By /s/ Scott C. Folkers

Scott C. Folkers

Vice President, General Counsel and Secretary

Winnebago Industries, Inc. Conflict Minerals Report for the Year Ended December 31, 2016

EXHIBIT 1.01

The "Company," "Winnebago Industries," "we," "our," and "us" are used interchangeably to refer to Winnebago Industries, Inc. and its subsidiary, Winnebago of Indiana, LLC, as appropriate in this context. During 2016, Winnebago Industries acquired Grand Design RV LLC "Grand Design", a manufacturer of towable recreation vehicles. Reporting, in accordance with the applicable guidance of the Securities and Exchange Commission, is not required in the current year. Winnebago Industries is incorporating the acquisition of Grand Design into its Conflict Minerals compliance program and will include the applicable information in the Conflict Minerals Report for the year ended December 31, 2017.

This Conflict Minerals Report of Winnebago Industries, Inc. for calendar year 2016 is presented in accordance with Rule 13p-1 ("Rule 13p-1") under the Securities Exchange Act of 1934 (the "1934 Act"). Please refer to Rule 13p-1, Form SD and the 1934 Act Release No. 34-67716 for definitions to the terms used in this Report, unless otherwise defined herein.

Winnebago Industries, a manufacturer of recreation vehicles, has determined that its products were manufactured with tin, tantalum, tungsten, and gold, which were necessary for the functionality of such products. In accordance with Rule 13p-1, Winnebago Industries performed due diligence as noted below to determine the conflict minerals' status of the necessary conflict minerals used in its product manufacturing.

Overview of Conflict Minerals Program and Reasonable Country of Origin Inquiry

- We have structured compliance efforts internally to support supply chain due diligence. Winnebago Industries has developed a team responsible for the conflict minerals program. The team reports to the General Counsel.
- We have established a system of controls and supply chain transparency through the adoption and use of due diligence tools created by the Electronic Industry Citizenship Coalition and the Global e-Sustainability Initiative ("EICC/GeSI"). This included the use of the Conflict Minerals Reporting Template ("CMRT"), a supply-chain survey.
- We identified risks at the product level and determined that all products we produce contained conflict minerals necessary to the functionality of the product.
- We have conducted a supply chain survey of 100% of suppliers that potentially provided parts and materials containing conflict minerals. The survey requested suppliers to identify smelters and refiners, using the CMRT. As a downstream manufacturer, we rely on our vendors to provide the origins of all of our conflict minerals, including the location of the smelter, mine, or transit route of the minerals.

Design of Due Diligence

Winnebago Industries has reviewed our suppliers and sourcing decisions, and integrated into our management programs the Organization for Economic Cooperation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Second Edition ("OECD Framework"), an internationally-recognized due diligence framework. Winnebago Industries communicated to applicable suppliers, our efforts to comply with Rule 13p-1.

Description of Due Diligence Measures Performed

We have included a summary below of the description of the measures performed to exercise due diligence on the source and chain of custody of the necessary conflict minerals contained in our products, which may have originated from the Covered Countries and may not have come from recycled or scrap sources:

- We evaluated survey responses to identify: (i) the use and source of Conflict Minerals, and; (ii) any indicators that Conflict Minerals may have come from the Democratic Republic of the Congo or an Adjoining Country.
- We compared smelters and refiners identified by the supply chain survey against the list of smelters and refiners that are compliant with the Conflict Free Smelter Program ("CFSP").
- We made additional inquiries on a case-by-case basis if smelter and refiner information was deemed inconsistent, inaccurate, or incomplete.
- The status of risk mitigation efforts was summarized and provided to Winnebago Industries' Management.
- Our conflict minerals compliance results are reported annually to the SEC and are made publicly available on our website.

Product Determination

All products manufactured by Winnebago Industries are deemed to contain conflict minerals necessary to the products' functionality. We produce products that include motorhomes, touring coaches, travel trailers and fifth wheel trailers as well as

supporting RV products. Based on the surveys provided and notifications that our suppliers' diligence efforts were incomplete, we do not have sufficient information to conclusively determine all smelters or refiners or countries of origin of the conflict minerals. However, based on the data provided by the RCOI, this information has been listed in Annex I. The majority of our suppliers reported conflict minerals' use at the company level, not at the product level. As such, we cannot definitively state whether these conflict minerals were included in the products supplied to Winnebago, or further validate that these smelters or refiners exist in our supply chain.

Future Due Diligence

There were numerous suppliers that did not provide a listing of smelters and refiners used, and an additional group of suppliers that did not provide a response to our survey. In our efforts to obtain timely and accurate information from our supply chain, we intend to execute the following:

- Continue to assess the presence of conflict minerals in our supply chain.
- Clearly communicate expectations with newly contracted and delinquent suppliers.
- Continue to improve our risk mitigation strategy.
- Continue to encourage our direct suppliers to assess their supply chain risks.
- Continue to encourage our direct suppliers to provide complete and accurate information.

As we progress, we expect that transparency in our supply chain will increase, which will allow for more accurate and detailed levels of risk assessment within our supply chain.
