that the average monthly rand price of gold exceeds R180,000/kg (subject to inflation adjustment). Where the average monthly rand price of gold does not exceed R180,000/kg (subject to inflation adjustment), the ounces produced in that quarter do not count towards the total 1.5Moz upon which the royalty is payable.

The royalty will be determined at 3% of the net revenue (being gross revenue less State royalties) generated by the Tau Lekoa assets. Royalties of \$1m, R7m were received during the quarter.

- (9) Provision of surety – The company has provided sureties in favour of a lender on a gold loan facility with its affiliate Oro Group (Pty) Limited and one of its subsidiaries to a maximum value of \$15m, R100m. The suretyship agreements have a termination notice period of 90 days.

## 15. Concentration of risk

There is a concentration of risk in respect of recoverable value added tax and fuel duties from the Tanzanian government:

- Recoverable value added tax due from the Tanzanian government amounts to \$46m, R310m at 30 June 2011 (31 March 2011: \$47m, R317m). The last audited value added tax return was for the period ended 31 October 2010 and at the reporting date the audited amount was \$47m, R317m. The outstanding amounts at Geita have been discounted to their present value at a rate of 7.82%.
- Recoverable fuel duties from the Tanzanian government amounts to \$71m, R478m at 30 June 2011 (31 March 2011: \$67m, R451m). Fuel duty claims are required to be submitted after consumption of the related fuel and are subject to authorisation by the Customs and Excise authorities. Claims for the refund of fuel duties amounting to \$53m, R357m have been lodged with the Customs and Excise authorities which are still outstanding, whilst claims for a refund of \$18m, R121m have not yet been submitted. The amounts outstanding have been discounted to their present value at a rate of 7.82%.

## 16. Borrowings

AngloGold Ashanti's borrowings are interest bearing.

## 17. Announcements

**Restructuring of the Black Economic Empowerment Share Ownership transaction:** On 14 April 2011 AngloGold Ashanti announced the proposed restructure of the Black Economic Empowerment transaction (BEE transaction). Shareholders in general meeting approved the restructure on 11 May 2011, by the requisite majority.

**Sale of mining area to Blyvooruitzicht Gold Mining Company:** On 14 July 2011, AngloGold Ashanti confirmed that it had offered to sell to Blyvooruitzicht Gold Mining Company, a South African incorporated company, some 390,000 square metres of its neighbouring Savuka mining area, for a consideration of R35 million. The area offered for sale was not within the company's current mine plan. The sale is subject to the finalisation of a binding agreement and the securing of the necessary regulatory approvals.

**Acquisition of an interest in First Uranium:** On 22 July 2011, AngloGold Ashanti announced that it had entered into an agreement to acquire 47,065,916 shares (or approximately 19.79%) in First Uranium Corporation (First Uranium), a Canadian incorporated company, from Village Main Reef Limited (Village), a South African incorporated company, at a price of CAD0.60 per share. In addition, Village have granted to AngloGold Ashanti, lock-up rights and rights of first refusal for its remaining approximate 5.7% stake in First Uranium and its holding of approximately R392.8 million convertible bonds issued by First Uranium.

## 18. Dividend

The directors declared Interim Dividend No. 110 of 90 (Interim Dividend No. 108: 65) South African cents per ordinary share for the six months ended 30 June 2011. In compliance with the requirements of Strate, given the company's primary listing on the JSE Limited, the salient dates for payment of the dividend are as follows:

### To holders of ordinary shares and to holders of CHES Depositary Interests (CDIs)

Each CDI represents one-fifth of an ordinary share.

	<b>2011</b>
Currency conversion date for UK pounds, Australian dollars and Ghanaian cedis	Thursday, 25 August
Last date to trade ordinary shares cum dividend	Friday, 26 August
Last date to register transfers of certificated securities cum dividend	Friday, 26 August
Ordinary shares trade ex dividend	Monday, 29 August
Record date	Friday, 2 September
Payment date	Friday, 9 September

On the payment date, dividends due to holders of certificated securities on the South African and United Kingdom share registers will be electronically transferred to shareholders' bank accounts. Given the increasing incidences of fraud with respect to cheque payments, the company has ceased the payment of dividends by way of cheque. Shareholders are requested to notify the relevant share registrars with banking details to enable future dividends to be paid via electronic funds transfer. Refer to the back cover for share registrar details.

Dividends in respect of dematerialised shareholdings will be credited to shareholders' accounts with the relevant CSDP or broker.

To comply with further requirements of Strate, between Monday, 29 August 2011 and Friday, 2 September 2011, both days inclusive, no transfers between the South African, United Kingdom, Australian and Ghana share registers will be permitted and no ordinary shares pertaining to the South African share register may be dematerialised or rematerialised.

#### **To holders of American Depositary Shares**

Each American Depositary Share (ADS) represents one ordinary share.

	<b>2011</b>
Ex dividend on New York Stock Exchange	Wednesday, 31 August
Record date	Friday, 2 September
Approximate date for currency conversion	Friday, 9 September
Approximate payment date of dividend	Monday, 19 September

Assuming an exchange rate of R6.7437/\$, the dividend payable per ADS is equivalent to 13.3458 US cents. This compares with the interim dividend of 9.0034 US cents per ADS paid on 20 September 2010. However the actual rate of payment will depend on the exchange rate on the date for currency conversion.

#### **To holders of Ghanaian Depositary Shares (GhDSs)**

100 GhDSs represent one ordinary share.

	<b>2011</b>
Last date to trade and to register GhDSs cum dividend	Friday, 26 August
GhDSs trade ex dividend	Monday, 29 August
Record date	Friday, 2 September
Approximate payment date of dividend	Monday, 12 September

Assuming an exchange rate of R1/¢0.2243, the dividend payable per share is equivalent to 0.2018 cedis. This compares with the interim dividend of 0.1266 cedis per share paid on 13 September 2010. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion. In Ghana, the authorities have determined that dividends payable to residents on the Ghana share register be subject to a final withholding tax at a rate of 8%.

In addition, directors declared Dividend No. E10 of 45 South African cents per E ordinary share, payable to employees participating in the Bokamoso ESOP and Izingwe Holdings (Proprietary) Limited. These dividends will be paid on Friday, 9 September 2011.

By order of the Board

**T T MBOWENI**  
Chairman

2 August 2011

**M CUTIFANI**  
Chief Executive Officer

## Non-GAAP disclosure

From time to time AngloGold Ashanti Limited may publicly disclose certain "Non-GAAP" financial measures in the course of its financial presentations, earnings releases, earnings conference calls and otherwise.

The group uses certain Non-GAAP performance measures and ratios in managing the business and may provide users of this financial information with additional meaningful comparisons between current results and results in prior operating periods. Non-GAAP financial measures should be viewed in addition to, and not as an alternative to, the reported operating results or cash flow from operations or any other measure of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures that other companies use.

Fair value adjustment on mandatory convertible bonds	(442)	(139)	-	(581)	-	(64)	(22)	-	(87)	-
Adjusted headline earnings <sup>(1)</sup>	2,317	1,415	980	3,733	1,442	342	203	129	544	190
<b>Cents per share <sup>(2)</sup></b>										
Adjusted headline earnings <sup>(1)</sup>	601	367	267	968	393	89	53	35	141	52

<sup>(1)</sup> (Gain) loss on non-hedge derivatives and other commodity contracts in the income statement comprise the change in fair value of all non-hedge derivatives and other commodity contracts as follows:

- Open positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the current reporting date; and
- Settled positions: The change in fair value from the previous reporting date or date of recognition (if later) through to the date of settlement.

Adjusted headline earnings is intended to illustrate earnings after adjusting for:

- The unrealised fair value change in contracts that were still open at reporting dates, as well as, the unwinding of the historic marked-to-market value of the position settled in the period;
- Investment in hedge restructure transaction: During the hedge restructure in December 2004 and March 2005 quarters, \$83m and \$69m in cash was injected respectively into the hedge book in these quarters to increase the value of long-dated contracts. The entire investment in long-dated derivatives (certain of which have now matured), for the purposes of the adjustment to earnings, will only be taken into account when the realised portion of long-dated non-hedge derivatives are settled, and not when the short-term contracts were settled;
- In the September 2010 quarter the hedge book was further reduced and contracts to the value of \$1.6bn were accelerated and settled. The impact on earnings after taxation was \$1.5bn in the September 2010 quarter. In the December 2010 quarter the hedge book was fully settled and hedge contracts to the value of \$1.1bn were accelerated and settled. The impact on earnings after taxation was \$1.1bn in the December 2010 quarter;
- The unrealised fair value change on the option component of the convertible bonds;
- The unrealised fair value change of the warrants on shares and the embedded derivative.

During 2010 the Group completed the elimination of its hedge book which has resulted in full exposure to prevailing spot gold prices.

<sup>(2)</sup> Calculated on the basic weighted average number of ordinary shares.

# Shareholders' notice board

## IMPORTANT NOTICE TO SHAREHOLDERS

### DISTRIBUTION OF QUARTERLY AND ANNUAL REPORTS

On 1 May 2011, the South African Companies Act, 71 of 2008 came into effect. In line with this Act, companies are no longer obliged to print and post certain material – such as quarterly and annual reports – to shareholders, unless shareholders specifically request to receive documents in a printed format.

AngloGold Ashanti recognises that the majority of its shareholders would prefer that:

- Timely information be available on the company's website or by e-mail;
- The company be prudent in the publication and postage of material in line with its cost reduction initiatives; and
- Scarce natural and man-made resources are used responsibly. By reducing the printing and postage of reports, we will use less paper, ink, energy and water, and we will reduce our carbon emissions.

By way of this notice, AngloGold Ashanti advises that shareholders wishing to receive information from the company in the future should indicate their preference. AngloGold Ashanti will continue to provide information in printed format to any shareholder that elects to receive the same.

- I would like to receive printed information by post.
- I would like to receive information by email at the following email address:  
..... (No email will exceed 1Mb.)
- I will access the information on the company's website. Please send an e-mail alert to me, notifying me when new information is available on the website, at the above e-mail address

Please fax, post or e-mail your response to:

Fax number: +27 11 637 6677  
E-mail address: companysecretary@anglogoldashanti.com  
Postal address: Company Secretary, P O Box 62117, Marshalltown, 2107, South Africa

Alternatively, you may fill this information in online at: <http://www.rair.co.za/clients/aga/aga-site/shareholder-notice.htm>.  
**The registration form will be available on the website from 22 August 2011.**

***Should you not make an election, you will no longer receive any reports from AngloGold Ashanti.***

Dematerialised shareholders, who do not wish to receive copies of reports, should advise their CSD Participant or Stockbroker to amend their records accordingly.

### PAYMENT OF DIVIDENDS BY WAY OF CHEQUE

Given the increasing incidences of fraud with respect to cheque payments, the company will cease the payment of dividends by way of cheque. If you have not already lodged a bank mandate form, you are requested to notify the relevant share registrars with banking details to enable future dividends to be paid via electronic funds transfer. Refer to the back cover for share registrar details.

If you have not already completed a bank mandate form and lodged this with the share registrar or if you do not do so, you will receive no further dividends from the company until such time as a completed bank mandated form is so lodged.

### CHANGE OF DETAILS

Shareholders are reminded that the onus is on them to keep the company, through its nominated share registrars, or through the relevant CSDPs or Brokers, apprised of any change in their postal address and personal particulars. Similarly, where shareholders receive dividend payments electronically (EFT), they should ensure that the banking details which the share registrars and/or CSDPs have on file are correct.

Certain statements made in this communication, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, cash costs and other operating results, growth prospects and outlook of AngloGold Ashanti's operations, individually or in the aggregate, including the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects and the completion of announced mergers and acquisitions transactions, AngloGold Ashanti's liquidity, capital resources and capital expenditure and the outcome and consequences of any litigation or regulatory proceedings or environmental issues, contain certain forward-looking statements regarding AngloGold Ashanti's operations, economic performance and financial condition. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions including environmental approvals and actions, fluctuations in gold prices and exchange rates, and business and operational risk management. For a discussion of certain of these and other factors, refer to AngloGold Ashanti's annual report for the year ended 31 December 2010, which was distributed to shareholders on 29 March 2011 and the company's 2010 annual report on Form 20-F, which was filed with the Securities and Exchange Commission in the United States on May 31, 2011. These factors are not necessarily all of the important factors that could cause AngloGold Ashanti's actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein.

This communication contains certain "Non-GAAP" financial measures. AngloGold Ashanti utilises certain Non-GAAP performance measures and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use.

AngloGold Ashanti posts information that is important to investors on the main page of its website at [www.anglogoldashanti.com](http://www.anglogoldashanti.com) and under the "Investors" tab on the main page. This information is updated regularly. Investors should visit this website to obtain important information about AngloGold Ashanti.
