BIOMASSE INTERNATIONAL, INC.  
(A COMPANY IN THE DEVELOPMENT STAGE)  
NOTES TO FINANCIAL STATEMENTS  
FOR THE SIX MONTHS ENDED MARCH 2004 AND 2003

NOTE 1 –BASIS OF PRESENTATION

The accompanying unaudited financial statements of Bims Renewable Energy, Inc. have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB and Article 10 of Regulation S-X. The financial statements reflect all adjustments consisting of normal recurring adjustments which, in the opinion of management, are necessary for a fair presentation of the results for the periods shown. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

These financial statements should be read in conjunction with the audited financial statements and footnotes thereto included in Bims Renewable Energy, Inc.'s form 10-KSB as filed with the Securities and Exchange Commission.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and that effect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 2 – EARNINGS (LOSS) PER SHARE

Earnings (Loss) per common share are calculated under the provisions of SFAS No. 128, "Earnings per Share," which establishes standards for computing and presenting earnings per share. SFAS No. 128 requires the Company to report both basic earnings (loss) per share, which is based on the weighted-average number of common shares outstanding during the period, and diluted earnings (loss) per share, which is based on the weighted-average number of common shares outstanding plus all potential dilutive common shares outstanding. Options and warrants are not considered in calculating diluted earnings (loss) per share since considering such items would have an anti-dilutive effect.

## **Item 2. Plan of Operations**

The following discussion should be read in conjunction with the financial statements and related notes that are included under Item 1. Statements made below which are not historical facts are forward-looking statements. Forward-looking statements involve a number of risks and uncertainties including, but not limited to, general economic conditions, our ability to complete development and then market our services, competitive factors and other risk factors as stated in other of our public filings with the Securities and Exchange Commission.

Our main business purpose is to provide industries with the most practical, economical and efficient way of disposing of the sludge they produce as a by-product of their operations. Our proprietary technology also allows us to give enhanced value to the waste sludge and other residues generated by their wastewater treatment systems. We own a process to convert, by combustion, in an environmentally safe manner, the waste residue produced into steam. We intend to profit by charging for the disposal of sludge by converting it to steam, which will be less than they are currently paying for shipping and storage of waste sludge. As an added benefit, it can, in turn, use the steam as energy thereby creating a low cost, clean energy source.

We have signed an agreement with EcoloMondo Inc., of Contrecoeur, Quebec, for the purchase of all their assets. We are currently in the financing phase for this acquisition, and the final agreement is expected to be signed in June, 2004. We have signed an agreement for a private investment in the amount of \$10,000,000 CDN in exchange for no more than 30% of the capital shares. This agreement is expected to be finalised before June, 2004. We are also looking for financing the assets we will acquire in EcoloMondo Inc. This acquisition reflects our objectives to develop and market twenty-first century technologies in the fields of pollution control, energy, and biotechnology.

BIMS currently expects to generate profits from operations of EcoloMondo Inc. in the first year provided its other plans as described above move forward on schedule. The company also hopes to sell licenses as interest from foreign countries has been initiated. No assurance can be given that the expected acquisition or financings will occur on a timely basis or at all or that BIMS will be profitable even if they do occur.

### **Liquidity**

As reflected in our March 31, 2004 balance sheet, we have minimal cash on hand. The Company's operations are not generating sufficient cash to maintain its present operations. The Company had a negative working capital of approximately \$2,332,788 at March 31, 2004. The company has reviewed all non-essential activities and expenditures and has aggressively curtailed these items to assist in reducing the cash used in operating activities. Monthly operating expenses including salaries, rent, communications, travel, consulting, and professional fees and other general and administrative are approximately \$130,000, including executive and management salaries of approximately \$60,000 per month.. We have several options to fund the above monthly expenditures: we are presently in the process of a private financing of \$10,000,000, from which a portion will be used for current operations and the balance in the EcoloMondo Inc. deal. Additional capital and/or borrowings will be necessary in order for the Company to continue in existence until attaining and sustaining profitable operations. The Company is aggressively pursuing strategic alliances which will bring a cash infusion, restructuring and a forward looking business plan. No assurances can be made that the Company will successfully implement its plans

## **Item 3. Controls and Procedures**

Within the 90 days prior to the date of this report, the company carried out an evaluation, under the supervision and with the participation of the company's management, including the company's principal executive officer and principal financial officer, of the effectiveness of the design and operation of the company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the principal executive officer and principal financial officer concluded that the company's disclosure controls and procedures are effective in timely alerting them to material information relating to the company required to be included in the company's periodic SEC filings.
