#### Notes:

- A. The lines represent semi-annual index levels derived from compounded daily returns that include all dividends.
- B. The indexes are reweighted daily, using the market capitalization on the previous trading day.
- C. If the monthly interval, based on the fiscal year-end is not a trading day, the preceding trading day is used.
- D. The index level for all series was set to \$100.00 on 11/21/96.
