SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER
PURSUANT TO RULE 13a-16 OR 15d-16 OF
THE SECURITIES EXCHANGE ACT OF 1934

Report on Form 6-K dated February 20, 2013

Commission File Number 1-14846

AngloGold Ashanti Limited

(Name of registrant)

76 Jeppe Street

Newtown, 2001

(P.O. Box 62117, Marshalltown, 2107)

South Africa

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1):

Yes No

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7):

Yes No

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

Enclosure: Press release **AngloGold Ashanti Report for the quarter and year ended 31 December 2012**

Report

for the quarter and year ended 31 December 2012

Group results for the year....

- ❖ Gold production of 3.944Moz (*estimated at 4.1Moz without the fourth quarter strike impact*).
- ❖ Total cash costs of \$862/oz (*estimated at \$829/oz without the fourth quarter strike impact*).
- ❖ Adjusted headline earnings of \$924bn (*about \$1.13bn without strike impact*).
- ❖ EBITDA of \$2.4bn (*about \$2.7bn without strike impact*), compared to \$3.01bn in 2011.
- ❖ Resources increased 10.6Moz to 241.5Moz reflecting exploration success at La Colosa and Tropicana.
- ❖ Quarterly dividend of 50 South African cents per share (6 US cents per share). Full year dividend of 300 SA cents per share.
- ❖ Capital projects remain on schedule; Tropicana and Kibali first production of gold is expected before 2013 year-end.
- ❖ All Injury Frequency Rate (AIFR) the lowest on record at 7.72 per million hours worked.
- ❖ Refinancing risk eliminated by obtaining US\$750m term facility.

For the fourth quarter

- ❖ Gold production of 859,000oz (*estimated at 1,061Moz without the fourth quarter strike impact*).
- ❖ Total cash costs \$1,009/oz (*estimated at \$852/oz without strike impact*).
- ❖ Adjusted headline earnings of \$7m (*estimated at \$215m without strike impact*).
- ❖ Net debt increased to \$2.06bn at the end of December, from \$1.57bn at the end of the previous quarter due to project capital and strike impact.
- ❖ Standard & Poor's affirmed the investment grade rating on the company's publicly traded debt.
- ❖ Smooth build-up of South Africa operations after Christmas break.

Certain statements made in this communication, other than statements of historical fact, including, without limitation, those concerning the economic outlook for the gold mining industry, expectations regarding gold prices, production, cash costs and other operating results, return on shareholders' equity, productivity improvements, growth prospects and outlook of AngloGold Ashanti's operations, individually or in the aggregate, including the achievement of project milestones, the completion and commencement of commercial operations of certain of AngloGold Ashanti's exploration and production projects and the completion of acquisitions and dispositions, AngloGold Ashanti's liquidity and capital resources and capital expenditures and the outcome and consequence of any potential or pending litigation or regulatory proceedings or environmental issues, are forward-looking statements or forecasts regarding AngloGold Ashanti's operations, economic performance and financial condition. These forward-looking statements or forecasts involve known and unknown risks, uncertainties and other factors that may cause AngloGold Ashanti's actual results, performance or achievements to differ materially from the anticipated results, performance or achievements expressed or implied in these forward-looking statements. Although AngloGold Ashanti believes that the expectations reflected in such forward-looking statements and forecasts are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic, social, political and market conditions, success of business and operating initiatives, changes in the regulatory environment and other government actions including environmental approvals, fluctuations in gold prices and exchange rates, and business and operational risk management. For a discussion of certain of these and other factors, refer to AngloGold Ashanti's annual report for the year ended 31 December 2011, which was distributed to shareholders on 4 April 2012, the company's 2011 annual report on Form 20-F, which was filed with the Securities and Exchange Commission in the United States on 23 April 2012 and the prospectus supplement to the company's prospectus dated 17 July 2012 that was filed with the Securities and Exchange Commission on 25 July 2012. These factors are not necessarily all of the important factors that could cause AngloGold Ashanti's actual results to differ materially from those expressed in any forward-looking statements. Other unknown or unpredictable factors could also have material adverse effects on future results. Consequently, stakeholders are cautioned not to place undue reliance on forward-looking statements. AngloGold Ashanti undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events, except to the extent required by applicable law. All subsequent written or oral forward-looking statements attributable to AngloGold Ashanti or any person acting on its behalf are qualified by the cautionary statements herein.

This communication may contain certain "Non-GAAP" financial measures. AngloGold Ashanti utilises certain Non-GAAP performance measures and ratios in managing its business. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the reported operating results or cash flow from operations or any other measures of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures other companies may use. AngloGold Ashanti posts information that is important to investors on the main page of its website at www.anglogoldashanti.com and under the "Investors" tab on the main page. This information is updated regularly. Investors should visit this website to obtain important information about AngloGold Ashanti.

Financial and Operating Report

OVERVIEW FOR THE YEAR AND QUARTER

FINANCIAL AND CORPORATE REVIEW

Full-year adjusted headline earnings (AHE) was \$924m, or 239 US cents per share, compared with \$1.30bn, or 336 US cents per share in 2011. The weaker performance in earnings and cash flow largely reflects challenges at the South Africa operations through the course of the year, including several safety-related stoppages in the first half and the unprotected strike action in the second half. Furthermore, AHE also reflects higher cash costs associated with inflation. If one were to exclude the impact of the SA strike only, adjusted headline earnings, on a pro-forma basis, would have been \$1.13bn, or 294 US cents per share. For 2012, the company's returns on net capital employed and equity was 14% and 18%, respectively. If adjusted for the strikes, it is estimated that ROCE would have been around 16% while ROE would have been around 20%.

Net profit attributable to equity shareholders for the full year was \$830m, compared to \$1.55bn in 2011. Cash flow generated from operating activities declined 32% to \$1.8bn, while total capital expenditure was \$2.15bn, compared with guidance at the beginning of the year of –around \$2.3bn, reflecting capital rationalisation implemented during the fourth quarter.

Production in 2012 was 3.94Moz at a total cash cost of \$862/oz, compared to 4.33Moz at \$728/oz the previous year. The Group's total cash costs for 2012 were \$862/oz and notional cash expenditure (including sustaining capital) was \$1,115/oz, and \$1,390/oz (if one were to include all project capital expenditure and new investment/projects). The strikes in South Africa impacted group total costs by \$33/oz for the year.

AngloGold Ashanti said in November it would review corporate costs and some expansion projects; focus on higher quality production from its underground mines; sell some non-core assets; and progress its Kibali, Tropicana and Cripple Creek & Victor growth projects to production.

A corporate cost review conducted in conjunction with Deloitte, is well advanced. A team of senior operational and financial management personnel is also conducting a thorough review of all operations to extract operational efficiencies from all sites. In addition, exploration spending across the group has been rationalised, some assets deemed to be non-core are being considered for sale and capital expenditure has been prioritised.

Net debt level as at 31 December 2012 was in line with our guidance at \$2.06bn, compared with \$610m at the start of the year. The principal three factors that accounted for the increase in net debt level were:

- Project capital of \$1.1bn, of which 80% was spent on Tropicana, Kibali, CC&V and Mponeng.
- Acquisitions of Serra Grande and Mine Waste Solutions paid for with \$555m in cash.
- Lost earnings of \$208m as a consequence of the unprotected strike action in South Africa. As a result of the protracted unprotected strike at our South African mines during the fourth quarter, we raised R1bn under a Domestic Medium Term Note Programme in South Africa. Of this debt, R700m matures in January 2014 whilst the balance of R300m matures in April 2013, but can be rolled over in the local bond markets.

AngloGold Ashanti Limited has entered into a syndicated bridge loan facility agreement pursuant to which a syndicate of banks has agreed to make available \$750,000,000 to AngloGold Ashanti Holdings. In the event AngloGold Ashanti chooses to draw on the loan, the proceeds are to be applied towards the repayment of the \$732,500,000, 3.5% convertible bonds due in May 2014. This prudent, pre-emptive move addresses any refinancing concerns that may arise over the next few months around the 2014 convertible bond falling due for repayment.

In September 2010 the Group issued \$789m worth of Mandatory Convertible Bonds that are due for conversion into equity in September 2013. When this conversion occurs in the third quarter, at current share prices, 18.14m shares will be issued as a consideration for the bonds converting into equity. The total shares in issue (including E-Ordinary shares) at that point will increase to 403m shares from the current 385m shares and the 6.0% interest coupon on this bond will cease to be paid.

Resources¹ increased to 241.5Moz in 2012, from 230.9Moz the previous year, reflecting an increase of 14.4Moz from exploration (10.6Moz from La Colosa) and modelling. Reserves² at year-end 2012 were 74.1Moz, down from 75.6Moz, reflecting changes in economic assumptions and offset by the acquisitions of the remaining 50% of Serra Grande and Mine Waste Solutions.

With effect from 1 January 2013, AngloGold Ashanti will be adopting IFRIC 20 in relation to capitalisation of qualified deferred stripping costs and amortising the same with adequate componentisation. IFRIC 20 provides for a transition adjustment in respect of certain brought forward balances and such balances will be written off against reserves.

“We’ve moved decisively to ensure that we continue a strong recovery from a difficult end to last year,” Joint Interim Chief Executive Officer Tony O’Neill said.

“We’re creating a leaner business and placing an absolute focus on costs, capital efficiency and driving returns to shareholders,” Joint Interim Chief Executive Officer Srinivasan Venkatakrishnan said. “We have also been proactive and obtained a Term Facility to backstop, if required the convertible bond maturing in May 2014 to remove refinancing risk.”

FOURTH QUARTER REVIEW

A strong performance in the Americas Region was offset, in particular, by the strike at the group’s South African mines and underperformance at Obuasi, in Ghana, mentioned as a major milestone below. Despite challenges faced in South Africa, Standard & Poor’s affirmed the investment grade rating, albeit with a negative outlook, on AngloGold Ashanti’s publicly traded debt following an extensive review. Major milestones were reached outside of South Africa, most notably the termination of the underground development contract with Mining and Building Contractors Limited, in Ghana, where sub-par development performance has been identified as a key constraint to the mine’s performance in recent years. At Tropicana, 1.0Moz was added to the resource and the group achieved the lowest quarterly All Injury Frequency Rate (AIFR) on record for the organisation at 6.17 per million hours worked.

Fourth-quarter AHE was \$7m, or 2 US cents a share, compared to \$295m, or 76 US cents a share in the fourth quarter of 2011. AHE was affected by the lower volumes and higher cash costs during the quarter, reflecting the impact of the strike in South Africa which eroded \$208m of earnings and the change-over of the mine development contractor at Obuasi that had a negative impact of \$44m. In addition, specific non-cash asset abandonment and de-recognition accounting charges following a reassessment of useful lives of certain mine development assets of \$248m after taxation were booked against net profits. These relate primarily to Obuasi and to a lesser extent Great Noligwa, Kopanang and Sigui. Cash flow generated from operating activities was \$454m during the fourth quarter compared with \$644m a year earlier. Free cash flow was negative during the fourth quarter at \$447m, due largely to the impact of the South African strike and the higher capital expenditure profile of \$804m.

DIVIDEND

The Board has declared a dividend of 50 South African cents per share (approximately 6 US cents per share) for the fourth quarter in line with previous guidance taking the full year’s dividend to 300 South African cents per share.

SAFETY

Tragically, four fatal incidents were reported during the quarter - two in the South Africa Region and two in the Continental Africa Region.

Much still needs to be done to reach the goal of eliminating injuries from the workplace. To this end, specific training programmes were developed to prevent repeat safety incidents, focusing on safety and incident investigation skills, improving identification and control of hazards to more effectively manage risk; and improving safety leadership behaviour. Incident investigation learning interventions were implemented throughout the group, covering about 500 people. About 400 employees have undergone formal evaluation and are now capable of leading investigations, while 100 are competent to facilitate incident investigations.

¹Mineral Resources have been estimated at a gold price of US\$2,000/oz (2011: US\$1,600/oz).

²Ore Reserves have been calculated using a gold price of US\$1,300/oz (2011: US\$1,100/oz).

The group's ongoing focus on safety, through various programmes and initiatives, helped lower the AIFR to 7.72 per million hours worked, the lowest on record for the company and 21% better than the previous year, which reflected double digit improvements from all regions against 2011 year-end performance. The December quarter end had the lowest quarterly AIFR on record for the organisation at 6.17 per million hours worked.

OPERATING REVIEW

Gold production for the three months to 31 December 2012 was 859,000oz at a total cash cost of \$1,009/oz, compared to 1,114,000oz at a total cash cost of \$762/oz for the same period last year. Output and costs in the fourth quarter was affected primarily by labour unrest in South Africa. The Americas Region recorded solid production results with a strong contribution from Brazil. The pro-forma total cash costs without the strike impact would have been \$852/oz, some \$14/oz lower than the third quarter's cash costs of \$866/oz.

The **South African** operations produced 171,000oz at a total unit cash cost of \$1,166/oz in the three months to 31 December 2012, compared with 398,000oz at a total cash cost of \$696/oz in the same period last year. Production for the year was 1,212,000oz at a total cash cost of \$873/oz, compared to production of 1,624,000oz at a total cash cost of \$694/oz in 2011.

The unprotected strike, during which all South African operations were at a standstill for over a month, severely hampered gold output across all operations and had a commensurate impact on costs. The unprotected work stoppage by more than 30,000 people was resolved with, among other things, mutually agreed job-grading improvements which raised the minimum wage and made other adjustments for other categories of employees. No wages were paid to striking workers for the period, though fixed costs were incurred, as were salaries for non-striking employees. The strike ended across all operations on 26 October though TauTona was again disrupted by a short underground sit-in on 1 November, as a result of which the company allowed the early repayments of a safety incentive in order to ensure the safe restart of the mine. Mponeng was also halted by management, between 6 November and 14 November following two underground sit-ins and vandalism to a building at surface. Work resumed after a code of conduct was agreed by management, employees and representatives of organised labour unions.

AngloGold Ashanti's management has continued to engage with its employees directly, and through their labour unions, in order to ensure a constructive dialogue is maintained ahead of this year's bi-annual wage talks. This includes the Association of Mineworkers and Construction Union, a new labour union, which has established itself in the gold sector.

The South African mines' quarterly performance was also adversely affected by a range of factors including safety-related disruptions, seismic activity in the West Wits Region, geological limitations coupled with lower mining grades in the Vaal River district and continued cost pressures that exceeded headline inflation.

At the West Wits operations, Mponeng's fourth-quarter production decreased 65% year-on-year to 48,000oz due to the labour unrest followed by a one week temporary suspension of operations due to safety concerns. Total cash costs rose 80% to \$934/oz year-on-year as a result of the lower gold output. At the adjacent TauTona mine, fourth-quarter output decreased 69% year-on-year to 22,000oz, mainly as a result of the strike and a safety stoppage during the ramp up period. Total cash costs increased by 89% year-on-year to \$1,307/oz.

The Vaal River operations, particularly Moab Khotsong, were severely impacted by the industrial strike action and mining flexibility constraints. This led to the fourth-quarter gold production at Moab Khotsong deteriorating by 56% to 23,000oz year-on-year. The mine also experienced a 24% decline in grade. Total cash cost increased by 65% year-on-year to \$1,359/oz. Great Noligwa's fourth-quarter output fell 30% year-on-year to 14,000oz as a result of the strike, face length constraints and declining yields, while total cash costs rose 7% year-on-year to \$1,369/oz. Kopanang, adversely affected by mining flexibility impediments and lower mining grades, experienced a 61% year-on-year decline in production to 26,000oz while total cash costs rose by 27% year-on-year to \$970/oz. Additional uranium sales during the quarter alleviated the impact of the gold shortfall on costs.

Surface operations experienced a 46% year-on-year decline in production to 20,000oz as a result of the strike and lower yields. Total cash costs escalated by 84% year-on-year to \$1,312/oz due to inflationary pressure on reagents and increased expenditure related to dust-control initiatives to improve environmental conditions. First Uranium, acquired in the third quarter of 2012, produced 14,000oz at a total cash cost of \$1,191/oz in the three months to 31 December 2012. Since the acquisition of First Uranium, AngloGold Ashanti's operating protocols, including Project ONE methodologies and principles, have begun to be implemented at First Uranium to improve efficiencies and regulatory compliance.

The **Continental Africa Region** produced 376,000oz at a total cash cost of \$1,070/oz in the fourth quarter, compared to 419,000oz at a total cash cost of \$799/oz in the same period last year. Production for the year ended 31 December 2012 was 1,521,000oz at a total cash cost of \$905/oz compared to production of 1,570,000oz at a total cash cost of \$765/oz in 2011.

In Ghana, Iduapriem's fourth quarter production declined year-on-year by 12% to 44,000oz as a result of lower tonnage throughput, as well as a decrease in recovered grade. Total cash costs were maintained at \$1,052/oz. Obuasi's fourth quarter production was 6% lower when compared to the same period last year at 76,000oz due to lower grades, equipment availability and late stope preparation, all of which took place during a quarter in which the development contract was terminated. Total cash costs, which included some once-off items, increased to \$1,519/oz. AngloGold Ashanti cancelled the underground development contract following a protracted period of below-target performance from the contractor. On 8 November, after a mandatory 28-day notice period, AngloGold Ashanti assumed operational accountability for development at the site.

In the Republic of Guinea, Sigui's fourth quarter production increased by 3% to 64,000oz when compared to the same period last year as the benefits of the Project ONE initiative were realised through an improvement in both tonnage throughput and recovered grade. Total cash costs decreased by 3% year-on-year to \$1,014/oz.

In Mali, Morila's fourth quarter production was 20,000oz, while total cash costs decreased by 7% year-on-year to \$714/oz. This was mainly as a result of the increased gold production and processing of marginal stockpiles, compared to full-grade ore the previous quarter, and was partly offset by higher royalties due to the higher gold price and higher fuel prices. Sadiola's fourth quarter production was similar to last year's levels at 27,000oz, reflecting an increase in tonnage throughput due to improved operational stability, partially offset by a decrease in recovered grade limited by availability of oxide ore sources. Total cash costs increased by 19% year-on-year to \$1,211/oz primarily as a result of currency fluctuations and increased consumable expenditure. Yatela's production was 10,000oz.

In Namibia, Navachab's fourth quarter production was relatively consistent at 18,000oz when compared to the same period last year. Total cash costs increased by 8% year-on-year to \$1,003/oz, impacted by increased royalties due to a higher gold price.

In Tanzania, Geita's fourth quarter production decreased by 18% year-on-year to 118,000oz as a result of a planned 33% decrease in recovered grade as higher-grade material was stockpiled in preparation for the scheduled replacement of the primary mill in the first quarter of 2013. Total cash costs consequently increased to \$825/oz, further influenced by increased royalties due to a higher gold price and year-end consumable stock write-downs.

In the **Americas Region**, fourth quarter production was up 10% year-on-year to 258,000oz at a total cash cost of \$720/oz from the same period last year when the region produced 234,000oz at a total cash cost of \$612/oz. Production for the year ended 31 December 2012 was 953,000oz at a total cash cost of \$683/oz, compared to production of 891,000oz at a total cash cost of \$528/oz.

At Cripple Creek & Victor (CC&V), fourth quarter production was 53,000oz which was 25% lower when compared to the same period last year, in line with the mine plan. Lower production was due to fewer ounces placed on the pad in the first half of the year. Cash cost increased by 4% to \$668/oz compared to the same period last year.

At AngloGold Ashanti Brasil Mineração, fourth-quarter production was 23% higher than the same period in 2011 at 112,000oz primarily due to higher production from the ramp up at Corrego do Sitio. Total cash costs were 13% higher than the same period last year at \$672/oz as a consequence of higher equipment maintenance costs and a lower proportion of primary development costs that were capitalised. At Serra Grande, now 100% owned, production was 23% higher than the same period in 2011 at 37,000oz. Total cash cost was 21% higher than the same period last year at \$755/oz as a result of higher maintenance and drilling costs.

Cerro Vanguardia's fourth quarter production was 8% higher at 55,000oz year-on-year, while total cash costs rose 44% year-on-year to \$829/oz reflecting lower by-product credits due to lower silver prices and lower silver production. Costs at the operation were also negatively impacted by higher costs associated with the heap leach, higher inflation, and higher equipment and vehicles maintenance costs associated with energy consumption.

In **Australia**, production at Sunrise Dam for the quarter was 55,000oz at a total cash cost of \$1,309/oz. Production for the year ended 31 December 2012 was 258,000oz at a total cash cost of \$1,126/oz compared to production of 246,000oz at a total cash cost of \$1,367/oz. During the year, underground production rates increased from 1.5Mtpa to 2 Mtpa as the transition from the open-pit continued. Redesign of the final stage of the open pit and remedial work to repair damage caused by a pit wall failure in 2011 was completed, enabling mining of the crown pillar at the base of the pit which is expected to begin early in 2013.

PROJECTS

AngloGold Ashanti incurred capital expenditure of \$804m (including equity-accounted joint ventures) during the quarter, of which \$469m was spent on growth projects. Expenditure on growth-related capital was \$56m in the Americas, \$186m in Continental Africa, \$166m in Australasia and \$61m in South Africa.

The CC&V MLE 2 is currently in the implementation stage. The project is expected to extend the mine life from 2017 through 2025, adding 2.6Moz of gold production. The primary project elements include a second Valley Leach Facility (VLF 2) in Squaw Gulch and appropriate modifications of the drainage and storm water management plan to accommodate the new facility, a carbon adsorption/desorption/electro-winning facility to process solutions from VLF 2, a grinding/flotation/cyanidation plant to process 2M short tons per year of selectively mined high grade ore, mine fleet replacement plus additional equipment to facilitate selective high grade mining, roads, power, water and process infrastructure requirements, and mining and processing an additional 218M short tons of ore.

Construction of a water pumping facility began in December 2012, the drain cover fill placement has been completed and the mill platform construction is underway. A contract has been awarded for construction of the VLF 2 and the re-routing of Highway 67 (part of which will be covered by the leach pad). First gold production is expected during the second half of 2016.

The Kibali project, a joint venture between state-owned Sokimo (10%), AngloGold Ashanti (45%) and operator Randgold Resources (45%), has budgeted attributable project capital expenditure of \$982m (including contingencies and escalation), to fund the development of the open pit and underground mines, as well as associated infrastructure, with first production of gold from the open pit targeted for late 2013. In 2012, AngloGold Ashanti spent \$263m towards Kibali's development, which remained on schedule. All key contracts have now been agreed. Work is progressing on the Metallurgical Plant, the CIL steelwork is in progress, the mill bases have been poured and the steelwork is being installed for the mill, the primary crushers and the conveyor.

Open pit mining has begun. The project team has handed over the boxcut to Byrncut on 13 December 2012 and the development work on the twin declines commenced on the Western portal on 17 December 2012. The shaft terrace portion has been completed, the vertical shaft sinking contractor, Shaft Sinkers, has mobilised the first crew on site and taken the cut of the shaft boxcut.

The Relocation Action Plan continued with more than 1,450 families already resettled in the new model village of Kokiza.

The **Mongbwalu project** (AGA 86.22%) review, announced in November, is scheduled for completion at the end of March 2013. Construction activities related to the completion of the construction and operations camps, all access roads and the mine portal area are progressing. The plan also includes the preparation of the tailings and return water dam area and the plant fabrication, where the mill is scheduled to be ready for testing in May 2013.

The **Tropicana Gold Project** (AGA 70% and manager, Independence Group NL 30%) remains on track to begin production in the fourth quarter of 2013. Engineering design and procurement activities are now complete and at the end of 2012, construction was 56% complete. During the December quarter, the Mineral Resource estimate (100% project) was updated to 118Mt at 2.08g/t containing 7.89Moz of gold (full details are available at www.anglogoldashanti.com).

This represented a 1.48Moz increase from the previous estimate and a 2.8Moz increase since the project was approved in November 2010. The Ore Reserve, which has increased by 15% to 56.4Mt at 2.16g/t for 3.91Moz since approval, is expected to be updated on completion of the Havana Deeps Pre-Feasibility Study. The study is examining the economic trade-off between open cut and underground mining of the Havana Deeps Mineral Resource. With the award during the quarter, of the major Structural, Mechanical & Piping (SMP) and Electrical & Instrumentation (E&I) contracts, project capital cost estimates have been updated.

On a 100% project basis, the estimated capital expenditure has increased to between A\$820-A\$845 million. This represents an 11% increase on the mid-point of the capital expenditure range forecast at the time the project was approved in November 2010 (the increase is covered by the budgeted CEO contingency). At that time, capital expenditure (nominal) was forecast to be between A\$725-A\$775 million. The increase is largely due to higher construction labour costs and decreased productivity.

Gold production in the first three years of operation remains in the range of 470,000-490,000oz per annum (100% project) at slightly increased cash costs of between A\$590/oz-A\$630/oz, compared to a forecast of A\$580/oz-A\$600/oz at approval. The increase is largely due to higher fuel prices, which were also impacted by the reduction in fuel rebates associated with the introduction of the Australian carbon tax.

During the quarter, near-mine exploration returned encouraging results including 5m at 5.2g/t from 108m and 7m at 3.6g/t from 413m at Springbok and 9m at 5.4g/t from 439m at Boston Shaker.

The company-wide project called **Project ONE**, aimed at improving efficiencies consists of several initiatives namely Safety Transformation (ST), System for People (SP) and Business Process Framework (BPF).

Safety Transformation initiatives for the fourth quarter maintained focus on hazard identification and incident management where individuals across disciplines were trained in incident investigation. A Safety Culture Transformation Framework with a view to significantly improve the culture of health and safety across the mining sector was introduced in collaboration with the Chamber of Mines. In support of the framework, a gap-analysis was conducted to assess the South African Region (SAR) Leadership Programmes and amendments were performed in aligning programmes with expectations.

System for People, the human resources component of our business model, provides the leadership and supporting management processes to ensure the right people, are in the right roles and doing the right work to deliver against our goals. During the quarter, focus was on cascading of Managerial Leadership Practices (MLP) with the SAR Management Committee. A comprehensive engagement model ensured the entrenchment of the MLP's and the first module was attended by all operational executive teams. Talent pool development and the performance management process is ongoing and was completed down to Stratum II level.

The Simunye safety and productivity training programme, a three-week course focussing on team building, engagement and safety training among other activities, is being implemented at all South African operations. This programme, part of the roll-out of Project ONE to production crews, focuses on safety and the reduction of injury rates, the reduction of disruptive stoppages, improved compliance with mining cycles and blast frequency. The programme began around two years ago, and to date 67% of AngloGold Ashanti's work crews in South Africa have undergone Simunye training, which includes a component of personal finance training to help educate employees about predatory lending practises in the private sector and to assist in creating a sound personal financial platform.

Crew performances are continually monitored and analysed, and the following productivity improvements were recorded:

- Improvement of 14% in m²/ISW (in-stope worker), and 22% in face advance at TauTona Mine;
- Improvement of 6% in average vamping at Savuka; and
- Improvement of 15% in face advance at Mponeng Mine translating into higher area mined and increased productivity per in-stope worker.

The Business Process Framework implementation is on-going and new management routines are being developed to support the key task behaviour methodologies. The integrity and quality of work packages within the production environment was extensively tested and reviewed to ensure a safe start-up at the end of the unprotected strike in South Africa. Production maintenance systems configuration and data sourcing has been finalised for SAP integration (OneERP), and certain of the regions went live on 4 February 2013.

Technology update

The Technology & Innovation Consortium continue to clear technical hurdles on the path to creating a safe, automated mining method intended for use at AngloGold Ashanti's deep-level underground mining operations.

The Consortium made significant progress relating to the three key projects:

- **RC (Geological) Drilling;**
RC Drilling tests continued to assess the performance of the equipment in a deep-level underground environment at TauTona. RC drilling on TauTona mine (75 level) commenced in August 2012 and was interrupted by the strike action. The aim of this is to assess the performance of the machine in a deep level underground mining environment in order to enhance geological ore-body information. Drilling is scheduled to resume in the first quarter of 2013.
- **Reef Boring; and**
In Reef Boring, the first prototype raise bore machine completed five test holes using a double pass technique. Further tests using a second prototype raise bore machine has commenced test drilling, using a single pass technique.
- **Ultra High Strength Backfill.**
Substantial progress has been made in the design and testing of Ultra High Strength Backfill. Surface tests were completed at TauTona mine. The construction for the underground plant has commenced.

These combined technologies have the potential to alter the way deep-level underground ore bodies are mined in South Africa, and to significantly improve safety and unlock additional value by extracting the gold that is not viable to mine using our current mining methods.

EXPLORATION

Total exploration expenditure during the fourth quarter, inclusive of expenditure at equity accounted joint ventures, was \$176m (\$51m on brownfield, \$69m on greenfield and \$56m on pre-feasibility studies), compared with \$115m during the previous year's quarter (\$37m on brownfield, \$43m on greenfield and \$35m on pre-feasibility studies).

Greenfield exploration activities were undertaken in five regions (Australia, Americas, Pacific, Sub-Saharan Africa and the Middle East & North Africa) during the quarter. A total of 81,248m of diamond, RC and aircore drilling was completed on existing priority targets and used to delineate new targets in Australia, Colombia, Brazil, Guinea, Tanzania, Egypt, the Solomon Islands and the DRC.

In **Colombia**, exploration continued at the Nuevo Chaquiro and Tenedor targets, the Quebradona project, and the Santa Rita target in the Rio Dulce project, in joint venture with B2Gold (AGA 70%). At Nuevo Chaquiro, a total of 7,853m of diamond drilling was completed and returned further significant results including 760m @ 0.45% Cu and 0.23g/t Au in CHA-044. On the adjacent Nuevo Tenedor target, surface mapping and sampling was completed. At the Santa Rita target, detailed geological mapping, sampling and ground IP surveying is ongoing.

In **Brazil**, diamond drilling continued at the Falcao Joint Venture (AGA earning 70%), managed by Horizonte Minerals, with a total of 906m completed. The drill programme confirmed continuity of the known mineralised footprint. At the Graben Joint Venture (AGA earning 51%), approximately 16,000 line kilometres of high-resolution airborne radio/magnetic geophysics was flown.

In **Australia**, a total of 2,119m of diamond drilling was completed at the Beaker prospect, within the Viking project (AGA 100%), and follows-up previous gold intercepts including 11m @ 3.06g/t Au and 7m @ 2.33g/t Au. At the Tropicana Joint Venture (AGA 70%), regional aircore (28,686m), RC (5,245m) and diamond (1,085m) drilling continued and returned a significant intersection from Voodoo Child of 12m @ 3.28g/t Au. At the Coronation Bore prospect, a total of 1,740m of diamond drilling was completed, targeting Iron Oxide Copper Gold (IOCG) mineralisation.

In **Guinea**, exploration work focussed on the Kounkoun trend in Block 3, with infill and delineation drilling and ground IP and magnetic geophysical surveying. At Kounkoun Central-East, Central-West and South, a total of 12,792m of aircore, reverse circulation and diamond drilling was completed, and follows up previously delineated mineralised zones. Best results include, but are not limited to (true widths), 59.2m @ 1.82g/t Au in KKRC161, 28.2m @ 2.34g/t Au in KKRC175, 42.3m @ 2.44g/t Au in KKRC173 and 21.6m @ 2.63g/t, 39.5m @ 1.94g/t and 42.3m @ 1.14g/t Au in KKRC201. At Kolita North, a total of 1,710m of reverse circulation drilling was completed. Mapping and surface sampling of artisanal working was also carried out in Block 3 and Block 4.

In **Tanzania**, diamond drilling, IP geophysical surveying and surface soil sampling was completed at the Lusahunga project (AGA earning 60%), located 150km west of Geita in the Nyakahura Belt, in joint venture with Oryx Mining and Exploration Ltd. A total of 807m was drilled, targeting observed shear-hosted and stockwork veining.

In the **Democratic Republic of the Congo**, exploration continued within the Kilo Greenstone Belt, which is part of the Ashanti Goldfields Kilo Joint Venture (AGA 87%). A total of 6,140m of diamond drilling was completed at the Issuru, Akwé, Petsi, Yemoliani and Nevienda prospects with encouraging results received for Akwé and Issuru. Further results are awaited. Ground IP geophysical surveying at Bakombé delineated significant anomalies, to be drill tested in 2013, while Xcalibur Airborne Geophysics were contracted to complete approximately 7,500 line kilometres of magnetic and radiometric surveying over the north and north-eastern licences. At the Kabakaba prospect, surface soil sampling was completed.

OUTLOOK

Group's gold production for 2013 is estimated at between 4.1Moz to 4.4Moz. Total cash costs are estimated at between \$815/oz-\$845/oz at an average exchange rate of R8.75/\$, BRL2.00/\$, A\$1.02/\$ and AP5.00/\$ and fuel at \$113/barrel. Both production and total cash costs estimates will be reviewed quarterly, in light of any unforeseen factors.

Gold production for the first quarter of 2013 is estimated at 910koz to 950koz. Total cash costs are estimated at between \$900/oz-\$910/oz at an average exchange rate of R8.75/\$, BRL2.00/\$, A\$1.02/\$ and AP5.00/\$ and fuel at \$113/barrel. Both estimates could be revised downwards in light of recent labour related challenges experienced in South Africa.

For 2013, capital expenditure is anticipated to be about \$2.1bn, compared with \$2.15bn in 2012. Included within the capital expenditure guidance for 2013 is US\$118m of qualified deferred stripping costs. Corporate costs, which include implementation of the Enterprise Resource Planning system, marketing and Project ONE expenditure, are expected to be \$240m, about \$51m less than in 2012. Spending on expensed exploration and studies, including equity accounted joint ventures, is anticipated to be about \$377m, \$84m less than in 2012. Depreciation and amortisation is anticipated to be \$1,050m, while interest and finance costs are expected to be \$250m (including coupon on mandatory convertible bonds).

Mineral Resource and Ore Reserve

Mineral Resource and Ore Reserve are reported in accordance with the minimum standards described by the Australasian Code for Reporting of Exploration Results, Mineral Resource and Ore Reserve (JORC Code, 2004 Edition), and also conform to the standards set out in the South African Code for the Reporting of Exploration Results, Mineral Resource and Mineral Reserve (The SAMREC Code, 2007 edition). Mineral Resource is inclusive of the Ore Reserve component unless otherwise stated.

AngloGold Ashanti strives to actively create value by growing its major asset – the Mineral Resource and Ore Reserve. This drive is based on an active, well-defined brownfields exploration programme, innovation in both geological modelling and mine planning and continual optimisation of its asset portfolio.

MINERAL RESOURCE

The total Mineral Resource increased from 230.9Moz in December 2011 to 241.5Moz in December 2012. A gross annual increase of 15.8Moz occurred before depletion, while the net increase after allowing for depletion is 10.7Moz. Changes in economic assumptions from December 2011 to December 2012 resulted in a 1.2Moz increase to the Mineral Resource, whilst exploration and modelling resulted in an increase of 14.4Moz. The remaining decrease of 3.7Moz resulted from various other factors. Depletion from the Mineral Resource for the year totalled 5.1Moz. The acquisition of the additional 50% of Serra Grande and the purchase of Mine Waste Solutions added a total of 3.8Moz to the Mineral Resource.

MINERAL RESOURCE		Moz
Mineral Resource as at 31 December 2011		230.9
Reductions		
Great Noligwa	Revisions due to reduced likelihood of eventual extraction	(2.8)
Obuasi	Revised estimates of historic mining	(2.0)
CC&V	Combination of increased costs and revised metallurgical recoveries	(1.1)
Kopanang	Negative exploration results and depletion	(1.0)
Other	Total of non-significant changes	(1.9)
Additions		
Tropicana	Reporting of Havana as an open pit Mineral Resource	1.0
Mponeng	Revised geological modelling of the Ventersdorp Contact Reef	1.3
La Colosa	Exploration success	10.6
Other	Total of non-significant changes	2.6
Acquisitions		
Serra Grande	Acquisition of the remaining 50% of the operation	1.2
Mine Waste Solutions	Acquisition of Mine Waste Solutions	2.7
Mineral Resource as at 31 December 2012		241.5

Rounding of numbers may result in computational discrepancies.

Mineral Resources have been estimated at a gold price of US\$2,000/oz (2011: US\$1,600/oz).

ORE RESERVE

The AngloGold Ashanti Ore Reserve reduced from 75.6Moz in December 2011 to 74.1Moz in December 2012. A gross annual increase of 3.2Moz occurred before depletion of 4.7Moz. The decrease net of depletion was therefore 1.5Moz. Changes in economic assumptions from 2011 to 2012 resulted in a reduction of 0.6Moz to the Ore Reserve, while exploration and modelling resulted in an increase of 0.6Moz. The acquisition of the remaining 50% of Serra Grande and Mine Waste solutions added a further 2.8Moz. The remaining increase of 0.4Moz resulted from various other factors.

ORE RESERVE		Moz
Ore Reserve as at 31 December 2011		75.6
Reductions		
Kopanang	Depletion and minor model revision	(1.4)
Obuasi	Revised mine planning parameters and geotechnical review	(0.9)
Great Noligwa	Economic driven reduction of underground mining footprint	(0.7)
Other	Total non-significant changes	(2.7)
Additions		
Kibali	Open pit increase due to additional metal defined by grade control drilling.	0.4
Geita	Positive economic changes	0.7
Other	Total non-significant changes	0.3
Acquisitions

Mine Waste Solutions	Purchase of Mine Waste Solutions	2.4
Ore Reserve as at 31 December 2012		74.1

Rounding of numbers may result in computational discrepancies.

Ore reserves have been calculated using a gold price of US\$1,300/oz (2011: US\$1,100/oz).

BY-PRODUCTS

Several by-products are recovered as a result of the processing of gold Ore Reserves. These include 73,492t of uranium oxide from the South African operations, 439,564t of sulphur from Brazil and 40.7Moz of silver from Argentina.

COMPETENT PERSONS

The information in this report relating to exploration results, Mineral Resources and Ore Reserves is based on information compiled by the Competent Persons. The Competent Persons consent to the inclusion of Exploration Results, Mineral Resource and Ore Reserve information in this report, in the form and context in which it appears.

During the past decade, the company has developed and implemented a rigorous system of internal and external reviews of Exploration Results, Mineral Resources and Ore Reserves. A documented chain of responsibility exists from the Competent Persons at the operations to the company's Mineral Resource and Ore Reserve Steering Committee. Accordingly, the Chairman of the Mineral Resource and Ore Reserve Steering Committee, VA Chamberlain, MSc (Mining Engineering), BSc (Hons) (Geology), MGSSA, FAusIMM, assumes responsibility for the Mineral Resource and Ore Reserve processes for AngloGold Ashanti and is satisfied that the Competent Persons have fulfilled their responsibilities.

A detailed breakdown of Mineral Resource and Ore Reserve and backup detail is provided on the AngloGold Ashanti website (www.anglogoldashanti.com).

Notes

for the quarter and year ended 31 December 2012

1. Basis of preparation

The financial statements in this quarterly report have been prepared in accordance with the historic cost convention except for certain financial instruments which are stated at fair value. Except for the change in presentation currency detailed in note 17, the group's accounting policies used in the preparation of these financial statements are consistent with those used in the annual financial statements for the year ended 31 December 2011 and revised International Financial Reporting Standards (IFRS) which are effective 1 January 2012, where applicable. The effect of the revised and amended accounting standards applicable to this period are not considered to have a material impact on the financial statements of the group.

The financial statements of AngloGold Ashanti Limited have been prepared in compliance with IAS 34, IFRS as issued by the International Accounting Standards Board, The Financial Reporting Guides as issued by the South African Institute of Chartered Accountants, JSE Listings Requirements and in the manner required by the South African Companies Act, 2008 for the preparation of financial information of the group for the quarter and year ended 31 December 2012.

12. Capital commitments

	Dec 2012	Sep 2012	Dec 2011
	Reviewed	Reviewed	Audited
US Dollar million			
Orders placed and outstanding on capital contracts at the prevailing rate of exchange ⁽¹⁾	927	1,004	202

⁽¹⁾ Includes capital commitments relating to equity-accounted joint ventures.

Liquidity and capital resources

To service the above capital commitments and other operational requirements, the group is dependent on existing cash resources, cash generated from operations and borrowing facilities.

Cash generated from operations is subject to operational, market and other risks. Distributions from operations may be subject to foreign investment, exchange control laws and regulations and the quantity of foreign exchange available in offshore countries. In addition, distributions from joint ventures are subject to the relevant board approval.

The credit facilities and other finance arrangements contain financial covenants and other similar undertakings. To the extent that external borrowings are required, the group's covenant performance indicates that existing financing facilities will be available to meet the above commitments. To the extent that any of the financing facilities mature in the near future, the group believes that sufficient measures are in place to ensure that these facilities can be refinanced.

13. Business combinations

Acquisition of First Uranium (Pty) Limited

On 20 July 2012, AngloGold Ashanti Limited acquired the entire share capital of First Uranium (Pty) Limited, a wholly owned subsidiary of Toronto-based First Uranium Corporation and the owner of Mine Waste Solutions, a recently commissioned tailings retreatment operation located in South Africa's Vaal River region and in the immediate proximity of AngloGold Ashanti Limited's own tailings facilities, for an aggregate cash consideration of \$335m. The transaction was funded from cash reserves and debt facilities. The acquisition has been accounted for using the acquisition method.

The fair value of the identifiable assets and liabilities of First Uranium (Pty) Limited as at the date of acquisition was:

	2012
	US Dollars million
Assets	
Tangible assets	616
Other investments	3
Deferred tax	52
Inventories	134
Trade and other receivables	2
Cash restricted for use	3
Cash and cash equivalents	5
	<u>815</u>
Liabilities	
Loans from group companies	204
Environmental rehabilitation and other provisions	386
Deferred tax	60
Trade and other payables	48
	<u>698</u>
Total identifiable net assets at fair value	117
Purchase consideration	131
Goodwill recognised on acquisition	14
	<u>145</u>
Analysis of cash flows on acquisition:	
Net cash acquired with the subsidiary	5
Cash paid - share capital acquired	(131)
Cash paid - loan acquired	(204)
	<u>(330)</u>

Since acquisition, First Uranium (Pty) Limited has contributed \$41m of revenue and a profit of less than \$1m to the net profit before tax of the group. If the combination had taken place at the beginning of the year, the group's profit for the year would have been \$927m and revenue would have been \$6,697m.

The transaction costs of \$3m have been expensed and are included in administrative expenses in the income statement and are part of operating activities in the statement of cash flows.

The goodwill of \$14m arising from the acquisition consists largely of the expected synergies arising from the immediate proximity of AngloGold Ashanti Limited's own tailings facilities to the Mine Waste Solutions plant that will allow processing of AngloGold Ashanti Limited's Vaal River tailings without having to build additional processing facilities. The processing of AngloGold Ashanti Limited's tailings will reduce the environmental liability associated with those tailings. In addition, the company is able to utilise its recently developed processes and recovery technology for tailings which will increase the ore recovery rates from both AngloGold Ashanti Limited and First Uranium (Pty) Limited tailings alike.

None of the goodwill recognised is expected to be deductible for income tax purposes. There have been no significant movements in goodwill or provisions except for the fair value movements related to the commodity contract since the date of acquisition.

Financial assets acquired includes trade and other receivables with a fair value of \$2m. All trade and other receivables are expected to be collectible.

Part disposal of Rand Refinery Limited

In early December 2012, AngloGold Ashanti Limited disposed of a 5% interest in Rand Refinery Limited (Rand Refinery) for a total cash consideration of \$6m. AngloGold Ashanti Limited now holds a remaining interest of 48.03% and this interest is accounted for as an associate.

The carrying value of the identifiable assets and liabilities of Rand Refinery as at the date of disposal was:

	2012
	US Dollars million
Assets	
Tangible assets	53
Other non-current assets	2
Non-current assets held for sale	1

	<u>319</u>	<u>150</u>

- (1) Groundwater pollution – AngloGold Ashanti has identified groundwater contamination plumes at certain of its operations in South Africa, which have occurred primarily as a result of seepage. Numerous scientific, technical and legal studies have been undertaken to assist in determining the extent of the contamination and to find sustainable remediation solutions. The group has instituted processes to reduce future potential seepage and it has been demonstrated that Monitored Natural Attenuation (MNA) by the existing environment will contribute to improvements in some instances. Furthermore, literature reviews, field trials and base line modelling techniques suggest, but have not yet proven, that the use of phyto-technologies can address the soil and groundwater contamination. Subject to the completion of trials and the technology being a proven remediation technique, no reliable estimate can be made for the obligation.
- (2) Deep groundwater pollution – The company has identified a flooding and future pollution risk posed by deep groundwater in certain underground mines in South Africa. Various studies have been undertaken by AngloGold Ashanti since 1999. Due to the interconnected nature of mining operations, any proposed solution needs to be a combined one supported by all the mines located in these gold fields. As a result, in South Africa, the Department of Mineral Resources and affected mining companies are now involved in the development of a “Regional Mine Closure Strategy”. In view of the limitation of current information for the accurate estimation of a liability, no reliable estimate can be made for the obligation.
- (3) Indirect taxes – AngloGold Ashanti (Ghana) Limited received tax assessments for the 2006 to 2008 and for the 2009 to 2011 tax years following audits by the tax authorities which related to various indirect taxes amounting to \$23m (2011: \$12m). Management is of the opinion that the indirect taxes were not properly assessed and the company has lodged an objection.
- (4) ODMWA litigation – On 3 March 2011, in Mankayi vs. AngloGold Ashanti, the Constitutional Court of South Africa held that section 35(1) of the Compensation for Occupational Injuries and Diseases Act, 1993 does not cover an “employee” who qualifies for compensation in respect of “compensable diseases” under the Occupational Diseases in Mines and Workers Act, 1973 (ODMWA). This judgment allows such qualifying employee to pursue a civil claim for damages against the employer. Following the Constitutional Court decision, AngloGold Ashanti has become subject to numerous claims relating to silicosis and other Occupational Lung Diseases (OLD), including several potential class actions and individual claims.

For example, on or about 21 August 2012, AngloGold Ashanti was served with an application instituted by Bangumzi Bennet Balakazi and others in which the applicants seek an order declaring that all mine workers (former or current) who previously worked or continue to work in specified South African gold mines for the period owned by AngloGold Ashanti and who have silicosis or other OLD constitute members of a class for the purpose of proceedings for declaratory relief and claims for damages. In the event the class is certified, such class of workers would be permitted to institute actions by way of a summons against AngloGold Ashanti for amounts as yet unspecified. On 4 September 2012, AngloGold Ashanti delivered its notice of intention to defend this application. AngloGold Ashanti has also delivered a formal request for additional information that it requires to prepare its affidavits in respect to the allegations and the request for certification of a class.

In addition, on or about 8 January 2013, AngloGold Ashanti and its subsidiary Free State Consolidated Gold Mines (Operations) Limited, alongside other mining companies operating in South Africa, were served with another application to certify a class. The applicants in the case seek to have the court certify two classes namely: (i) current and former mineworkers who have silicosis (whether or not accompanied by any other disease) and who work or have worked on certain specified gold mines at any time from 1 January 1965 to date; and (ii) the dependants of mineworkers who died as a result of silicosis (whether or not accompanied by any other disease) and who worked on these gold mines at any time after 1 January 1965. AngloGold Ashanti has filed a notice of intention to oppose the application.

In October 2012, a further 31 individual summonses and particulars of claim have been received relating to silicosis and/or other OLD. The total amount being claimed in the 31 summonses is approximately \$9m. On 22 October 2012, AngloGold Ashanti filed a notice of intention to oppose these claims. AngloGold Ashanti has also served a notice of exception to the summonses which, if successful, is expected to require the plaintiffs to redraft the particulars of claim to correct certain errors. The exception is expected to be heard by the South Gauteng High Court on 26 February 2013.

It is possible that additional class actions and/or individual claims relating to silicosis and/or other OLD will be filed against AngloGold Ashanti in the future. AngloGold Ashanti will defend all current and subsequently filed claims on their merits. Should AngloGold Ashanti be unsuccessful in defending any such claims, or in otherwise favourably resolving perceived deficiencies in the national occupational disease compensation framework that were identified in the earlier decision by the Constitutional Court, such matters would have an adverse effect on its financial position, which could be material. The company is unable to estimate its share of the amounts claimed.

- (5) Other tax disputes - In November 2007, the Departamento Nacional de Produção Mineral (DNPM), a Brazilian federal mining authority, issued a tax assessment against AngloGold Ashanti Brazil Mineração (AABM) in the amount of \$21m (2011: \$21m) relating to the calculation and payment by AABM of the financial contribution on mining exploitation (CFEM) in the period from 1991 to 2006. AngloGold Ashanti’s subsidiaries in Brazil are involved in various other disputes with tax authorities. These disputes involve federal tax assessments including income tax, royalties, social contributions and annual property tax. The amount involved is approximately \$17m (2011: \$8m). Management is of the opinion that the taxes are not payable.
- (6) Sales tax on gold deliveries – In 2006, Mineração Serra Grande S.A. (MSG), received two tax assessments from the State of Goiás related to payments of state sales taxes at the rate of 12% on gold deliveries for export from one Brazilian state to another during the period from February 2004 to the end of May 2006. The first and second assessments are approximately \$96m (2011: attributable share \$54m) and \$60m (2011: attributable share \$34m) respectively. In November 2006, the administrative council’s second chamber ruled in favour of MSG and fully cancelled the tax liability related to the first period. In July 2011, the administrative council’s second chamber ruled in

favour of MSG and fully cancelled the tax liability related to the second period. The State of Goiás has appealed to the full board of the State of Goiás tax administrative council. In November 2011 (first case) and June 2012 (second case), the administrative council's full board approved the suspension of proceedings and the remittance of the matter to the Department of Supervision of Foreign Trade (COMEX) for review and verification. Both cases have been remitted to the COMEX and are under review. The company believes both assessments are in violation of federal legislation on sales taxes. A date has not yet been set for a hearing before the COMEX.

- (7) Other tax disputes - MSG received a tax assessment in October 2003 from the State of Minas Gerais related to sales taxes on gold. The tax administrators rejected the company's appeal against the assessment. The company is now appealing the dismissal of the case. The assessment is approximately \$19m (2011: attributable share \$9m).
- (8) Tax dispute – AngloGold Ashanti Colombia S.A. (AGAC) received notice from the Colombian Tax Office (DIAN) that it disagreed with the company's tax treatment of certain items in the 2010 income tax return. The company believes that the tax legislation has been applied correctly. The company is considering defending AGAC's position. An estimated additional tax of \$26m will be payable if the tax returns are amended. Penalties and interest for the additional tax are expected to be \$135m based on Colombian tax law.
- (9) Indemnity - As part of the acquisition by AngloGold Ashanti of the remaining 50% interest in MSG during June 2012, Kinross Gold Corporation (Kinross) has provided an indemnity to a maximum amount of BRL255m (\$90m at 31 December 2012 exchange rates) against the specific exposures discussed in items 6 and 7 above.
- (10) Royalty – As a result of the sale of the interest in the Boddington Gold Mine joint venture during 2009, the group is entitled to receive a royalty on any gold recovered or produced by the Boddington Gold Mine, where the gold price is in excess of Boddington Gold Mine's cash cost plus \$600/oz. The royalty commenced on 1 July 2010 and is capped at a total amount of \$100m, of which \$60m (2011: \$34m) has been received to date. Royalties of \$4m (2011: \$8m) were received during the quarter.
- (11) Royalty – As a result of the sale of the interest in the Tau Lekoa Gold Mine during 2010, the group is entitled to receive a royalty on the production of a total of 1.5Moz by the Tau Lekoa Gold Mine and in the event that the average monthly rand price of gold exceeds R180,000/kg (subject to an inflation adjustment). Where the average monthly rand price of gold does not exceed R180,000/kg (subject to an inflation adjustment), the ounces produced in that quarter do not count towards the total 1.5Moz upon which the royalty is payable.
- The royalty will be determined at 3% of the net revenue (being gross revenue less State royalties) generated by the Tau Lekoa assets. Royalties on 304,643oz produced have been received to date. Royalties of \$1m (2011: \$1m) were received during the quarter.
- (12) Provision of surety – The company has provided sureties in favour of a lender on a gold loan facility with its affiliate Oro Group (Pty) Limited and one of its subsidiaries to a maximum value of \$12m (2011: \$12m). The suretyship agreements have a termination notice period of 90 days.

15. Concentration of risk

There is a concentration of risk in respect of recoverable value added tax, fuel duties and appeal deposits from the Tanzanian government. The outstanding amounts have been discounted to their present value at a rate of 7.82%.

The recoverable value added tax, fuel duties and appeal deposits are summarised as follows:

	2012
Recoverable value added tax	16
Recoverable fuel duties ⁽¹⁾	35
Appeal deposits	4

(1) Fuel duty claims are required to be submitted after consumption of the related fuel and are subject to authorisation by the Customs and Excise authorities.

16. Borrowings

AngloGold Ashanti's borrowings are interest bearing.

17. Change in presentation currency

Effective 1 January 2012, the group changed the presentation currency of its results from reporting in US Dollars and South African Rands to reporting only in US Dollars. Management has concluded that the change in presentation currency will result in more reliable and relevant information than the prior position of reporting in two currencies. Management considered the following factors: the majority of AngloGold Ashanti's operating mines use US Dollars as their functional currency; the majority of AngloGold Ashanti's annual production and reserves are derived from non-South African Rand denominated countries; the majority of AngloGold Ashanti shareholders are not domiciled in a South African Rand denominated country; management prepare investor presentations and analysis in US Dollars only; and the management accounts, except for South Africa which is reported in dual currency, are reported to the Chief Operating Decision Maker in US Dollars.

The change in presentation currency has no effect on comparative information.

18. Announcements

On 1 October 2012, AngloGold Ashanti announced that its mines in South Africa remained at a standstill as a result of the unprotected strike which began on 20 September 2012 at the Kopanang operation and spread to the remaining five operations on 25 September 2012. On 24 October 2012, AngloGold Ashanti announced that the unprotected strike at its Vaal River region had come to an end. On 2 November 2012, AngloGold Ashanti announced that employees at the Mponeng and TauTona mines did not resume work due to illegal sit-ins. On 14 November 2012, following another sit-in, AngloGold Ashanti announced that normal operations resumed at its Mponeng mine following successful engagement with employee and trade union representatives.

On 13 October 2012, AngloGold Ashanti announced the termination of its relationship with Mining and Building Contractors Ltd, the underground development contractor at the Obuasi mine in Ghana.

On 16 October 2012, AngloGold Ashanti announced that the JSE Limited granted AngloGold Ashanti the listing of its ANG01 Senior Unsecured Fixed Rate Notes and ANG02 Senior Unsecured Floating Rate Notes under its ZAR10 billion Domestic Medium Term Note Programme dated 29 June 2012.

On 4 December 2012, AngloGold Ashanti announced that the Mineral Resource estimate for the Tropicana Gold Project had increased by a further 1.48 million ounces to 7.89 million ounces of contained gold. The increase was the result of drilling completed in 2012 and greater confidence in the viability of a larger pit at Havana.

On 10 December 2012, AngloGold Ashanti announced that Standard & Poor's affirmed the investment grade rating on the company's publicly traded debt following an extensive review.

On 8 January 2013, the Board of AngloGold Ashanti announced the resignation of Chief Executive Officer, Mark Cutifani with effect from 1 April 2013. The Board further announced the appointment of the current Chief Financial Officer, Mr Srinivasan Venkatakrishnan and Executive Vice President Business and Technical Development, Mr Anthony O'Neill as joint interim Chief Executives, with Mr Venkatakrishnan responsible for all Finance and Corporate functions and Mr O'Neill responsible for all Operations, Projects (including the company's Enterprise Resource Planning programme and procurement) and Technical functions.

19. Dividend

The salient details Dividend No. 115 for the quarter ended 30 September 2012 paid by AngloGold Ashanti (Registration Number 1944/017354/06) is shown below:

	Rate of exchange	Gross dividend declared	Withholding tax at 15%	Net dividend paid	Date of payment 2012
South African cents per ordinary share	-	50	7.5	42.5	14 December
UK pence per ordinary share	R14.2725/£1	3.503	0.525	2.978	14 December
Australian cents per CHES Depository Interest (CDI)	R1/A\$0.1077	1.077	0.162	0.915	14 December
Ghana cedi per ordinary share	R1/¢0.2117	0.10585	0.01588	0.08997	14 December
Ghana cedi per Ghanaian Depository Share (GhDSs)	R1/¢0.2117	0.0010585	0.0001588	0.0008997	17 December
US cents per American Depository Share (ADS)	R8.6784/\$1	5.7614	0.8642	4.8972	24 December

Each CDI represents one-fifth of an ordinary share, and 100 GhDSs represents one ordinary share. Each ADS represents one ordinary share.

Quarter ended 30 September 2012 Dividend No. E15 of 25 South African cents (gross), or 21.25 South African cents (net) was paid to holders of E ordinary shares on 14 December 2012, being those employees participating in the Bokamoso ESOP and 25 South African cents (gross) was paid to Izingwe Holdings (Proprietary) Limited on the same day.

The directors of AngloGold Ashanti Limited (Registration Number 1944/017354/06) declared *Final Dividend No. 116* for the quarter and year ended 31 December 2012 as detailed below. In terms of the withholding tax on dividends which became effective on 1 April 2012, the following additional information is disclosed:

Dividends have been declared out of total reserves	
Rate of dividend declared per ordinary share in South African cents (gross)	50
Dividends tax rate applicable to shareholders liable to pay the dividend tax	15%
STC credits utilised in South African cents	Nil
Rate in South African cents (net) where dividend tax at 15% is payable	42.5
The ordinary shares of AngloGold Ashanti Limited in issue at the date of declaration is	383,341,572
The E ordinary shares of AngloGold Ashanti Limited in issue at the date of declaration is	1,612,518
AngloGold Ashanti Limited's tax reference number	9640006608

In compliance with the requirements of Strate, given the company's primary listing on the JSE, the salient dates for payment of the dividend are as follows:

To holders of ordinary shares and to holders of CHES Depository Interests (CDIs)

Each CDI represents one-fifth of an ordinary share.

	2013
Currency conversion date for UK pounds, Australian dollars and Ghanaian cedis	Thursday, 7 March
Last date to trade ordinary shares cum dividend	Friday, 8 March
Last date to register transfers of certificated securities cum dividend	Friday, 8 March
Ordinary shares trade ex-dividend	Monday, 11 March
Record date	Friday, 15 March
Payment date	Thursday, 28 March

On the payment date, dividends due to holders of certificated securities on the South African and Jersey share registers will be electronically transferred to shareholders' bank accounts.

Dividends in respect of dematerialised shareholdings will be credited to shareholders' accounts with the relevant CSDP or broker.

To comply with further requirements of Strate, between Monday, 11 March 2013 and Friday, 15 March 2013, both days inclusive, no transfers between the South African, Jersey, Australian and Ghana share registers will be permitted and no ordinary shares pertaining to the South African share register may be dematerialised or rematerialised.

To holders of American Depositary Shares

Each American Depositary Share (ADS) represents one ordinary share.

2013	
Ex dividend on New York Stock Exchange	Wednesday, 13 March
Record date	Friday, 15 March
Approximate date for currency conversion	Friday, 22 March
Approximate payment date of dividend	Monday, 8 April

Assuming an exchange rate of R8.8736/\$, the gross dividend payable per ADS, which is subject to a 15% South African withholding tax, is equivalent to 6 US cents. However the actual rate of payment will depend on the exchange rate on the date for currency conversion.

To holders of Ghanaian Depositary Shares (GhDSs)

100 GhDSs represent one ordinary share.

2013	
Last date to trade and to register GhDSs cum dividend	Friday, 8 March
GhDSs trade ex-dividend	Monday, 11 March
Record date	Friday, 15 March
Approximate payment date of dividend	Monday, 2 April

Assuming an exchange rate of R1/0.21411¢, which is subject to a 15% South African withholding tax, the dividend payable per share is equivalent to 0.1071 cedis. However, the actual rate of payment will depend on the exchange rate on the date for currency conversion. In Ghana, the authorities have determined that dividends payable to residents on the Ghana share register be subject to a final withholding tax at a rate of 8%.

In addition, directors declared Interim Dividend No. E16, for the quarter and year ended 31 December 2012 of 25 South African cents per E ordinary share, payable to employees participating in the Bokamoso ESOP and Izingwe Holdings (Proprietary) Limited. These dividends will be paid on Thursday, 28 March 2013.

By order of the Board

T T MBOWENI
Chairman
18 February 2013

M CUTIFANI
Chief Executive Officer

Non-GAAP disclosure

From time to time AngloGold Ashanti Limited may publicly disclose certain "Non-GAAP" financial measures in the course of its financial presentations, earnings releases, earnings conference calls and otherwise.

The group uses certain Non-GAAP performance measures and ratios in managing the business and may provide users of this financial information with additional meaningful comparisons between current results and results in prior operating periods. Non-GAAP financial measures should be viewed in addition to, and not as an alternative to, the reported operating results or any other measure of performance prepared in accordance with IFRS. In addition, the presentation of these measures may not be comparable to similarly titled measures that other companies use.
