**CAPITOL FEDERAL FINANCIAL
REPORTS FIRST QUARTER 2008 RESULTS**

Topeka, KS - Capitol Federal Financial (NASDAQ: CFFN) (the "Company") announced results today for the quarter ended December 31, 2007. Detailed results of the quarter are available in the Company's Quarterly Report on Form 10-Q for the quarter ended December 31, 2007, which will be filed today and posted on our website, <http://ir.capfed.com/sec.cfm>. Highlights for the quarter include:

- net income of \$9.1 million,
- diluted earnings per share of \$0.12, and
- efficiency ratio of 57.65%.

On January 9, 2008, the board of directors declared a \$0.50 per share dividend to stockholders of record as of February 1, 2008, payable on February 15, 2008.

Results of Operations for the Quarter Ended December 31, 2007

Net income for the quarter ending December 31, 2007 was \$9.1 million compared to \$10.2 million for the same period in the prior fiscal year. The \$1.1 million decrease in net income was primarily a result of a decrease in interest and dividend income of \$4.2 million, partially offset by a decrease in interest expense of \$2.9 million.

Total interest and dividend income for the quarter was \$101.0 million compared to \$105.2 million for the prior year quarter. The \$4.2 million decrease was a result of a decrease in interest income on investments of \$2.6 million, a decrease in interest income on mortgage-related securities of \$2.4 million, a decrease of \$1.6 million in interest income on cash and cash equivalents, and a decrease in dividends on FHLB stock of \$619 thousand, partially offset by an increase in interest income on loans receivable of \$3.1 million.

Interest expense on deposits for the current quarter was \$38.0 million compared to \$35.5 million for the prior year quarter. The \$2.5 million increase in interest expense was primarily a result of an increase in the average rate paid on the certificate of deposit portfolio.

Interest expense on FHLB advances for the current quarter was \$34.2 million compared to \$40.7 million for the prior year quarter. The \$6.5 million decrease in interest expense was a result of a decrease in the average balance due to maturing advances that were not renewed and the termination of \$575.0 million of interest rate swaps in December 2007, partially offset by an increase in the paying rate on the interest rate swaps for the majority of the current quarter, while the swaps were still in place.

Interest expense on other borrowings was \$2.2 million compared to \$1.1 million in the prior year quarter. The \$1.1 million increase was due to an increase in the average balance of other borrowings due to the Bank entering into repurchase agreements during the first quarter of fiscal year 2008.

No provision for loan losses was recorded during the current quarter.

Financial Condition as of December 31, 2007

Total assets increased from \$7.68 billion at September 30, 2007 to \$7.95 billion at December 31, 2007. The \$268.1 million increase in assets was primarily attributed to a \$194.6 million increase in the mortgage-related securities portfolio and a \$90.9 million increase in cash and cash equivalents, partially offset by a \$24.2 million decrease in the investment securities portfolio.

The balance of our non-performing loans increased from \$7.4 million to \$10.2 million. Our ratio of non-performing loans to total loans increased from 0.14% at September 30, 2007 to .019% at December 31, 2007.

Total liabilities increased from \$6.81 billion at September 30, 2007 to \$7.08 billion at December 31, 2007. The \$273.1 million increase in liabilities was due primarily to an increase in other borrowings of \$250.0 million and to an increase in deposits of \$58.7 million.

Stockholders' equity decreased \$5.0 million to \$862.6 million at December 31, 2007, from \$867.6 million at September 30, 2007. The decrease was primarily a result of treasury stock purchases of \$7.2 million and dividends paid of \$10.4 million, partially offset by net income of \$9.1 million and an increase in accumulated other comprehensive income of \$1.9 million due to the increase in market value of AFS securities.

Management's Discussion of Dividends

We strive to enhance stockholder value while maintaining a strong capital position. We continue to provide returns to stockholders through our dividend payments. On January 9, 2008, the board of directors declared a dividend of \$0.50 per share which will be paid on February 15, 2008 to stockholders of record on February 1, 2008. Due to Capitol Federal Savings Bank MHC's ("MHC") waiver of dividends, the dividend of \$0.50 per share will be paid only on public shares. Our cash dividend payout policy is continually reviewed by management and the board of directors. Dividend payments depend upon a number of factors including the Company's financial condition, results of operations, regulatory capital requirements of Capitol Federal Savings Bank (the "Bank"), other regulatory limitations on the Bank's ability to make capital distributions to the Company and the continued waiver of dividends by MHC. Because the Company has a relatively unique corporate structure, the reporting of certain information under accounting principles generally accepted in the United States of America ("GAAP") is not necessarily reflective of the process considered by the board of directors in connection with its dividend policy. At December 31, 2007, Capitol Federal Financial, at the holding company level, had \$106.3 million in cash and certificates of deposit at the Bank to be used to further the Company's general corporate and capital management strategies, which could include the payment of dividends. The earnings per share amounts in the following table are presented in accordance with GAAP. Included in the GAAP earnings per share calculations are the average shares held by MHC. It is expected that MHC will continue to waive future dividends except to the extent dividends are needed to fund its continuing operations.

The following is a reconciliation of the denominators of the basic and diluted earnings per share calculations.

Diluted	\$ 0.12	\$ 0.14

Because of the waiver of dividends by MHC, the inclusion of shares held by MHC understates earnings available to be paid out through dividends to public stockholders of CFFN stock. The following table is presented to provide a better understanding of the information the board of directors reviews when considering the amount of dividends to declare. The table presents basic and diluted earnings per share, excluding shares held by MHC from the earnings per share calculation. **The following information is not presented in accordance with GAAP.**
