**Forbes Medi-Tech Announces Third Quarter 2006 Financial Results
~Company Reports 29% Increase in Revenues: Strong Contribution from Forbes Fayrefield Ltd;
US Phase II Trial Topline Results Expected Within First Two Weeks of December~**

Vancouver, Canada – Forbes Medi-Tech Inc. (TSX:FMI; NASDAQ:FMTI) today announced its financial results for the three and nine-month periods ended September 30, 2006. Comparative periods for these statements are the three months and nine months ended September 30, 2005, respectively. All amounts are in Canadian Dollars unless otherwise noted.

Third Quarter 2006 Highlights

- Reported revenues of \$1.8 million for the three months ended September 30, 2006 compared to \$1.39 million for the three months ended September 30, 2005
- Reported revenues of \$4.44 million for the nine months ended September 30, 2006 compared to \$3.67 million for the nine months ended September 30, 2005
- Reported net loss from continuing operations of \$0.09 per share for the three months ended September 30, 2006 compared to \$0.13 per share loss for the three months ended September 30, 2005
- Reported net loss from continuing operations of \$0.35 per share for the nine months ended September 30, 2006 compared to \$0.36 per share loss for the nine months ended September 30, 2005
- Announced the launch of Heartfelt Plus Natural Cheese with Reducol™ through UK's largest retailer, Tesco Stores Ltd (Tesco)
- Announced the launch of a new non-dairy margarine and expanded Pirkka yogurt sales

“Additional product launches featuring our cholesterol-lowering ingredient, Reducol™, and the subsequent completion of the US Phase II trial for FM-VP4 has helped generate recognition for Forbes from the investment and pharmaceutical community”, said Charles Butt, President and CEO of Forbes Medi-Tech Inc.

Drug Development

In recent months, Forbes reached a significant milestone and completed a major transaction that has the potential to transform Forbes' pharmaceutical development program.

The first notable achievement is the completion of the Company's US Phase II trial for its cholesterol-lowering drug, FM-VP4. Topline results from this trial are expected to be released within the first two weeks of December. A conference call is expected to be held following the release of results. As previously announced, the primary efficacy objective of this trial is to determine the effect of two doses of FM-VP4, 450mg and 900mg, given for 12 weeks, compared to placebo, on low density lipoprotein-cholesterol (LDL-C). The goal of this trial is to demonstrate a minimum of 15% reduction from baseline in LDL-C at Week 12.

FM-VP4 is part of the fastest growing category within the anti-dyslipidemics market called cholesterol absorption inhibitors (CAIs). CAIs are less potent than statins, but can provide enhanced safety as well as a synergistic efficacy in combination therapy. These products demonstrated 116% growth between 2003 and 2004, which was due primarily to the launch of Merck/Schering Plough's compound - Zetia®*. Zetia®, like FM-VP4, inhibits dietary cholesterol absorption. Global sales for Zetia® in 2005 were US\$1.4 billion.

The successful acquisition of TheraPei Pharmaceuticals Inc. (TheraPei) marks the second major achievement for Forbes in recent months. TheraPei was a privately held company formed with technology 'spun-out' of Sequenom, Inc. focused on developing novel pharmaceuticals directed at the underlying causes of type II diabetes and related metabolic diseases. Forbes will further develop TheraPei technologies along with Forbes' existing technologies with R&D based in San Diego and Forbes' clinical development team in Vancouver. TheraPei's founder, Dr. John Nestor, was appointed as the Chief Scientific Officer of Forbes on closing.

The lead preclinical product is a peptide that is targeted to be a long acting VPAC2 selective agonist designed for once daily administration to stimulate insulin secretion. These analogues are particularly promising based on pre-clinical study results to date demonstrating a beneficial effect through lowering glucose in blood, which could benefit a large diabetic patient population.

Diabetes represents a significant market opportunity with annual sales expected to reach about US\$25 billion by 2011 according to DataMonitor. It is believed that VPAC2 selective agonists will target insulin secretion via a different pathway than BYETTA®** (launched in 2005, with forecasted sales of US\$1 billion in 2007) leading to a differentiated product profile in this increasingly important class. The same agonists are also generally believed to play a role as inflammatory mediators in a number of other physiological conditions, creating a much broader utility for this technology.

Marketing & Sales Outlook

Reducoil™'s clinically proven, non-GMO competitive advantage has helped maintain a healthy momentum of product launches with over 25 different product SKU's on the European market. Additionally, Forbes will continue to develop business opportunities outside Europe including the US. Based on existing sales contracts, and assuming that forecasted supply requirements will be ordered and shipped, the Company maintains its revenue guidance for 2006 of \$7-7.5 million.

Financial Results

In February 2006, the Company announced the decision to dispose of its interest in the Phyto-Source joint venture. In accordance with CICA Handbook Section 3475, the activities relating to the Phyto-Source joint venture operations, assets and liabilities then to be disposed of have been presented as discontinued operations in the September 30, 2006 consolidated financial statements. Results for the prior year have also been reclassified to reflect this treatment.

Summary: (<i>'000's Cdn\$ except per share amounts</i>) (<i>unaudited</i>)	3 month period ended Sept. 30, 2006	3 month period ended Sept. 30, 2005	9 month period ended Sept. 30, 2006	9 month period ended Sept. 30, 2005

Provision for income taxes	(4)	—	(81)	—
Net loss from continuing operations	\$ (3,469)	\$ (4,427)	\$ (13,062)	\$ (12,393)
Income from discontinued operations, net of current tax expense	—	1,526	305	3,860
Gain from disposal of discontinued operations, net of taxes	—	—	6,627	—
Net loss for the period	\$ (3,469)	\$ (2,901)	\$ (6,130)	\$ (8,533)
Loss per share from continuing operations Basic and diluted	\$ (0.09)	\$ (0.13)	\$ (0.35)	\$ (0.36)
Income per share from discontinued operations Basic and diluted	—	0.04	0.01	0.11
Gain per share from disposal of discontinued operations Basic and diluted	—	—	0.18	—
Net loss per share Basic and diluted	\$ (0.09)	\$ (0.09)	\$ (0.16)	\$ (0.25)

Results of operations - The net loss from continuing operations for the three months ended September 30, 2006 totaled \$3.5 million and \$13.1 million for the nine months ended September 30, 2006. As Forbes continues to develop FM-VP4 and to conduct further research and development of the FM-VPx library of compounds and acquired technology, the Company expects to continue to report future operating losses from continuing operations.

Revenue: (summary) (<i>'000's Cdn\$</i>) (<i>unaudited</i>)	3 month period ended Sept. 30, 2006	3 month period ended Sept. 30, 2005	9 month period ended Sept. 30, 2006	9 month period ended Sept. 30, 2005
Sales-phytosterol products	\$ 1,030	\$ 1,230	\$ 3,032	\$ 3,226
Sales-finished goods (<i>Forbes Fayrefield Ltd.</i>)	418	—	467	—
Licensing	29	40	86	116
Phytosterol revenues	1,477	1,270	3,585	3,342
Interest and other	325	119	853	331
Total revenues	\$ 1,802	\$ 1,389	\$ 4,438	\$ 3,673

Revenues – Phytosterol revenues, representing direct sales of phytosterol products, primarily Reducoil™, the Company's proportionate share of the Forbes-Fayrefield revenue and the amortization of license fees, made up the majority of the Company's revenue of \$1.5 million for the three months ended September 30, 2006 (\$1.3 million – direct sales phytosterol products and licensing fees for quarter ended September 30, 2005) and \$3.6 million for the nine months ended September 30, 2006 (\$3.3 million for the nine months ended September 30, 2005). Increases in revenue are attributable to increased sales volumes of phytosterol products.

Expenses:

Expenses (summary) <i>('000's Cdn\$)</i> <i>(unaudited)</i>	3 month period ended- September 30, 2006	3 month period ended- September 30, 2005	9 month period ended- September 30, 2006	9 month period ended- September 30, 2005
Research & development	\$ 1,997	\$ 2,587	\$ 7,122	\$ 8,387
General & administrative	1,243	1,726	5,278	4,105
Cost of sales	1,305	815	3,099	2,105
Marketing, sales & product development	686	652	1,812	1,348
Depreciation & amortization	36	36	108	121
Total expenses	\$ 5,267	\$ 5,816	\$ 17,419	\$16,066

Cost of sales, marketing and product development ("Cost of Sales") for the three months ended September 30, 2006 totaled \$1.3 million on revenues of \$1.5 million, or 88% of revenues, versus \$0.8 million on phytosterol revenues of \$1.3 million for the three months ended September 30, 2005, or 64% of phytosterol revenues. The increase in percentage is mainly attributable to selling higher cost product acquired in the prior year, and the timing of customer sales. Cost of sales for the nine months ended September 30, 2006 totaled \$3.1 million on revenues of \$3.6 million, or 86% of phytosterol revenues, versus \$2.1 million on phytosterol revenues of \$3.3 million for the nine months ended September 30, 2005, or 63% of phytosterol revenues. The increase in percentage is attributable to selling higher cost product acquired in the prior year, and the timing of customer sales. Having entered into a long-term supply agreement, at the time of Forbes' disposition of Phyto-Source, for the supply of Reducol™ and other wood sterols, the Company expects to achieve improved cost of sales over time.

Research and development expenses ("R&D") for the three months ended September 30, 2006 totaled \$2.0 million compared with \$2.6 million for the same period in 2005. R&D expenses for the nine months ended September 30, 2006 totaled \$7.1 million compared with \$8.4 million for the same period in 2005. R&D expenditures in the first nine months of 2006 were similar to the same period in 2005, and were incurred as core research projects are progressed, US based Phase II clinical work on FM-VP4 continues, and work on the Company's Library of Compounds is continued.

General and administrative expenditures ("G&A") totaled \$1.2 million for the three months ended September 30, 2006 compared with \$1.7 million for the three months ended September 30, 2005. G&A expenses for the nine months ended September 30, 2006 totaled \$5.3 million compared with \$4.1 million for the same period in 2005. For the nine month period ended September 30, 2006 Forbes recorded an unrealized foreign exchange loss of \$1.1 million compared to an unrealized foreign exchange loss of \$0.3 million in the first nine months of 2005.

Liquidity & Capital Resources**Cash, cash equivalents and Working Capital**

As at September 30, 2006, the Company's net cash and cash equivalents were \$21.0 million compared with \$9.3 million as at December 31, 2005. Forbes' working capital at September 30, 2006 was \$24.1 million compared with \$12.8 million at December 31, 2005. The increase in cash and working capital in the nine months ended September 30, 2006 was mainly attributable to the receipt of the proceeds of US\$25 million (Cdn\$28.9 million, based on then current exchange rates) on the sale of Forbes' interest in Phyto-Source.

After taking into consideration the proceeds of sale of Forbes' interest in Phyto-Source in March 2006, the Company's planned R&D expenditures in both the pharmaceutical and nutraceutical areas and assuming the Company does not incur any unanticipated expenses, the Company considers that its working capital will be sufficient to finance operations through fiscal 2007. The Company will continue to seek additional funding, primarily by way of equity offerings, to carry out its business plan and to minimize risks to operations. The market, however, for equity financings for companies such as Forbes is challenging, and there can be no assurance that additional funding by way of equity financing will be available. The failure to obtain additional funding on a timely basis may result in Forbes' having to reduce or delay one or more of the Company's planned research, development and marketing programs and reducing related personnel, any of which could impair the current and future value of the business. Any additional equity financing, if secured, may result in significant dilution to the existing shareholders at the time of such financing. The Company may also seek additional funding from other sources, including technology licensing, co-development collaborations, and other strategic alliances, which, if obtained, may reduce the Company's interest in certain projects or products. There can be no assurance, however, that any alternative sources of funding will be available.

Operations

During the three months ended September 30, 2006, the Company used \$5.4 million of cash for continuing operations compared with \$2.5 million of cash used in the quarter ended September 30, 2005. Net cash used in continuing operations for the third quarter of 2006 was primarily a result of the net loss of \$3.5 million for the period adjusted for non-cash expenses, and decreases in non-cash operating items of \$2.2 million, primarily relating to tax liability payments of \$2.2 million. Net cash used in continuing operations for the quarter ended September 30, 2005 was primarily a result of the net loss of \$2.9 million for the period, adjusted for non-cash expenses and increases in non-cash operating items of \$1.6 million, which was primarily due to increases in accounts payable and accrued liabilities.

During the nine months ended September 30, 2006, the Company used \$19.4 million of cash for continuing operations, compared with \$9.7 million used for continuing operations during the nine months ended September 30, 2005. Net cash used in continuing operations for the nine months ended September 30, 2006, was primarily due to the operating loss of \$6.1 million, offset by non-cash expenses, and decreases in non-cash operating items of \$8.2 million, primarily relating to tax liability payments of \$6.0 million, and increases in inventories. Inventories, a non-cash operating asset, have increased in anticipation of future product launches of functional foods containing Reducool™. Net cash used in continuing operations for the nine months ended September 30, 2005, was primarily due to the operating loss of \$8.5 million, offset by non-cash expenses, and increases in non-cash operating items of \$1.2 million, which was primarily due to increases in accounts payable and accrued liabilities.

Investing Activities

Investing activities relating to continuing operations in the quarter ended September 30, 2006 and 2005 were insignificant. Investing activities in the nine months ended September 30, 2006 realized \$28.9 million, relating to the proceeds on disposal of Forbes' interest in Phyto-Source. Cash provided by investing activities in the nine months ended September 30, 2005, resulted primarily from \$6.0 million transferred from short-term investments.

Financing Activities

Financing activities relating to continuing operations for the three and nine months ended September 30, 2006 were \$0.5 million and \$0.7 million respectively, and relate to issuance of common shares on the exercise of options and warrants. Financing activities relating to continuing operations for the three and nine months ended September 30, 2005 were insignificant, and relate to issuance of common shares on the exercise of options.

Third Quarter 2006 Report

This news release includes by reference the Company's unaudited financial statements for the third quarter ended September 30, 2005, including the full Management Discussion & Analysis (MD&A). The MD&A and financial statements are being filed with applicable Canadian and U.S. regulatory authorities.

Conference Call

Due to the fact that a conference call is expected to be held to discuss the results for the Company's US Phase II trial of FM-VP4 within weeks, the Company will not be hosting a conference call for this quarter's financial statements.

About Forbes Medi-Tech Inc.

Forbes Medi-Tech Inc. is a life sciences company dedicated to the research, development and commercialization of innovative products for the prevention and treatment primarily of cardiovascular disease (CVD). Our vision is to develop and market products along a treatment continuum that consumers, healthcare professionals and specialized research and healthcare institutions will identify, recommend and seek. Our business strategy is to develop and commercialize proprietary compounds to address the unmet needs of patients within the cardiovascular disease and related markets.
