**FORM 6-K**

**Report of Foreign Private Issuer  
Pursuant to Rule 13a-16 or 15d-16  
of the Securities Exchange Act of 1934**

For the month of **March 2006**

Commission File Number: **0-30150**

-----  
(Translation of registrant's name into English)

**Suite 300, 1055 West Hastings Street, Vancouver, B.C. V6E 2E9**

-----  
(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover  
Form 20-F or Form 40-F.

Form 20-F [ **X** ]

Form 40-F [   ]

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): \_\_\_\_\_

**Note:** Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): \_\_\_\_\_

**Note:** Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes [ ☐ ]

No [☒]

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82- \_\_\_\_\_

Documents Included as Part of this Report

## **BUFFALO ACQUIRES ADDITIONAL URANIUM PROPERTIES**

**Vancouver, B.C., March 15, 2006 – Buffalo Gold Ltd. (TSX-V: BUF.U)** is pleased to announce that it has been granted an option by a private Australian company, Global Discovery Pty. Limited ("Global"), to acquire a 100% interest in the Murphy Ridge Project located in North East Northern Territory, Australia.

The Murphy Ridge Project is within the same tectonic area and along strike from Laramide Resources' Westmoreland Project in Queensland. Westmoreland is reported by Laramide to have a large existing inferred resource of 17.4M tons @ 1.2 kg/ton U<sub>3</sub>O<sub>8</sub> (>44 million pounds) which ranks it as one of the top ten largest uranium deposits in Australia. This resource calculation was based on work completed prior to the implementation of National Instrument 43-101, however, and is therefore not currently 43-101 compliant.

The Murphy Ridge Project comprises two strategically placed exploration permits totaling ~2300 square km. The target is unconformity style uranium with a setting analogous to the world-class Ranger and Jabiluka Mines, also in the Northern Territory. This style of uranium deposits is the highest grade in the world with Canadian examples that include Cigar Lake and McArthur River.

Australia ranks first in the world in known recoverable resources of uranium with 28% of the total. By contrast, Canada ranks third with 14% but has a leading position in world mine output with 30% of global supply. (For further information on uranium in Australia, see [www.uic.com.au](http://www.uic.com.au)).

Buffalo has signed a binding letter of intent on the Murphy Ridge project and has paid Global the initial \$50,000 non-refundable payment that provides for a due diligence period that expires on October 11, 2006. On completion of the due diligence period Buffalo can exercise its option and acquire 100% of the project by issuing Global 200,000 shares of Buffalo and agreeing to make a further payment of \$50,000 on the anniversary date of the option exercise.

Global is a private company with exploration interests in the Northern Territory, Australia. Dr. Andy Wilde and Mr. Mike Raetz are the principals of Global and will work with Buffalo to capture further uranium project opportunities.

Dr. Wilde started his mineral exploration career working for Uranerz Australia, searching for unconformity-type uranium deposits in the Northern Territory of Australia (Rum Jungle and Westmoreland areas). He went on to complete a Ph.D. on the world-class unconformity-type uranium-gold deposits of the Alligator Rivers region (Jabiluka, Nabarlek and Koongarra). Dr.

Wilde joined BHP Minerals in 1988, and in 1990 completed a substantial review of global uranium opportunities. More recently he has been involved in research as part of the co-operative research centre in predictive mineral discovery, which included a study of the substantial uranium deposits of the Mount Isa region, and has consulted to a number of Australian and Canadian companies.

Mr. Raetz is an exploration geologist with a keen interest to adapt new ideas and technology to discovery, previously with BHP Minerals, now at the Australian Crustal Research Centre, Monash University and in private practice. His experience totals seventeen years exploration project geology, three years mining geology and fifteen years exploration project development, research and consulting.

Uranium prices have improved substantially in the past 24 months; with spot prices rising from below USD\$10/lb to current levels almost USD\$40/lb. This trend of rising prices is attributed to strong industry fundamentals with present world mine output a little more than half the level of consumption by utilities that are the consumers of all of global uranium supply. This positive pricing picture follows a prolonged bear market dating to the early 1980's.

Mark Dugmore, MAusIMM, is the qualified person for the purposes of NI43-101 that was responsible for the preparation of the technical information disclosed in this news release.
