## INCORPORATION BY REFERENCE

Sappi Limited's report for the conformed second quarter results ended March 2013, furnished by the Registrant under this Form 6-K, is incorporated by reference into (i) the Registration Statements on Form S-8 of the Registrant filed December 23, 1999, December 15, 2004 and February 2, 2010 in connection with The Sappi Limited Share Incentive Scheme, (ii) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited Share Incentive Scheme, (iii) the Registration Statements on Form S-8 of the Registrant filed December 15, 2004 and December 21, 2005 in connection with The Sappi Limited 2004 Performance Share Incentive Plan and (iv) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited 2004 Performance Share Incentive Plan. This Form 6-K includes a conformed version of the earnings announcement sent by the Registrant to its shareholders. This conformed version was prepared solely for purposes of supplementing the documents referred to in clauses (i) - (iv) above.

## FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions, which are predictions of or indicate future events and future trends, which do not relate to historical matters, identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to:

- the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including rawmaterial, energy and employee costs, and pricing);
- the impact on the business of the global economic downturn;
- unanticipated production disruptions (including as a result of planned or unexpected power outages);
- changes in environmental, tax and other laws and regulations;
- adverse changes in the markets for the Group's products;
- the emergence of new technologies and changes in consumer trends including increased preferences for digital media;
- consequences of the Group's leverage, including as a result of adverse changes in credit markets that affect the Group's ability to raise capital when needed;
- adverse changes in the political situation and economy in the countries in which the Group operates or the effect of governmental efforts to address present or future economic or social problems;
- the impact of restructurings, investments, acquisitions, dispositions and other strategic initiatives (including related financing), any delays, unexpected costs or other problems experienced in connection with dispositions or with integrating acquisitions or implementing restructuring or strategic initiatives (including dissolving wood pulp conversion projects), and achieving expected savings and synergies; and
- currency fluctuations.

These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20- F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward looking statements, whether to reflect new information or future events or circumstances or otherwise.

# 2nd quarter results

Sappi works closely with customers, both direct and indirect, in over 100 countries to provide them with relevant and sustainable paper, paper-pulp and dissolving wood pulp products and related services and innovations.

Our market-leading range of paper products includes: coated fine papers used by printers, publishers and corporate end-users in the production of books, brochures, magazines, catalogues, direct mail and many other print applications; casting release papers used by suppliers to the fashion, textiles, automobile and household industries; and in our Southern African region, newsprint, uncoated graphic and business papers, premium-quality packaging papers, paper-grade pulp and dissolving wood pulp.

Our dissolving wood pulp products are used worldwide by converters to create viscose fibre, acetate tow, pharmaceutical products as well as a wide range of consumer products.

The pulp needed for our products is either produced within Sappi or bought from accredited suppliers. Across the group, Sappi is close to 'pulp neutral', meaning that we sell almost as much pulp as we buy.

## Financial summary for the quarter

- Profit for the period US\$7 million (Q2 2012 US\$58 million)
- EPS 1 US cent (Q2 2012 11 US cents)
- Operating profit US\$78 million (Q2 2012 US\$120 million)
- Operating profit excluding special items US\$40 million (Q2 2012 US\$125 million)
- Net finance costs of US\$40 million (Q2 2012 US\$51 million)
- Interest-bearing borrowings (including bank overdrafts) less cash and cash equivalents ('net debt') US\$2,152 million (Q2 2012 US\$2,133 million)

	Quarter ended			Half-year ended	
	Mar 2013	Mar 2012	Dec 2012	Mar 2013	Mar 2012

(2) Refer to note 8 to the group results for the reconciliation of EBITDA excluding special items and operating profit excluding special items to segment operating profit, and profit for the period.

## Commentary on the quarter

Market conditions for our graphic paper products remained challenging, particularly in Europe where we experienced further deterioration across all graphic paper grades. For our Specialised Cellulose and speciality paper businesses, conditions remained good.

The US\$78 million operating profit generated by the group was adversely impacted by the weak performance of the European business. Paper volumes and prices in this business were lower, whilst input costs were higher compared to the corresponding quarter last year. We were unable to fully implement the January price increases during the quarter.

The second-quarter results were also impacted by major special items including a credit of US\$96 million related to the revaluation of the Southern African plantations, and asset impairment charges of US\$47 million primarily in the Southern African paper and paper packaging business.

The Southern African business performed reasonably well but was, as expected, negatively impacted by the planned extended shut at the Ngodwana Mill as a result of the conversion of the pulp mill to dissolving wood pulp, as well as the relatively weak local demand for paper products. Dissolving wood pulp sales volumes from the Saiccor Mill remain limited only by our production capacity. Rising NBSK pulp prices, to which our dissolving wood pulp sales are linked, and a weaker Rand exchange rate contributed to the strong performance of Saiccor.

The North American business continued its good performance with strong paper sales volumes offsetting both weaker paper sales prices and the decline in paper pulp sales as the Cloquet Mill prepares for the conversion of the pulp mill from paper pulp to dissolving wood pulp.

Net finance costs for the quarter of US\$40 million are US\$11 million below that of the equivalent quarter last year as a result of the refinancing of higher cost debt in the past year.

The two major dissolving wood pulp projects at Ngodwana and Cloquet Mills progressed according to plan during the quarter and remain on schedule to start up in our third quarter.

## Cash flow and debt

Net cash utilised in operating and investing activities for the quarter was US\$99 million, compared to net cash generated of US\$91 million in the equivalent quarter last year. This cash utilisation was mainly as a result of lower profits from operations and capital expenditure, which increased to US\$179 million during the quarter from the US\$59 million in the equivalent quarter last year. This increased capital expenditure relates primarily to the strategic investments in expanding our dissolving wood pulp capacity.

Net debt of US\$2,152 million increased as expected when compared to both the equivalent quarter last year (US\$2,133 million) and the prior quarter (US\$2,095 million), largely as a result of the increased capital expenditure during the quarter.

After the end of the quarter, a new South African bond of US\$162 million (ZAR1.5 billion) was raised in three tranches comprising a three-year tranche of US\$28 million (ZAR255 million), a five-year tranche of US\$54 million (ZAR500 million) and a seven-year tranche of US\$81 million (ZAR745 million) at a blended interest rate of approximately 7.6% after swapping all the notes to a fixed rate. The proceeds of this bond will be used to repay a US\$108 million (ZAR1.0 billion) bond due in June 2013 and to partially fund the Ngodwana conversion project.

At quarter-end, liquidity remained strong with cash and cash equivalents of US\$398 million and US\$509 million available from the undrawn committed revolving credit facilities in Europe and South Africa.

## Operating Review for the Quarter

### Europe

	Quarter ended Mar 2013 US\$ million	Quarter ended Dec 2012 US\$ million	Quarter ended Sept 2012 US\$ million	Quarter ended Jun 2012 US\$ million	Quarter ended Mar 2012 US\$ million
Sales	824	799	826	795	883
Operating (loss) profit	(3)	18	87	4	53
Operating (loss) profit to sales (%)	(0.4)	2.3	10.5	0.5	6.0
Special items – losses (gains)	1	3	(42)	6	(4)
Operating (loss) profit excluding special items	(2)	21	45	10	49
Operating (loss) profit excluding special items to sales (%)	(0.2)	2.6	5.4	1.3	5.5

The European business experienced very weak market conditions during the quarter and, despite the significant cost reductions implemented over the past year, the performance of the business was substantially weaker than a year ago.

In comparison to the equivalent quarter last year, the business experienced both lower sales volumes and lower prices for graphic papers. Compared to the prior quarter the business experienced the usual seasonal increase in graphic paper sales volumes, however average coated paper prices were 2 to 3% lower.

Increased variable costs, particularly hardwood pulp, energy and delivery costs placed further pressure on margins, leading to an operating loss for the business.

The coated specialties business had another good quarter, with volumes and prices up both quarter-on-quarter and year-on-year.

## North America

	Quarter ended Mar 2013 US\$ million	Quarter ended Dec 2012 US\$ million	Quarter ended Sept 2012 US\$ million	Quarter ended Jun 2012 US\$ million	Quarter ended Mar 2012 US\$ million
<b>Sales</b>	<b>341</b>	346	377	360	<b>349</b>
<b>Operating profit</b>	<b>26</b>	16	40	13	<b>24</b>
<b>Operating profit to sales (%)</b>	<b>7.6</b>	4.6	10.6	3.6	<b>6.9</b>
Special items – (gains) losses	<b>(5)</b>	2	2	5	–
Operating profit excluding special items	<b>21</b>	18	42	18	<b>24</b>
Operating profit excluding special items to sales (%)	<b>6.2</b>	5.2	11.1	5.0	<b>6.9</b>

The North American business achieved strong coated paper sales volumes, an increase of 6% over the equivalent quarter last year and 2% higher than the prior quarter; however, prices were lower in a competitive market.

The specialty paper business was down slightly compared to last year due to lower volume early in the quarter before a strong rebound in March. Performance was improved compared to the prior quarter as the market continues to recover, particularly in China.

Pulp sales volumes were wound down and inventory was built to supply the Cloquet paper machines ahead of the planned April shut to convert the Cloquet pulp mill to dissolving wood pulp. Dissolving wood pulp sales are scheduled to start in June 2013.

Variable costs were lower compared to both the prior quarter and the equivalent quarter last year, driven principally by improved operational efficiency as well as generally lower input prices.

## Sappi Southern Africa

	Quarter ended Mar 2013 US\$ million	Quarter ended Dec 2012 US\$ million	Quarter ended Sept 2012 US\$ million	Quarter ended Jun 2012 US\$ million	Quarter ended Mar 2012 US\$ million
<b>Sales</b>	<b>338</b>	330	382	389	<b>401</b>
<b>Operating profit</b>	<b>62</b>	33	30	16	<b>44</b>
<b>Operating profit to sales (%)</b>	<b>18.3</b>	10.0	7.9	4.1	<b>11.0</b>
Special items – (gains) losses	<b>(42)</b>	(2)	3	15	<b>9</b>
Operating profit excluding special items	<b>20</b>	31	33	31	<b>53</b>
Operating profit excluding special items to sales (%)	<b>5.9</b>	9.4	8.6	8.0	<b>13.2</b>

The Southern African Specialised Cellulose business continued its strong performance in the quarter. Sales volumes for the quarter were 184kt, an improvement over the prior quarter and equal to the sales in the equivalent quarter last year. NBSK dollar pulp prices, to which our dissolving wood pulp prices are linked, have increased for the last six months, though remained on average lower in this quarter than in the equivalent quarter last year. The weaker Rand/Dollar exchange rate more than offset this weakness however, resulting in an improved performance compared to both the prior quarter and the equivalent quarter last year.

The domestic paper packaging market in South Africa was generally weak and increased export sales were only able to partially offset the local market conditions. The performance of the paper and paper packaging business was also negatively impacted by US\$18 million due to the extended maintenance shut at the Ngodwana Mill as a result of the conversion project at that mill.

Variable costs were slightly up year-on-year, primarily due to increased purchased wood and pulp costs, both impacted by the weaker Rand/Dollar exchange rate.

Special items for the quarter included a plantation price fair value adjustment of US\$96 million largely as a result of the revaluation of the softwood plantation assets that previously supplied the Ngodwana softwood pulp line. As a result of the conversion of the pulp mill to hardwood dissolving wood pulp, this softwood resource is now available to sell as saw logs which earn a price premium to pulp logs. Various assets at the Tugela and Stanger Mills were impaired and a charge of US\$52 million was booked in the quarter. These charges relate to the ongoing optimisation process in the Southern African paper and paper packaging business.

## Directorate

During the quarter we announced that following the retirement in December 2012 of Professor Meyer Feldberg and in line with the Sappi board's succession planning, Mr Robert (Bob) J DeKoch joined the board as an independent non-executive director as from 01 March 2013.

## Outlook

Market conditions for our paper businesses, particularly in Europe are expected to be weaker than previously envisaged. Demand and pricing remain under pressure and input costs, particularly pulp, are likely to remain high. The announced January price increases for coated woodfree paper were only marginally successful, and further price increases were announced during the quarter for implementation in April. These increases, to date, have not been sufficient to restore margins given rising input costs. Despite the interventions and major cost reductions that have taken place, we expect the European business to only achieve a breakeven operating profit excluding special items for the full year.

This performance necessitates further action and we are evaluating a number of options that could result in capacity and cost reductions in our European business. Further measures are also being implemented in the Southern African business. The Specialised Cellulose and North American businesses continue to perform according to plan.

Notwithstanding the weak European performance, and the impact of the commissioning and start-up of the two major dissolving wood pulp projects, we expect that the group will at worst breakeven at the profit for the period excluding special items level for the full year. We expect net debt to peak at approximately US\$2.4 billion in the third quarter and thereafter to decrease to approximately US\$2.2 billion by the end of the financial year.

The Ngodwana and Cloquet Mills both successfully completed their major shuts relating to the Specialised Cellulose expansion projects during March and April. Dissolving wood pulp production is expected to commence at both plants before the end of June, with paper pulp being produced for internal use in the interim.

Despite the generally tough market conditions and the once-off impact of our major transitional projects on the current year performance, our actions and investments will position the group well for improved performance from 2014 onwards.

On behalf of the board

R J Boëttger  
Director

S R Binnie  
Director

## Notes to the condensed group results

### 1. Basis of preparation

The condensed consolidated interim financial statements are prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* (IAS 34), the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and the requirements of the Companies Act of South Africa. The accounting policies applied in the preparation of these interim financial statements are consistent with those applied in the previous annual financial statements.

The preparation of this condensed consolidated interim financial information was supervised by the Chief Financial Officer, S R Binnie CA(SA).

The results are unaudited.

## 6. Material balance sheet movements

Since the 2012 financial year-end, the period end ZAR rate has weakened by approximately 11% to the US Dollar, the group's presentation currency, resulting in a similar decrease on translation of the group's ZAR functional currency assets and liabilities to US Dollar.

### *Property, plant and equipment*

As a result of continuing difficult market conditions, Sappi Southern Africa ('SSA') impaired plant and equipment at its Tugela and Stanger Mills to the value of US\$52 million (ZAR454 million). In addition, there was a recovery in Sappi Fine Paper Europe of US\$9 million (€7 million) through the sale of certain assets that had previously been impaired as well as further asset impairments of US\$4 million (€3 million).

### *Deferred taxation assets*

Deferred tax assets of US\$24 million (€18 million) were reversed within the Sappi Fine Paper Europe region as they were no longer deemed recoverable.

### **Plantations**

Due to the Ngodwana dissolving wood pulp conversion project and the closure of the Kraft Continuous Digester at Tugela, a certain portion of SSA's softwood plantations that were previously utilised in the paper pulp production will now be sold to the local saw log markets. Consequently, SSA's plantations were revalued resulting in a favourable price fair value adjustment of US\$98 million (ZAR863 million).

### **Inventories, trade and other receivables and other current liabilities**

The group increased its inventory levels in anticipation of the dissolving wood pulp conversion projects. In additions, inventory increased as a result of lower than expected sales of commodity paper in SSA. The decrease in trade and other receivables and other current liabilities is due to seasonality and the receipt of US\$42 million on the sale of the previously equity accounted 34% shareholding in Jiangxi Chenming Paper Company.

### **Cash and cash equivalents and interest-bearing borrowings**

Cash and cash equivalents decreased largely due to the capital expenditure outflows of US\$275 million which mostly relates to the dissolving wood pulp conversion projects. In addition, the remaining stub of the group's senior secured notes due 2014 of US\$42 million (€31 million) as well as the group's private placement bonds in South Africa amounting to US\$41 million (ZAR382 million) were repaid. These outflows were partially offset by the issuance of commercial paper of US\$43 million (ZAR400 million) by SSA as well as a draw-down from the South African revolving credit facility of US\$49 million (ZAR450 million), both of which were repaid in April 2013.

## **7. Post balance sheet events**

In April 2013, SSA placed a public bond offering of US\$162 million (ZAR1.5 billion), the proceeds of which will be used to refinance the US\$108 million (ZAR1.0 billion) public bond maturing in June 2013 and to partially fund the Ngodwana conversion project. The bond was placed in tranches which comprised 3-year floating rate notes of US\$28 million (ZAR255 million), 5-year floating rate notes of US\$54 million (ZAR500 million) and 7-year fixed rate notes of US\$81 million (ZAR745 million) which were placed at spreads of 123 basis points and 150 basis points over the Johannesburg Inter-bank Agreed Rate ('JIBAR') and at 183 basis points over the yield curve for the 7-year fixed rate notes. The floating rate notes were swapped into fixed rates of 6.74% and 7.46% respectively.

(1) In compliance with the U.S. Securities Exchange Commission ("SEC") rules relating to "Conditions for Use of Non-GAAP Financial Measures", we have reconciled both operating profit excluding special items and EBITDA excluding special items to profit for the period, rather than operating profit.

We use operating profit excluding special items and EBITDA excluding special items as internal measures of performance to benchmark and compare performance, both between our own operations and as against other companies. Operating profit excluding special items and EBITDA excluding special items are used as measures by the group, together with measures of performance under IFRS, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe operating profit excluding special items and EBITDA excluding special items are useful measures of financial performance in addition to profit for the period, operating profit and other profitability measures under IFRS because it facilitates operating performance comparisons from period to period and company to company. For these reasons, we believe operating profit excluding special items, EBITDA excluding special items and other similar measures are regularly used by the investment community as a means of comparison of companies in our industry.

Different companies and analysts may calculate operating profit excluding special items and EBITDA excluding special items differently, so making comparisons among companies on this basis should be done very carefully. Operating profit excluding special items and EBITDA excluding special items are not measures of performance under IFRS and should not be considered in isolation or construed as a substitute for operating profit or profit for the period as an indicator of the company's operations in accordance with IFRS.
