SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-KSB

(Mark One)

☒ **ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended: **February 29, 2008**

☐ **TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _____ to _____

Commission file number: **333-91191**

INTERMOUNTAIN REFINING CO., INC.

(Name of small business issuer in its charter)

NEW MEXICO

(State or other jurisdiction of incorporation or organization)

74-2329327

(I.R.S. Employer Identification Number)

**1921 Bloomfield Boulevard
Farmington, New Mexico 87401
Telephone: (505) 326-2668**

(Address, including zip code, and telephone number, including area code, of issuer's principal executive offices)

Securities registered under Section 12(b) of the Exchange Act: **None**

Securities registered under Section 12(g) of the Exchange Act: **None**

Check whether the issuer is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act ☐

Note - Checking the box above will not relieve any Registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

-Continued-

Check if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-B is not contained in this form, and no disclosure will be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendment to this Form 10-KSB. []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act. Yes _____ No X

State issuer's revenues for its most recent fiscal year: \$356,296

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was sold, or average bid and asked price of such common equity, as of a specified date within the past 60 days. (See definition of affiliate in Rule 12b-2 of the Exchange Act) **N/A as of April 30, 2008. There presently is no market maker for the Registrant's common stock. As no public trading market exists for the stock, bid and ask prices are not available.**

Note: If determining whether a person is an affiliate will involve an unreasonable effort and expense, the issuer may calculate the aggregate market value of the common equity held by non-affiliates on the basis of reasonable assumptions, if the assumptions are stated.

(ISSUERS INVOLVED IN BANKRUPTCY PROCEEDING DURING THE PAST FIVE YEARS)

Check whether the issuer has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Exchange Act after the distribution of securities under a plan confirmed by a court. Yes _____ No _____

(APPLICABLE ONLY TO CORPORATE REGISTRANTS)

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date: **1,155,609 shares of common stock, no par value, were outstanding on April 30, 2008.**

DOCUMENTS INCORPORATED BY REFERENCE

If the following documents are incorporated by reference, briefly describe them and identify the part of the Form 10-KSB (e.g. Part I, Part II, etc.) into which the document is incorporated: (1) any annual report to security holders; (2) any proxy or information statement; and (3) any prospectus filed pursuant to Rule 424(b) or (c) of the Securities Act of 1933 ("Securities Act"). The list documents should be clearly described for identification purposes (e.g. annual report to security holders for fiscal year ended December 24, 1990).

Certain exhibits required to be filed in Part IV of this Form 10-KSB have been incorporated by reference to Intermountain's registration statement on Form S-1 dated April 9, 2001. See exhibit index on page 34 of this report.

Transitional Small Business Disclosure Format (check one) Yes _____ No X

Cross Reference Sheet

The Registrant has included all information required in Parts I, II and III of Form 10-KSB in its Integrated Annual Report to Shareholders as of February 29, 2008 as filed herein as part of this report. The following table provides a cross reference to the specific pages and sections of the Integrated Annual Report to Shareholders where the information required in Form 10-KSB may be found:

Intermountain's Business Activities

Intermountain was incorporated under the laws of the state of New Mexico in January 1984 and conducts its business in the following areas:

- Production of natural gas
- Leasing of asphalt products manufacturing and storage facilities
- Other business activities including leasing unused space in Intermountain's office building

Natural Gas Production

On August 1, 2004, we acquired an estimated 12.28% working interest (9.98% net revenue interest) in 15 natural gas wells located on approximately 5,420 gross acres in San Juan County New Mexico. The wells are operated by an unrelated third party.

On February 28, 2007, we sold all of our interests in 19 natural gas producing wells that we operated in Southwestern Kansas. Projections of future cash flows associated with the Kansas properties were expected to decline significantly due to the old age of the subject producing wells coupled with recent changes made by Oneok Field Services to the gas purchase and sale agreement. Day to day operation and maintenance of the wells was performed by an individual under contract with Intermountain.

In the past, sales of natural gas from the Kansas properties represented a significant portion of our total revenues. We are presently seeking to acquire, through purchase or merger, additional oil and/or natural gas producing properties within the United States, to replace revenues and cash flows lost due to the sale of the Kansas properties.

Leasing of Asphalt Products Manufacturing and Storage Facilities

Since January 2002, Paramount Petroleum Corporation has leased a portion of our asphalt facilities located in Fredonia, Arizona. Material provisions of the lease agreement with Paramount include the following:

- Paramount is responsible for the operation and maintenance of the asphalt storage and manufacturing facility and is obligated to reimburse Intermountain for any direct costs that we may incur with respect to Paramount's operation of the facility during the term of the agreement. Intermountain is responsible for maintenance and other costs associated with the facility that is not being used by Paramount.
- The primary term of the agreement was for two years beginning on January 1, 2002 and expired on December 31, 2003. Since the expiration of the agreement's original term, it has been automatically extended on a year to year basis. The agreement may be cancelled by either party upon 90 days advance notification prior to the end of any extended term. As the agreement was not terminated prior to December 31, 2007, the term of the agreement has been automatically extended to December 31, 2008. There is no assurance that Paramount will continue leasing the facility beyond the end of the current extended term.
- Paramount pays \$3,200 per month for rent of Intermountain's asphalt products storage and manufacturing equipment.
- In addition to basic equipment rent, Paramount pays a fee of \$5.50 per ton for all asphalt products shipped from the facility. In the event that total shipments of asphalt products exceeds 10,000 tons during a calendar year, Paramount will pay a supplemental fee of \$4.50 per ton applicable to all volumes shipped during the year.

In October 2007, we sold all of all of the land and remaining equipment located at the facility, including the land and equipment associated with the asphalt products manufacturing and storage facility to an unrelated third party. However, under the terms of the sale agreement, Intermountain retained all of the benefits and obligations associated with the Paramount lease agreement until December 31, 2010, or sooner at the sole option of Intermountain.

Other Business Activities

We lease unused office space in our Farmington, New Mexico office building to unrelated third parties and actively manage the building. Revenues from office leasing varies between \$13 and \$25 per square foot annually depending on the type of space rented and additional services provided to tenants such as secretarial, phone answering, cleaning, and office machine use. Leasing of office space should not be viewed as a material source of revenues for Intermountain.

Employees

We presently employ three people, including officers, who are salaried and employed on a full time basis in our administrative offices in Farmington, New Mexico. All full time employees are eligible to participate in Intermountain's SIMPLE IRA Plan and a group medical insurance program. Our employees are not represented by a union and management believes its employee relations to be satisfactory.

Research and Development Activities

We have not spent any material amount on research or development activities since our inception.

Government Regulations, Environmental Laws and Taxes

Our business is subject to certain national, state and local laws and regulations relating to the production and transportation of oil, natural gas and the processing of hydrocarbons, as well as environmental and safety matters. Many of these laws and regulations have become more stringent in recent years, imposing greater liability on a larger number of potentially responsible parties. We believe we have complied in all material respects with these laws and regulations. Because the requirements imposed by such laws and regulations are frequently changed, we are unable to predict the ultimate cost of compliance with these requirements or their effect on our operations.

The operation of gas fields and the processing of hydrocarbons inherently involve environmental risks. These risks can be minimized, but not eliminated, through the use of various engineering and other technological methods. We intend to employ such methods to industry standards.

Severance taxes on natural gas production are collected and paid by the first purchaser of the production.

Competition

The petroleum and natural gas industries are highly competitive. We encounter competition from other oil and gas and petroleum companies in all of our operations, including the acquisition of producing properties, obtaining services, including oil field services, and the sale of natural gas. Our competitors include integrated petroleum and natural gas companies and numerous independent oil and gas companies, and individuals. Many of these competitors are large and well established with substantially larger operating staffs and greater capital resources and who, in many instances, have been engaged in the energy business for a much longer time than Intermountain. Such competitors may be able to develop better information and provide better analysis of available information, to pay more for raw materials and productive oil and natural gas properties and exploratory prospects and to define, evaluate, bid for and purchase a greater number of properties and prospects than our resources permit.

The market for the asphalt products produced at the asphalt storage and manufacturing facility in Fredonia, Arizona is generally located in northwestern Arizona and southwestern Utah. Paramount competes for market share with various suppliers throughout this region. The long term success of the equipment lease to Paramount is greatly dependent on Paramount's ability to compete with the other suppliers in the region.

Seasonality

Traditionally, the demand for natural gas has been higher during colder winter months compared to warmer summer months. More recently however, demand for natural gas has increased during summer months due to an increase in gas fired electric generation facilities. Accordingly, over the past several years, seasonal variation of natural gas supply and demand has been somewhat diminished.

The use of asphalt products for highway construction, repair and maintenance is usually restricted during winter months where cold weather, rain and snow are factors. We expect that the majority of fees earned from the shipment of asphalt products will occur during the months of May through October and that the asphalt manufacturing facility will normally be idle during the months of December through March.

Description of Properties

All properties used in the conduct of our businesses are owned in fee except for the mineral leases associated with our natural gas properties, which are held by production. There are no outstanding mortgages on any of our properties.

We own an average 12.48% working interest (9.98% net revenue interest) in 15 natural gas producing wells on 5,420 gross acres in San Juan County, New Mexico. As of February 29, 2008, the proven producing reserves are estimated to be 294 million cubic feet of natural gas net to our interest. During the year ended February 29, 2008, we produced 17 million cubic feet of natural gas net to our interest.

On February 28, 2007, we sold all of our interest in the Kansas properties. The properties consisted of an average 98.4% working interest (average 79.7% net revenue interest) in 19 producing natural gas wells on 10,601 gross lease acres in Scott and Finney Counties in southwest Kansas. For the year ended February 28, 2007, we produced 139 million cubic feet of natural gas net to our interest.

No reserve estimates of our gas properties have been filed with any Federal authorities or agencies.

Additional information relative to our oil and natural gas reserves and activities is included in Note M of our February 29, 2008 financial statements included on page 27 of this report. Estimates of reserves are based on internal data prepared by us and should not be construed as exact quantities. Estimates of reserves are subject to future changes based on numerous factors, including, but not limited to, changes in future market prices, changes in transportation and gathering system operating conditions and arrangements, changes in operating and production costs, changes in production characteristics of individual wells, and changes in regulatory requirements. Many of the factors affecting changes in reserve estimates are unpredictable and beyond our control.

In October 20007, we sold, to an unrelated party, all of the remaining 18 acres of land and remaining equipment located at the asphalt storage and manufacturing facility in Fredonia, Arizona. The asphalt storage and manufacturing equipment has been under lease to Paramount and portions of the asphalt products manufacturing equipment located at the facility are owned by Paramount. The portions of the equipment that were not leased to Paramount have been dismantled and recoverable metals were sold for salvage. Under the terms of the land and equipment sale agreement, we retained the benefits and obligations of the Paramount lease until December 31, 2010 or such earlier time as we may determine. It is our intention to retain the benefits and obligations under the lease with Paramount until the lease is either terminated by Paramount, or the retention rights expire in 2010, whichever occurs first.

We own a 7,000 square foot office building in Farmington, New Mexico. Approximately one half of the office building is used for our corporate offices. The remainder of the space is leased, or available for lease, to non-related tenants.

We owned two Caterpillar Model 3606 diesel powered electric generators, each capable of producing up to 1.5 megawatts, that were located at our Fredonia, Arizona facility. The generators were taken out of service in January 1999 because we were no longer able to generate electricity at competitive prices. In November 2006, the electric generation facility (including land, building, generators, associated equipment, and fuel inventory) was sold to a regional electric power distributor.

Legal Proceedings

We are not aware of any pending or threatened legal proceedings to which Intermountain is a party. We are not aware of any pending or threatened legal proceedings to which any director, officer, affiliate of Intermountain, or any owner of more than 5% of Intermountain's common stock, is an adverse party to, or has a material interest adverse to, Intermountain.

Submission of Matters to a Vote of Security Holders

There have been no matters submitted to a vote of security holders during the past year through the solicitation of proxies or otherwise.

Market for Common Equity and Related Shareholder Matters

Market for Intermountain Common Stock

There is presently no public market for our common stock. Accordingly, we are unable to provide any historical information regarding sales prices for our common stock. No prediction can be made as to the effect, if any, that the sale of shares, or the availability of shares for sale, will have on the market price prevailing from time to time. Nevertheless, sales of substantial amounts of the common stock in the public market could adversely affect prevailing market prices and our ability to raise equity capital in the future.

Shares Eligible for Future Sale

There are 1,155,609 shares of Intermountain common stock outstanding held by approximately 425 shareholders. Of the 1,155,609 shares outstanding, 442,643 shares are freely tradable in the public market without restriction, and 712,966 shares are subject to restrictions on future sales as set forth in Rule 144 of the Securities Act of 1933.

Of the 712,966 restricted shares, 704,056 shares are held by affiliates of Intermountain. In general, persons who are affiliates of Intermountain are entitled to sell, within any three month period, a number of shares that does not exceed the greater of the following:

- One percent of the then outstanding shares of common stock, or
- The average weekly reported trading volume of the common stock during the four calendar weeks immediately preceding the date on which notice of such sale is filed with the Securities and Exchange Commission, provided that manner of sale and notice requirements and requirements as to the availability of current public information concerning Intermountain are satisfied.

Mr. William N. Hagler and Mr. Rick L. Hurt may be considered affiliates of Intermountain. See "Security Ownership of Certain Beneficial Owners and Management".

Dividends

Intermountain has never paid any dividends on its common stock and while there are no restrictions on the payment of dividends, Intermountain does not anticipate paying any dividends in the foreseeable future.

Financial Statements of Intermountain

The audited financial statements of Intermountain as of February 29, 2008 and for each of the two years in the period ended February 29, 2008 are included beginning on page 16 of this report. Supplemental financial information relative to Intermountain's natural gas reserves and activities is included in Notes L and M to Intermountain's audited financial statements as of February 29, 2008 beginning on page 26 of this report.

Changes in and Disagreements with Accountants

There have been no disagreements between Intermountain and its accountants regarding financial disclosure issues.

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition as of February 29, 2008 and results of operations for the years ended February 28, 2007 and February 29, 2008, should be read in conjunction with our financial statements, the notes related thereto, and the other financial data included elsewhere in this report.

Some of the statements contained in this report relate to future expectations, contain projections of results of operations or financial condition or include other forward-looking information. When used in this report, the words "estimate", "project", "anticipate", "intend", "believe", "hope", "may" and similar expressions, as well as "will", "shall" and other indications of future tense, are intended to identify forward-looking statements. Those statements are subject to known and unknown risks, uncertainties and other factors that could cause the actual results to differ materially from those contemplated by the statements. You are cautioned not to place undue reliance on the forward-looking statements.

Liquidity and Capital Resources

The following table presents selected financial data regarding cash and working capital for each of the past two fiscal years:

	<u>Fiscal Year Ended</u>		
	February 28, <u>2007</u>	% <u>Change</u>	February 29, <u>2008</u>
Cash and cash equivalents (unrestricted)	\$ <u>2,391,302</u>	(14)%	\$ <u>2,062,887</u>
Working capital	\$ <u>2,266,766</u>	(7)%	\$ <u>2,098,041</u>

During the year ended February 29, 2008, we realized \$150,000 cash used from operating activities. The negative cash flow was primarily attributed to the payment of income taxes due with respect to fiscal year end February 28, 2007 income tax obligations. Significant non-operating sources and uses of cash during the year ended

February 29, 2008 consisted of the use of \$219,000 to drill a replacement well in Kansas and net cash proceeds from the sale of the Fredonia facility of \$41,000.

During the year ended February 28, 2007, we realized \$213,000 of cash flow from operating activities. The positive cash flow was primarily from profits realized from normal operations with no other significant operating sources or uses of cash. Significant non-operating sources and uses of cash during the year ended February 28, 2007 consisted of \$1,100,000 proceeds from the sale of our Kansas gas properties, and \$270,000 proceeds from the sale of the electric generation facility, offset by \$52,000 used for improvements to the electric generation equipment prior to its sale.

Cash requirements as of February 29, 2008

While current cash balances are adequate to satisfy normal operating costs, our present forecasts indicate that future cash flows from current operations will not be sufficient to fully cover normal operating costs. It is our intent to acquire, through purchase or merger, additional interests in oil and/or natural gas producing properties to replace cash flows lost as the result of the sale of our Kansas natural gas properties. There are presently no formal plans or agreements in place and there is no assurance that we will enter into any formal agreements in the near future that would have a significant impact on Intermountain's financial condition.

Estimated cash requirements for the next twelve months include:

- \$24,000 per month for normal general and administrative costs, including costs to operate our Farmington office building
- \$600 per month estimated costs associated with the retained obligations under the lease of the asphalt products manufacturing and storage facility to Paramount

In its efforts to develop additional sources of revenues, Intermountain may incur some project development costs. We are unable to predict the level of costs that may be incurred for such additional projects during the next year.

Expected sources of cash during the next twelve months consist of cash flows from operating activities estimated as follows:

- \$7,000 per month (net of production costs) from estimated natural gas operations in New Mexico based on results of operations during the year ended February 29, 2008 and projected natural gas prices over the next 12 months
- \$1,100 per month from Farmington office space rental
- \$5,000 per month dividends, interest, and royalty income on investments and cash balances
- \$3,200 per month from the retained benefits under the lease agreement with Paramount of the asphalt storage and manufacturing facility, plus an estimated average \$8,300 per month in throughput fees based on annual asphalt product shipments of 10,000 tons during the upcoming 2008 paving season

Under the sale agreement for the Kansas gas producing properties, we are entitled to receive an additional \$370,000 from the purchaser if a replacement well (which was completed in July 2007 at a cost of \$219,000) is successful in producing saleable quantities of natural gas. Initial gas pressures at the wellhead of the replacement well were not sufficient to produce saleable quantities of natural gas. At the advise of our consultant, we have been pumping water from the well in an effort to dewater the producing zone with the expectation that gas pressures will eventually improve to the point that natural gas can be produced in saleable quantities. Ongoing dewatering costs are estimated to be approximately \$600 per month. There is no assurance that we will be successful in returning the gas unit to production within a reasonable amount of time.

Estimates of future sources and uses of cash presented herein are based on our assumptions and expectations that our operations will continue at current levels without material interruption and that collection of accounts will occur under agreed terms. Actual results may be materially different.

Results of Operations

The following table summarizes the results of Intermountain's operations for each of the past two fiscal years. All percentage amounts were calculated using the underlying data.

	<u>Fiscal Year Ended</u>		
	February 28, <u>2007</u>	% Change	February 29, <u>2008</u>
Revenues	\$ 850,764	(58)%	\$ 356,296
Costs and Expenses (net of gains on sale of assets)	<u>(171,004)</u>	<u>283%</u>	<u>312,744</u>
Net income before taxes	1,021,768	(96)%	43,552
Income taxes	<u>187,330</u>	<u>(100)%</u>	<u>781</u>
Net income	<u>\$ 834,438</u>	<u>(95)%</u>	<u>\$ 42,771</u>

Revenues

The following table presents a summary of our revenues for the periods indicated. All percentage amounts were calculated using the underlying data.

	<u>Fiscal Year Ended</u>		
	February 28, <u>2007</u>	% Change	February 29, <u>2008</u>
Natural gas production	\$ 670,621	(79)%	\$ 142,372
Asphalt equipment rental and fees	154,325	28%	197,844
Real estate rental	22,818	43%	13,080
Other revenues	<u>3,000</u>	<u>0%</u>	<u>3,000</u>
Total Revenues	<u>\$ 850,764</u>	<u>(58)%</u>	<u>\$ 356,296</u>

Changes in individual components of revenues are discussed below:

Natural gas revenues

The following table contains gas production volumes, net to our interest, and average sales prices received for the periods indicated:

	<u>Fiscal Year Ended</u>		
	February 28, <u>2007</u>	% Change	February 29, <u>2008</u>
Natural gas produced, net (Mcf)	<u>164,164</u>	<u>(90)%</u>	<u>17,080</u>
Average selling price (\$/Mcf)	<u>\$4.09</u>	<u>104%</u>	<u>\$8.34</u>

The decrease in natural gas revenues for the year ended February 29, 2008 as compared to the year ended February 28, 2007 consisted of a \$30,000 (18%) decrease in New Mexico natural gas revenues along with the elimination of \$498,000 (100%) in Kansas natural gas revenues. The Kansas properties were sold on February 28, 2007. The decrease in New Mexico natural gas revenues consisted of an 8,000 Mcf (32%) decrease in production offset by a \$1.46/Mcf (21%) increase in average selling price. Due to the complexity of the economic factors affecting energy prices, we are unable to predict the direction or magnitude of future price changes. Production of natural gas in New Mexico was lower than expected during the year ended February 29, 2008. Production from natural gas wells naturally decline over time but the periodic application of stimulation and well bore maintenance procedures can often improve production performance. The operating partner of the New Mexico properties has indicated that during the summer of 2008, it plans to perform stimulation procedures on at least one of the wells in an effort to improve production.

The decrease in oil and natural gas revenues for the year ended February 28, 2007 as compared to the year ended February 28, 2006 consisted of a \$251,000 (34%) decrease in Kansas natural gas revenues, a \$35,000 (21%) decrease in New Mexico natural gas revenues, along with a \$27,000 (100%) decrease in Nebraska crude oil revenues. The decrease in Kansas natural gas revenues consisted of a \$1.15/Mcf (24%) decrease in selling price along with a 19,000 Mcf (12%) decrease in production. The Kansas gas properties were sold on February 28, 2007. The decrease in New Mexico natural gas revenues consisted of a \$0.62/Mcf (8%) decrease in selling price along with a 2,700 MCF (10%) decrease in production. The Nebraska oil properties were sold in November 2005.

Leasing of asphalt products manufacturing and storage facilities

The agreement with Paramount provides for Intermountain to receive \$3,200 per month in basic rent for Intermountain's asphalt storage and manufacturing facility. In addition, Intermountain receives a basic \$5.50 per ton

fee for all asphalt products shipped from the facility plus a supplemental fee of \$4.50 per ton, applied retroactively to all tons shipped during the year, in the event that annual shipments from the facility exceed 10,000 tons.

The increase in asphalt equipment rental fees during the year ended February 29, 2008 as compared to the year ended February 28, 2007 was due to an increase in product shipments from the facility during the 2007 paving season. Basic equipment rental revenues remained the same during the two periods. Fees received for products shipped increased by \$44,000 (38%). The current extended term of the agreement with Paramount will expire on December 31, 2008. There is no assurance that the current agreement will be continued beyond its current term. In October 2007, we sold all of the remaining assets at the Fredonia facility but retained the benefits and obligations under the lease agreement with Paramount until December 31, 2010 or at an earlier time at the option of Intermountain. We intend to maintain the retention rights until they expire in 2010 unless Paramount elects to cancel the existing lease agreement. We would normally expect that asphalt fee revenues associated with this activity to remain relatively flat over the 2008 paving season, however, with the recent significant increases in crude oil prices, we anticipate that asphalt product sales will trend downward.

The decrease in asphalt equipment rental fees during the year ended February 28, 2007 as compared to the year ended February 28, 2006 was attributed to an expected decrease in product shipments, specifically paving grade asphalt products, from the facility. Basic equipment rental revenues remained the same during the two periods. Fees received for products shipped decreased by \$65,000 (30%).

Real estate rental

Real estate rental revenues declined by an average \$812 per month for the year ended February 29, 2008 as compared to the year ended February 28, 2007 due to a decrease in occupancy. As of February 29, 2008, there were six small to medium sized single office spaces available for rent in our Farmington office building.

Real estate rental revenues declined by an average \$61 per month for the year ended February 28, 2007 as compared to the year ended February 28, 2006 due to a slight decrease in average occupancy.

Costs and Expenses

The following table presents a summary of our costs and expenses (including gains and losses on sales of assets and other miscellaneous charges and credits) for the last two fiscal years:

	<u>Fiscal Year Ended</u>		
	February 28, <u>2007</u>	<u>% Change</u>	February 29, <u>2008</u>
Cost of sales	\$ 457,557	(72)%	\$ 126,987
General and administrative costs	287,817	2%	292,835
Depletion, depreciation and amortization	45,003	(53)%	21,006
Bad debt expense	-	100+%	11,311
Gain on sale of refinery land and equipment	(6,768)	910%	(68,383)
Salvage of refinery equipment	(11,141)	11%	(9,930)
Gain on sale of electric generation equipment	(4,936)	100%	-
(Gain)/loss on sale of oil producing properties	(918,085)	100%	-
Accretion of discount on asset retirement obligations	2,131	(80)%	417
Loss on settlement of asset retirement obligations	7,615	(100)%	-
Interest and investment (income) expense, net	<u>(30,197)</u>	<u>(104)%</u>	<u>(61,499)</u>
Total costs and expenses	<u>\$ (171,004)</u>	<u>283%</u>	<u>\$ 312,744</u>

Changes in individual components of costs and expenses are discussed below.

Cost of sales

Cost of sales includes costs incurred in the production of natural gas, and costs of maintaining the asphalt facility.

The decrease in cost of sales during the year ended February 29, 2008 compared to the year ended February 28, 2007 consisted of a \$311,000 (73%) decrease in natural gas production costs and a \$20,000 (68%) decrease in asphalt facility maintenance costs. The decrease in natural gas production costs was substantially attributed to the \$311,000 (558%) reduction in costs associated with the Kansas natural gas producing properties which were sold on February 28, 2007. While the Kansas properties were sold in the previous year, during the year ended February 29, 2008 we incurred approximately \$30,000 in costs associated with repair claims made by the purchaser under the warranty provisions of the sale contract, and approximately \$5,000 in costs associated with dewatering the replacement well completed in July 2007. New Mexico natural gas production costs were relatively unchanged

during the year ended February 29, 2008 compared to the year ended February 28, 2007. Well pump, production tubing, surface equipment, and well casing failures occur randomly and the timing and cost of repairs cannot be accurately predicted. In addition, future repair costs may be material and become a critical factor in assessing the economic viability of individual wells. The decrease in maintenance costs associated with the Fredonia asphalt facility was primarily attributed to the cessation of debris removal and cleanup upon completion of dismantling and metal salvage activities. While the facility was sold in October 2007, we retained the obligation to incur certain costs associated with the equipment leased to Paramount, including property taxes, environmental permit fees, and insurance. Our obligation to incur such costs will expire on December 31, 2010 or such earlier time as we may determine.

The decrease in cost of sales during the year ended February 28, 2007 compared to the year ended February 28, 2006 consisted of an \$82,000 (16%) decrease in oil and natural gas production costs offset by a \$17,000 (150%) increase in asphalt facility maintenance costs. The decrease in oil and natural gas production costs consisted of a \$36,000 (10%) decrease in Kansas natural gas production costs, a \$32,000 decrease in New Mexico natural gas production costs, and a \$14,000 (100%) decrease in Nebraska crude oil production costs. The decrease in Kansas costs was mainly attributed to a \$37,000 (16%) decrease in well equipment repair costs. The decrease in New Mexico costs was attributed to decreases in most cost categories including a \$6,000 (27%) decrease in gathering fees, a \$4,000 (22%) decrease in severance taxes, an \$8,000 (77%) decrease in water disposal, and an \$8,000 (31%) decrease in well maintenance supplies and repairs. As the Nebraska properties were sold during the prior year, there were no Nebraska costs during the year ended February 28, 2007. The increase in costs associated with the asphalt facility was primarily due to costs associated with cleanup and disposal of debris remaining upon completion of metal salvage activities.

General and administrative expenses

General and administrative expenses include the cost of our officers and administrative employees, costs incurred to operate and maintain our Farmington office building, and all items of general overhead required to manage and administer our corporate affairs.

The increase in general and administrative expenses for the year ended February 29, 2008 compared to the year ended February 28, 2007 consisted of an \$11,000 increase in office building repair and maintenance costs offset by an overall \$6,000 decrease in all other costs categories. The increase in office building repairs and maintenance costs was attributed to routine periodic roof repairs and renovation of offices that were vacated during the year ended February 29, 2008. The overall decrease in all other general and administrative costs is attributed to the elimination of administrative operations connected to the Kansas natural gas operations, which were sold on February 28, 2007.

General and administrative expenses during the year ended February 28, 2007 compared to the year ended February 28, 2006 were relatively unchanged and there were no significant changes in individual cost categories.

Depletion, depreciation and amortization

The decrease in depletion and depreciation for the year ended February 29, 2008 compared to the year ended February 28, 2007 consisted of a \$23,500 (54%) reduction in depletion expense and a \$500 decrease in depreciation expense. The decrease in depletion expense consisted of a \$9,000 (31%) decrease in New Mexico depletion along with a \$14,500 (100%) decrease in Kansas depletion as a result of the sale of the Kansas properties on February 28, 2007.

The decrease in depletion and depreciation for the year ended February 28, 2007 compared to the year ended February 28, 2006 consisted solely of a \$5,500 (11%) decrease in depletion on oil and natural gas producing properties. There was no change in depreciation expense associated with the asphalt facility or the Farmington office building. The decrease in depletion consisted of a \$2,000 (12%) decrease in Kansas depletion, a \$1,300 (4%) decrease in New Mexico depletion, and the elimination of \$2,200 of Nebraska depletion.

Gain on sale of refinery land and equipment

In October 2007, we sold our remaining 18 acres of land and all remaining equipment located at the Fredonia facility to an unrelated third party for \$80,000. The proceeds from the sale included \$40,000 cash down payment and a \$40,000 6% note receivable, payable in 36 equal monthly installments. On the date of closing, the carrying value of the land and equipment was \$11,353, net of accumulated depreciation of \$577,919, which resulted in a \$68,383 gain on the sale, after closing costs of \$264.

During the year ended February 28, 2007, we sold approximately 1 acre of land at the Fredonia facility to a Red Hills Manufacturing (a related party) for \$7,500. On the date of closing, the carrying value of the parcel was \$732, which resulted in a \$6,768 gain on the sale after \$50 in selling expenses.

Salvage of refinery equipment:

In April, 2005, we began the process of dismantling the portions of our refining equipment at our Fredonia facility that were no longer used for ongoing operations and were not expected to be used in the future. We recognized \$11,000 during 2007 and \$10,000 during 2008 from the salvage of metals and used equipment removed from the facility. The entire facility was sold during October 2007.

Gain on sale of electric generation facility:

In November 2006, we sold our electric generation facility to an unrelated third party for \$269,800. As of the date of sale, the carrying value of the facility was \$264,900 (net of prior impairments in value), which resulted in a gain on the sale of \$4,900.

(Gain) loss on sale of oil and gas producing properties:

On February 28, 2007, we sold all of our interests in our Kansas natural gas producing properties. The \$1,124,000 proceeds from the sale (including cash of \$1,100,000 and release from asset retirement obligations of \$24,000) exceeded the \$206,000 net carrying value of the properties, which resulted in a recognized gain on the sale of \$918,000.

Accretion of discount and loss on settlement of asset retirement obligations:

Accretion of discount on asset retirement obligations consists of changes in the present value of future asset retirement obligations with the passage of time. Gains or losses on the settlement of asset retirement obligations arise from the difference between actual asset retirement costs incurred and the present value, at the time of retirement, of the previously estimated retirement cost.

There were no significant changes in the accretion of discount on asset retirement obligations during the year ended February 29, 2008 compared to the year ended February 28, 2007.

There were no significant changes in the accretion of discount on asset retirement obligations during the year ended February 28, 2007 compared to the year ended February 28, 2006. There were two wells plugged and abandoned during the year ended February 28, 2007, which resulted in a total loss on settlement of asset retirement obligations of \$7,600.

Interest and investment (income) expense, net

Interest and investment income includes earnings on cash balances and net earnings on investments, less interest expense incurred.

Net interest and investment income during the year ended February 29, 2008 consisted of \$58,900 earned on cash balances and notes receivable, and \$5,900 of dividends and royalties on investments (less \$2,800 in depletion on investments in royalty trusts), offset by \$500 of interest expense paid on 2007 income tax obligations. Due to recent declines in overall interest rates, it is anticipated that interest income earned on cash balances will decline over the next twelve months. Investment income is expected to remain relatively unchanged over the next twelve months.

Net interest and investment income during the year ended February 28, 2007 consisted of \$26,700 earned on cash balances and \$6,600 of dividends and royalties on investments, less \$3,100 in depletion on investments in oil and natural gas royalty trusts. We did not incur any interest expense during the year ended February 28, 2007.

Changes in Accounting Principles

During the year ended February 29, 2008, the Financial Accounting Standards Board did not issue any new statements that required any changes in our accounting principles.

Critical Accounting Estimates

Certain accounting estimates are important to the presentation of our financial condition and results of operations and require management's subjective or complex judgments. Such estimates are subject to change based on future conditions and events that may have a material effect on our financial condition and results of operations.

Natural Gas Reserve Estimates

Estimating natural gas reserves is a subjective process that is dependent on the quality of available data and on interpretation and judgment concerning such data. Reserve estimates are subject to change over time as additional information becomes available and as a result of changes in market prices and production costs. Our estimates of

reserves can be adversely affected by future changes including material decreases in market prices, increases in operating costs, and higher than expected declines in production quantities.

As capitalized costs and estimated future retirement costs associated with our oil and gas properties are depleted on the unit-of-production basis, decreases in estimated oil and gas reserves would increase depletion expense resulting in a decrease in oil and gas operating income.

We have recorded estimates of future asset retirement obligations associated with the eventual plugging and abandonment of our oil and natural gas wells. The fair value of future plugging and abandonment costs is estimated by escalating current plugging and abandonment costs (at an assumed inflation rate over the expected economic life of an individual well) discounted at our credit-adjusted risk-free interest rate. The fair value of the future plugging and abandonment costs is capitalized and depreciated using the unit-of-production method. The discount on the asset retirement obligation is accreted over time until the obligation is settled or the asset is sold. The expected economic life of an individual well is determined from the estimate of reserve quantities at the time the well was acquired. Future increases in well plugging and abandonment costs in excess of assumed inflation rates and premature or earlier than expected well retirement could result in the recognition of a loss on the settlement of future well plugging and abandonment obligations.

Impairment of Long-Lived Assets

Events or changes in circumstances periodically require that long-lived assets (including oil and natural gas properties) be evaluated to determine if the carrying amount of the asset may not be recoverable out of estimated future cash flows from the asset. Such periodic evaluations are subjective and require the use of estimates of future cash flows that are subject to change. There are currently no impairments recognized with respect to our existing long-term assets.

Accounting for Income Taxes

Deferred tax assets and liabilities arise from temporary differences from the differing treatment of items for tax and accounting purposes. While we have estimated that we have net deferred tax assets arising from temporary differences, we have provided a valuation allowance equal to the amount of the estimated net deferred tax assets because we are uncertain that future results of operations will be adequate to recover such deferred tax assets.

Inflation, Deflation and Changing Prices

The results of operations and capital expenditures will continue to be affected by inflation, deflation and changing prices. A decline in the price of natural gas could have an adverse effect on Intermountain's operations. Management is unable to determine the full impact of inflation, deflation and changing prices on the results of operations or working capital.

Directors and Executive Officers

<u>Name and Address</u>	<u>Age</u>	<u>Position</u>	<u>Held Since</u>
William N. Hagler 4421 Bella Vista Cr. Farmington, New Mexico 87401	75	President and Director	1984
Rick L. Hurt 5701 Tee Dr. Farmington, New Mexico 87402	55	Controller, Secretary, Treasurer and Director	1985

Background information concerning the Officers and Directors is as follows:

William N. Hagler has been the President and a Director of Intermountain since 1984. Mr. Hagler received a B.S. degree in Industrial Engineering from North Carolina State University in 1955. From 1955 to 1968, he was employed by Esso Standard Oil, Cities Service Oil Co. and Riffe Petroleum Co. in various phases of the petroleum refining and marketing industry. In July 1968, he became assistant to the president and later vice president of Plateau, Inc., Farmington, New Mexico, a regional refining and marketing firm. His responsibilities have included refinery management, marketing, corporate development, economics and planning, crude oil supply, negotiation and administration of processing arrangements, labor relations, coordination of refinery acquisition and expansion programs, and relations with state and federal regulatory bodies. In 1979, Mr. Hagler organized Unico, Inc., the former parent company of Intermountain, and served as its President and as a Director from its inception until June 1998 when he resigned both positions. In April 1993, Mr. Hagler accepted an appointment as a Director of Saba Petroleum and from October 1998 until December 1998 also served as its Management Committee Chairman. He resigned from all Saba Petroleum positions in March 1999. During 1999, Mr. Hagler accepted an appointment as

Chairman of the Board of Directors of Petrominerals Corporation. Mr. Hagler resigned his position with Petrominerals during 2002. Mr. Hagler is also a member of the Farmington, New Mexico Public Utilities Commission.

Rick L. Hurt has been the Secretary, Treasurer and a Director of Intermountain since 1985. Mr. Hurt received a BBA degree in Accounting from the University of New Mexico in 1979. From 1979 to 1982, he was employed as a staff accountant and later as a senior accountant by the accounting firm of Fox & Company in its Albuquerque, New Mexico offices. From 1982 until March 1985, he was employed as chief accountant for the law firm of Davis and Davis in Austin, Texas. Mr. Hurt is certified as a public accountant in the state of New Mexico. Mr. Hurt joined Unico, Inc., the former parent company of Intermountain, as Assistant Controller in March 1985, and became its Controller, Secretary, Treasurer, and a Director in May 1985. Mr. Hurt resigned from these Unico positions in June 1998.

Both Mr. Hagler and Mr. Hurt may be deemed a parent or promoter of Intermountain as those terms are defined in the rules and regulations promulgated under the Securities Act of 1933.

No family relationship exists between any officer or director of Intermountain and no officer or director of Intermountain has been subject, during the preceding 5 years, to any of the events set forth in paragraph (d) of Item 401 of Regulation S-B.

Compensation of Directors and Executive Officers

The following table will inform you about the compensation earned by all of our executive officers for services rendered during the last two fiscal years:

Name and Principal Positions	Year	Salary	Bonus	Other Annual Compensation	Long-Term Compensation Awards -	All Other Compensation
					Restricted Stock Awards	
		(\$)	(\$)	(\$)	(#)	(\$)
William N. Hagler	2008	\$101,164	\$ 0	\$ 0	0	\$3,035 (1)
Chief Executive Officer and Director	2007	\$101,164	\$ 0	\$ 0	0	\$3,035 (1)
Rick L. Hurt	2008	\$ 54,889	\$ 0	\$ 0	0	\$1,647 (1)
Secretary, Treasurer, and Director	2007	\$ 54,889	\$ 0	\$ 0	0	\$1,647 (1)
All officers and directors as a group (2 persons)	2008	\$156,053	\$ 0	\$ 0	0	\$4,682 (1)
	2007	\$156,053	\$ 0	\$ 0	0	\$4,682 (1)

(1) Consists of SIMPLE IRA employer matching contributions amounting to the lesser of employee elective deferrals or 3% of salary.

Our employees, including officers, may receive such bonuses and salary increases as the Board of Directors, in its sole discretion, may award from time to time. We have not increased officers salaries since April 1997, at which time, a 2.5% cost of living adjustment was awarded.

We provide health insurance benefits to the officers and all other full time employees.

We maintain a SIMPLE IRA plan for our officers and all of our full time employees. Participation in the plan is voluntary and employee contributions are limited by regulations established annually by the Internal Revenue Service. We are required to match employee contributions up to the lesser of 3% of salary or the amount of employee contributions.

No director has been compensated for attending meetings of the Board of Directors. However, by resolution of the Board of Directors, a fixed sum and expenses of attendance, if any, may be allowed for attendance at each regular and special meeting of the Board of Directors.

We do not currently maintain director and officer liability insurance.

We have no employment contracts with any of our employees. All employees can terminate employment at will.

Security Ownership of Certain Beneficial Owners and Management

Security Ownership of Certain Owners

The following table lists the only persons known to us who beneficially own five percent (5%) or more of the issued and outstanding Intermountain common stock, its only voting security:

<u>Title of Class</u>	<u>Name and address of Beneficial owner</u>	<u>Amount and nature of Beneficial ownership</u>	<u>Percent of Class</u>
Common stock, no par value	William N. Hagler 4421 Bella Vista Cr. Farmington, NM 87401	693,808 shares of record and beneficially	60.04%

Security Ownership of Management

The following table lists the ownership of Intermountain common stock by the management:

<u>Title of Class</u>	<u>Name and address of Beneficial owner</u>	<u>Amount and nature of Beneficial ownership</u>	<u>Percent of Class</u>
Common stock, no par value	William N. Hagler 4421 Bella Vista Cr. Farmington, NM 87401	693,808 shares of record and beneficially	60.04%
Common stock, no par value	Rick L. Hurt 5701 Tee Dr. Farmington, NM 87402	6,904 shares of record and beneficially	0.60%
Common stock, no par value	All officers and directors (2 people) as a group	700,712 shares of record and beneficially	60.64%

Code of Ethics

On March 15, 2006, our Board of Directors adopted a written Code of Ethics designed to deter wrongdoing and promote honest and ethical conduct, full, fair and accurate disclosure, compliance with laws, prompt internal reporting and accountability to adherence to the Code of Ethics. This Code of Ethics has been filed with the Securities and Exchange Commission as an Exhibit to our Form 10-KSB for the year ended February 28, 2006. Individuals may obtain a written copy of the Code of Ethics by submitting a written request to Intermountain's administrative offices.

Compliance with Section 16(a) of the Exchange Act

In accordance with Section 16(a) of the Securities Exchange Act of 1934, any person who, at any time during the last fiscal year, was an officer, director, or beneficial owner of more than 10% of any securities of an issuer that have been registered pursuant to Section 12 of the Exchange Act, is required to file periodic reports with the Securities and Exchange Commission and provide copies of the reports to the registered issuer. In accordance with item 405 of Regulation S-B, we are required to report information regarding untimely or delinquent filings by such individuals. We are not aware of any untimely or delinquent filing of periodic reports of individuals during the year ended February 29, 2008.

Certain Relationships and Related Party Transactions

During the last two fiscal years, there have been no transactions, or series of transactions, between Intermountain and other related parties that are of a nature that are required to be disclosed in this report. However, information relative to this topic may be found in Note H to Intermountain's financial statements on page 24 of this report.

Controls and Procedures

Evaluation of Disclosure Controls and Procedures:

Disclosure controls and procedures are designed and implemented to ensure that all material information relating to a company is made known to its chief operating officer, chief financial officer, and such other persons who are responsible for preparing and filing periodic reports with the Securities and Exchange Commission. William N. Hagler and Rick L. Hurt, representing all of the officers and directors of Intermountain, have evaluated our disclosure controls and procedures and concluded that such controls were effective as of February 29, 2008.

Management's Report on Internal Control over Financial Reporting

Intermountain's management is responsible for establishing and maintaining adequate internal control over financial reporting. William N. Hagler and Rick L. Hurt, representing all of the officers and directors of Intermountain, conducted an evaluation of the effectiveness of internal control over financial reporting based on the Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that Intermountain's internal control over financial reporting was effective as of February 29, 2008.

This annual report does not include an attestation report of the company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the company to provide only management's report in this annual report.

Changes in Internal Controls:

There have been no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of Management's last evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

Principal Accountant Fees and Services

Information regarding services and the related fees billed by our principal accountants during the periods indicated is as follows:

	<u>For the years ended</u>	
	February 28, <u>2007</u>	February 29, <u>2008</u>
Audit fees: Includes audit and review services applicable to Intermountain's annual financial statements, Forms 10-KSB and 10-QSB, and other filings made with the Securities and Exchange Commission.	\$ 24,110	\$ 23,364
Audit related fees	0	0
Tax fees	0	0
All other fees	<u>0</u>	<u>0</u>
Total fees billed by principal accountants	<u>\$ 24,110</u>	<u>\$ 23,364</u>

We, due to our small size, do not have an audit committee. All functions and procedures that would traditionally be performed by an audit committee are performed by our board of directors. Our board of directors pre-approves all engagements for services performed by our principal accountants. Generally, we do not engage our principal accountants for services other than those related to auditing and reviewing of financial statements included in statutory filings with the Securities and Exchange Commission.

Report of Independent Registered Public Accounting Firm

Stockholders and Board of Directors
Intermountain Refining Co., Inc.

We have audited the accompanying balance sheet of Intermountain Refining Co., Inc. as of February 29, 2008, and the related statements of income and comprehensive income, changes in stockholders' equity, and cash flows for the years ended February 28, 2007 and February 29, 2008. These financial statements are the responsibility of Intermountain's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States.) Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we do not express such an opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Intermountain Refining Co., Inc. as of February 29, 2008, and the results of operations and cash flows for the years ended February 26, 2007 and February 29, 2008, in conformity with accounting principles generally accepted in the United States of America.

Intermountain Refining Co., Inc.
Notes to Financial Statements
February 29, 2008

Note A - Summary of Significant Accounting Policies

Business Activity: Intermountain owns an approximate 12.48% working interest (9.98% net revenue interest) in 15 natural gas producing wells (operated by others) in San Juan County, New Mexico. Intermountain owned a 98.4% working interest (81.5% net revenue interest) in 19 natural gas producing wells located in Southwestern Kansas and was the operator of the properties. The Kansas properties were sold effective as of February 28, 2007.

Intermountain owned an asphalt products manufacturing and storage facility located in Fredonia Arizona that was sold to an unrelated third party on October 18, 2007. The facility has been under lease to Paramount Petroleum Corporation since 2002 and Intermountain will retain the benefits and obligations under the lease agreement until December 31, 2010, or such earlier time at the option of Intermountain. Intermountain receives fixed monthly lease payments and variable throughput fees for products shipped from the facility.

Intermountain owns an office building in Farmington, New Mexico that it uses for its corporate offices and leases unused space to others.

Cash and Cash Equivalents: For purposes of reporting cash flows, cash and cash equivalents include cash on hand, cash in depository institutions, and interest bearing over-night cash investments. Intermountain maintains its cash balances in a national financial institution. The balances maintained are in excess of the maximum insurance provided by the Federal Deposit Insurance Corporation. Intermountain does not believe that it has any significant credit risk for amounts in excess of the federally insured amounts.

Property, Plant and Equipment: Property, plant and equipment is stated at cost. Depreciation of property and equipment is provided on the straight-line method over the following useful lives:

Buildings	15-20
Equipment	3-20

Maintenance, repairs and renewals, which neither materially add to the value of the property nor appreciably prolong its life, are charged to expense as incurred. Gains or losses on disposition of property are included in results of operations.

Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the related carrying amount may not be recoverable. A review for impairment includes comparing the current carrying amount of an asset to the estimated future cash flows expected to result from the use of the asset and its eventual disposition. If such future estimated cash flows are not sufficient to recover the carrying cost, then an impairment loss is recognized. When required, impairment losses on assets to be held are recognized based on the excess of the asset's carrying amount over the fair value of the asset.

Asset Retirement Obligations: Asset retirement obligations, such as future plugging and abandonment of oil and gas wells, are recognized based on the present value of the future retirement costs as of the date an asset is acquired and capitalized as part of the cost of the asset. The capitalized cost is amortized to expense and the discount on the future obligation is amortized to accretion expense over the life of the asset. Actual costs associated with asset retirement activities are charged against the asset retirement obligation. Gains or losses on the ultimate settlement of asset retirement obligations are charged to results of operations in the year of retirement.

Oil and Gas Properties: The successful efforts method of accounting for the acquisition, exploration, development and production of oil and gas properties is utilized. Costs of acquiring undeveloped oil and gas leases are capitalized. All development costs of proved properties are capitalized as incurred and all exploration costs are expensed. The capitalized costs of oil and gas wells and related equipment are amortized by the units-of-production method based on the estimated proved oil and gas reserves.

Revenue Recognition: Natural gas production revenues are recognized upon delivery. Real estate rental income, asphalt equipment rental fees, and other revenues are recognized on a monthly basis as services are provided. Asphalt product throughput fees are recognized on a monthly basis as asphalt products are shipped. Additional throughput fees are recognized, if and when, annual calendar shipments exceed 10,000 tons.

Intermountain Refining Co., Inc.

Notes to Financial Statements - Continued

Income Taxes: Deferred income tax expense and benefits are provided on temporary differences arising from the timing of recognition of income and expenses for financial reporting purposes and recognition for income tax purposes. Items that give rise to deferred taxes include: differences between straight line depreciation used for financial reporting purposes and statutory depreciation used for tax purposes; cost depletion used for financial reporting purposes and statutory depletion used for tax purposes; differences between book and tax treatment of asset retirement obligations; differences between book and tax timing of gain recognition on installment sales and, financial statement recognition of operating and capital losses which are carried forward to future years for income tax purposes. Deferred tax assets are limited to amounts considered to be realizable in future periods.

Earnings Per Share: Income (loss) per share is based on the weighted average number of common shares outstanding during each period.

Estimates: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that effect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Fair Value of Financial Instruments: The carrying amount of cash and cash equivalents, accounts receivable, notes receivable, accounts payable, and accrued expenses approximate fair value because of the short maturity of these amounts. None of Intermountain's financial instruments are held for trading purposes.

Available for Sale Investments: Available for sale investments include investments in publicly traded equity securities and oil and gas royalty trusts, and brokerage money market accounts. The carrying amounts of Intermountain's available for sale investments are reflected at fair value. Unrealized holding gains and losses in the market value of the investments are reported as other comprehensive income (loss) and included in changes in equity.

Concentration of Credit Risk: Intermountain generates substantially all of its natural gas revenues from one customer. Intermountain generates all of its asphalt manufacturing and storage revenues from one customer, Paramount Petroleum Corporation. Intermountain has not experienced any credit losses with respect to its natural gas or asphalt manufacturing and storage receivables. Accordingly, no provision for doubtful accounts on such receivables has been recorded by Intermountain. Collateral is not required on oil and natural gas receivables or asphalt manufacturing and storage receivables.

Other Comprehensive Gains and Losses: Other comprehensive income includes unrealized gains and losses (net of deferred tax liabilities or benefits) on changes in the value of available for sale investments and is recorded as changes in equity. Reclassification adjustments for realized gains and losses are reflected in earnings on the statements of income.

Note B - Accounts Receivable

Accounts receivable consists of amounts due from customers for sales of natural gas, equipment rental, office space rental, and services rendered. Credit sales are generally made on terms of net 30 days in accordance with normal industry practice. Intermountain performs periodic credit evaluations of its customers' financial condition and generally does not require collateral. The past due status of a receivable is determined based on the timeliness of payments as based upon the agreed-upon credit terms. Management does not believe that an allowance for bad debts on accounts receivable is necessary.

Note C - Sale of Fredonia Arizona Facility

In October 2007, Intermountain sold its remaining 18 acres of land and all remaining equipment located at its Fredonia facility to an unrelated third party for \$80,000. The proceeds from the sale included \$40,000 cash down payment and a \$40,000 6% note receivable, payable in 36 equal monthly installments. On the date of closing, the carrying value of the land and equipment was \$11,353, net of accumulated depreciation of \$577,919, which resulted in a \$68,383 gain on the sale, after closing costs of \$264. As an inducement to enter into the transaction, the purchaser granted Intermountain the right to retain all benefits and obligations related to the asphalt manufacturing and storage

Intermountain Refining Co., Inc.
Notes to Financial Statements - Continued

equipment under lease to Paramount Petroleum. The rights and obligations associated with the leased equipment will expire on December 31, 2010 unless terminated earlier at Intermountain's option.

Note D - Asphalt Product Storage Services

Effective January 1, 2002, Intermountain leased its asphalt storage and processing equipment to Paramount Petroleum Corporation for \$3,200 per month plus a throughput fee of \$5.50 per ton for asphalt products shipped from the facility during the term of the agreement. In addition, if annual product shipments from the facility exceed 10,000 tons, Paramount will pay an additional throughput fee of \$4.50 per ton, applicable to all tons shipped during the year. The initial term of the agreement expired on January 1, 2003 but has been automatically extended on a year to year basis under the extension terms of the agreement. The facility was sold to an unrelated third party on October 18, 2007 (see Note C), however, the benefits and obligations under the lease agreement were retained by Intermountain until December 31, 2010, or such earlier time at the option of Intermountain. For the year ended February 28, 2007, Intermountain recognized equipment rental revenues of \$38,400 and throughput fees of \$115,925. For the year ended February 29, 2008, Intermountain recognized equipment rental revenues of \$38,400 and throughput fees of \$159,444.

Note E - Available-For-Sale Investments

Available-for-sale investments consist of the following at February 29, 2008:

<u>Description</u>	<u>Cost</u>	<u>Unrealized gain/(loss)</u>	<u>Estimated Fair Value</u>
Investment in natural gas royalty trusts *	\$ 36,795	\$ 42,012	\$ 78,807
Investment in common stock equities	14,781	20,180	34,961
Brokerage money market accounts	<u>22,740</u>	<u>0</u>	<u>22,740</u>
Total investments available for sale	<u>\$ 74,316</u>	<u>\$ 62,192</u>	<u>\$ 136,508</u>

*Cost net of accumulated depletion of \$12,538.

Investments in royalty trusts and common stock equities are stated at their estimated fair value as of the balance sheet date presented. Unrealized holding gains and losses in market value of investment securities are classified as comprehensive gain and loss and included as an increase or reduction of stockholders' equity. Unrealized holding gains/(losses) in market value of investment securities were \$(3,462) for the year ended February 28, 2007 and \$9,259 for the year ended February 29, 2009.

Gains and losses on the sale of investment securities (when incurred) are determined using the first-in first-out method. Given that the investments are in royalty trusts and common stock equities, no contractual maturities exist that would require separate disclosure. The fair market values of the investments are subject to ongoing fluctuation. The amount ultimately realized upon disposition will be different from the amounts reported in these financial statements.

Note F - Notes Receivable

Notes receivable consisted of the following as of February 28, 2007:

6% Note receivable dated October 18, 2007 payable in 36 equal monthly installments beginning November 18, 2007, secured by land and equipment located in Fredonia, Arizona	\$ 38,954
Less current portion	(15,731)
Notes Receivable	<u>\$ 23,223</u>

Intermountain Refining Co., Inc.
Notes to Financial Statements - Continued

Note G - Income Taxes

Income tax expense (benefit) differs from income tax at the statutory rate as follows:

	February 28 <u>2007</u>	February 29 <u>2008</u>
Income at statutory rate	35%	35%
State income taxes	1%	(8)%
Income not includable for tax purposes	- %	(2)%
Expenses not deductible for tax purposes	- %	1%
Carry-back of net operating loss to prior year	-%	24%
Change in valuation allowance and other	<u>(18)%</u>	<u>(52)%</u>
Income tax expense (benefit)	<u>18 %</u>	<u>2%</u>

Income tax expense (benefit) for the periods indicated consists of the following:

	<u>For the years ended</u>	
	February 28, <u>2007</u>	February 29, <u>2008</u>
Current		
Federal	\$ 158,308	\$ (6,975)
State	29,022	7,756
Deferred		
Federal	259,740	16,318
State	40,710	2,509
Change in valuation allowance	<u>(299,950)</u>	<u>(18,827)</u>
Total income taxes	<u>\$ 187,330</u>	<u>\$ 781</u>

Deferred tax assets/(liabilities) as of February 29, 2008 consist of the following:

Net deferred tax asset arising from book and tax basis differences in depreciable assets	\$ 35,989
Deferred tax asset arising from book accrual of asset retirement obligations	634
Deferred tax liability from use of installment method for tax purposes on the recognition of capital gains on the sale of land	(11,575)
Deferred tax liability arising from deferral of gain on receipt of stock from demutualization of a life insurance company	(5,173)
Valuation allowance provided for net deferred tax assets	<u>(19,875)</u>
Deferred taxes receivable/(payable)	<u>\$ -</u>
Deferred tax liability from unrealized holding gain on available for sale investments recorded as other comprehensive income	<u>\$ (21,767)</u>

Note H - Related Party Transactions

Following are descriptions of transactions involving Intermountain and other related parties that occurred during the past two fiscal years. In the opinion of management, the terms of the transactions discussed are believed to be at least as favorable to Intermountain as those that could have been secured in arm's length transactions.

Red Hills Manufacturing, Inc. is a small wood products manufacturing company located in Fredonia, Arizona of which Mr. Hagler (President, Director and shareholder) and Mr. Hurt (Treasurer, Secretary, Director and shareholder), among others, are officers, directors, shareholders, and employees. Mr. Hagler, Mr. Hurt and one other employee perform certain management and accounting services for Red Hills on a part time basis and Red Hills

Intermountain Refining Co., Inc.

Notes to Financial Statements - Continued

compensates the individuals directly for such services. In addition, Red Hills pays Intermountain \$250 per month to compensate for incidental use of office resources. Amounts received from Red Hills were \$3,000 for the year ended February 28, 2007 and \$3,000 for the year ended February 29, 2008.

During the year ended February 28, 2007, Intermountain sold approximately 1 acre of land at the Fredonia facility to Red Hills for \$7,500. On the date of closing, the carrying value of the parcel was \$732, which resulted in a \$6,768 gain on the sale after \$50 in selling expenses.

Note I - Commitments and Contingencies

Environmental Matters: Intermountain has been involved in the manufacture, storage, and sale of petroleum products since 1984, which exposes Intermountain to potential claims for environmental remediation costs, if any, of sites operated by Intermountain. Except as discussed below, Intermountain is not aware of any claims pending for such sites.

In April, 2005, Intermountain began the process of dismantling the portions of its refining equipment at its Fredonia facility that were no longer used for ongoing operations and were not expected to be used in the future. As part of the dismantling process, Intermountain identified the presence of asbestos containing materials in portions of the equipment being dismantled. Intermountain engaged a consultant to evaluate the extent of asbestos present on the site and to prepare a plan for the abatement and removal of the material. Intermountain believes that abatement and disposal of the asbestos containing materials had been completed as of February 28, 2006. The land associated with the Fredonia facility was sold to an unrelated third party in October 2007.

Intermountain recognized \$11,141 in 2007 and \$9,930 in 2008, from the salvage of metals and used equipment removed from the facility.

Sale of Kansas Natural Gas Producing Properties: On February 28, 2007, Intermountain sold all of its interest in the leases, wells and equipment associated with the natural gas producing properties located in Scott and Finney Counties, Kansas. In accordance with the sale price provisions of the sale agreement, Intermountain is entitled to receive additional compensation of \$370,000 contingent upon restoration of production from one gas unit that, due to a significant casing failure, was not producing natural gas as of the date of sale. Intermountain attempted additional repair efforts subsequent to February 28, 2007 and ultimately decided to drill a replacement well on the unit which was completed in July 2007. The capitalized development cost associated with the replacement well amounted to approximately \$219,000 during the year ended February 29, 2008. Initial gas pressure at the wellhead was not sufficient to produce saleable quantities and, at the advise of its consultant, Intermountain is presently attempting to dewater the producing formation in an effort to raise gas pressure. Management believes there is a reasonable probability that production from the unit can be restored, however, there is no assurance that the replacement well will be successful.

Note J - Simple IRA Plan

Intermountain maintains a SIMPLE IRA plan for the benefit of all of its full time employees. The plan provides for the elective deferral of employee wages, subject to annual limits established by the Internal Revenue Service, and provides a mandatory employer matching contribution. Mandatory matching contributions are the lesser of 3% of employee compensation or the amount of elective deferrals. Intermountain may elect to reduce the matching percentage to 1% for two out of five consecutive calendar years. Intermountain made matching contributions of \$5,385 in 2007 and \$5,385 in 2008.

Note K - Financial Information Relating to Industry Segments

Intermountain's major industry segments are natural gas production and the leasing of asphalt product manufacturing and storage facilities. Intermountain also rents office space in its Farmington, New Mexico office building. All costs and expenses associated with the overall management of Intermountain and other miscellaneous activities are included under "Other" in the following segment information. Selected financial information relating to these segments, is as follows:

Intermountain Refining Co., Inc.

		<u>\$ 2,847,226</u>

Capital Expenditures - During the year ended February 29, 2008, Intermountain capitalized \$218,515 in development costs associated with a replacement well drilled in Kansas. See Note I

Major Customers - Intermountain sold substantially all natural gas produced from the Kansas gas properties to one customer. Natural gas sales to the customer, net to Intermountain's interest, were approximately \$485,000 for the year ended February 28, 2007. Intermountain receives all of its revenues associated with its New Mexico gas properties from the operating partner. Natural gas revenues received from the operating partner, net to Intermountain's interest, were approximately \$173,000 for the year ended February 28, 2006 and \$142,372 for the year ended February 29, 2008. Intermountain leased its asphalt products manufacturing and storage equipment to one customer. Equipment lease and fees revenues received from the customer were approximately \$154,000 for the year ended February 28, 2007 and \$198,000 for the year ended February 29, 2008.

Note L - Natural Gas Properties

Intermountain currently owns, but does not operate, working interests in certain proven and developed natural gas reserves and related production equipment located in Northwestern New Mexico. On February 28, 2007, Intermountain sold all of its interest in certain proven and developed natural gas reserves and related production

Intermountain Refining Co., Inc.
Notes to Financial Statements - Continued

equipment that it operated in Southwestern Kansas. Intermountain is presently seeking to acquire existing developed and producing oil and/or gas reserves within the United States but has not identified any properties that meet Intermountain's criteria. Intermountain may participate in the drilling of additional development wells on its leased properties, however, there are no current plans to drill or complete any additional wells on the New Mexico leases.

Capitalized Costs: Capitalized costs relating to natural gas producing activities are as follows at February 29, 2008:

Proved natural gas properties	\$ 658,489
Unproved natural gas properties	-
Less accumulated depletion	<u>(91,031)</u>
Net capitalized costs	<u>\$ 567,458</u>

Results of Operations: Results of operations of natural gas producing activities, excluding overhead and interest allocations, for the periods indicated are as follows:

	<u>For the years ended</u>	
	<u>February 28, 2007</u>	<u>February 29, 2008</u>
Revenues		
Natural gas sales	\$ 670,621	\$ 142,372
Costs and Expenses		
Operating costs	428,714	117,896
Accretion of discount on future plugging and abandonment costs	2,131	417
Loss on settlement of plugging and abandonment costs	7,615	-
Depletion, depreciation and amortization	<u>43,795</u>	<u>20,280</u>
	<u>482,255</u>	<u>138,593</u>
Income before taxes	188,366	3,779
Income tax expense	<u>65,928</u>	<u>1,323</u>
Net income	<u>\$ 122,438</u>	<u>\$ 2,456</u>
Gain/(loss) on sale of oil and natural gas producing properties, net of income taxes	<u>\$ 596,753</u>	<u>\$ -</u>

Effective February 28, 2007, Intermountain sold all of its interest in the Scott and Finney Counties, Kansas natural gas producing properties to an unrelated third party for \$1,100,000. The carrying value of the property at the time of sale was \$206,342, net of accumulated depletion of \$786,725. Satisfaction of the selling price consisted of a cash payment of \$1,100,000 and release from accrued asset retirement obligations of \$23,695. Intermountain may receive additional compensation of up to \$370,000, contingent upon the successful return of production of one of the gas units sold. During the year ended February 29, 2008, Intermountain capitalized \$218,515 in development costs in conjunction with the drilling of a replacement well in its efforts to return production to the one Kansas gas unit that was sold. As of the date of this report, natural gas production from the Kansas unit has not yet been reestablished. See Note I

Note M - Natural Gas Reserve Data and Supplemental Data (Unaudited)

In accordance with Statement of Financial Accounting Standards No. 69, the following unaudited information is presented with regard to Intermountain's proved natural gas reserves. Information is presented in million cubic feet (MMcf) except where otherwise indicated in thousand cubic feet (Mcf).

Intermountain Refining Co., Inc.
Notes to Financial Statements - Continued

Production: Intermountain's natural gas production, average sales price and production cost for the periods indicated are as follows:

	<u>For the years ended</u>	
	<u>February 28,</u> <u>2007</u>	<u>February 29,</u> <u>2008</u>
Net gas production (Mcf)	164,164	17,080
Average sales price (\$/Mcf)	\$ 4.085	\$ 8.336
Average production cost (\$/Mcf)	\$ 2.611	\$ 6.903

Reserves: Natural gas reserves as of February 29, 2008 are based on data developed internally by Intermountain.

Estimated net quantities of proved developed and proved undeveloped natural gas reserves are as follows at February 29, 2008:

	<u>Oil</u> <u>(Bbls)</u>	<u>Gas</u> <u>(MMcf)</u>
Proved developed	-	294
Proved undeveloped	-	-
	<u>-</u>	<u>294</u>

Statement of Changes in Quantities of Proved Developed and Undeveloped Natural Gas Reserves for the years indicated are as follows:

	<u>For the year ended</u>	
	<u>February 28,</u> <u>2007</u>	<u>February 29,</u> <u>2008</u>
	<u>(MMcf)</u>	<u>(MMcf)</u>
Proved reserves - beginning of year	2,447	311
Acquisition of reserves in place	-	-
Sale of reserves in place	(1,966)	-
Revisions to previous estimates (1)	(6)	-
Production	<u>(164)</u>	<u>(17)</u>
Proved reserves - end of period	<u>311</u>	<u>294</u>

(1) The decrease in previous estimates for the year ended February 28, 2007 was due to the write down of reserves associated with a New Mexico well that was plugged and abandoned during the year.

The Standardized Measure of Discounted Future Net Cash Flows relating to Proved Natural Gas Reserves are as follows at February 29, 2008:

	<u>(\$/1000)</u>
Future cash inflows	\$ 2,448
Future production costs	(1,429)
Future plugging and abandonment costs	(16)
Future income tax expense	<u>(223)</u>
Future net cash flow	780
Ten percent discount factor	<u>(461)</u>
Standardized measure of discounted future net cash flows	<u>\$ 319</u>

Intermountain Refining Co., Inc.
Notes to Financial Statements - Continued

Changes in the Standardized Measure of Discounted Future Net Cash Flows From Proved Natural Gas Reserve Quantities for the periods indicated are as follows:

	<u>For the years ended</u>	
	February 28, <u>2007</u>	February 29, <u>2008</u>
	(\$/1000)	(\$/1000)
Standardized measure - beginning of year	\$ 2,101	\$ 415
Acquisition of reserves in place	-	-
Sale of reserves in place	(1,100)	-
Revisions to previous quantity estimates	(8)	-
Sales, net of production costs	(230)	(59)
Income taxes	525	14
Changes in present value due to price and production cost changes (Including accretion of discount)	<u>(873)</u>	<u>(51)</u>
Standardized measure - end of period	<u>\$ 415</u>	<u>\$ 319</u>

Developed and Undeveloped Acreage: The following summarizes Intermountain's gross and net undeveloped and developed acreage at February 29, 2008:

	<u>Gross</u>	<u>Net</u>
Developed Acreage		
New Mexico	5,419	541
Undeveloped Acreage	-	-

"Gross Acres" refers to the number of acres in which Intermountain owns a working interest. "Net Acres" refers to the sum of the fractional working interest owned by Intermountain in gross acres.

Other: Intermountain held interests in the following wells at February 29, 2008:

	<u>Gross</u>	<u>Net</u>
Producing gas wells	15	1.85

Note N - Asset Retirement Obligations

Accounting for asset retirement obligations relates to legal obligations associated with the retirement of long lived assets. Intermountain has a legal obligation to incur plugging and abandonment costs associated with its natural gas operations.

Changes in Intermountain's asset retirement obligations for the periods indicated are as follows:

	<u>For the years ended</u>	
	February 28, <u>2007</u>	February 29, <u>2008</u>
Asset retirement obligation - beginning of year	\$ 32,343	\$ 6,770
Sale of natural gas producing properties	(23,695)	-
Acquisition of oil and natural gas producing properties	-	-
Settlement of asset retirement obligations	(11,624)	-
Loss on settlement of asset retirement obligations	7,615	-
Accretion of discount	<u>2,131</u>	<u>417</u>
Asset retirement obligation - end of year	<u>\$ 6,770</u>	<u>\$ 7,187</u>

Intermountain Refining Co., Inc.

Note O - Electric Generation Equipment Held For Sale

In November 2006, Intermountain sold its electric generation facility, including associated land, building and fuel inventory, to a regional electric power distributor for \$269,820. In accordance with the 2005 memorandum of understanding between Intermountain and the purchaser, Intermountain agreed to transfer operational equipment that was capable of successfully completing a 24-48 hour full load test run. Intermountain incurred improvement costs of \$52,241 in 2007, which were deemed necessary to insure that the generators would successfully complete the test run. At the time of the sale, the electric generation facility had a combined carrying value of \$264,884, net of impairment of \$440,935. The impairment in value reflected the estimated amount by which the carrying value of the equipment (including land, building, fuel inventory and recent improvements) exceeded the estimated proceeds from the sale.
