

**Working together** to provide  
unique products that improve patient care

## 2023 Highlights

### Delivering Our Products to New Patients

#### May | Caldolor® Newborn Indication & Study Publication

The FDA approved expanded labeling for our Caldolor product, an intravenously delivered formulation of ibuprofen, to include use in infants. The non-narcotic agent may now be administered for the treatment of pain and fever in patients 3 to 6 months of age. With this newly approved labeling, Caldolor is the only non-opioid product approved to treat pain in infants that is delivered through injection.

We also shared the positive results from a clinical study investigating the safety and pharmacokinetics of Caldolor in newborns, published in the journal *Pediatric Drugs*. The results of the study support the growing body of evidence that demonstrates Caldolor is a safe therapeutic option available to practitioners for the treatment of fever and pain in infants, children and adults.

#### June | Expanded Oncology Sales Division

We expanded our oncology sales division as we work to deliver our newest brand Sancuso® – to help cancer patients tolerate their chemotherapy treatments. Sancuso is the first and only FDA-approved prescription patch for the prevention of nausea and vomiting in patients receiving certain types of chemotherapy.

#### October | New Vibativ® Pediatric Study Publication

We announced a new publication in *Antimicrobial Agents and Chemotherapy* detailing the results of the first clinical study investigating the safety and pharmacokinetics of our Vibativ product in children 2 to 17 years of age. Vibativ is an intravenous antibiotic approved by the FDA for the treatment of hospital-acquired and ventilator-associated bacterial pneumonia, as well as complicated skin and skin structure infections caused by certain gram-positive bacteria. The results of the study suggest that a single dose of Vibativ is safe in children and they experience reduced exposure to Vibativ, compared with the same body weight-based dosing in adults.

## To Our Shareholders, Employees & Partners:

In many ways 2023 was a building year for Cumberland, as we continued to integrate our newest products, while also delivering several significant achievements.

During the year we took a fresh look at our mission statement and refined it to better capture the spirit of what we do each day at Cumberland. Our mission is now: **working together to provide unique products that improve the quality of patient care.**

In designing this statement, we considered several factors.

First, we wanted our mission to address the constituencies we serve, which include patients in need of care, as well as health care providers, our employees, shareholders, partners and community.

We also sought to reflect Cumberland's culture, where teamwork is prized, emphasized and expected – in order to achieve our goals.

Next, it needed to demonstrate our focus on developing, acquiring and distributing differentiated brands.

And finally, we wanted to emphasize that the patient is at the core of everything we do. Our collective efforts are directed at providing unique products that serve as better alternatives for poorly met medical needs.

Now, as we report on the progress we made throughout 2023, we are pleased to share a few exciting updates including the growth opportunities for our portfolio of branded medicines.

Following the FDA's approval to expand the labeling for Caldolor, our non-narcotic agent may now be administered for the treatment of pain and fever in patients 3 to 6 months of age. This expanded use was further supported by the publication of positive results from a clinical study investigating the safety and pharmacokinetics of Caldolor in newborns. We are thrilled to extend Caldolor's labeling for these youngest of patients.

Additionally, we shared the results of the first pediatric study investigating the safety and pharmacokinetics of our Vibativ product. The results suggest that a single dose of Vibativ can be safely administered to children to fight certain serious skin and lung infections.

Meanwhile, we completed the expansion of our oncology sales division as we work to deliver our newest brand, Sancuso, to cancer patients.

As we remain focused on delivering our products to patients within the U.S., we continue to work with our partners in their efforts to register and launch Vibativ in several international markets, which should provide significant future catalysts for the brand.

We also continue to progress our pipeline of innovative products designed to improve patient care and patients' quality of life. Our ifetroban product candidate is being evaluated in a number of Phase II clinical trials for patients with a series of unmet medical needs.

It has now been dosed in nearly 1,400 subjects and has been found to be safe and well tolerated in those individuals. We look forward to sharing the results from these studies as they emerge and then deciding on the best development path for the product, which we believe has the potential to benefit many patients.

We remain committed to fulfilling our newly refined mission by building a portfolio of specialty pharmaceutical brands, which we do by maximizing the potential of our commercial brands, progressing our pipeline and also pursuing select acquisitions.

All the best,

A.J. Kazimi  
Chairman and Chief Executive Officer

## Products to enhance patients' lives

### Addressing unmet medical needs through our product portfolio

With a focus on underserved, specialty markets, including hospital acute care, gastroenterology and oncology, we develop and acquire medicines that are designed to offer distinct advantages over prior treatments.

Our portfolio of FDA-approved brands is supported through our hospital, field, and oncology sales divisions along with our national accounts and field-based medical teams across the United States.

Our commercial product line includes the brands shown below.

**IV**ACETADOTE®

**(acetylcysteine)** An injection used for the treatment of acetaminophen poisoning, which is the leading cause of drug toxicity in the U.S.

 **KRISTALOSE®**

**(lactulose)** The only branded prescription laxative product that combines the established safety and efficacy of lactulose with the convenience and portability of a pre-measured dose

**Sancuso®**

**(granisetron)** The first and only FDA-approved prescription patch that prevents nausea and vomiting in patients receiving certain types of chemotherapy treatment

**CALDOLOR®**

**(ibuprofen)** The first injectable therapy approved in the U.S. for the treatment of both pain and fever

 **Vaprisol®**

**(conivaptan)** The first and only intravenously administered vasopressin receptor antagonist, which is used to raise serum sodium levels in hospitalized patients with euvolemic and hypervolemic hyponatremia

 **VIBATIV®**

**(telavancin)** An injection used for the treatment of certain serious bacterial infections, including hospital-acquired and ventilator-associated bacterial pneumonia, as well as complicated skin and skin structure infections

For more information on Cumberland's approved products, including safety and full prescribing information, please visit links to the individual product websites, which can be found on our corporate website, [www.cumberlandpharma.com](http://www.cumberlandpharma.com).

# Providing Medicines to Patients Around the World

## A look at our key international partnerships

To provide for the availability of our products, we have established a network of distribution partners. Our international partners are responsible for registering and commercializing select Cumberland products, allowing us to provide our unique medicines to better the quality of patient lives in their countries.

Bringing our medicines to patients throughout the world through a growing network of distinguished international partners

**Tennessee**  
**Cardinal Health Inc.** provides warehousing, shipping and other distribution support for our products in the U.S.

**Mexico**  
**PiSA Pharmaceutical** is our commercial partner for Caldolor.

**Saudi Arabia and Jordan**  
**Tabuk Pharmaceutical Manufacturing Company** is our commercial partner for Vibativ.

**Australia**  
**Phebra Pty Ltd.** is our commercial partner for Acetadote and Caldolor.

**India**  
**Sandor Medicaids Pvt. Ltd.** is our commercial partner for Caldolor.

**Russia and CIS**  
**R-Pharm JSC** is our commercial partner for Vibativ.

**South Korea**  
**D.B. Pharm Korea Co. Ltd.** is our commercial partner for Caldolor and Vibativ.

**China**  
**WinHealth Pharma Group** is our commercial partner for Caldolor and Acetadote, and an investor in Cumberland Emerging Technologies.

**SciClone Pharmaceuticals** is our commercial partner for Vibativ.

# VIBATIV

## WHEN YOUR NEXT STEP IS CRITICAL

The once-daily antibiotic infusion with a dual mechanism of action indicated for MRSA and MSSA

## Sustainability 2023 At a Glance

### ENVIRONMENT

#### Supplies

Contracted with third-party companies for the manufacturing, packaging and warehousing of our products

#### Waste

Ensured strict guidelines and processes for the safe, permanent disposal of all unused product

#### Returns

Received and disposed of **5,891** pounds of damaged and expired products

### SOCIAL Community Involvement

#### Cumberland Pharma Foundation

Contributed to Denver Health, Loyola University, Tennessee State Museum, American Heart Association, Tennessee Historical Society, Belmont University & University of Mississippi

#### Sponsorships

Nashville Health Care Council's Wall Street's View of Healthcare Event

#### Associations

- Nashville Health Care Council
- Life Science Tennessee
- Nashville Chamber of Commerce

#### Life Sciences Center

Provide a lab and incubator to help build the biomedical industry in our area

### SOCIAL Employees

Male – 56%  
Female – 44%

Turnover – 19.1%

Additions – 20%

Minorities – 15%

#### Career Development Program

Available to all corporate employees

#### Ages

6.5% below 30  
27.5% between 30 & 50  
66% over 50
